Market Continues Strengthening Some Bids "Jumped" To Fill Want Lists

We are continuing to see across-the-board strengthening of sight-unseen Bids, especially in the coins valued below \$2,000. While at first glance this could be viewed as a continuation of the positive movements that we have been following for the last two months (and we do indeed view it as such), this strength seen this week makes it especially impressive. With so many of the major dealers attending the FUN show in Florida this week, we expected teletype activity to be somewhat reduced in volume and levels (as dealers withdrew their commitments to buy while travelling).

Looking further at the rising Bids, it appears that many of them are from the dealers who are attending the FUN show. This is a strong indication of their desire to purchase these items as soon as possible; they may have staff remaining in the office who can monitor the exchanges, or they intend to follow their Bids from the bourse floor. Either way, Bids that stay posted are serious Bids, and indicate confidence in the current Bid levels; this display of confidence is one of the surest signs of stability we have seen in some time.

Some of the current high Bids are also coming from dealers who are not travelling to Florida. This may be a sign of increased market breadth, as that portion of the leadership is coming from dealers who normally aren't expected to Bid quite so aggressively. Hopefully, they are following the lead of their customers, who are exercising their Want Lists while coins are still at relatively low levels.

This matter of Want Lists is receiving more attention now than at any time in the last five years or so. Dealers are naturally thankful to have customers willing to spend real money on real coins, as it allows them to assert their market presence and do the things they like to do best—buy coins, sell coins, and take care of their clients. It is useful to know that the coins are not going to languish in inventory for some period before a willing customer emerges. There are some slight drawbacks to the Want List: if the dealer really has to chase the item, he may have to pay a price that severely impacts his profit; or he may even be working on a commission. Regardless, in a slow market, the Want List is King.

We have noticed that some of the Bids on the teletypes are being "jumped" (that is, the Bid is suddenly raised 20% to 100%) for the first time in several

months. Until now, dealers with cash to spend in this market have been somewhat furtive about their top Bid—why advertise what you're willing to pay when you might be able to get it more cheaply? When we see Bids jumping, we like to think it means that customers are getting anxious about obtaining that special Want List item now while prices are still so low, and dealers are responding by 'spreading the word' more aggressively.

Silver Commemoratives are showing the kinds of advances we think should characterize a customer-driven rally, while Gold Commems continue to slide on a lack of support. Morgan Dollars are showing solid signs of advancing across the chart, with continuing strength in the generics matched by some real advances in the rarer items. Peace Dollars are showing some progress, but dealers still aren't showing much enthusiasm. Mint State Type activity is solidly on the upswing, as are selected issues among the Proof Types. Mint State Gold is rising in the lesser uncirculated grades, while Proof Gold was almost entirely steady. Buffalo Nickels, Mercury Dimes, and Walking Liberty Halves are all showing an overwhelming display of plus signs—late-date and high grade Merics continue to climb on buyer demand.

CCDN COIN MARKET INDEX: 736.72 + 4.50 JAN 5, 1990 BIDS = 1000

Bluesheet Chart	Index	Change		
Silver Commems	679.15	+ 14.43	Mercury Dimes	794.33 + 11.69

PCGS Professional Coin Grading Service, Newport Beach, CA
Established in 1986, PCGS grades and authenticates U.S. and world coins. PCGS has certified more than two million coins. All coins must be submitted through one of the 560+ authorized dealers; contact PCGS at 800-447-8848 for a list.

PCGS has more than 15 graders on its staff; each coin is examined by at least two graders before the final grade is determined. No person involved with the grading process may be active in the buying or selling of U.S. coins. Fees start at \$26 or \$35 depending on the type of coin, plus postage and insurance; several levels of Express service are also available. PCGS coins are sonically sealed in an inert plastic "NumisCap" holder before return to the customer.

PCGS has a cash-backed Guarantee of Grade and Authenticity. PCGS has a comprehensive grading set which includes most major series. PCGS is a grading service only and does not make markets. PCGS dealers are responsible for their own making of markets in PCGS coins. PCGS publishes a monthly Population Report.

ANACS ANACS: The first authentication service (established in 1972), to which grading services were added in 1978. ANACS renders unbiased, third party grading opinions. To ensure objectivity, each coin is inspected by at least six authenticators/graders (who do not trade coins), before verification by a member of PNG. ANACS utilizes the expertise of more than 100 outside numismatists.

ANACS offers the following services for all regular issue U.S. coins & patterns: grading with a certificate displaying color photographs of the obverse and reverse, or grading and encapsulation in a plastic "Cache". Costs start at \$23, a free services and fees booklet is available from ANACS P.O. Box 182141 Columbus, OH 43128-2141, Phone 800-888-1861.

CCDN Bids reflect 1986 and newer certified coins, and assume the certificates have no negative comments. ANACS Bids are listed only once each month.

NGC Numismatic Guaranty Corporation of America Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance. After it is graded, it is then placed in a "lab tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 450 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit, "Arm's length." NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute Organized in June 1984 to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at Heritage Plaza, Highland Park Village, Dallas, TX 75205-2788. Phone (214) 528-3500. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) compared to the other three services listed. Regular cost is \$24 per coin. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded with a charge of 50% of the regular fee. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20/25 Goldens, and Walking Liberty halves. Due to current trading values, NCI coins will only be listed once a month. CCDN Bids reflect 1987 and newer certified coins.

Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids. Certification does not guarantee protection against the normal risks associated with potentially volatile markets.

The Bluesheet

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CCDn albeit on a sight basis.

The *Certified Coin Dealer Newsletter*
announces a new **monthly** publication
featuring **Lowest Asks or Last Trades:**

the CCDn ASKSHEET

With the **sight-unseen** market beset by controversy over declining Bids, dealers need to have more complete information **now, more than ever!** Responding to the requests of scores of dealers, we are pleased to provide an important new source of necessary information. Even if the **sight-unseen** Bid reaches unrealistically low levels, having wholesale Low Ask or Last Trade information available will allow dealers to make more informed buying and selling decisions. And the spread observed will also give a strong indication of market liquidity.

The *CCDn ASKSHEET* will provide subscribers with the Lowest Ask or Last Trade prices seen during the preceding month in the dealer-to-dealer, wholesale marketplace. While we are offering this publication separately from the *Bluesheet*, we must point out that neither publication alone will give a complete picture of current wholesale market values. In fact, every page of the *ASKSHEET* will contain a caveat to that effect. After all, the Lowest Ask doesn't necessarily represent market value any more than the Highest Bid. But together, they should define the parameters of wholesale market value.

Hopefully, access to these dealer-to-dealer offers to sell will help stabilize the market price of coins. Uncertainty of value in a supply/demand marketplace means that fewer transactions can occur, and that benefits neither potential buyer nor potential seller.

ENGINEERED FOR UNBIASED GRADING

The Numismatic Guaranty Corporation was founded to ensure unbiased, arms-length coin grading. The final graders of NGC can not buy, sell, or trade coins commercially. NGC is creating the standard for objective, consistent, and accurate grading of higher quality coins.

Numismatic Guaranty Corporation has over 500 Charter and Associate members. Look for premium quality, NGC certified coins at the following Charter Member/Dealers.

CERTIFIED COIN DEALER

a weekly report on the certified market
published by the Coin Dealer Newsletter (est. 1963)

newsletter

Vol. VI No. 2

January 11, 1991

Single copy price \$3.50

Year Starts on Positive Trading Note Coins Moving In Active Market

Ask a hundred dealers how they define a positive market (as we did at the F.U.N. Show) and you will get a hundred different answers, although they will all agree on two elements. First, coins must be changing hands; or to be more precise, coins must be finding new **owners**, and not just going into a different dealer's **inventory**. Second, demand in the marketplace should exceed the supply, forcing prices to rise; however, the market doesn't need an **abundance** of plus signs in order to be considered positive.

Whatever else their definitions included, most also agreed that the market they were enjoying at the F.U.N. Show was very positive indeed. There was a widespread feeling going into Florida that this show would test the stability and modest growth that the market had evidenced during late November and December. A good show would mean that stability was serious; a sell-off of coins below Bid would have meant that cash-flow was still controlling demand. Well, F.U.N. passed the test with flying colors, and dealers voiced great satisfaction with the results. A steady influx of **customers** during the entire show, and **buying customers** at that, assured dealers of an active market. The new money injected into the market was most welcome, and customers felt that they were buying nice coins at decent prices. The concept of **value** rules in numismatic purchasing as well as a host of competing temptations for those surplus dollars. Coins changing hands only added to the generally optimistic attitude that dealers carried into the show, and hopefully this market psychology will continue through Long Beach.

While the market is continuing to show what we consider a healthy mix of plus signs, the **number** of changes are certainly not overwhelming. This too seems to be viewed as a 'positive' by many of the dealers consulted. Everybody likes "plus" signs, but dealers (and their customers) seem to be weary of the 'excessive' advances of 1989 & 1990 that resulted in the 'ex-

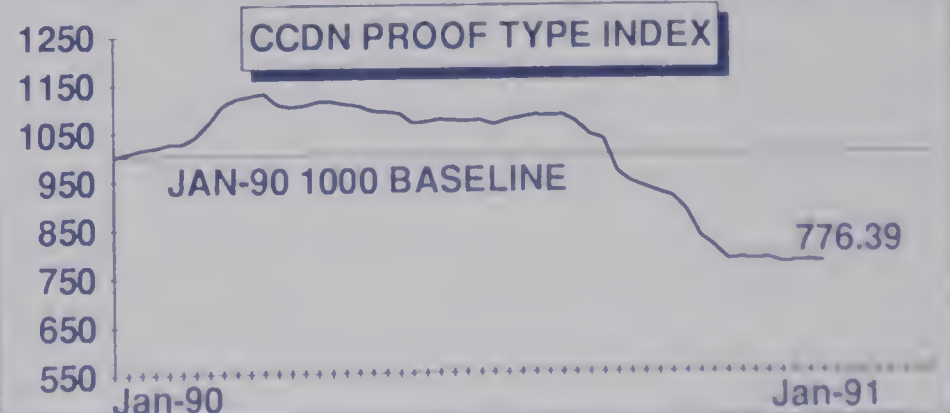

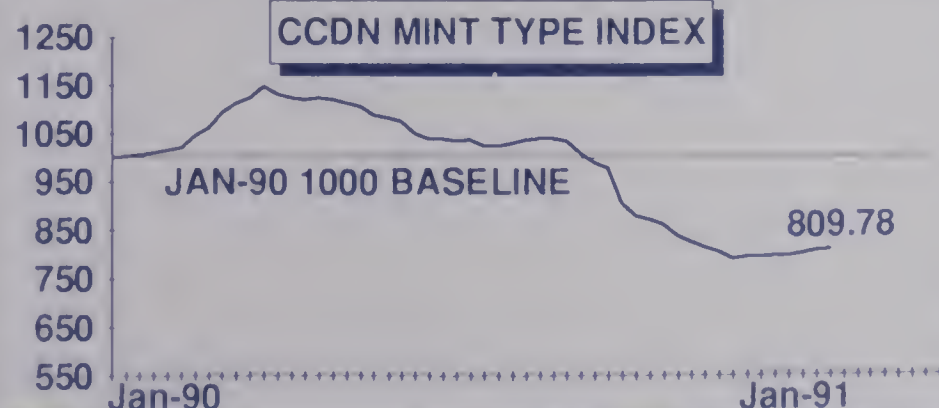

cessive' declines of 1990. After that roller coaster ride, most seem content with stability. No one holding a large inventory which was purchased at higher levels is especially pleased with the current levels, but that is in the past, and in the present they are happy to see coins trading at these levels. What matters is the turn and the replacement cost; the rest is fodder for the accountants.

Mid-American Rare Coin Auctions' 1991 F.U.N. Sale reported total prices realized exceeding \$1.6 million and was especially strong on the \$2000 and below 'bread and butter' material. Among the higher valued certified coins were:

Denomination	Certified Grade	Price Realized
1809 Lincoln Cent	PCGS Pr67R	\$5,060
1860 Seated Quarter	NGC65	\$7,040
1795 Bust \$1, B-4	ANACS45	\$3,190
1866 Seated \$1	PCGS Pr64	\$6,710
1879-CC Morgan \$1	NGC64	\$3,520
1889-CC Morgan \$1	NGC62	\$7,150
1896 Morgan \$1	PCGS Pr65	\$6,160
1882 Trade \$1	NGC Pr66	\$18,150
1855-D Gold \$1	PCGS58	\$12,650
1859-D Gold \$1	PCGS60	\$7,700
1854-D \$2 1/2	PCGS50	\$6,600
1937 Antietam	NGC67	\$3,630
1936 Gettysburg	NGC66	\$2,530
1938 New Rochelle	NGC67	\$6,160
1917 McKinley \$1	PCGS65	\$4,950

The Bidder

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

The *Certified Coin Dealer Newsletter*
announces a new **monthly** publication
featuring **Lowest Asks or Last Trades**:

the CCDn ASKSHEET

With the **sight-unseen** market beset by controversy over declining Bids, dealers need to have more complete information **now, more than ever!** Responding to the requests of scores of dealers, we are pleased to provide an important new source of necessary information. Even if the **sight-unseen** Bid reaches unrealistically low levels, having wholesale Low Ask or Last Trade information available will allow dealers to make more informed buying and selling decisions. And the spread observed will also give a strong indication of market liquidity.

The *CCDn ASKSHEET* will provide subscribers with the Lowest Ask or Last Trade prices seen during the preceding month in the dealer-to-dealer, wholesale marketplace. While we are offering this publication separately from the *Bluesheet*, we must point out that neither publication alone will give a complete picture of current wholesale market values. In fact, every page of the *ASKSHEET* will contain a caveat to that effect. After all, the Lowest Ask doesn't necessarily represent market value any more than the Highest Bid. But together, they should define the parameters of wholesale market value.

Hopefully, access to these dealer-to-dealer offers to sell will help stabilize the market price of coins. Uncertainty of value in a supply/demand marketplace means that fewer transactions can occur, and that benefits neither potential buyer nor potential seller.

Subscribe now to the *CCDn ASKSHEET*. Compiled by the same staff that has made the name *Bluesheet* synonymous with accuracy, timeliness, and reliability.

CCDn ASKSHEET

the newest member of the CDN family of publications

A New Publication
for the Coin Market of the '90s

PL Dollars may be seen relative to one or both of the two other variables than the deep-prior $Pr = 1$ like Bids for PLs are usually more than for DMPL but command some premium over non-PL types.

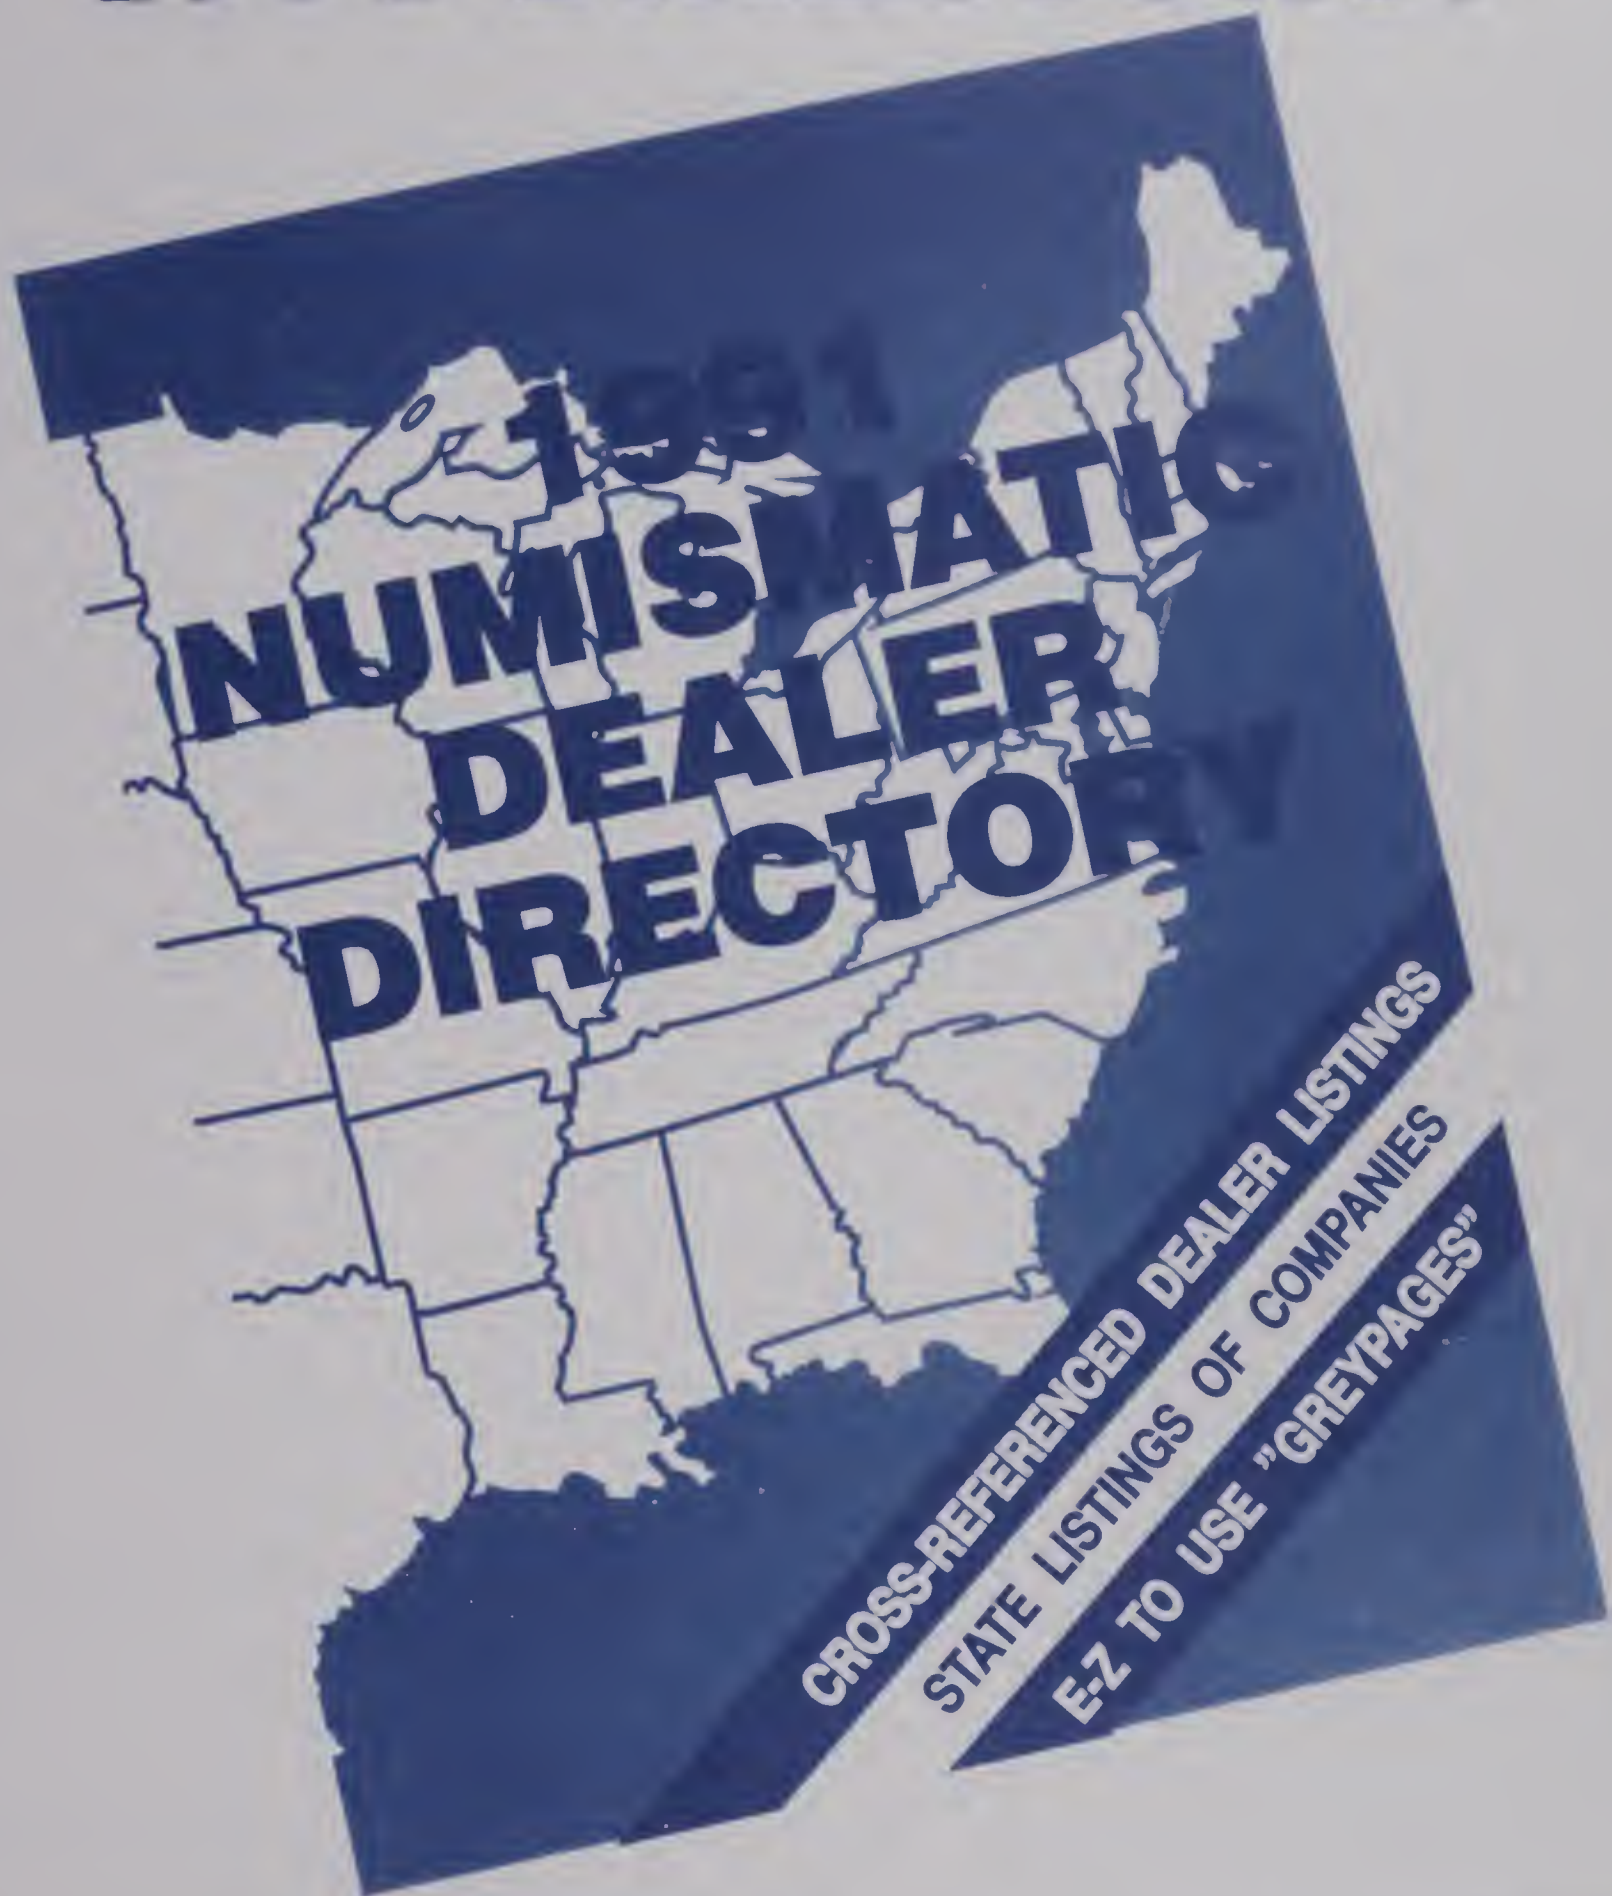

The gold coins in this chart trade very infrequently. These are the last known bids.

Bids for Lincoln cents are for full red specimens in MS64 and higher.

Matte Proof Cent Bids for grades of PR64 and better are for full red cents. PR63 and lower Bids are for Red and Brown cents; See Proof Type Coins page for Type Bids in all colors.

[illegible]

LOOKING FOR YOUR 1991 DIRECTORY?

Are you looking for your copy of the 1991 Numismatic Dealer Directory? Well, it hasn't been published yet.

You still have one month to get your advertisements in to our offices. Your advertisement in the 1991 NDD's "Greypages" will reach every one of America's leading dealers, investors, and collectors. This is your prime numismatic audience, and you need to let them know your services and qualifications.

Remember, the Directory is good for one entire year—365 days that your competitors will be reaching out to our subscribers. Your free listing will help customers find you—your paid advertisement will compel them to contact you.

THE ADVERTISING BUY OF THE DECADE IS ALREADY IN YOUR HANDS

The **Coin Dealer Newsletter** *family of publications* reaches every major dealer in America, as well as all serious investors and collectors. This is your prime numismatic audience – these are the sophisticated numismatists that you can target only through advertising to our elite group of subscribers.

Your advertisement in the **1991 Numismatic Dealer Directory** will reach this audience every day for one entire year! A free copy of the Directory will be mailed to every one of our subscribers shortly. As effective as our weekly advertisements are, just imagine getting a whole year's worth of impact for less money. We have a wide range of sizes and placements for your convenience and most effective use of your advertising dollars – everything from your business card to a full page, and all at very reasonable rates.

We will be printing soon, so time is of the essence. You should already have received your advertising brochure and free-listing confirmation card (if you haven't, please call us immediately!). And remember, the time for the substantial prepublication discounts will shortly be expiring. Act now!

My advertising brochure didn't arrive; please rush me a copy! ^{or}

What everybody ought to know...

About the PCGS Population Report

And why, for \$10 an issue, you can't beat the value!

Each and every coin certified by PCGS, some you probably have in your collection, is in the PCGS Population Report. That's a lot of information. And as you can imagine, there are many different ways to organize and publish this data.

That's why we've been asking coin enthusiasts across the country, from the novice to the expert, what they want out of the PCGS Population Report. The result includes some improvements we think you should know about.

CIRCULATED COINS - It used to be, you had to wait two-and-a-half months to get circulated coin information. Now you get these statistics monthly.

WORLD COINS - Whether you have any world coins or not, you can see how they're doing on a monthly basis. Coins from Canada, England, Germany, Japan, Switzerland, and U.S. Philippines are already included and provide today's coin enthusiast with a whole new world of options.

INFORMATION - Each of the more than two million PCGS certified coins listed in the book are categorized by type and grade. This means that if you have a 1881-S Morgan silver dollar, PCGS graded MS65, you can find out with the turn of a page, just how many coins like yours are out there. This is an important factor to consider when researching facts on your coins.

The report now costs an amazingly low \$10 per issue.

MINTAGE QUANTITIES - Listed along with each coin is the quantity originally minted. This too, is useful information and having it this handy can be a valuable time saver when you need all the facts in a hurry.

READER FEATURES - We designed the format to be easy to read and with the step-by-step User's Guide to help you, you'll have no trouble at all

getting the information you need. A comprehensive Glossary of Terms is also included and provides definitions for abbreviations and covers individual characteristics of your coins.

GREAT PRICE - A significant reduction of printing costs was made by changing the style of the book. By switching to "newsprint" type paper we were able to drastically cut the cost to an all time low of just \$10 for a single issue and \$89 for a full annual subscription (please call us for additional savings on multiple subscriptions).

HERE'S HOW TO ORDER -

Simply complete and return the coupon below. Or, if you like, call our toll-free number and a customer service representative will take your order over the phone. Don't miss out on a single issue, order today!

Market Climb Continues Modest Advances on Many More Coins

The sight-unseen certified market continues to demonstrate quiet strength, with another week of upward activity. In most cases, the plus signs represent a modest increase in Bid price, but the overall number of small increases is impressive—especially when one considers the alternatives.

Silver Commemoratives are continuing their recent signs of life; no, they have been even better than that—they are almost showing signs of health. After being neglected for so long, we were beginning to wonder if anyone cared for these great pieces of history. Advances outgunned declines about 10:1, and if many of the plus signs did represent nominal Bid increases, at least the Bids are headed in the 'right' direction. Even the Gold Commems tried to get into the act, with pluses outnumbering minus signs. While Gold Commems have been lacking a champion for some weeks (while an increasing number of them have been appearing on the market), the situation seems to be finally showing some signs of stabilizing.

Morgan Dollars seem to be leading the market rally that we have been watching since Thanksgiving. There is no question that Dollars were hard hit during the volatility of 1990, both generics and rare dates; and there is probably little need to point out that many issues have a long way to go to reach their previous highs. But none of that matters in a 'free' supply-demand marketplace. Dollars are climbing now, and therefore the value of dealers' inventories and collectors' holdings are climbing likewise. Even Peace Dollars have joined the advance.

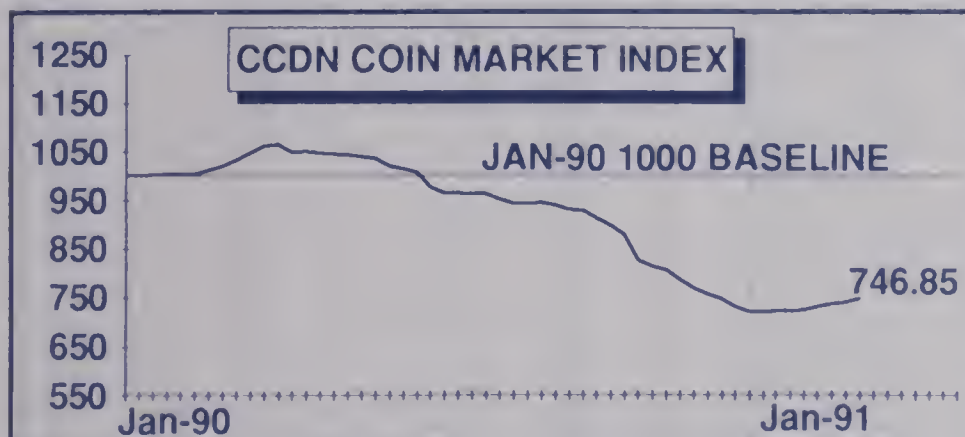

Mint State Type coins advanced solidly, with pluses overwhelming very few declines 20:1. The bulk of the advances were MS65 and below, and especially on Type coins below the \$2,000 'barrier'. Proof Type displayed the same progress, and at about the same ratio; only a handful of declines/adjustments can be found scattered among the roughly 200 advances. Like the Mint State Type, most of the increased Bids came on lower valued coins.

Mint Gold was also strong, with advances concentrated in the MS61 to MS65 columns. Proof Gold Bids moved modestly downward in Bid levels, but with a large number of minus signs. Perhaps it is not coincidental that most of these coins are higher-valued items. Some dealers are concluding that these coins (at these lower levels) represent opportunistic buys, but corresponding buying activity is not yet evident.

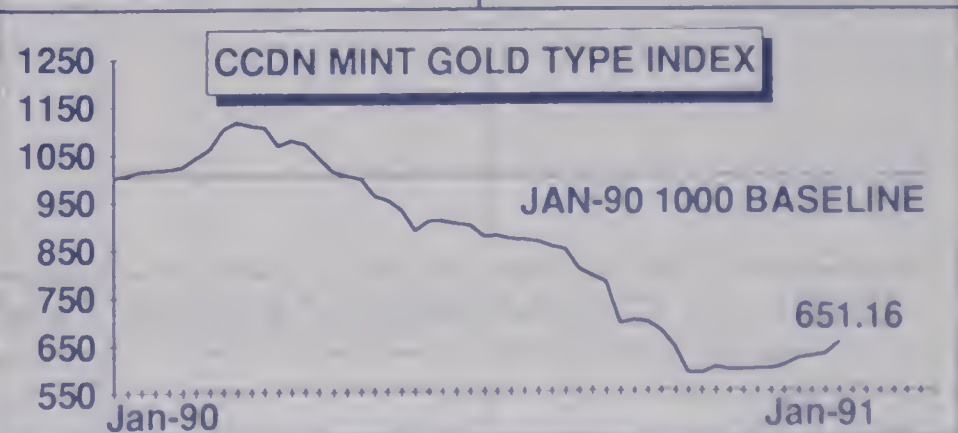

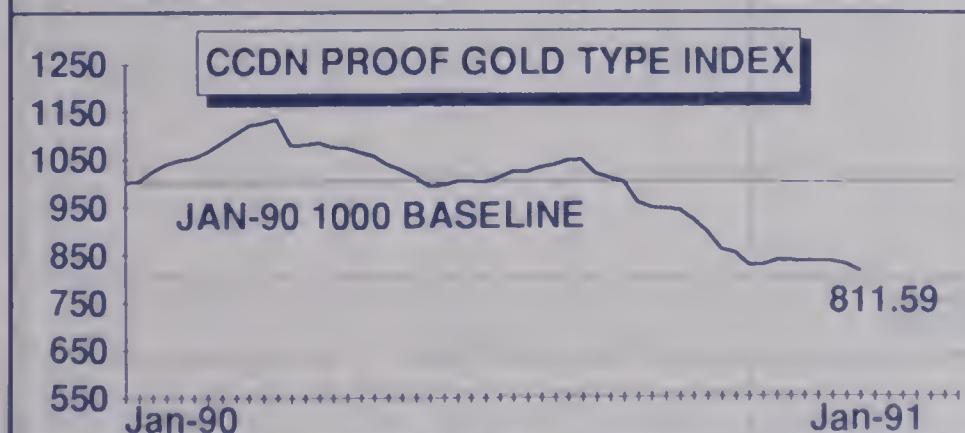

Buffalo Nickels, especially in the MS63–MS65 columns, registered a solid advance; a quick glance at the charts will demonstrate the overwhelming nature of the climb. Mercury Dimes solidly plused, but the upward activity seems to get lost next to the preponderance of plus signs seen in some of the other charts. Walking Liberty Halves are advancing nicely in MS61 through MS65, and especially in the earlier issues, MS61 issues from the 'Forties seem to be in demand. Proof Singles showed scattered activity, with higher grade Dimes and Halves advancing along with middle-grade Nickels and Quarters.

Among the specialty charts that we cover on a monthly basis, plus signs dominate the charts for Standing Liberty Quarters and \$20 Saints. In the Quarters, pluses outnumber declines 5:1, with activity scattered across the charts; most interesting are the declines in MS65 on both sides of the chart, contrasted with the pluses in the other grades. The upward movement in the Saints was mainly in the 'lesser' uncirculated grades, with most of the few minuses to be found in the upper grades due to dealers adjusting their buy prices. The Franklin halves declined overall, outgunning a few pluses in MS65 about 2:1.

All of this upward activity, concentrated as it is, raises some very basic questions. Is the \$2,000 'barrier' a function of a collector-led rally, or is it a result of many dealers not wanting to tie up inventory dollars in "big ticket" items?

The Bluesheet

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

Ronald J. Gillio, Inc. - Santa Barbara, CA

Gillio Coins Asia Ltd. - Hong Kong

NEEDS TO BUY WORLD GOLD AND SILVER

Since 1961 we have been a constant buyer of World Gold and Silver. We specialize in coins of the Orient especially Japan, Korea, China and Thailand, and Franklin Mint modern issues. We strive to pay the best possible prices. Others run buying ads with higher prices but we've seen these buyers come and go and we're still here. Give us a try - we are sure you will be satisfied.

We are also taking consignments of Oriental coins, paper money, tokens and medals for our 1991 Tokyo and Hong Kong Auctions. We have been conducting auctions in the Orient since 1982 and in the U.S. since 1967. Please contact us for further information.

And ... we are buyers and sellers of USA coins, common to rare.

ENGINEERED FOR UNBIASED GRADING

The Numismatic Guaranty Corporation was founded to ensure unbiased, arms-length coin grading. The final graders of NGC can not buy, sell, or trade coins commercially. NGC is creating the standard for objective, consistent, and accurate grading of higher quality coins.

Numismatic Guaranty Corporation has over 500 Charter and Associate members. Look for premium quality, NGC certified coins at the following Charter Member/Dealers.

THE ADVERTISING BUY OF THE DECADE IS ALREADY IN YOUR HANDS

The Coin Dealer Newsletter *family of publications* reaches every major dealer in America, as well as all serious investors and collectors. This is your prime numismatic audience – these are the sophisticated numismatists that you can target only through advertising to our elite group of subscribers.

Your advertisement in the **1991 Numismatic Dealer Directory** will reach this audience every day for one entire year! A free copy of the Directory will be mailed to every one of our subscribers shortly. As effective as our weekly advertisements are, just imagine getting a whole year's worth of impact for less money. We have a wide range of sizes and placements for your convenience and most effective use of your advertising dollars – everything from your business card to a full page, and all at very reasonable rates.

We will be printing soon, so time is of the essence. You should already have received your advertising brochure and free-listing confirmation card (if you haven't, please call us immediately!). And remember, the time for the substantial prepublication discounts will shortly be expiring. Act now!

My advertising brochure didn't arrive; please rush me a copy! *

☐ **My free listing for the
1991 Numismatic Dealer Directory**

"USRCE is an effective 'one-stop' shopping tool for collectors and investors alike. We sold some great coins to many new customers."

**Janelle Strombeck, President
Classic Rarities**

**... and here's what
other leading dealers
are saying about
USRCE ...**

"I've sold more coins on USRCE in the past few weeks than I sold in all of October and November. A great source to buy and sell coins."

**Steve Ryan, President
Steve Ryan Numismatics**

"Subscribing to USRCE is like having your own private coin show with over 50 dealers participating. USRCE is probably the best consumer oriented innovation since the advent of third party certification."

**Rob Dempsey, President
Certified Financial Consultants**

"USRCE allows traders to transact more business buying and selling coins without leaving the office."

**Jeff Isaac, President
Jeff Isaac Rare Coin Investments**

"USRCE is a wonderful concept. I'm reaching more customers than ever before. The market penetration is surprising."

**Jeff Garrett, President
Mid-American Rare Coins**

"I have found USRCE a very cost effective way for my firm to offer coins to serious buyers. The results we've experienced have exceeded our expectations. I feel USRCE is the marketing tool for the 90's."

**Jack Ehrmantraut, President
Numismatic Investment Group**

"I ran 35 coins on USRCE for three weeks and sold 28 of them, and along the way picked up several new customers. An excellent way for the educated collector or investor to add choice material to their holdings."

**Edward Seymour, President
Edward Seymour Rare Coin Investments**

"USRCE offers the end buyer as varied an inventory of certified coins as is available today."

**Paul Schuyler, Vice President
Ellesmere Numismatics**

"We are receiving lots of calls every day through our listings on USRCE. A great concept and a wonderful way to do business."

**Bob Rose, President
Renrob Coins, Inc.**

"USRCE is working better than I ever had hoped for. It has opened up a whole new market for the buying and selling of coins. We think the future for USRCE is 'the sky's the limit!'"

**Elliot Goldman
Allstate Coins**

"USRCE has allowed me to offer coins at truly wholesale prices."

**Stuart N. Sherman
Professional Numismatic Services**

"Refreshing to see what 'real' level rare coins are trading at on USRCE, obviously more than reported in the CCDN or 'bid' levels. Overall, a great system that is real in every respect. We support it in every way."

**Randy McIntosh, VP Sales
S.L. Contursi Rare Coins**

"USRCE is the only place to buy or sell rare coins, whether you are a collector or a dealer."

**Dale Williams, President
Williams Gallery**

"A much needed tool for both the dealer and the investor to find needed material."

**Robert Avena, President
Avena Coin Company**

"USRCE is an innovative new way to buy and sell coins. It's quick, easy, and efficient."

**William Gay, Sales Director
Delaware Valley Rare Coin Company**

"The best source for exposing coins for sale to the numismatic public. Great shopping service for collectors and investors alike. Great future."

**David R. Griffiths, CEO
Century Stamp & Coin Company**

**Others promise.
USRCE delivers!
Over 7,000 coins offered in the
past 30 days valued at over \$30 million!!**

Sight-Unseen Bids Continue Strengthening Discounted Sells Disappearing

Regular readers have heard our caveats many times. The High Bid that we report should not be confused with the "value" of a coin, or what that coin is "worth". A retail buyer should expect to pay some varying premium above Bid depending upon the rarity and condition of the coin. The quantity of "Plus" (or "Minus") signs has a limited usefulness in describing market activity without a full understanding of the size of the change and the reasons behind it.

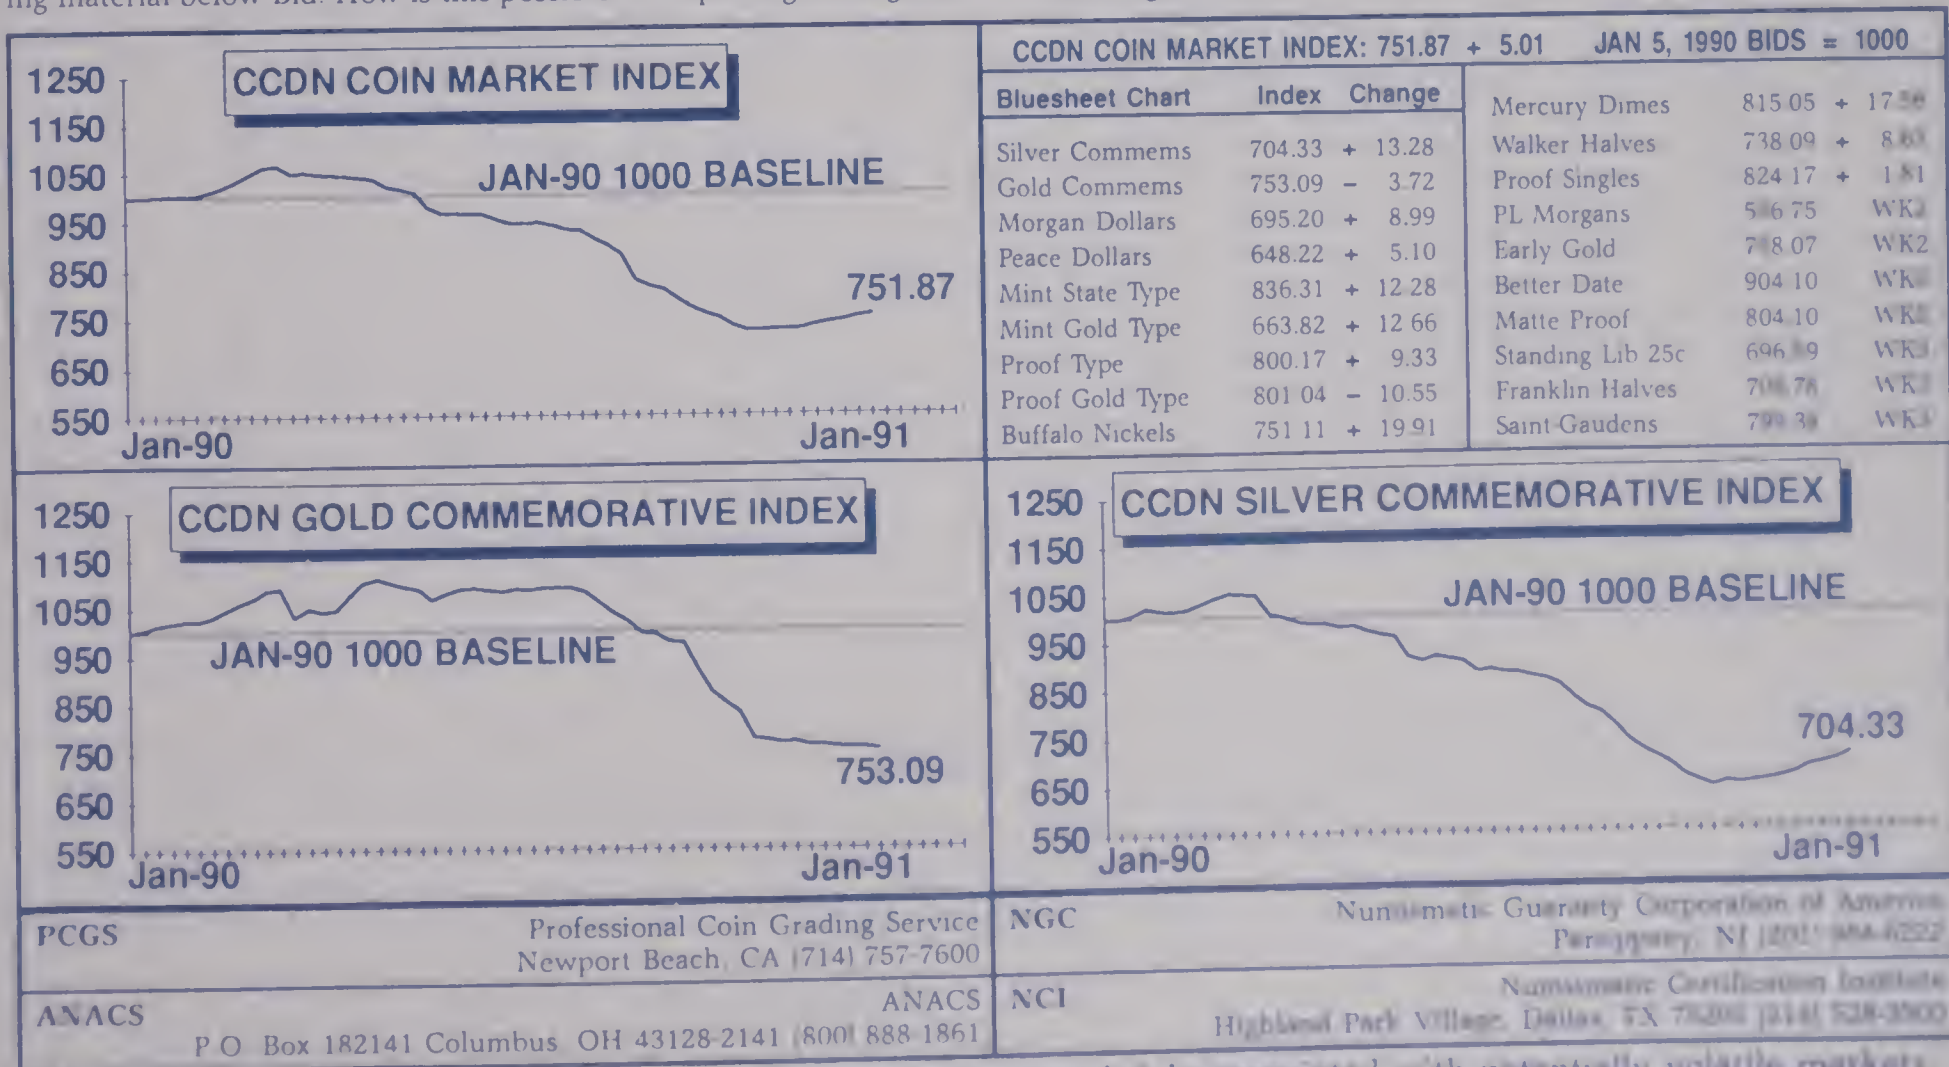

All this is by way of examining this week's market activity indicators. The number of "Plus" signs is again overwhelming the "Minus" signs, which is a very positive indicator. Dealers are reporting increased market activity, both in the stable and the rising issues, which is a very positive indicator. Dealers tell us that they are buying for their customers, rather than on their personal account. The **CCDN CMI** is up again this week, indicating a strong overall Bid market. Coins (at least the non-bullion issues) have done very well since the outbreak of fighting in the Gulf War. In fact, about the only negatives on the horizon may be that this "up-market" is not being enjoyed by all dealers, and that large numbers of coins may be entering the marketplace (courtesy of investors disenchanted by last year's volatility) which will test market liquidity.

The **most positive** indicator that we see in today's market, and one that we think is more important than all of the others listed above, is the declining number of discounted sells. This truly is a critical indicator of market health. During several periods of excessive volatility last year, you may have seen plus signs reported while other dealers were selling material below Bid. How is this possible? In reporting the highest

sight-unseen, nationally reported Bid it may have been that the Bidder only wanted **one** coin on behalf of an anxious customer. The dealer might actually raise Bid as a means of alerting the market of his active interest, and the first seller to recognize that interest could have a sale at an "above normal" price. The dealer who wished to sell the desired specimen might have been out of luck, and if he was caught in a cash flow bind, might have had to liquidate at a much lower price to a cash-in-hand customer.

If the **sight-unseen** market was totally efficient, there would be no reason for any slabbed coin to ever sell below Bid. But it isn't and there remains a difference between immediate cash and seven-day pay, or 14-day pay, or 28-day pay. The time value of money is an active consideration in the buying and selling prices of coins. Of course there is another reason for a discounted sell—when a particular dealer (or the market) is confused about the current, true value of the coins.

The minuscule number of discounted sells that we are now seeing gives us faith in the market recovery thus far. It means that dealers share a common consensus on the value of coins at these levels. In fact, the number of "Plus" signs that we are seeing lends strong credibility to the opinion that dealers believe coins are currently worth more than Bid, and are willing to increase their Bids to obtain supply. And most importantly, the lack of discounted sells is a strong indication that the liquidity crisis facing so many dealers last year has eased—that inventory, assets, and debts are largely in equilibrium. If the base of the coin market really is this strong, it could provide a strong foundation for future growth.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet Dealer-to-Dealer Bids*.

The Bluesheet

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer, and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN albeit on a sight basis.

Sight-Unseen Bids Continue Surge Dealer Uncertainty Bending Towards Optimism

The "news" this week is the same as the week before—in fact, the same "news" found all the way back to late November. Sight-Unseen Bids are climbing. If one were to look at only the number of plus signs (and ignore the underlying levels), it would be only too easy to declare that the coin market is in the midst of a stupendous rally.

Some dealers share great resistance towards enthusiasm, no doubt a lingering reaction to the unpleasantness of last year's volatility. But the reasons given for their lack of excitement also contain elements of the sound basis of this upward trend. "Many of the increased Bids are for very nominal amounts"; but how much do coins need to appreciate in one week? "The price recovery seems to be concentrating on those Bids below \$2,000"; but hasn't that always been where the greatest collector demand can be found? "Most coins still have a long way to go to regain their 1990 levels"; but isn't inventory replacement value a better guide to profits and valuation?

This new aura of confidence could not be developing at a better time, as numismatic Southern California is half-way through its "Southland Season". The events making up the season are pretty well known by now: The Golden State Coin Convention held in Pasadena has become the lead-off event, with its accompanying Auction by Bowers & Merena. Reports from both of these events conveyed enthusiastic levels of activity. From there, the action will shift to Superior Galleries and their upcoming sale in Beverly Hills, and thence to Long Beach.

Superiors' February 3,4,5, Sale featuring The Dennis Mendelson Collection of Large Cents is another in a long series of specialized

sales that Superior has offered. The Sale starts with the specialized collection of Large Cents assembled by Mr. Mendelson in 400 lots, and follows that with another 350 premium lots belonging to additional consignors. Rarities and Condition Census material abounds, and the enthusiasm exhibited by the Early Copper buyers is a sight to behold. And the sale becomes even more exciting after that with a superb offering of Gold, with many pieces certified as Gems.

The Long Beach Coin, Stamp & Baseball Card Show ends the "Southland Season." Just like an old and dear friend, it's hard to say anything bad about the Long Beach Show. Sometimes the market is better than at other times, but the shows are **all** good. At Long Beach, dealers can be assured of having the best show possible—it's hard to ask for more than that.

PCGS Professional Coin Grading Service, Newport Beach, CA Established in 1986, PCGS grades and authenticates U.S. and world coins. PCGS has certified more than two million coins. All coins must be submitted through one of the 560+ authorized dealers; contact PCGS at 800-447-8848 for a list.

PCGS has more than 15 graders on its staff; each coin is examined by at least two graders before the final grade is determined. No person involved with the grading process may be active in the buying or selling of U.S. coins. Fees start at \$26 or \$35 depending on the type of coin, plus postage and insurance; several levels of Express service are also available. PCGS coins are sonically sealed in an inert plastic "NumisCap" holder before return to the customer.

PCGS has a cash-backed Guarantee of Grade and Authenticity. PCGS has a comprehensive grading set which includes most major series. PCGS is a grading service only and does not make markets. PCGS dealers are responsible for their own making of markets in PCGS coins. PCGS publishes a monthly Population Report.

ANACS ANACS: The first authentication service (established in 1972), to which grading services were added in 1978. ANACS authenticates and grades all U.S. coins and Patterns, rendering unbiased third party grading opinions using prevailing market grading standards. After grading, the coins are placed in the sonically sealed ANACS Cache™.

ANACS has over 700 active submission centers. All coins can be sent through the submission centers or directly to the ANACS office. Submitters can also become Market Makers. The fee for a standard submission is \$23, and various levels of express service are available between \$40 and \$125.

Free information is available from ANACS P.O. Box 182141 Columbus, Ohio 43218-2141 Phone 1-800-888-1861

CCDN Bids reflect 1986 and newer certified coins, and assume the certificates have no negative comments. ANACS Bids are listed only once each month.

NGC Numismatic Guaranty Corporation of America Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 450 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit. "Arm's length" NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute Organized in June 1984 to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at Heritage Plaza, Highland Park Village, Dallas, TX 75205-2788, Phone (214) 528-3500. NCI uses three graders in a determination of a final grade and thirty professional dealers act as consultants. Many of these dealers also market NCI coin.

Grading is based on the philosophy of James H. Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercially) compared to the other three services listed. Regular cost is \$24 per coin. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded with a charge of 50% of the regular fee. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. Due to current trading volume, NCI coins will only be listed once a month. CCDN Bids reflect 1987 and newer certified coins.

Client or sight-seen sales may command a substantial premium above Bluesheet Dealer to Dealer Bids. Certification does not guarantee protection against the normal risks associated with potentially volatile markets.

The Blue Sheet

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

The *Certified Coin Dealer Newsletter*
announces a new **monthly** publication
featuring **Lowest Asks or Last Trades:**

the CCDn ASKSHEET

With the **sight-unseen** market beset by controversy over declining Bids, dealers need to have more complete information **now, more than ever!** Responding to the requests of scores of dealers, we are pleased to provide an important new source of necessary information. Even if the **sight-unseen** Bid reaches unrealistically low levels, having wholesale Low Ask or Last Trade information available will allow dealers to make more informed buying and selling decisions. And the spread observed will also give a strong indication of market liquidity.

The *CCDn ASKSHEET* will provide subscribers with the Lowest Ask or Last Trade prices seen during the preceding month in the dealer-to-dealer, wholesale marketplace. While we are offering this publication separately from the *Bluesheet*, we must point out that neither publication alone will give a complete picture of current wholesale market values. In fact, every page of the *ASKSHEET* will contain a caveat to that effect. After all, the Lowest Ask doesn't necessarily represent market value any more than the Highest Bid. But together, they should define the parameters of wholesale market value.

Hopefully, access to these dealer-to-dealer offers to sell will help stabilize the market price of coins. Uncertainty of value in a supply/demand marketplace means that fewer transactions can occur, and that benefits neither potential buyer nor potential seller.

Subscribe now to the *CCDn ASKSHEET*. Compiled by the same staff that has made the name *Bluesheet* synonymous with accuracy, timeliness, and reliability.

VISIT US AT LONG BEACH

Stop by and see us at table #219. Offer us your rare proof type coins. We are extremely interested in buying your pre-1858 proof coins - gold or silver, graded or ungraded, Proof-60 to Proof-69.

**A couple of extremely rare coins
to enhance your portfolio:**

1823 Proof Bust Half

Possibly Unique!

Traceable to 1864

P.O.R.

NGC PR63

with Walter Breen papers

**1853 Proof Arrows &
Rays Quarter**

One of just five minted!

Extremely rare and desirable type coin

P.O.R.

Proof-62

with Walter Breen papers

Bid Escalation Continues Long Beach Looks Upbeat

For dealers who have remained wary of this market rally up until now, we probably have the single best evidence of its strength and breadth: the **CCDN Coin Market Index** has climbed again this week. Granted, the increase isn't the largest we have seen, *but the fact that it occurred while hundreds of America's leading dealers were on their way to Long Beach is crucial!* We have been noticing for some time that more players are posting electronic Bids, and that many of these players don't "do" the show circuit (not even major shows like Long Beach). It has been typical in the past for the **sight-unseen** market to noticeably dip during major shows (ANA, FUN, Long Beach, and a few others) due to the simple reason that a dealer cannot be at his computer, balancing his inventory, and travelling at the same time. Is this a further segmentation of the market, or just a sign of growing strength with dealers leaving their Bids up while travelling?

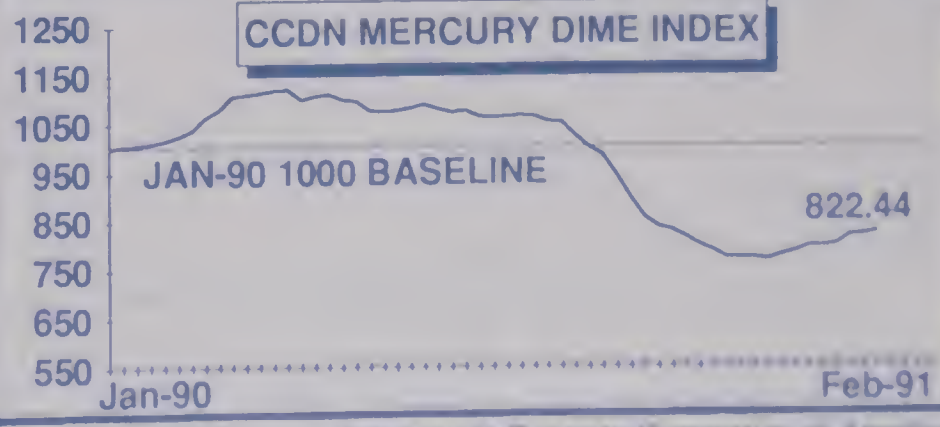

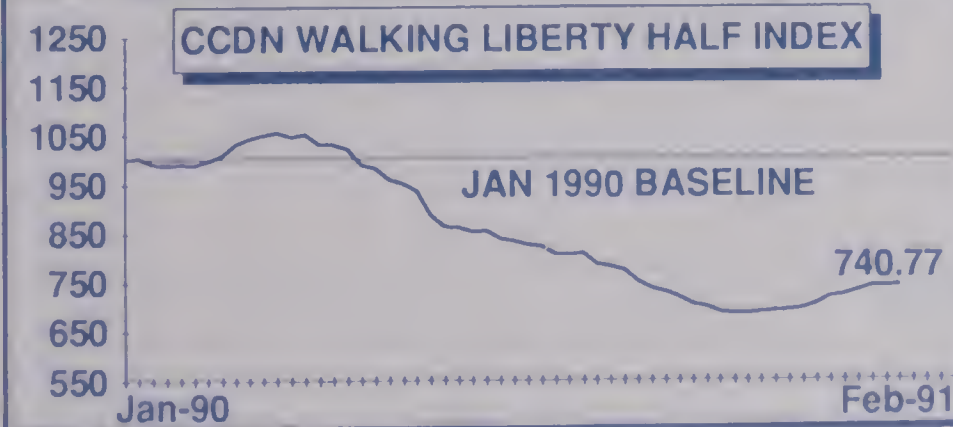

Another sign of the general health of the market was found at Superior Galleries February 3,4,5 1991 Sale featuring the Dennis Mendelson Collection of Large Cents. Following collector-driven Bidding on specialty collections of California National Bank Notes and Large Cents, dealers got to show the strength of their belief in the market direction. Among the highlights:

Denomination	Certified Grade	Price Realized
1793 Large Cent S-10	PCGS64Brown	\$ 34,100
1794 Large Cent, S-26	NGC65Brown	\$ 35,750

The Bluesheet

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight-unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer, and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CCDn, albeit on a sight basis.

ENGINEERED FOR UNBIASED GRADING

The Numismatic Guaranty Corporation was founded to ensure unbiased, arms-length coin grading. The final graders of NGC can not buy, sell, or trade coins commercially. NGC is creating the standard for objective, consistent, and accurate grading of higher quality coins.

Numismatic Guaranty Corporation has over 500 Charter and Associate members. Look for premium quality, NGC certified coins at the following Charter Member/Dealers.

PROOFLIKE MORGAN DOLLARS

FLDs should be referred to as "prooflike" rather than "proof" as they are not made by the Mint for circulation. Prooflike coins are made by the Mint for the DMPL (Diplomatic Mail) and some private mint orders.

The *Certified Coin Dealer Newsletter*
announces a new **monthly** publication
featuring **Lowest Asks or Last Trades:**

the CCDn ASKSHEET

With the **sight-unseen** market beset by controversy over declining Bids, dealers need to have more complete information **now, more than ever!** Responding to the requests of scores of dealers, we are pleased to provide an important new source of necessary information. Even if the **sight-unseen** Bid reaches unrealistically low levels, having wholesale Low Ask or Last Trade information available will allow dealers to make more informed buying and selling decisions. And the spread observed will also give a strong indication of market liquidity.

The *CCDn ASKSHEET* will provide subscribers with the Lowest Ask or Last Trade prices seen during the preceding month in the dealer-to-dealer, wholesale marketplace. While we are offering this publication separately from the *Bluesheet*, we must point out that neither publication alone will give a complete picture of current wholesale market values. In fact, every page of the *ASKSHEET* will contain a caveat to that effect. After all, the Lowest Ask doesn't necessarily represent market value any more than the Highest Bid. But together, they should define the parameters of wholesale market value.

Hopefully, access to these dealer-to-dealer offers to sell will help stabilize the market price of coins. Uncertainty of value in a supply/demand marketplace means that fewer transactions can occur, and that benefits neither potential buyer nor potential seller.

Subscribe now to the *CCDn ASKSHEET*. Compiled by the same staff that has made the name *Bluesheet* synonymous with accuracy, timeliness, and reliability.

CCDn ASKSHEET

P.O. Box 11099 Torrance, CA 90510

Please start my subscription to the

What everybody ought to know...

About the PCGS Population Report

And why, for \$10 an issue, you can't beat the value!

Each and every coin certified by PCGS, some you probably have in your collection, is in the PCGS Population Report. That's a lot of information. And as you can imagine, there are many different ways to organize and publish this data.

That's why we've been asking coin enthusiasts across the country, from the novice to the expert, what they want out of the PCGS Population Report. The result includes some improvements we think you should know about.

CIRCULATED COINS - It used to be, you had to wait two-and-a-half months to get circulated coin information. Now you get these statistics monthly.

WORLD COINS - Whether you have any world coins or not, you can see how they're doing on a monthly basis. Coins from Canada, England, Germany, Japan, Switzerland, and U.S. Philippines are already included and provide today's coin enthusiast with a whole new world of options.

INFORMATION - Each of the more than two million PCGS certified coins listed in the book are categorized by type and grade. This means that if you have a 1881-S Morgan silver dollar, PCGS graded MS65, you can find out with the turn of a page, just how many coins like yours are out there. This is an important factor to consider when researching facts on your coins.

The report now costs an amazingly low \$10 per issue.

MINTAGE QUANTITIES - Listed along with each coin is the quantity originally minted. This too, is useful information and having it this handy can be a valuable time saver when you need all the facts in a hurry.

READER FEATURES - We designed the format to be easy to read and with the step-by-step User's Guide to help you, you'll have no trouble at all

getting the information you need. A comprehensive Glossary of Terms is also included and provides definitions for abbreviations and covers individual characteristics of your coins.

GREAT PRICE - A significant reduction of printing costs was made by changing the style of the book. By switching to "newsprint" type paper we were able to drastically cut the cost to an all time low of just \$10 for a single issue and \$89 for a full annual subscription (please call us for additional savings on multiple subscriptions).

HERE'S HOW TO ORDER - Simply complete and return the coupon below. Or, if you like, call our toll-free number and a customer service representative will take your order over the phone. Don't miss out on a single issue, order today!

Sight-Unseen Market Steadies Mint Gold Type Demonstrates Efficiencies

The number of plus signs in this week's *Bluesheet* is down noticeably from the number of advances that we have been seeing lately, although the upward trend in the market is continuing. Since we didn't observe any noticeable 'drop-off' in Bids during the Long Beach Show, and since Long Beach was generally considered to be a "good" to "very good" show by the dealers, the relative stability in the Bids this week can probably be attributed to dealers concentrating on the **retailing** of coins. This should not be unexpected, since Long Beach definitely provided buying opportunities, and dealers usually follow up their 'buying binges' with a 'selling splurge'—how else can you keep your inventory in balance?

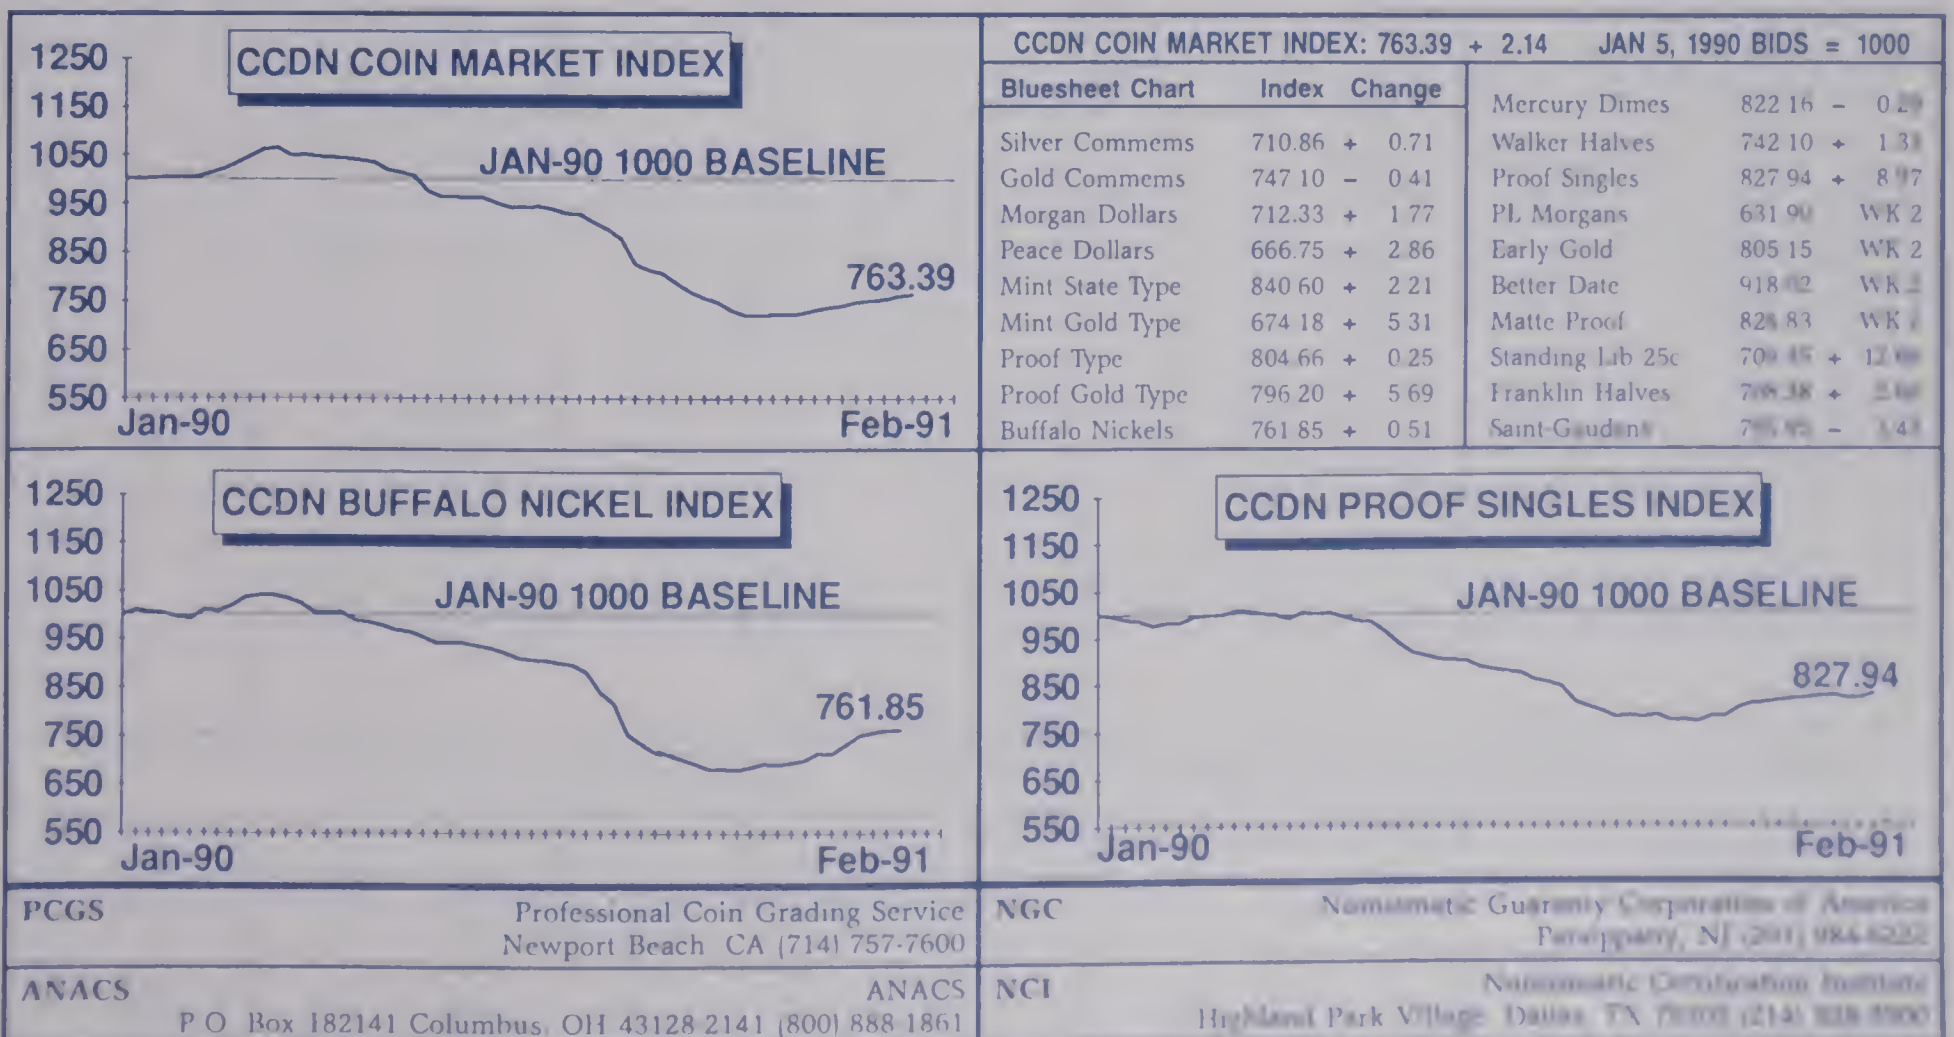

We have remarked before on the recent stability of the **sight-unseen** electronic Bids through the major shows, and how this should be viewed as a sign of real strength in this market. We don't want to dwell too much on this concept, as the market still hasn't fully come to grips with the special problems presented by the **travelling dealer**. However, one doesn't have to look back too far to the 'bad old days' to remember how unsatisfactory it **looked** when the **sight-unseen** market plunged every time there was a major show. The reasons for this had everything to do with **logistics** and nothing to do with the **value** of coins, but it looked bad to the outside observer. Rare coins showed enough volatility on their own without having to 'borrow trouble'. The recent ability of the electronic exchanges to hold their levels during major shows is another indication of their increasing efficiency.

And speaking of market efficiency, the chart that best exemplifies the future possibilities of **sight-unseen** trading is Mint State Gold Type Coins. This is the one area of the market where you have the tightest Bid-Ask spreads, and generally the most Bidding and trading activity.

There are many reasons for the efficiency of this market segment. Gold coins generally present a more uniform appearance, so buyers don't have to worry as much about the color variations of copper or the toning differences on silver. Because of their relative higher value, many gold coins have been slabbed, giving a more accurate population profile. Gold has always been popular with the collecting and investing segments, and more active trading means tighter spreads (which in turn inspires additional investing). Some of the premium grade, low-pop issues still show wide spreads but that *may* never change with this type of mechanism.

It will take some time before the other charts reach the level of efficiency of Mint State Gold Type; in fact, among the less-traded and higher valued coins, it almost seems that Bidding is as inefficient as Mint State Type Gold is efficient! We know better than to make any predictions about the future direction of **sight-unseen** trading, but we do know that volatility remains the number one enemy. The tighter the Bid-Ask spread, the easier it is to sell the system; and the more that dealers believe in their Bids and the system, the less wild volatility we will see.

This isn't to say that minus signs can't or shouldn't happen. Mint State Type Gold shows plenty of minus signs as the market adjusts to the forces of supply and demand; indeed, the ability of that segment to show \$2 declines as well as \$2000 declines is part of its strength. Bids and Asks can adjust all they want, as long as the participants share a common consensus on what the material is worth. A common belief in the value of the item at whatever level is the truest sign of market efficiency. **Sight-unseen** may never replace **sight-seen**, but the development of this market to its **greatest efficiency** should help everyone in the long run.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.

Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

The Bluesheet

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight unseen bid prices shown. In the absence of current market bids the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer, and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN albeit on a sight basis.

ENGINEERED FOR UNBIASED GRADING

The Numismatic Guaranty Corporation was founded to ensure unbiased, arms-length coin grading. The final graders of NGC can not buy, sell, or trade coins commercially. NGC is creating the standard for objective, consistent, and accurate grading of higher quality coins.

Numismatic Guaranty Corporation has over 500 Charter and Associate members. *Look for premium quality, NGC certified coins at the following Charter Member/Dealers.*

The *Certified Coin Dealer Newsletter*
announces a new **monthly** publication
featuring **Lowest Asks or Last Trades:**

the CCDn ASKSHEET

With the **sight-unseen** market beset by controversy over declining Bids, dealers need to have more complete information **now, more than ever!** Responding to the requests of scores of dealers, we are pleased to provide an important new source of necessary information. Even if the **sight-unseen** Bid reaches unrealistically low levels, having wholesale Low Ask or Last Trade information available will allow dealers to make more informed buying and selling decisions. And the spread observed will also give a strong indication of market liquidity.

The *CCDn ASKSHEET* will provide subscribers with the Lowest Ask or Last Trade prices seen during the preceding month in the dealer-to-dealer, wholesale marketplace. While we are offering this publication separately from the *Bluesheet*, we must point out that neither publication alone will give a complete picture of current wholesale market values. In fact, every page of the *ASKSHEET* will contain a caveat to that effect. After all, the Lowest Ask doesn't necessarily represent market value any more than the Highest Bid. But together, they should define the parameters of wholesale market value.

Hopefully, access to these dealer-to-dealer offers to sell will help stabilize the market price of coins. Uncertainty of value in a supply/demand marketplace means that fewer transactions can occur, and that benefits neither potential buyer nor potential seller.

Subscribe now to the *CCDn ASKSHEET*. Compiled by the same staff that has made the name *Bluesheet* synonymous with accuracy, timeliness, and reliability.

CCDn ASKSHEET

To Dealers in Rare Coins

Check your Sources. Now look at the way Heritage does business.

Heritage Coin Wholesale means business:
professional courtesy, quick payment, fair prices, unparalleled
financial resources, wide selection, and just plain good deals.

Anyone can make these
claims, but Heritage proves
it. Read why America's top
dealers like to do business
with Heritage.

"We've done million of dollars in business with
Heritage's wholesale and auction departments.
Their integrity and professionalism in all our
dealings has been outstanding."

Dan Avena, Sr., PNG
Avena Coin Co.
Vineland, NJ

"Jim's business acumen is legendary. To say that
he makes a keen addition to the ANA board,
would be quite modest."

Kurt Krueger, PNG
Dealer and former ANA Governor

"I've done millions of dollars in business with
Heritage both buying and selling. They are among
the most honest, straight forward people I deal
with."

John Dannreuther, PNG
Major Wholesale Dealer and part owner of PCGS.

"I've dealt with almost every division of Heritage.
This is a company that goes the extra mile to take
care of their customers."

John F. Maben, PNG
Certified Numismatic Investments
Cherry Hill, NJ

"Our family has dealt with Heritage for almost 20
years. Buying or selling we've been treated fairly
on every deal."

Charles Karler, PNG
Southwestern Gold Co.
Albuquerque, NM and Oklahoma City, OK

"Heritage is nothing short of amazing! The diverse
range of coins they handle coupled with the
top-flight numismatists on staff is surely the reason
they are a continued success."

Paul Sims, President
Paul Sims, Inc.
Richmond, VA

"Heritage runs a first class operation."

Larry Lee, PNG
Coin & Bullion Reserves
Panama City, FL

"I'm very impressed with all Heritage is doing for
the good of the industry. They give freely of their
vast resources."

Frank Greenberg, President
Delaware Valley Rare Coin Co., Inc.
Pennsylvania State Chapter of I.C.T.A.

"Heritage is always fair. I deal with them at
virtually every show I attend."

Bill Shamhart
Shamhart & Associates
Wilmington, DE

"Heritage is very fair, easy to do business with,
great service and great people."

Sal Germano
S.G. Rare Coins

"Competitive prices, lots of coins in stock and
excellent service. A winning combination for
dealer business."

Jeffrey Bergelt
Bergelt International

"Heritage does a great job, they have always
treated me with fairness and courtesy. And they
have the best prices in the marketplace."

Richard Schwary
California Numismatic Investments

"Heritage always gives me a good deal whether the
market is up or down."

Joel Rettew
Joel Rettew Rare Coin Galleries

"Heritage has a varied inventory, competitive
prices and a helpful staff. Their deliveries are
among the fastest."

Pat Heller
Liberty Coin Service

"Heritage always has a vast array of coins at fair
prices and fast overnight service if you need it."

Ira Einhorn
American Coin Portfolios

Call Heritage the next
time you want to deal.
You'll discover why
Heritage means business.

Bids Continue Rising

Trading Increasing In Selected Areas

The coin market is seldom *dull*. Last year, dealers tried mightily to understand why prices plummeted so precipitously. So far this year, they are trying to understand why the market is showing such strength. This recovery is certainly different than many of the previous cycles. Among its curious aspects is its seeming indifference to the bullion price of silver and gold (is \$3 silver that unimaginable now?). War in the Gulf has had no apparent negative impact on prices, although it would certainly be hard to discern a positive impact. Talk of the *Recession* has taken a back seat to more pressing issues, although the numbers continue to look scary. So what is really happening in the coin market, and why?

We know for certain that many Bids are rising, and rising on a regular basis. That is apparent from both the number of plus signs on our charts, and from the consistently rising *CCDN Coin Market Index*. This isn't to say that business is doing great—we have talked to enough dealers (as you probably have) to know that many are still hurting. But there is no question that for most inventory-oriented dealers, it is a *relief* to have the market moving in an upward direction.

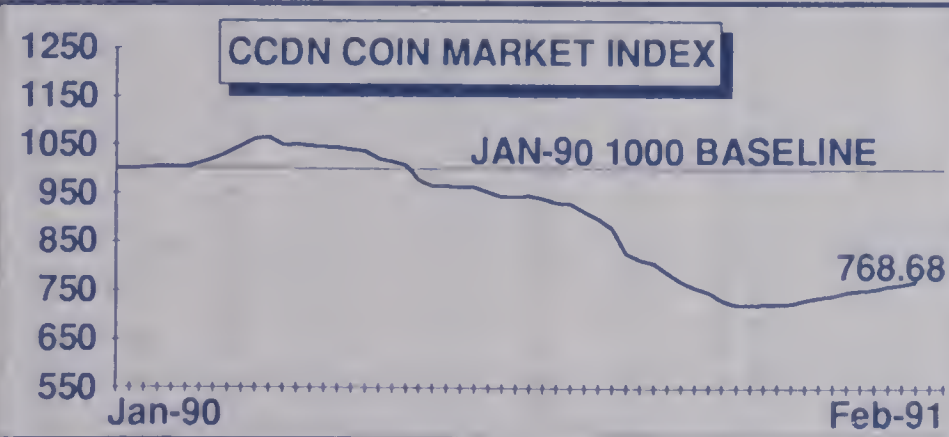

Yet we continue to hear from dealers that business is substantially slower than it was previously (which we interpret to mean the trends of the last two years). The value of coins (and therefore the value of inventory) is rising, but it still seems that not as many sales are being made. The last two weeks have also seen a definite increase in bidding on the NGC side of the charts, scattered among several dealers. They report that in many cases, even with 20% to 30% jumps in Bid, they still aren't buying that many coins. It will remain to be seen whether we will see higher Bids on specific issues or a general widening of the range of issues covered; that will ultimately give us a strong indication of whether the Bidding is being done for Want

Lists or for inventory purposes

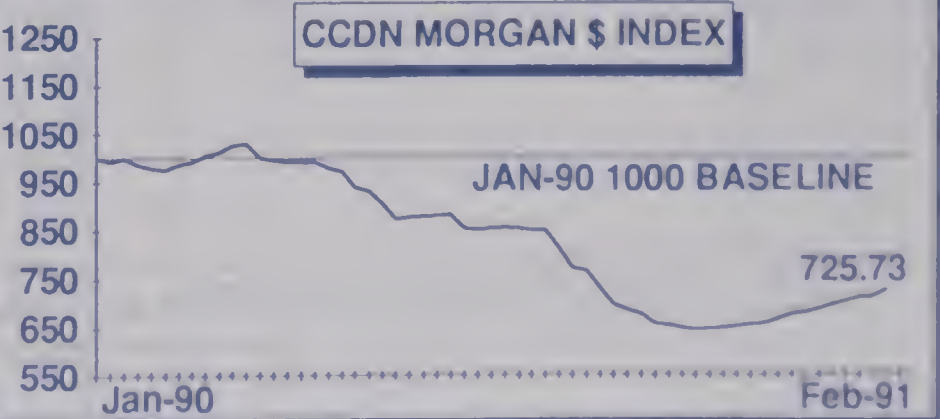

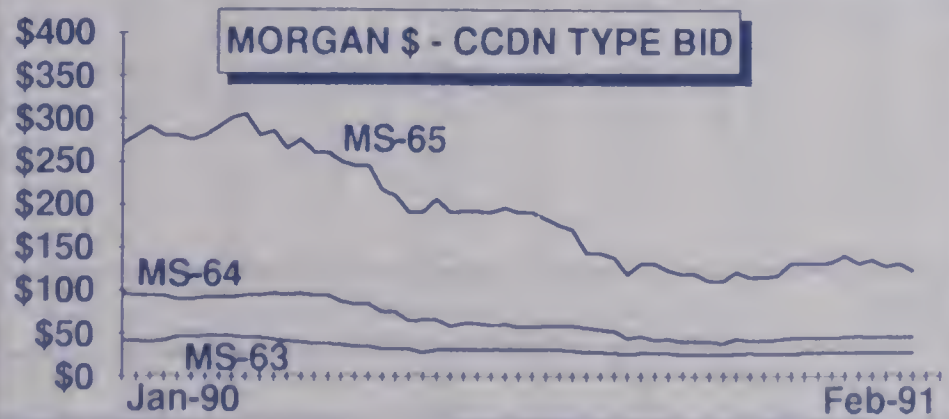

Overall, there is a definite increase in real market trading among dealers, and this is being seen both on the bourse floor and on the electronic exchanges. One of the teletype exchanges (CCE) reported two 300,000+ trading days this week, and material is definitely changing hands throughout the market.

Silver Commems are continuing to show strength across the chart with only a few lowered sells. Gold Commems are beginning to remind us of a limbo contest; surely at some point a new champion has to emerge. Despite some slight weakness in the generic issues, Morgan Dollars continue to forge ahead, especially in the MS63 and higher grades. Lowered sells dropped less than a handful of Bids, and the market has demonstrated strength even with some profit taking. Bidding activity on NGC Morgans has also been especially pronounced. Peace Dollars are finally joining in the "Cartwheel Spirit", and have solidly plussed in MS63 through MS65.

Mint State Type is strong overall, with many of the minuses due to slightly lowered high Bids. Mint State Gold is a cornucopia of movement and may finally be showing some signs of being affected by bullion prices. Or maybe not. Anyone who can predict this market segment with any degree of accuracy deserves the "Grand Prize." Proof Type is advancing solidly with noticeable increases on the NGC chart. Proof Gold is a little less certain, although still in the plus column overall. Buffalo Nickels are showing plus signs almost exclusively, and Mercury Dimes are looking quite healthy. Walking Liberty Halves are strongly positive, although some sells among the later dates have pushed Bids down. Proof singles are showing spotty movement (as they have for some time), with weakness in the late-date halves, and strength in the Nickels and Dimes.

The Bluesheet

The Certified Coin Dealer newsletter reports the national market for certified coins only, following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight-unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer, and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

FIGURE 1 | **Flowchart** of the study. The flowchart illustrates the selection process for the study. It starts with 1000 subjects, from which 100 were excluded due to missing data. The remaining 900 subjects were then divided into two groups: 450 in the control group and 450 in the intervention group. The control group received standard care, while the intervention group received a combination of standard care and a new intervention. The study was conducted over a period of 12 weeks, with data collected at baseline, 4 weeks, 8 weeks, and 12 weeks. The primary outcome was the change in the number of hospitalizations, and the secondary outcome was the change in the number of days in hospital.

Bid Prices Stabilize Discounted Sells Force Some Declines

The market rally that we have been tracking since late November stalled a bit this week, and the pace of increases slowed markedly. Any number of reasons for this have been advanced, and they may all tell part of the story. Dealers at Long Beach reported very heavy buying activity, and some may be taking a respite to rebalance their inventory. The American Numismatic Association, Professional Numismatists Guild Early Spring Convention in Dallas has just opened, and many dealers were arriving early to swing deals *before* the bourse floor opened. The rising market enticed many dealers into profit-taking. And least encouragingly, some dealers are predicting that this rally may be running out of steam.

Well, all of the above contain some element of truth, although none of these explanations seem quite satisfactory. We know from long experience that coin prices go up and down, according to the forces of supply and demand. We also know that generally there is a compelling reason behind the status change in either the supply or demand. Now, we try not to be as simplistic as some financial writers who report that "the stock market rose (or fell) yesterday in reaction to (insert yesterday's headline here)." But sometimes with coins it is nearly as simple as that. A big jump in the rate of inflation, and people get jittery about their money. War is declared, and prices of certain commodities soar while others fall. A negative report appears in the Wall Street Journal and a stock price tumbles. Cause and effect, when visible, is a pretty persuasive argument.

Since we see no undue influences on the coin market, we might have to search in other directions. It just may be that a few dealers needed to raise some quick cash. Or it may be that some of these coins were "over-priced", and it takes a lowered sell to bring them back in line. These adjustments may also just be the result of a functioning supply-demand market, where some items rise while others fall.

The Silver Commemoratives chart is showing more declines than we have seen in some time, although the advances clearly dominate, most of

the adjustments are in the MS64 through MS66 grades. Gold Commemorative continue to evidence a lack of support. The advance of Morgan Dollars continues to be led by the DMPLs, although some lowered sells on business issues resulted in minus signs. Peace Dollars still aren't enjoying the level of interest found for many of the series, although Bids are generally moving upward.

Changes in the Mint State Type Bids were mostly on the plus side, the minus signs resulting from a combination of discounted sells and lowered Bids. Mint State Gold Type was definitely on the minus side, especially in the lower grades. The majority of changes on the Proof Type chart were declines, for the first time in months. Proof Gold Type is showing a lack of support in the higher grades, although some of the PR61 and PR62 much registered advances. Changes in the Buffalo Nickels chart were strongly positive, as were the Mercury Dimes and Walking Liberty Halves. Activity in the Proof Singles continues to be scattered, with the only discernible pattern being a weakening of the early date and lower grade half-dollars.

CCDN COIN MARKET INDEX: 769.03 + 0.35 JAN 5, 1990 BIDS = 1000

PCGS Professional Coin Grading Service, Newport Beach, CA Established in 1986, PCGS grades and authenticates U.S. and world coins. PCGS has certified more than two million coins. All coins must be submitted through one of the 560+ authorized dealers; contact PCGS at 800-447-8848 for a list.

PCGS has more than 15 graders on its staff; each coin is examined by at least two graders before the final grade is determined. No person involved with the grading process may be active in the buying or selling of U.S. coins. Fees start at \$26 or \$35 depending on the type of coin, plus postage and insurance; several levels of Express service are also available. PCGS coins are sonically sealed in an inert plastic "NumisCap" holder before return to the customer.

PCGS has a cash-backed Guarantee of Grade and Authenticity. PCGS has a comprehensive grading set which includes most major series. PCGS is a grading service only and does not make markets. PCGS dealers are responsible for their own making of markets in PCGS coins. PCGS publishes a monthly Population Report.

ANACS ANACS: The first authentication service (established in 1972), to which grading services were added in 1978. ANACS authenticates and grades all U.S. coins and Patterns, rendering unbiased third party grading opinions using prevailing market grading standards. After grading, the coins are placed in the sonically sealed ANACS Cache™.

ANACS has over 700 active submission centers. All coins can be sent through the submission centers or directly to the ANACS office. Submitters can also become Market Makers. The fee for a standard submission is \$23, and various levels of express service are available between \$40 and \$125.

Free information is available from ANACS, P.O. Box 182141, Columbus, Ohio 43218-2141. Phone 1-800-888-1861.

CCDN Bids reflect 1986 and newer certified coins, and assume the certificates have no negative comments. ANACS Bids are listed only once each month.

NGC Numismatic Guaranty Corporation of America. Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone (201) 984-6222. NGC has more than 15 graders on its staff, and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$33, plus postage and insurance. After it is graded, it is then placed in a lab-tested (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 450 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC-graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principle of NGC do not buy or sell coins for commercial profit. "Arm's Length" NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute. Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at Heritage Plaza, Highland Park Village, Dallas, TX 75205-2788. Phone (214) 518-3500. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin (N.C.I. Grading Council), which may be considered somewhat liberal (commercial) compared to the other three services listed. Regular cost is \$14 per coin. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded with a charge of 50% of the regular fee. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. Due to current trading volume, NCI coins will only be listed once a month. CCN Bids reflect 1987 and newer certified coins.

Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer to Dealer Bids. Certification does not guarantee protection against the normal risks associated with potentially volatile markets.

The Blue Sheet

The Certified Coin Dealer newsletter reports the national market for certified coins only, following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer, and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CCDn, albeit on a sight basis.

The *Certified Coin Dealer Newsletter*
announces a new **monthly** publication
featuring **Lowest Asks or Last Trades:**

the CCDn ASKSHEET

With the **sight-unseen** market beset by controversy over declining Bids, dealers need to have more complete information **now, more than ever!** Responding to the requests of scores of dealers, we are pleased to provide an important new source of necessary information. Even if the **sight-unseen** Bid reaches unrealistically low levels, having wholesale Low Ask or Last Trade information available will allow dealers to make more informed buying and selling decisions. And the spread observed will also give a strong indication of market liquidity.

The *CCDn ASKSHEET* will provide subscribers with the Lowest Ask or Last Trade prices seen during the preceding month in the dealer-to-dealer, wholesale marketplace. While we are offering this publication separately from the *Bluesheet*, we must point out that neither publication alone will give a complete picture of current wholesale market values. In fact, every page of the *ASKSHEET* will contain a caveat to that effect. After all, the Lowest Ask doesn't necessarily represent market value any more than the Highest Bid. But together, they should define the parameters of wholesale market value.

Hopefully, access to these dealer-to-dealer offers to sell will help stabilize the market price of coins. Uncertainty of value in a supply/demand marketplace means that fewer transactions can occur, and that benefits neither potential buyer nor potential seller.

Subscribe now to the *CCDn ASKSHEET*. Compiled by the same staff that has made the name *Bluesheet* synonymous with accuracy, timeliness, and reliability.

CCDn ASKSHEET

P.O. Box 11099 Torrance, CA 90510

UNITRADE

IS COMING TO A DEALER NEAR YOU!

*Shortly, one of the
boldest concepts ever
for the collectible
industry will be fully
unveiled. A single word
has been coined
to describe this
tremendous
undertaking...*

UNITRADE

The name **UNITRADE** will describe the primary source where you can buy or sell coins (through a **UNITRADE** associate) at current competitive market prices simply by browsing through the largest coin inventory utilizing the latest computer technology.

Soon, an initial group of coin dealers located throughout the country, will be provided access to the **UNITRADE** state of the art computer network. This core group of dealers will grow to a national network of thousands by the end of 1992.

These dealers will be able to view instantaneously, from a **UNITRADE** provided computer terminal in their offices the current "real time" prices of thousands of coins in the **UNITRADE's** multi-million dollar inventory. These dealers will be able at "the touch of a button" to buy for you any coin listed on this huge inventory.

Also, these dealers will be able to easily and efficiently enter for you a coin or coins that you want to sell, and within a matter of minutes a description of that coin and your asking price will be communicated via satellite to hundreds of dealers across the country and will automatically become part of the **UNITRADE** inventory. Thousands of dealers, collectors and investors will have the opportunity to buy your coins.

Although, **UNITRADE's** initial offer is to provide a huge coin inventory, this concept will quickly expand to other collectibles: baseball cards, stamps, diamonds and gems, etc.

The countdown has begun. In a few short weeks, **UNITRADE** associates will be ready to assist you with your coin needs.

Market Direction Changing Dealer Attitudes Mixed

This past week has found the sight-unseen marketplace making a definitive directional change. Since the end of November, dealers have been watching the **sight-unseen** market moving consistently upward. Even a couple of weeks ago, when the market weakened slightly, it quickly stabilized (and even advanced nominally). However, at the American Numismatic Association / Professional Numismatists Guild Early Spring Convention this past week in Dallas, the market remained indecisive throughout the show. Not that prices were declining in Dallas — *they weren't!* Rather, there just wasn't that much business taking place. During the show, slow though it may have been, at least there was an absence of panic-selling.

This week has been noticeably different. Sellers have come out of the woodwork to move inventory to the high Bidders. And, of course, the high Bidders have retreated rather quickly (although not excessively) in the face of large purchasing invoices. Overall, Bid levels are not down dramatically, however — it is readily apparent that the majority of market-makers are lowering their Bids in an effort to lower their cost of purchases, or, moving just under another high Bidder. Since many of the Bids had been placed in the hopes of **buying** the coins, these declines may be viewed more as a continuing desire to buy, but not to overpay. To date, we have seen no indication of the massive removal of Bids that accompanied last year's market breakdown.

At the ANA/PNG Convention, it was clear that the market leaders were looking for some positive indication of market trends. While we normally think of rising or falling Bids as characterizing a trend, a more accurate indicator this year just may be the amount of fresh money entering the marketplace. To be succinct, dealers are nearly unanimous in reporting that there simply isn't enough of it! Not seeing an increase of cash into the marketplace, the marketmakers decided it was time

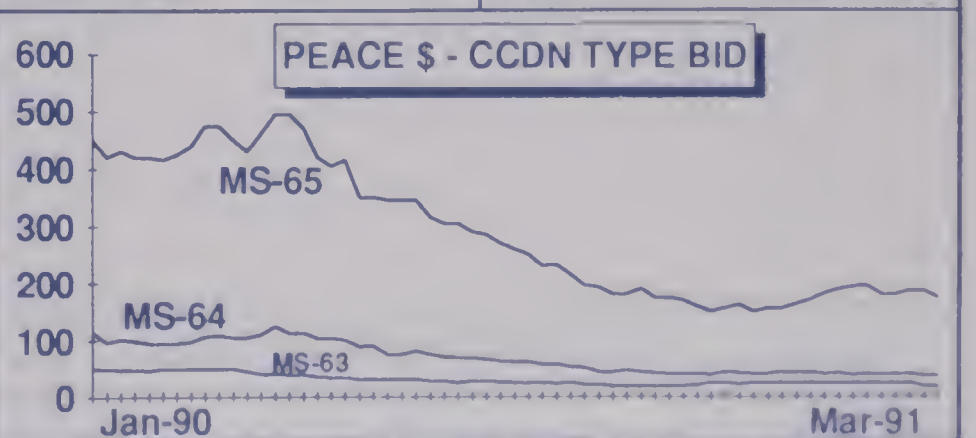

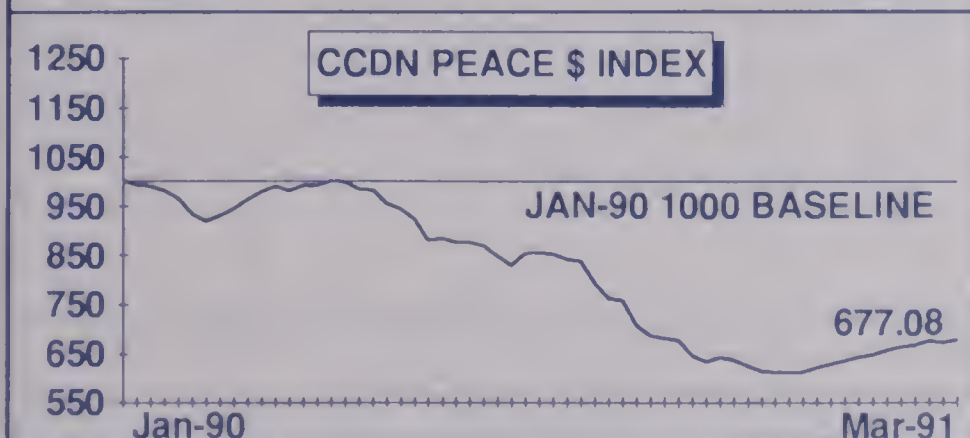

to lessen their exposure to new inventory. Some dealers are concerned with the fact that Wall Street money is no longer a lucrative near-term influence, and without an increase in the number of buyers who would purchase coins and remove them from the marketplace, the market appears stagnant at best. Once again, coin dealers are finding that *the customer with cash is King*.

There is another aspect to the current coin market (which we hesitate to call a new phase) that perhaps can be described as *indifference*. While the nation is ecstatic over the results of the Gulf War, and Wall Street seems poised to reach new highs, the world markets are rejecting silver and gold as attractive investments. While the relationship between gold bullion and rare coins is sometimes tenuous, it can safely be said that during early 1991, neither gold nor silver has held much interest for the consumer.

As long as coin dealers have their inventories in balance, they can afford to sit and wait for the buyer to come along and meet their price. How long they can wait, and whether the buyer ultimately comes along will determine the future direction of the market. If the consumer decides that his surplus dollars are better spent elsewhere, then ultimately prices must drop. On the other hand, if supplies stay constant and the recession goes away, coins could begin to look mighty good at these levels. Every coin dealer recognizes that pricing is a dynamic variable subject to many influences. However, should a major offering of coins be made into this market (from the liquidation of a **major** collection, or perhaps the holdings of a **major** dealer or supplier of coins), the current market does not evidence the strength to absorb it without a major realignment of prices. But should another fund emerge, or some other **major** influx of fresh money, even dealers will be amazed at how quickly Bids can recover.

SAFRABANK NUMISMATIC FINANCING OFFERS YOU FOUR POWERFUL NEW SOURCES OF BUSINESS ENERGY.

FLEXIBILITY to
generate cash flow
from existing inventory
without having to sell.

VERSATILITY
to use any portion of an
existing inventory to finance
a larger inventory.

LEVERAGE to add new
or additional inventory
in the open market
or in auction.

SERVICE to use
SafraBank Power when
you want it, when you need
it with speed, efficiency
and courtesy.

The Power of SAFRABANK'S Numismatic Financing can help you achieve greater purchase and sales volume plus more versatile and flexible management of your numismatic inventory.

SAFRABANK FINANCING AVAILABLE:

PCGS • NGC • Select Raw Numismatic Coin • Gold Bullion and Coin • Silver Bullion and Coin • US 40% Silver Coin • Platinum Bullion & Coin • Palladium Bullion & Coin • Foreign Currency • Exchange Warehouse Receipts • Bank Certificates.

*Draw from the Power of SafraBank to give
your business new energy. Call or write*

PROOFLIKE MORGAN DOLLARS

P.L. Dollars may be seen reflective on one or both sides with less reflectivity than the deep mirror Prooflikes. Bids for P.L.s are usually much lower than for DMPL but command some premium over non P.L. strikes.

ENGINEERED FOR UNBIASED GRADING

The Numismatic Guaranty Corporation was founded to ensure unbiased, arms-length coin grading. The final graders of NGC can not buy, sell, or trade coins commercially. NGC is creating the standard for objective, consistent, and accurate grading of higher quality coins.

Numismatic Guaranty Corporation has over 500 Charter and Associate members. *Look for premium quality, NGC certified coins at the following Charter Member/Dealers.*

Market Driven by Asks and Sells

Market Climb May Become Casualty of Profit-Taking

Last week's apparent uncertainty of market direction seems to have resolved itself this week – the hard way. *Discounted sells* (selling or offering to sell coins below last week's Bid) and *lowered Asks* have dominated price changes this week. The minus signs in this week's *Bluesheet* are the result of these lowered sells & Asks as well as declining Bids.

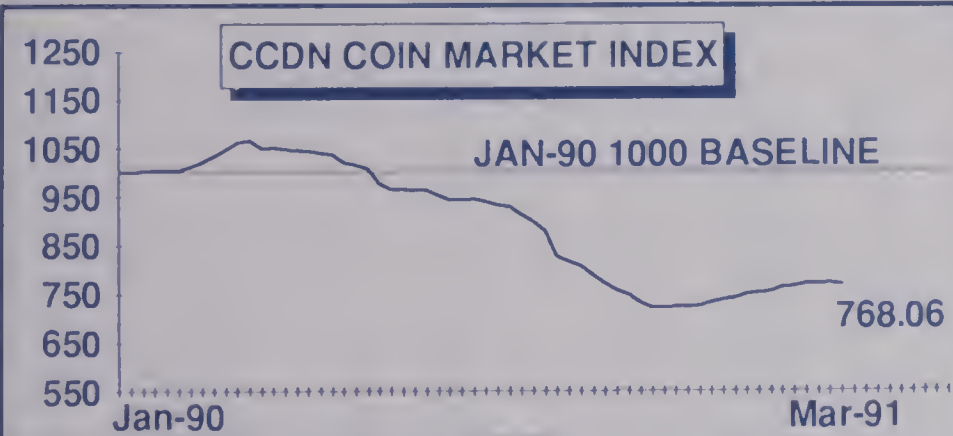

The *Certified Coin Market Index*, which has been rising steadily (but surely) since late November, is subsequently showing its first minus sign in four months. Even with last week's uncertainty, the *CMI* had still managed to show a positive direction. While the bulk of Bids in the *Bluesheet* are still stable this week, the minus signs have basically managed to overpower the few areas showing upward activity.

Why are dealers and investors selling into this market – and at a time when Wall Street stocks are about to set a new record? Well, the answer may well have something to do with Wall Street and the sometimes "fickle" nature of investors. When "outside" money is injected into the coin marketplace (increasing demand), prices rise. And when coins are liquidated and the money removed from the coin market (increasing supply and reducing demand), prices will drop. Dealers who watch this flow of money into and out of the marketplace will try to anticipate the movements, Bidding coins up before money flows in, and liquidating quickly before money flows out. While this can easily be justified as economic preservation, such profit-taking in anticipation of a decline has the effect

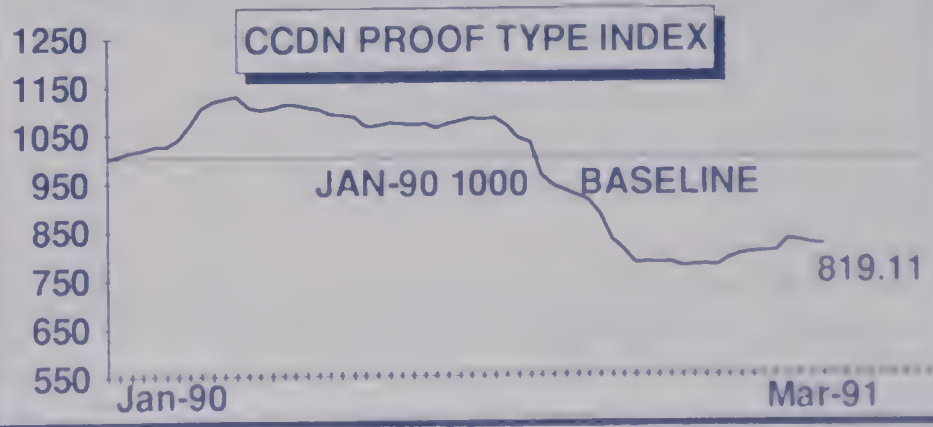

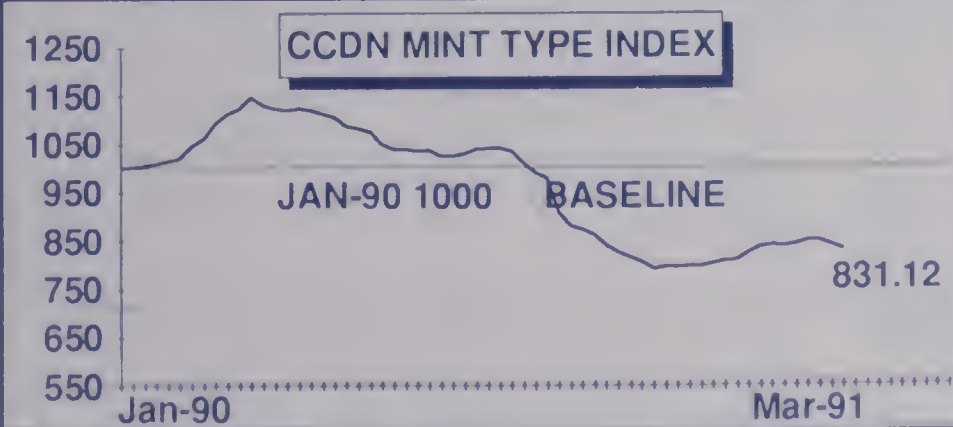

of a self-fulfilling prophecy. The positive side of such a buying opportunity, for both collectors and dealers, will be to see just how much coin CASH will be able to buy.

Silver Commemoratives, which struggled for so long to show consistent advancing, seem to be doing fairly well under the selling attack. While Gold Commems are under strong selling pressure, at least this should come as no surprise. Anyone looking for real surprises has only to inspect the Morgan Dollar chart. Gosh, we like these coins – we know that they aren't all that rare, but even at these lower prices you get a lot of coin and history for the money. I guess a few others would agree, since Morgans are continuing to show strength – especially when compared to some other areas.

Peace Dollars are basically stable, with advances pushing the *CMI* higher – which is more than can be said for Mint State Type, where declines clearly outnumbered advances. Declines also dominated advances in the Proof Type chart. Mint State Gold is stable, while Proof gold remains a problem, with dealers starting to discount these "high-ticket" items. Buffalo Nickels, another area favored by collectors, showed substantially more advances than declines. Mercury Dimes were strong in MS65FB, but declines marked many other columns. Walkers were generally strong, especially in the early dates, and the later MS65s. Proof Singles are under extreme selling pressure. Among the monthly charts, Standing Lib Quarters and Saints were both weak, but Franklin Halves showed a strong increase.

CCDN COIN MARKET INDEX: 768.06 - 2.28 JAN 5, 1990 BIDS = 1000			
Bluesheet Chart	Index	Change	
Silver Commems	722.02	- 0.86

The Bluesheet

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CCDn albeit on a sight basis.

UNITRADE^{INC.}

IS COMING
TO A DEALER
NEAR YOU!

SHORTLY, ONE OF THE
BOLDEST CONCEPTS EVER FOR
THE COLLECTIBLE INDUSTRY
WILL BE FULLY UNVEILED. A
SINGLE WORD HAS BEEN
COINED TO DESCRIBE THIS
TREMENDOUS UNDERTAKING...

UNITRADE

The name **UNITRADE** will describe the primary source where you can buy or sell coins (through a **UNITRADE** associate) at current competitive market prices simply by browsing through the largest coin inventory utilizing the latest computer technology.

Soon, an initial group of coin dealers located throughout the country, will be provided access to the **UNITRADE** state of the art computer network. This core group of dealers will grow to a national network of thousands by the end of 1992.

These dealers will be able to view instantaneously, from a **UNITRADE** provided computer terminal, in their offices, the current "real time" prices of thousands of coins in the **UNITRADE's** multi-million dollar inventory. These dealers will be able at "the touch of a button" to buy for you any coin listed on this huge inventory.

Also, these dealers will be able to easily and efficiently enter for you a coin or coins that you want to sell, and within a matter of minutes a description of that coin and your asking price will be communicated via satellite to hundreds of dealers across the country and will automatically become part of the **UNITRADE** inventory. Thousands of dealers, collectors and investors will have the opportunity to buy your coin(s).

A special feature of **UNITRADE** will be the world's first "real-time, computerized auction" using computers and satellites.

The **UNITRADE** auction will be patterned after actual, current coin auctions. Utilizing the **UNITRADE** computer in his office, an associate on his own behalf or for a client, will be able to bid on any coin, or item, in the computer auction, as if he is present in person on the auction floor.

Although, **UNITRADE's** initial offer is to provide a huge coin inventory, this concept will quickly expand to other collectibles: baseball cards, stamps, diamonds and gems, etc.

The count down has begun. In a few short weeks, **UNITRADE** associates will be ready to assist you with your coin needs.

ENGINEERED FOR UNBIASED GRADING

The Numismatic Guaranty Corporation was founded to ensure unbiased, arms-length coin grading. The final graders of NGC can not buy, sell, or trade coins commercially. NGC is creating *the* standard for objective, consistent, and accurate grading of higher quality coins.

Numismatic Guaranty Corporation has over 500 Charter and Associate members. *Look for premium quality, NGC certified coins at the following Charter Member/Dealers.*

The *Certified Coin Dealer Newsletter*
announces a new **monthly** publication
featuring **Lowest Asks or Last Trades**:

the CCDn ASKSHEET

With the **sight-unseen** market beset by controversy over declining Bids, dealers need to have more complete information **now, more than ever!** Responding to the requests of scores of dealers, we are pleased to provide an important new source of necessary information. Even if the **sight-unseen** Bid reaches unrealistically low levels, having wholesale Low Ask or Last Trade information available will allow dealers to make more informed buying and selling decisions. And the spread observed will also give a strong indication of market liquidity.

The *CCDn ASKSHEET* will provide subscribers with the Lowest Ask or Last Trade prices seen during the preceding month in the dealer-to-dealer, wholesale marketplace. While we are offering this publication separately from the *Bluesheet*, we must point out that neither publication alone will give a complete picture of current wholesale market values. In fact, every page of the *ASKSHEET* will contain a caveat to that effect. After all, the Lowest Ask doesn't necessarily represent market value any more than the Highest Bid. But together, they should define the parameters of wholesale market value.

Hopefully, access to these dealer-to-dealer offers to sell will help stabilize the market price of coins. Uncertainty of value in a supply/demand marketplace means that fewer transactions can occur, and that benefits neither potential buyer nor potential seller.

Subscribe now to the *CCDn ASKSHEET*. Compiled by the same staff that has made the name *Bluesheet* synonymous with accuracy, timeliness, and reliability.

CCDn ASKSHEET

P.O. Box 11099 Torrance, CA 90510

What everybody ought to know...

About the PCGS Population Report

And why, for \$10 an issue, you can't beat the value!

Each and every coin certified by PCGS, some you probably have in your collection, is in the PCGS Population Report. That's a lot of information. And as you can imagine, there are many different ways to organize and publish this data.

That's why we've been asking coin enthusiasts across the country, from the novice to the expert, what they want out of the PCGS Population Report. The result includes some improvements we think you should know about.

CIRCULATED COINS - It used to be, you had to wait two-and-a-half months to get circulated coin information. Now you get these statistics monthly.

WORLD COINS - Whether you have any world coins or not, you can see how they're doing on a monthly basis. Coins from Canada, England, Germany, Japan, Switzerland, and U.S. Philippines are already included and provide today's coin enthusiast with a whole new world of options.

INFORMATION - Each of the more than two million PCGS certified coins listed in the book are categorized by type and grade. This means that if you have a 1881-S Morgan silver dollar, PCGS graded MS65, you can find out with the turn of a page, just how many coins like yours are out there. This is an important factor to consider when researching facts on your coins.

The report now costs an amazingly low \$10 per issue.

MINTAGE QUANTITIES - Listed along with each coin is the quantity originally minted. This too, is useful information and having it this handy can be a valuable time saver when you need all the facts in a hurry.

READER FEATURES - We designed the format to be easy to read and with the step-by-step User's Guide to help you, you'll have no trouble at all

getting the information you need. A comprehensive Glossary of Terms is also included and provides definitions for abbreviations and covers individual characteristics of your coins.

GREAT PRICE - By switching to a new format we were able to cut costs and generate the most handsome and user-friendly Population Report ever (please call us for additional savings on multiple subscriptions).

HERE'S HOW TO ORDER - Simply complete and return the convenient coupon below. Or, if you like, call our toll-free number and a customer service representative will take your order over the phone. Don't miss out on a single issue, order today!

Buying Opportunities To Define Market Buffalo Nickels Show A Lot of Life

The coin market has turned in another checkered performance this week, with any overall pattern well-masked by the wildly divergent movements of individual series. About the only continuing trend is that "dated-material" is performing very well, especially when compared to the volatility of their Type counterparts. Of course, by "dated-material" we are speaking of the not-so-common issues within a series which are needed by collectors for a complete set—and we are not referring to the "super-rarities" that are searching for demand right now.

Silver Commemoratives seem to defy attempts at understanding their wholesale market behavior, especially when considering their popularity with collectors. Followed over time, they will be doing "OK", but just when you expect them to make a substantial upward move, they will disappoint you. Other collector series will be moving upward, and Commems will just sit there. Perhaps their popularity is now better judged in the number of coins moving instead of their price levels. It may be relevant to the coin market of the Nineties to understand that some coins will remain very popular despite decreasing prices. Anyone following Gold Commems closely for the past year is bound to be a masochist anyway, so they may not be bothered by the 50:0 ratio of minus signs this week. Are the entry costs just too high for collectors in this series?

The Morgan Dollars, which had been a leading indicator of the rising market, have sagged a bit this week. More significant than whether they had gone up or down is the incredible activity they displayed in Bid adjustments: nearly 250 plus signs against nearly 350 minus signs. Many of the changes were rather small increments, but the fact that dealers are "fine-tuning" their Bids reflects a healthy market situation. Peace Dollars turned in an overall decline, but managed to show a little life in MS63 and MS64.

Mint State Type Coins are still demonstrating some volatility, to be sure, but also a reassuring resilience. Pluses are outnumbering minus signs, with activity scattered across the chart. Proof Type coins, after last week's dismal performance, also turned in a positive week, with pluses outnumbering minuses 3 to 1—the 1961 through 1974 coins are attracting the most interest.

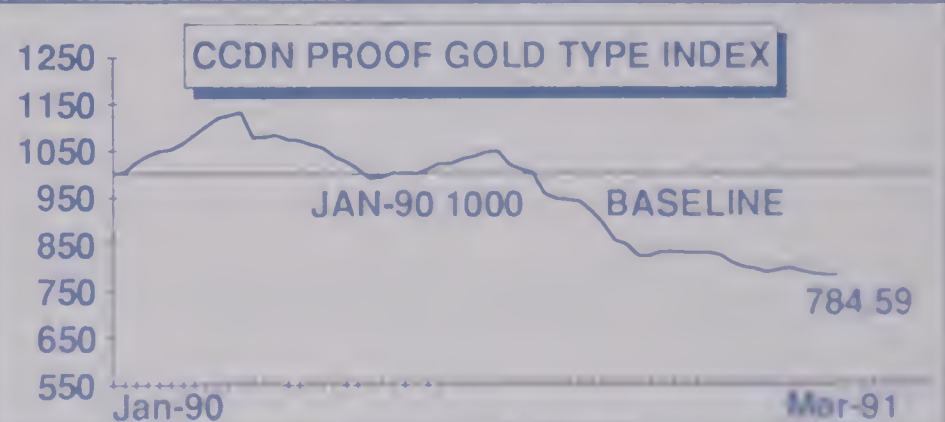

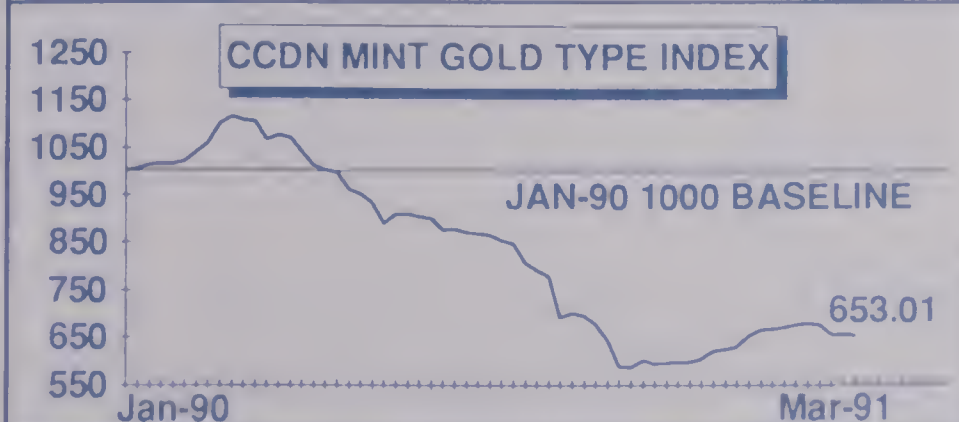

Mint State Gold Type coins were squarely in the minus column this week, although Bullion was basically unchanged, with gold the largest inventory category of many dealers. A healthy market here means a lot to the overall numismatic market. Proof Gold Type was mixed this week, with most of the activity in the lower grades.

Buffalo Nickels have to be this week's star performer. The upward movement of Bids on a wide range of dates and grades has overwhelmed the few minus signs, the only significant observation from the chart is that interest has not spread to the MS67s (few of which can be found among the early mint-marked dates). Under other circumstances, we would point to this series as being one that is popular with collectors, and accordingly, we expect it to do well in a market that is increasingly collector-driven. We aren't sure how accurate that observation is now, especially in comparison with the results in the other collector-dominated charts: Morgans, Walkers, Silver Commems. Still, it is comforting to know that at least something is in demand.

Mercury Dimes ended the week on the plus side, thanks to a lot of interest in MS65FB and MS66 issues, considering the large population counts on many of these issues, it may be assumed that collectors will still opt for quality when it is reasonably priced. Walking Liberty Halves are about unchanged, with a nice balancing of up and down Bidding activity. Proof Singles, which have been weak of late, were mixed, with most plus signs occurring on the higher grade specimens.

IN TODAY'S MARKET, CAN YOU AFFORD NOT TO SELL THROUGH HERITAGE NUMISMATIC AUCTIONS?

In today's coin market, one grading point can make a difference of several hundred percent in the value of an uncirculated coin. And it's well known that not all grading opinions are equal. In fact, repeated submissions of the same coin, to the same service can result in two, or sometimes even more different opinions. So even if your coin is certified and you sell it for "over bid", that doesn't mean that you got all the money it was worth.

GETTING THE MOST MONEY

In order to receive the most money for your coins, they must be encapsulated at the highest grade they are ever likely to get. Any auction company that promises the highest prices for your coins, cannot possibly deliver on that promise without carefully examining each coin, and making an informed decision as to which service the coin should be submitted, or if it is already certified, whether or not resubmission is advisable.

THAT'S WHERE WE COME IN

No company is better qualified than Heritage Numismatic Auctions to make these difficult decisions. Through our affiliate, Heritage Rare Coin Wholesale, we have ready access to the opinions of four individuals who have all graded for PCGS at one time or another. They are involved with trading coins on a daily basis, and they examine literally thousands of coins per week, making exactly these types of decisions for a living. To put it bluntly, top talent such as this is simply unobtainable at any other auction company.

GET WITH THE PRESENT

The single most important factor in getting you the most money for your coins is the certified grade at which they're auctioned. In fact, nothing else is even close. So, if you're truly interested in getting the most money for your coin collection or portfolio, put the experts at Heritage to work for you.

Market Direction Reverses Again Morgans Lead Recovery

Just when all the nay-sayers were dusting off their predictions about the imminent demise of the rare coin market (after only two weeks of minus signs), back it comes! And along a broad front as well! So what's going on?

Silver Commemoratives advanced more than 3:1 over declines, most actively in the MS62 through MS65 grades. Gold Commems, which declined generally, are still trying to reach "collectable" levels. Morgan Dollars rallied impressively, with plus signs outnumbering declines almost 4:1. Peace dollars continued their quiet climb of recent memory, with advances peppering the charts. Mint State Type showed a large number of Bid changes with advances outnumbering declines 4:1. Mint State Gold Type showed a general decline, although there were some scattered plus signs in the lower uncirculated grades. Proof Type advances overpowered declines by 5:1, with Copper strong as were the middle grades of Silver issues. Proof Gold Type showed mixed results, ending on the minus side.

Buffalo Nickels advanced more than 8:1 over declines, with notable advances in MS64 through MS66. Mercury Dimes advanced about 3:1 over declines, with plus signs throughout MS64 to MS66FB. Walking Liberty Halves advanced more than 3:1 over declines, with most of the pluses in the MS61 through MS64 grades. Activity in Proof Singles was mixed, although squarely on the "up" side.

With a few exceptions, the coin market has staged an impressive, broadly-based recovery. While we don't want to make too much of this latest market reversal (although we will admit to always being glad to bear good news), coins go up and coins go down. And yes, the overall coin market has suffered some substantial declines (as measured in the *CCMI* chart below), but when viewed with a long term perspective, coins have done very well as an investment. A speculative investment, to be sure, but name one "Hobby of History" that isn't? Coins have certainly fallen since January of 1990, when we started our charting, but remember how quickly they had climbed in the two years prior to that; it wasn't the first time, and we suspect that it

won't be the last time that the size of a drop in coin prices will be greatly influenced by the size of the previous increase.

Among other healthy signs in the current market, auction sales continue to attract a large audience of educated, willing buyers. Despite record numbers of coins coming onto the market in recent years, auction customers have demonstrated an uncanny ability to absorb the supply. Bowers & Merena's recent Marvin P. Matlock, M.D. Collection sale held in New York had more than 200 floor bidders register. Among the highlights:

Denomination	Certified Grade	Price Realized
1796 Half-cent, B-2	NGC55	\$30,200

Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Shane Downing

The Classified C in Dealer new letter reports the national market for refined oils only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer, and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

City _____ State _____ Zip _____

Some bids within represent very conservative sight/unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN albeit on a sight basis.

Coins May Be Forever But Timing is of Utmost Importance

The power of compounding interest plays an important role in many pieces of literature – everywhere from Aesop to The Restaurant on the Edge of the Universe. Underlying each demonstration of the power of compound interest is the assumption that 'past results *are* a good indicator of future returns.' In the collectibles field, we know that this isn't always the case. Older collectors can remember a time when Tiffany lamps were attic junk, and bags of silver dollars could be lugged home from the bank.

Any pricing history of U.S. coins covering more than a decade will show the cycles created by a free market operating on the principles of supply and demand. Sometimes coin prices go up, and sometimes they go down; the greater the increase, the greater the following decline (generally). Most importantly, *the overall trend in coin prices over decades has been upward*, and this has been the bedrock of many successful investments. Sometimes the entire market will move in one direction; other times, selected series will move in and out of favor.

The current market is definitely sending confusing signals. Silver Commemoratives are continuing their recovery started late last year; Gold Commems are showing 42 Minus signs to one Plus sign, and that illustrates their pricing tendency over the same period. Morgan Dollars (especially the DMPLs) have been doing very well over the last four months, while Peace Dollars are just starting to show real signs of life. Mint State Type has been evidencing a great deal of confusion, as vacillating prices have begun to move downward; Proof Type, which was strong for some time, has been hard hit recently.

Mint State Gold, with many lower grade issues tied closely to bullion, has just been "a disaster"; Proof Type Gold, with virtually no ties to 'Gold Spot', has been especially hard hit in the higher grades. Buffalo Nickels continue to demonstrate strength, while Mercury Dimes are a mixed bag this week; Walking Liberty Halves are on the minus side of activity (especially in the later dates). Proof Singles, which for a short while seemed to be leading the market, now are finding few buyers at existing levels.

As our front-page charts will indicate over time, each series will follow its own cycles of increases and decreases. Generally, they may follow the

pattern developed by the overall market, but at times they will demonstrate a mind of their own. Following these cycles may not be easy, but it does lie at the core of numismatic investing. Knowing what comes are but permits both the buyer and seller to make informed decisions in the transaction. The *contrarian* will search for out of favor coins; the *technician* will search for series already on the way up; and the *collector* will search for coins that he likes at a price that he can accept. Each adds his own special demand to the marketplace.

What does this all prove? Only that it is extremely difficult to make any generalizations about the coin market, and therefore it is extremely difficult to make generalizations about the investment potential of rare coins. Fortunes have been made by investors with the courage to buy at the bottom and the good 'luck' of selling at the top of a cycle. Money has been lost in all markets, whether land, stocks, or Shirley Temple Dolls, by investors who wait to buy until the top of the cycle has been reached and then decide it's time to jump in.

CCDN COIN MARKET INDEX: 767.35 - 1.47 JAN 5, 1990 BIDS = 1000

Buffalo Nickels	834.43	+ 23.46	Franklin Halves	712.66 WK 3
			Saint Gaudens	795.93 WK 3

PCGS Professional Coin Grading Service, Newport Beach, CA Established in 1986, PCGS grades and authenticates U.S. and world coins. PCGS has certified more than two million coins. All coins must be submitted through one of the 560+ authorized dealers; contact PCGS at 800-447-8848 for a list.

PCGS has more than 15 graders on its staff; each coin is examined by at least two graders before the final grade is determined. No person involved with the grading process may be active in the buying or selling of U.S. coins. Fees start at \$26 or \$35 depending on the type of coin, plus postage and insurance; several levels of Express service are also available. PCGS coins are sonically sealed in an inert plastic "NumisCap" holder before return to the customer.

PCGS has a cash-backed Guarantee of Grade and Authenticity. PCGS has a comprehensive grading set which includes most major series. PCGS is a grading service only and does not make markets. PCGS dealers are responsible for their own making of markets in PCGS coins. PCGS publishes a monthly Population Report.

ANACS ANACS: The first authentication service (established in 1972) to which grading services were added in 1978. ANACS authenticates and grades all U.S. coins and Patterns, rendering unbiased third party grading opinions using prevailing market grading standards. After grading, the coins are placed in the sonically sealed ANACS Cache™.

ANACS has over 700 active submission centers. All coins can be sent through the submission centers or directly to the ANACS office. Submitters can also become Market Makers. The fee for a standard submission is \$23, and various levels of express service are available between \$40 and \$125.

Free information is available from ANACS, P.O. Box 182141, Columbus, Ohio 43218-2141. Phone 1-800-888-1861.

CCDN Bids reflect 1986 and newer certified coins, and assume the certificates have no negative comments. ANACS Bids are listed only once each month.

NGC Numismatic Guaranty Corporation of America. Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance. After it is graded, it is then placed in a 'lab tested' (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 450 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit. "Arms length" NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute. Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at Heritage Plaza, Highland Park Village, Dallas, TX 75205-2788. Phone (214) 528-3500. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Hepperlin (N.C.I. Grading Guide), which may be considered somewhat liberal (potentially compared to the other three services listed). Regular cost is \$24 per coin. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded with a charge of 50% of the regular fee. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. Due to current trading volumes, NCI coins will only be listed once a month. CCDN Bids reflect 1987 and newer certified coins.

Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids. Certification does not guarantee protection against the normal risks associated with potentially volatile markets.

The Bluesheet

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

The *Certified Coin Dealer Newsletter*
announces a new **monthly** publication
featuring **Lowest Asks or Last Trades**:

the CCDn ASKSHEET

With the **sight-unseen** market beset by controversy over declining Bids, dealers need to have more complete information **now, more than ever!** Responding to the requests of scores of dealers, we are pleased to provide an important new source of necessary information. Even if the **sight-unseen** Bid reaches unrealistically low levels, having wholesale Low Ask or Last Trade information available will allow dealers to make more informed buying and selling decisions. And the spread observed will also give a strong indication of market liquidity.

The *CCDn ASKSHEET* will provide subscribers with the Lowest Ask or Last Trade prices seen during the preceding month in the dealer-to-dealer, wholesale marketplace. While we are offering this publication separately from the *Bluesheet*, we must point out that neither publication alone will give a complete picture of current wholesale market values. In fact, every page of the *ASKSHEET* will contain a caveat to that effect. After all, the Lowest Ask doesn't necessarily represent market value any more than the Highest Bid. But together, they should define the parameters of wholesale market value.

Hopefully, access to these dealer-to-dealer offers to sell will help stabilize the market price of coins. Uncertainty of value in a supply/demand marketplace means that fewer transactions can occur, and that benefits neither potential buyer nor potential seller.

Subscribe now to the *CCDn ASKSHEET*. Compiled by the same staff that has made the name *Bluesheet* synonymous with accuracy, timeliness, and reliability.

We Collect Clients. . .

Our Clients Collect Coins

Not many dealers are willing to make a lifetime commitment to their clients. In fact, **Joel D. Rettew & Son Rare Coin Brokerage** is the only American numismatic firm to make this offer to you:

- We will work for you in a brokerage capacity, which means that *we are on your side* in making money in the numismatic marketplace!
- We can sell your coins *for you* in retail transactions for a 10% commission!
- We will sell coins *to you* at a very conservative mark-up (our average is about 10%)!
- We will give you a FREE statistical analysis of your current portfolio. (Minimum \$20,000)

What's in it for us?

- Financially, we will earn 10% of any profits that we assist you in generating for your account.
- More importantly, we want *all* of your coin business *for life*. We want a long-term relationship with you as a customer and as a friend.

There are many reasons why **Joel D. Rettew & Son Rare Coin Brokerage** should be your dealer of choice. We have been buying and selling coins since 1953, nearly four decades of service to our old customers and *friends*. But we are just as serious about making *new friends* through servicing new customers - and we are serious enough to offer benefits unmatched by any other dealer in America!

Joel D. Rettew & Son Rare Coin Brokerage

Discounted Sells Drive Market Downward Teletype Bidders Question Sight-Unseen Trading

The sight-unseen rare coin market has embroiled itself in controversy once again. Many dealers, after deciding that the sight-unseen Bids on the teletype services were 'too low', advocated the pulling of all Bids, thus driving the posted Bids even lower. The number of supporting Bids on the trading networks has accordingly been substantially lowered.

One thing is certain: The coin market on which we report is lower this week, and it is lower due to dealers offering coins for sale below last week's Bids. *And make no mistake—coin prices are declining because the laws of supply and demand don't just push prices up.* As we have done in the past, when many posted Bids have been withdrawn (for any reason), we have postponed dropping the *Bluesheet* Bids just because the highest visible national sight-unseen Bid has been lowered. While there are still a large number of minus signs in this week's issue, easily 95% of them are due to discounted sells by dealers. We caution readers that activity in the market this week should be taken only with due consideration.

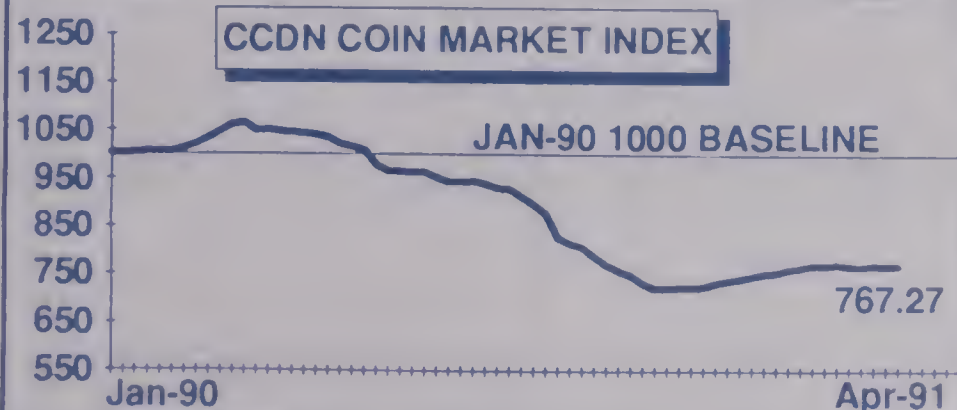

Our regular subscribers will have read many times in these editorials that there are some very basic problems inherent in a sight-unseen Bidding system for all but the most generic of coins. Simply put, why would dealers want to buy a coin sight-unseen when their customers will want to inspect the merchandise? Why Bid at a level higher than is appropriate to receive what may be the worst possible example? In a hobby/industry whose very existence is based upon the careful examination of coins, and their aesthetic appeal, it just doesn't seem practical to stick yourself with ugly coins that still make the grade. Sight-unseen makes sense on large orders of generics—how carefully do you

need to examine an order for 100 Santa Fe MS621 Hay for \$3,000 or \$10,000 or \$50,000 coins?

And what happens when the only Bid on a \$10,000 coin is \$1,500? The old-time dealer would say that such "Low ball" bids are a waste of time. The conscientious teletype dealer would claim that they are dangerous. Just remember that the concept behind the original sight-unseen market was *market liquidity and not market value!* If that \$1,500 Bid is the highest visible national Bid, then that is what the coin is "worth" in the sight-unseen instant liquidity market. But as we have pointed out *ad nauseam*, on no account should this be confused with the value of that coin in the real world.

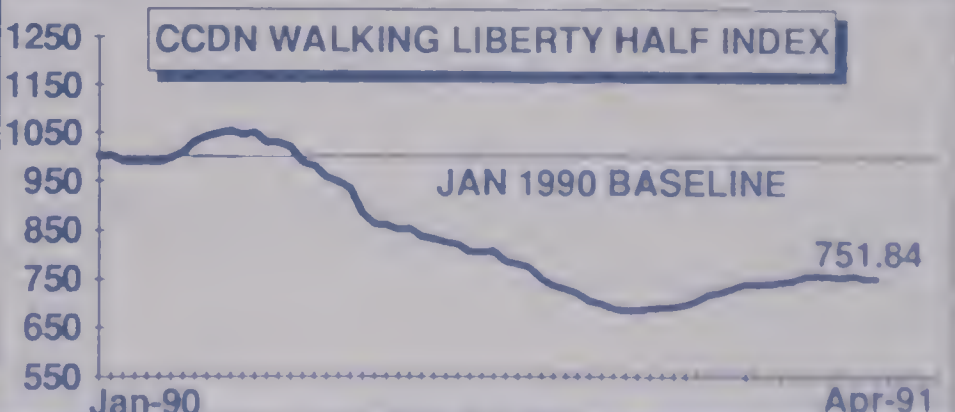

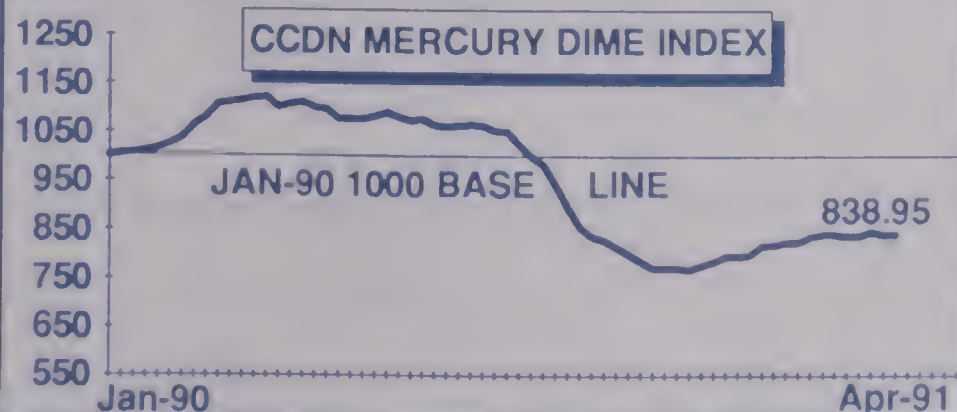

The levels of true 'worth' or 'value' are difficult to establish. Is a coin "worth" what the high Bidder is willing to pay? What the last specimen traded at? What the current lowest Ask is? What the last one sold for at auction? Both dealers and collectors will immediately recognize flaws in all of those approaches. Dealers can try to disguise a dropping market through insisting that only their selling prices be listed, but that approach can only work for so long. In a free, supply/demand market, information cannot be suppressed, and the ultimate consumer cannot be fooled.

Since the *Bluesheet* was created to reflect activity in the certified sight-unseen market, you can expect that as that market evolves, the *Bluesheet* will change along with it. We add our voice to those reasoned arguments that change is necessary. We are in the business of providing the market with the information that they need. Together, numismatists of "good-will" and "common-sense" will work towards improving the hobby/industry.

CCDN COIN MARKET INDEX: 767.27 - 0.08 JAN 5, 1990 BIDS = 1000

The Blue Sheet

The Certified Coin Dealer newsletter reports the national market for certified coins daily following the most active areas of the coin market. CCDn uses every means available to insure accuracy and completeness of the sight unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

NUMISMATIC
GUARANTY
CORPORATION
OF AMERICA

For the NGC dealer nearest you, contact Numismatic Guaranty Corporation,
P.O. Box 1776, Parsippany, New Jersey 07054, tel. (201) 994-6322.

P/L Downers may be semi-reflective on one or both sides, with less reflectivity than the deep-mirror Proflikes. Bids for P/Ls are usually much lower than for DMPL but command some premium over non P/L strikes.

The gold coins in this chart trade very infrequently. These are the last known bids.

Bids for Lincoln cents are for full red specimens in MS64 and higher.

Matte Proof Cent Bids for grades of PR64 and better are for full red cents. PR63 and lower Bids are for Red and Brown cents; See Proof Type Coins page for Type Bids in all colors.

We Collect Clients. . .

Our Clients Collect Coins

Not many dealers are willing to make a lifetime commitment to their clients. In fact, **Joel D. Rettew & Son Rare Coin Brokerage** is the only American numismatic firm to make this offer to you:

- We will work for you in a brokerage capacity, which means that *we are on your side* in making money in the numismatic marketplace!
- We can sell your coins *for you* in retail transactions for a 10% commission!
- We will sell coins *to you* at a very conservative mark-up (our average is about 10%)!
- We will give you a FREE statistical analysis of your current portfolio. (Minimum \$20,000)

What's in it for us?

- Financially, we will earn 10% of any profits that we assist you in generating for your account.
- More importantly, we want *all* of your coin business *for life*. We want a long-term relationship with you as a customer and as a friend.

There are many reasons why **Joel D. Rettew & Son Rare Coin Brokerage** should be your dealer of choice. We have been buying and selling coins since 1953, nearly four decades of service to our old customers and *friends*. But we are just as serious about making *new friends* through servicing new customers - and we are serious enough to offer benefits unmatched by any other dealer in America!

Joel D. Rettew & Son Rare Coin Brokerage

What everybody ought to know...

About the PCGS Population Report

And why, for \$10 an issue, you can't beat the value!

Each and every coin certified by PCGS, some you probably have in your collection, is in the PCGS Population Report. That's a lot of information. And as you can imagine, there are many different ways to organize and publish this data.

That's why we've been asking coin enthusiasts across the country, from the novice to the expert, what they want out of the PCGS Population Report. The result includes some improvements we think you should know about.

CIRCULATED COINS - It used to be, you had to wait two-and-a-half months to get circulated coin information. Now you get these statistics monthly.

WORLD COINS - Whether you have any world coins or not, you can see how they're doing on a monthly basis. Coins from Canada, England, Germany, Japan, Switzerland, and U.S. Philippines are already included and provide today's coin enthusiast with a whole new world of options.

INFORMATION - Each of the more than two million PCGS certified coins listed in the book are categorized by type and grade. This means that if you have a 1881-S Morgan silver dollar, PCGS graded MS65, you can find out with the turn of a page, just how many coins like yours are out there. This is an important factor to consider when researching facts on your coins.

2,480,712 Coins Graded with a
Declared Value of \$2,903,108,300

THE STANDARD FOR THE RARE COIN INDUSTRY.

Certification by PCGS does not guarantee protection against the normal risks associated with potentially volatile markets.

The report now costs an amazingly low \$10 per issue.

MINTAGE QUANTITIES - Listed along with each coin is the quantity originally minted. This too, is useful information and having it this handy can be a valuable time saver when you need all the facts in a hurry.

READER FEATURES - We designed the format to be easy to read and with the step-by-step User's Guide to help you, you'll have no trouble at all

getting the information you need. A comprehensive Glossary of Terms is also included and provides definitions for abbreviations and covers individual characteristics of your coins.

GREAT PRICE - By switching to a new format we were able to cut costs and generate the most handsome and user-friendly Population Report ever (please call us for additional savings on multiple subscriptions).

HERE'S HOW TO ORDER - Simply complete and return the convenient coupon below. Or, if you like, call our toll-free number and a customer service representative will take your order over the phone. Don't miss out on a single issue, order today!

Plus Signs Mark This Week's Activity Wholesale Market Appears Healthier

The sight-unseen certified coin market is "on" again this week, after a few weeks of "off" behavior. The positive side of the volatility inherent in this market is its ability to rebound quickly. All it takes are a few serious bidders, and the market picks right back up.

This week we are continuing last week's policy on changes in the *Bluesheet Bids*: *We raised Bluesheet Bid on a higher posted Bid, but we didn't lower Bluesheet Bid on a lower posted Bid; Bluesheet Bid was lowered only in response to a discounted Sell or Trade*. Since this is a departure from our normal methods of reporting Bid in the *Bluesheet*, we again advise subscribers that there may not always be an active Bidder in the sight-unseen marketplace at these levels; however, there are *always* dealers willing to buy coins on a sight-seen basis (depending upon their needs at the time).

The best news that we have to report is that the number of minus signs this week (that is, the number of discounted sells) is well below the level observed last week. This can be interpreted as dealers having greater faith in the coin market, collectors and investors having greater faith in the coin market, or all of the above. The number of plus signs is substantially higher than we have seen recently; this is even more impressive because some dealers are still actively boycotting the Bid side of the Certified Coin Exchange (one of the several teletype services).

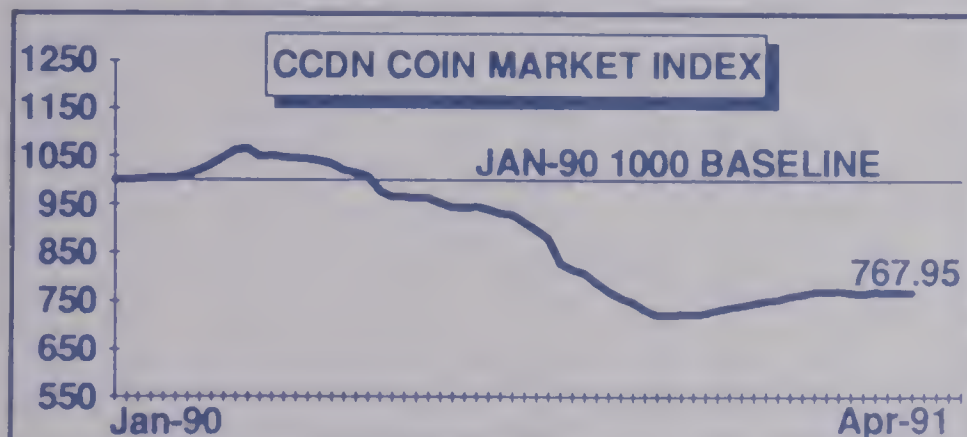

The positive effects of the higher Bidding is visible across most of the charts. Gains outnumbered declines in the Silver Com-

memoratives more than 2:1, but Gold Commems continue to deflate right in front of our eyes. Morgan Dollars were generally steady but will register a nice increase due to some substantial increases on selected DMPL Bids. Peace Dollars are largely steady but still aren't generating the level of enthusiasm that Morgans seem to inspire.

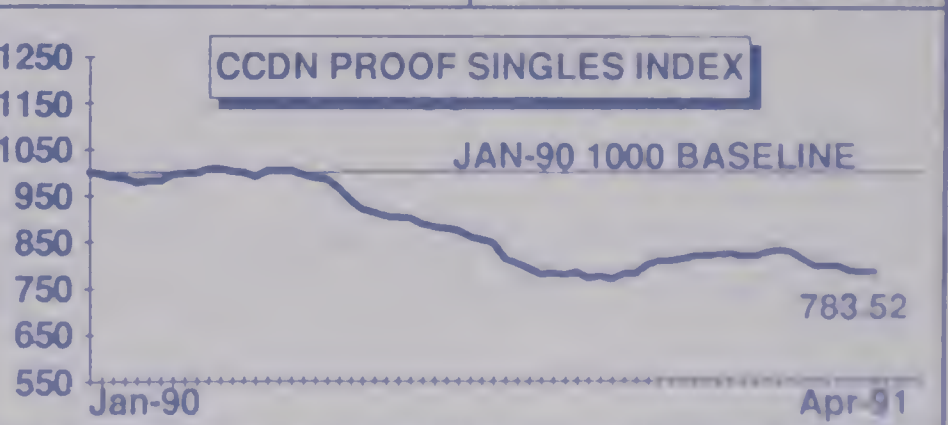

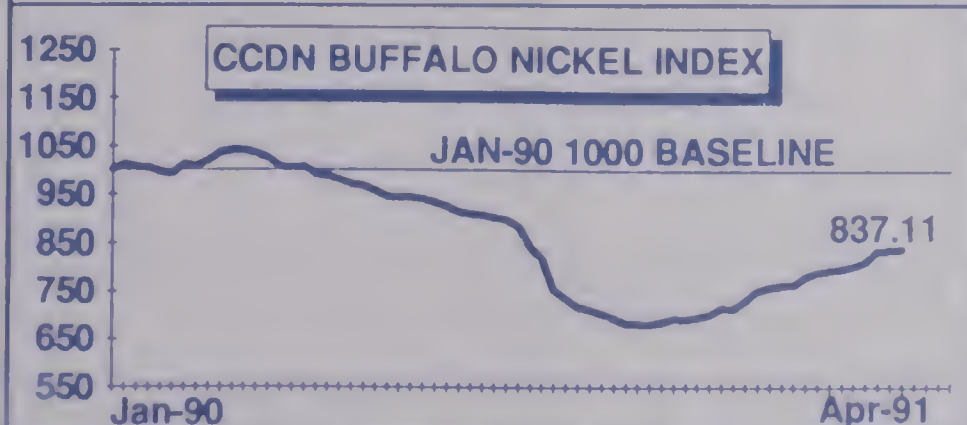

Mint State Type weighed in on the plus side, with many of the advances in the lower grades. Proof Type coins are up 2:1. Mint State Gold Type is beginning to show some life, with pluses outnumbering minuses 5:1. Proof Gold Type is largely steady with a few scattered upward ticks.

Among the specialty series, Buffalo Nickels were solidly positive, Mercury Dimes extremely positive, and Walking Liberty Halves stronger in the earlier issues, with some weakness in later dates and better grades. Proof Singles stayed on their see-saw and managed to climb this week.

The monthly charts allow us to examine changes over a greater time span, although with the volatility of late in the marketplace it becomes difficult to put too much faith on any short-term comparisons. Standing Liberty Quarters registered a substantial decline yet trading activity in the series continues to be strong. Franklin Halves showed a substantial increase, but trading seems to be very sparse. The \$20 Saints seem to be suffering from the general malaise that has struck the U.S. Gold market this year, with minuses outnumbering pluses 2:1 (mainly due to Type Bids).

CCDN COIN MARKET INDEX: 767.95 + 0.67			JAN 5, 1990 BIDS = 1000	
Bluesheet Chart	Index	Change		
Silver Commems	707.83	+ 3.17	Mercury Dimes	819.67 + 0.72

The Bluesheet

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer, and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

The *Certified Coin Dealer Newsletter*
announces a new **monthly** publication
featuring **Lowest Asks or Last Trades:**

the CCDn ASKSHEET

With the **sight-unseen** market beset by controversy over declining Bids, dealers need to have more complete information **now, more than ever!** Responding to the requests of scores of dealers, we are pleased to provide an important new source of necessary information. Even if the **sight-unseen** Bid reaches unrealistically low levels, having wholesale Low Ask or Last Trade information available will allow dealers to make more informed buying and selling decisions. And the spread observed will also give a strong indication of market liquidity.

The *CCDn ASKSHEET* will provide subscribers with the Lowest Ask or Last Trade prices seen during the preceding month in the dealer-to-dealer, wholesale marketplace. While we are offering this publication separately from the *Bluesheet*, we must point out that neither publication alone will give a complete picture of current wholesale market values. In fact, every page of the *ASKSHEET* will contain a caveat to that effect. After all, the Lowest Ask doesn't necessarily represent market value any more than the Highest Bid. But together, they should define the parameters of wholesale market value.

Hopefully, access to these dealer-to-dealer offers to sell will help stabilize the market price of coins. Uncertainty of value in a supply/demand marketplace means that fewer transactions can occur, and that benefits neither potential buyer nor potential seller.

Subscribe now to the *CCDn ASKSHEET*. Compiled by the same staff that has made the name *Bluesheet* synonymous with accuracy, timeliness, and reliability.

CCDn ASKSHEET

P.O. Box 11099 Torrance, CA 90510

Please start my subscription to the
CCDn ASKSHEET for the term checked
below. Enclosed is my Check / M.O.

Learn the Million-Dollar Secrets of Coin Grading!

A \$1 Million Value - Yours For Only \$11.95

✓ GET MORE Coin for Your Money!

✓ INCREASE the Value of Your Rare Coin Investment!

✓ ENHANCE Your Enjoyment of Your Hobby!

✓ IMPROVE the Quality of Your Collection!

✓ SHARPEN Your Coin-Buying Skills!

Whatever Your Level of Experience, You're on Your Way to Becoming Your Own Coin Grading Expert from the Very First Page!

For the Novice...

- Glossary of Grading Terms (p. 13)
- How to Grade Mint State Coins (p. 21)
- Comparative Photos of Surface Preservation (p. 27)
- Comparative Photos of Differences in Strike (p. 32)
- A Formula for Grading (p. 49)
- How to Tell the Difference Between a Proof and Business Strike (p. 51)

For the Knowledgeable Collector...

- Comparative Photos Showing Variations of Strike on All Morgan Dollars (p. 38)
- Comparative Photos Showing Variations of Lustre on Morgan Dollars (p. 41)
- Comparative Prooflike Chart (p. 55)
- Why The Grading Services Might Return Your Coin (p. 157)

For the Expert Numismatist...

- Coin "Maps" Showing Visual Impairment Severity Levels on Major Series (p. 67)
- High Points of Design for All Major Series (p. 65)
- When to Play "The Bust-Out Game" (p. 157)
- What the Future Holds (p. 158)

Even If You Don't Buy Mint or Proof Coins, You Can Benefit From These Valuable Grading Techniques!

About the Author

James L. Halperin is Co-Chairman of the Board of Heritage Rare Coin Galleries the world's largest dealer of rare coins. A professional numismatist since 1969, he was elected to the Board of Governors of the American Numismatic Association

in 1989. Professionally qualified as a coin grader by the leading third-party grading services (PCGS, NGC, NCI and ANACS), he is widely recognized as one of the foremost experts on United States coinage.

The Contributors to this Book Have Made Millions Knowing How to Grade Coins!

Bruce Amphamer • Q. David Bowers • Ed Milas
Harvey Stark • Scott Travers
And dozens of other numismatic giants!

Read What These Leading Experts Have To Say About The Information Contained in this Book:

"...a common sense approach to a thorny issue, an important road map on how to do it the right way."

David L. Ganz, ANA Governor & PNG General Counsel

"A quantum leap forward for the industry in its noble quest to achieve perfection."

Maurice Rosen
Numismatic Counseling, Inc.

"Brilliant! A numismatic masterpiece!"

John Albanese
President and Founder of NGC

"Usable coin grading information from one of the most knowledgeable dealers in the business. Written in pleasant straightforward language, *How To Grade U.S. Coins* could become the manual of rare coin grading and evaluation."

Philip Schuyler
Ellesmere Numismatics

"Jim may be THE greatest coin mind...when Jim Halperin talks seriously about rare coins, everybody listens."

David Hall
President and Founder of PCGS

FREE BONUS POSTER!

Beautifully printed on sturdy laminated stock, this poster features the colorful cover of *How To Grade U.S. Coins* along with a useful glossary of numismatic terms. An attractive and informative addition to any numismatist's study or coin room, it's yours FREE (a \$6 value) when you order your copy of *How To Grade U.S. Coins*. But hurry! Supplies are limited, so order your copy today!

Satisfaction Guaranteed: If you're not **DELIGHTED**, just return the book for a full refund. (The poster is yours to keep.)

HOW TO GRADE U.S. COINS is your step-by-step guide to the secrets of coin grading. In a clear, conversational style, leading American numismatist James Halperin de-mystifies this often misunderstood art with easy-to-learn techniques you can begin to apply right away.

Plus Signs Reflect Active Interest "Sight-Seen" Discussions Continue

While dealers continue to discuss the controversial topics of sight-unseen vs sight-seen trading, and "Bid" vs "Ask" values, we are busy listening. In our editorials, we have recognized many times that there are drawbacks to the concept of sight-unseen, the first of which is that dealers must ultimately be unhappy over having to buy a coin sight-unseen when they may have to sell it sight-seen to their client. And we have commented regularly that sight-unseen Bid equals "value" only on the most generic of coins. On the other hand, the electronic trading networks have been an invaluable aid to dealers, allowing them to find (and buy!) the coins they need, or sell material at prices they welcome.

As the market struggles to find a workable solution that embraces all needs, suggestions have been flying fast and furious. Since the *Bluesheet* usually reports the highest national sight-unseen Bid, many of the proposals put forward have also included detailed suggestions on how the *Bluesheet* should report "prices" (or "Bids", or "values", or "wholesale market values", or "Asks"—you get the idea). *On the back of this issue, we have included a survey seeking your opinion on how the Bluesheet should change, or if it should change.* We sincerely request that every one of our subscribers take the time to respond—the *Bluesheet* is your tool, and we need to know how you use it. We care about your opinion.

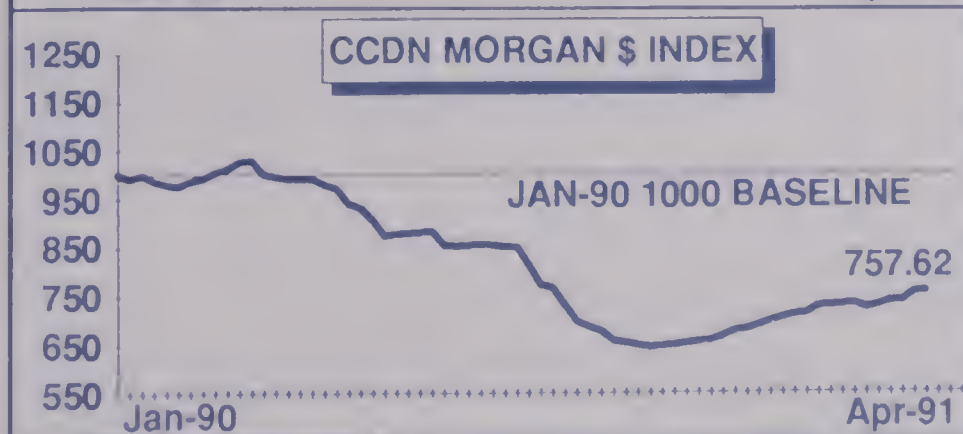

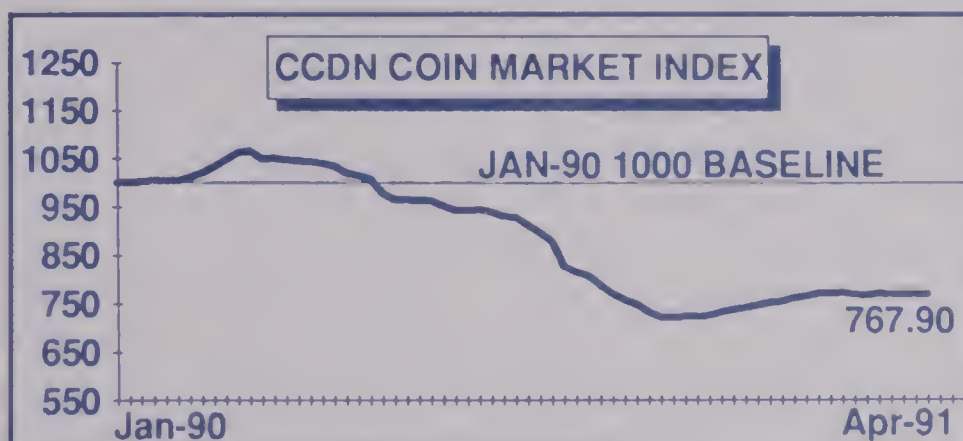

While the market seeks solutions, we are continuing our recent policy on changes in the *Bluesheet* Bids: *We raised Bluesheet Bid on a higher posted Bid, but we didn't lower Bluesheet Bid on a lowered posted Bid; Bluesheet Bid was lowered only in response to a discounted Sell or Trade.* Since this is a departure from our normal methods of

reporting Bids in the *Bluesheet*, we again advise subscribers that there may not always be an active Bidder in the sight-unseen marketplace at these levels; however, there are always dealers willing to buy sight-sight-seen if not sight-unseen.

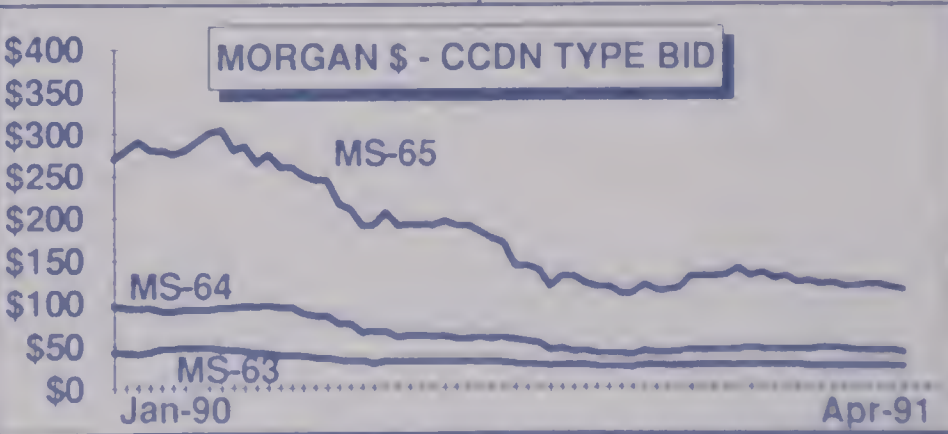

This week's market continues to demonstrate the same strengths that we saw last week. There are many Bidders who are raising their sight-unseen Bids because they want to buy coins. Higher Bids are being registered on all of the messaging systems. Higher Bidders on CCE obviously feel that buying coins through that trading exchange is a very efficient method of obtaining needed inventory, and many are unhappy over suggestions that the CCE become an Ask-based system. Proponents of an Ask-based system argue that Bids are degenerative, and that the public confuses sight-unseen Bids with "value".

One thing is certain—the coins themselves haven't changed. How we look at coins seems to change on a regular basis, and the tools that we use to assemble great collections and service our customers' needs change. We all know that values have dropped, and that over the recent short-term coins have not been a stellar investment—but does that mean that coins are now a bad investment, or that at these levels they represent a great investment? We change, our concepts change, our marketing changes, our packaging changes, but thankfully the coins remain. What should also remain is our collective desire to educate our customers, and educate the public to the joys that can be derived from numismatics.

There is no need to make the coin business something it is not. It is what it is and nothing more. And nothing less.

CCDN COIN MARKET INDEX: 767.90 - 0.05			JAN 5, 1990 BIDS = 1000

The Blueprint

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CCDn albeit on a sight basis.

Should the Bluesheet change?

Due to the current controversy in the sight-unseen Bidding marketplace, many dealers have put forth their *detailed* plans on how *they* think the *Bluesheet* should be run. Because we take our obligations to the *entire* market very seriously, we have carefully listened to all of these suggestions; because the *Bluesheet* is so important, we **need** to know how *YOU* feel.

What the Bluesheet is:

The *Bluesheet* reports the highest visible national **sight-unseen** Bid for certified coins. This High Bid should not be confused with *wholesale market value* (which would and should be higher), except for the most generic coins.

What the Bluesheet isn't:

The *Bluesheet* DOES NOT report the current *wholesale market value* of certified coins, except for the most generic issues where the spread between Bid and Ask is extremely thin. In theory, you should not be able to consistently buy coins (and especially not *rare* coins) at Bluesheet Bid, although few days go by that someone doesn't report some dealer selling something below Bid (which would ultimately lower an unsupported Bid).

What the Bluesheet should be:

Please give each of the following your vote in order of preference: 1 to the idea you think is best, 2 to the next likely candidate, etc.; put an X on ideas you think unworthy of any consideration.

Changes:

___ Leave the Bluesheet just the way it is (High Bid), and leave the ASKSHEET (Low Ask or last Trade) just the way it is. That way, each dealer can use each publication to his best marketing advantage.

___ Continue your recent approach: raise Bids only on a higher Bid; lower Bids only when a lower Ask or Trade is found. This would change Bid into a *wholesale market value* over time.

___ Combine the Bluesheet and ASKSHEET (as a weekly) and charge \$149 per year. The page count would double on all the pricing pages; all of our preparation, paper, printing and postage costs would double.

___ Combine the Bluesheet and the ASKSHEET; every weekly issue would feature: 1) a combined PCGS/NGC High Bid (one combined Bid for both services) and 2) weekly Low Ask or Last Trade information. This will require a modest increase in the subscription rate to \$125.

Radical changes:

___ Eliminate all sight-unseen Bids and only list Asks.

___ Eliminate sight-unseen Bids and make Bluesheet prices suggested RETAIL prices.

___ Eliminate sight-unseen Bids and make Bluesheet prices suggested *wholesale market value* prices.

___ Other suggestions? _____

Name and address (optional)

Remember, we need to hear from you. The CCDN is a *tool*, and we need to hear from *you* to make it the *most effective tool possible*. Thank you.

Sight-Unseen Bid Levels Lower Spreads With Asks Tighten

With the recent discussions on the future direction of the certified marketplace, we have been regularly reminding our subscribers that **sight-unseen Bid** equals "value" only on the most generic of coins. This is a safe enough statement, because whatever your definition of "value", a \$50 spread on a \$500 coin is certainly going to get everyone into the same ballpark. And this seems a good place to remind readers that we are continuing our recent policy on *Bluesheet Bids*: **We raised Bluesheet Bid on a higher posted Bid, but we didn't lower Bluesheet Bid on a lowered posted Bid; Bluesheet Bid was lowered only in response to a discounted Sell or Trade.**

In preparing the latest **CCDN ASKSHEET**, we were reminded of the more far-reaching implications of tight spreads. Simply, there are many \$1,000 coins showing a Bid/Ask spread of \$50 or less. Implied in the rationale for sight-unseen trading is the belief that a more efficient coin market will demonstrate tighter spreads as buyers and sellers share greater agreement on "value". At its extreme, this assumes that a trade can occur only when the spread approaches zero.

It is our contention that most wholesale dealers cannot survive in an inventory-based coin market with the possibility of \$35 or even \$50 margins on \$1,000 coins. Perhaps some of their traditional functions will be assumed by the electronic networks. This leaves several possibilities for survival tactics, some of which are now working for retail dealers. One that we have mentioned before is forming closer "business" relationships with your best customers, and using their holdings as "extended inventory". When demand rises, the customer is offered the opportunity for a profitable trade. Of course, this requires customers who are predominantly investment-oriented.

Other leading dealers have taken the process a step further, and applied it to all of their customers; they have become **coin brokers**. With this approach, the dealer tries to insulate himself as much as possible from the effects of holding a large inventory position in rare coins; this can limit profit in an up-market, but will prevent disaster in a declining market such as we have witnessed over the last year.

Let's take a \$1,000 coin now worth \$500. The dealer with no inventory has suffered a \$100 loss; the dealer willing now on behalf of a customer for a 10% commission has "lost" only \$10 (his premium on the decline). Naturally, this leveraging occurs on the profit side as well in a rising market. The dealer who is willing to forego the big gains in order to avoid the big losses gets other advantages out of leaving the inventory burden with his customers: His enormous carrying costs are greatly reduced or eliminated (insurance, interest, security, etc.); the dealer can better position himself as an "associate" of the customer with complementary goals ("The more you make, the more I make"); and greater identification with the way real estate is sold (especially with "Liquidity").

It will be interesting to see how many dealers take this approach over the next few years. It certainly will be extremely difficult for the thousands of local coin shops to change their traffic-driven orientation that demands inventory. If enough coin dealers become brokers, it could change one of the oldest aspects of the coin market.

Please remember to return your Survey from last week's Bluesheet!

CCDN COIN MARKET INDEX: 765.63 - 2.28 JAN 5, 1990 BIDS = 1000

PCGS Professional Coin Grading Service, Newport Beach, CA. Established in 1986, PCGS grades and authenticates U.S. and world coins. PCGS has certified more than two million coins. All coins must be submitted through one of the 560+ authorized dealers; contact PCGS at 800-447-8848 for a list.

PCGS has more than 15 graders on its staff; each coin is examined by at least two graders before the final grade is determined. No person involved with the grading process may be active in the buying or selling of U.S. coins. Fees start at \$26 or \$35 depending on the type of coin, plus postage and insurance; several levels of Express service are also available. PCGS coins are sonically sealed in an inert plastic "NumisCap" holder before return to the customer.

PCGS has a cash-backed Guarantee of Grade and Authenticity. PCGS has a comprehensive grading set which includes most major series. PCGS is a grading service only and does not make markets. PCGS dealers are responsible for their own making of markets in PCGS coins. PCGS publishes a monthly Population Report.

ANACS ANACS: The first authentication service (established in 1972) to which grading services were added in 1978. ANACS authenticates and grades all U.S. coins and Patterns, rendering unbiased third party grading opinions using prevailing market grading standards. After grading, the coins are placed in the sonically sealed ANACS Cache.

ANACS has over 700 active submission centers. All coins can be sent through the submission centers or directly to the ANACS office. Submitters can also become Market Makers. The fee for a standard submission is \$23, and various levels of express service are available between \$40 and \$125.

For information is available from ANACS, P.O. Box 182141, Columbus, Ohio 43218-2141. Phone: 1-800-818-1861.

CCDN Bids reflect 1986 and newer certified coins, and assume the certifier has no negative comments. ANACS Bids are listed only once each month.

NGC Numismatic Guaranty Corporation of America. Established in 1987 to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A final grader confirms the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$33, plus postage and insurance. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 450 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit. "Arm's length" NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute. Organized in June, 1984 to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at Heritage Plaza, Highland Park Village, Dallas, TX 75205-2788. Phone: (214) 529-3400. NCI has three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers sell market NCI coins.

Grading is based on the philosophy of James Halperin (N.C.I. Grading Guide) which may be considered somewhat liberal (generous) compared to the other three services listed. Regular cost is \$24 per coin. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded with a charge of 50% of the regular fee. They will certify coins already in holders without removal of the original.

NCI has established grading sets for alloy dollars, \$20's, Quarters, and Walking Liberty halves. Due to current trading volume, NCI coins will only be issued once a month. CCDN Bids reflect 1987 and newer certified coins.

Client or sight-seen sales may command a substantial premium above *Bluesheet Dealer-to-Dealer Bids*. Certification does not guarantee protection against the normal risks associated with potentially volatile markets.

EXECUTIVE DIRECTOR	Pauline Milladin
PUBLISHER	Ron Downing
EDITOR	Dennis R. Baker
ANALYST	Robert Korver
CIRCULATION & ADVERTISING	Betty Morris
GRAPHICS	Shane Downing

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight/unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

City _____ State _____ Zip _____

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

The *Certified Coin Dealer Newsletter*
announces a new **monthly** publication
featuring **Lowest Asks or Last Trades:**

the CCDn ASKSHEET

With the **sight-unseen** market beset by controversy over declining Bids, dealers need to have more complete information **now, more than ever!** Responding to the requests of scores of dealers, we are pleased to provide an important new source of necessary information. Even if the **sight-unseen** Bid reaches unrealistically low levels, having wholesale Low Ask or Last Trade information available will allow dealers to make more informed buying and selling decisions. And the spread observed will also give a strong indication of market liquidity.

The *CCDn ASKSHEET* will provide subscribers with the Lowest Ask or Last Trade prices seen during the preceding month in the dealer-to-dealer, wholesale marketplace. While we are offering this publication separately from the *Bluesheet*, we must point out that neither publication alone will give a complete picture of current wholesale market values. In fact, every page of the *ASKSHEET* will contain a caveat to that effect. After all, the Lowest Ask doesn't necessarily represent market value any more than the Highest Bid. But together, they should define the parameters of wholesale market value.

Hopefully, access to these dealer-to-dealer offers to sell will help stabilize the market price of coins. Uncertainty of value in a supply/demand marketplace means that fewer transactions can occur, and that benefits neither potential buyer nor potential seller.

Subscribe now to the *CCDn ASKSHEET*. Compiled by the same staff that has made the name *Bluesheet* synonymous with accuracy, timeliness, and reliability.

CCDn ASKSHEET

P.O. Box 11099 Torrance, CA 90510

ENGINEERED FOR UNBIASED GRADING

The Numismatic Guaranty Corporation was founded to ensure unbiased, arms-length coin grading. The final graders of NGC can not buy, sell, or trade coins commercially. NGC is creating *the* standard for objective, consistent, and accurate grading of higher quality coins.

Numismatic Guaranty Corporation has over 500 Charter and Associate members. *Look for premium quality, NGC certified coins at the following Charter Member/Dealers.*

CERTIFIED COIN DEALER

a weekly report on the certified market
published by the Coin Dealer Newsletter (est. 1963)

newsletter

Vol VI No. 19

May 10, 1991

Single copy price \$3.50

Bids on Selected Issues Defy Naysayers Central States to Test Sight-Seen

The certified coin market is never dull, that's for sure! The same week that we see messages from some of the country's largest wholesalers bemoaning the lack of activity in the market, we also see **major** sight-unseen Bid increases from a dealer who doesn't like sight-unseen Bidding. Whether Bids rise or fall, as long as coins are trading (and especially being sold to customers), the coin market will remain dynamic. While the electronic traffic has fallen off somewhat this week (as it always does as dealers prepare to attend a major show), there remains substantial activity.

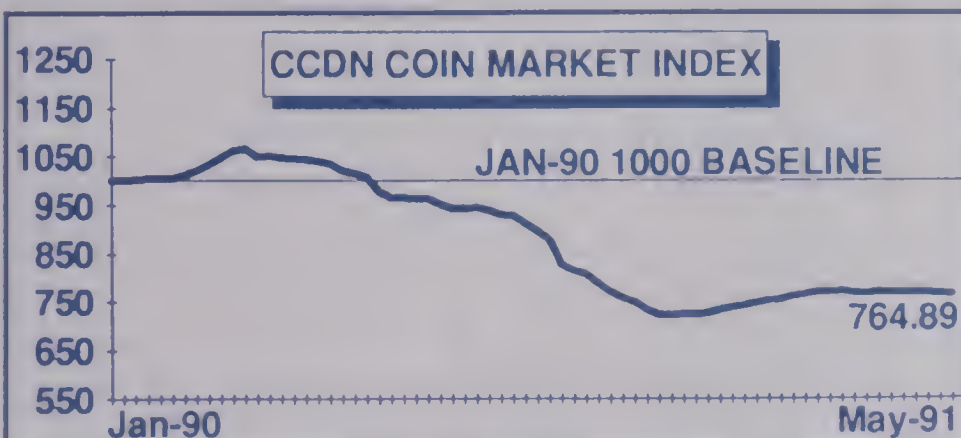

So what's going on? Everything, and nothing. There is as little consensus among dealers now as when the latest round of discussions on how to "improve" the market started. The fact that the very best minds in commercial numismatics have simply been unable to agree on what system would best serve to increase the popularity of coin collecting (and therefore the price of coins) indicates that there *may be no solution* that will satisfy everyone. This may mean a compromise, where everyone is a little unhappy, or it may mean that one market segment is going to emerge from the debate feeling very disillusioned. It seems certain that whatever change is adopted, it will affect prices, but you can find the full range of opinions on whether those changes will be positive or negative.

In the meantime, as they say, life goes on. The sight-unseen Bid on many coins is rising (and spectacularly so on some); Bid has dropped on many more due to offers to sell, with many Trades occurring at these lower levels. We are continuing our recent policy on **Bluesheet Bids: We raised Bluesheet Bid on a higher posted Bid, but we didn't lower Bluesheet Bid on a lowered posted Bid; Bluesheet Bid was lowered only in response to a discounted Sell or Trade.** In short, the market is performing just as it should. Visible demand has increased on some items, thus increasing their value; visible

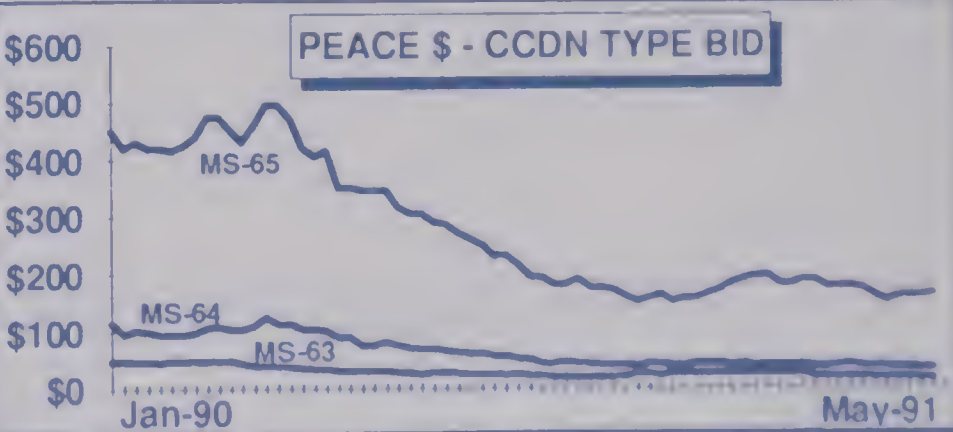

demand has decreased on others, and their value has declined. That is how supply-demand marketplaces are supposed to operate. That is how the coin market should operate.

Several other large trends in the certified market have also made their presence felt this week. Many of the dealers planning on attending Central States have been running "Want List" messages, notable for three reasons. The first, and probably most important, is their desire to **examine** the material at the show; these are not simply "I want to buy" messages—they are more like "I want to **look** and then buy." Second, many of these messages are not stating prices, which in itself is not surprising; hand-in-hand with two dealers sitting down over a pile of coins is the price negotiation which occurs. Third, many of the messages are for **collector coins** (nice circulated type and rarer dates).

We have cautioned before that we could see some substantial problems with the 'evolution' of the coin market into two separate and distinct markets: One for the collector, and one for the investor. We were concerned primarily because the two markets need each other, and the investor market especially needs the demand created by the collector market. We understand how fickle investors can be, but even we were surprised at the rapidity with which the buyers of the big-ticket items jumped ship. Curiously enough, the relative stability of the prices on the collector items begins to look like the better investment, as well as being more fun. The only negative that we truly fear in today's coin market are the large number of wonder, high-grade coins that seem unable to find new homes. Auctions are certainly doing their share in matching nice coins with willing collectors, but there are still too many of the "high-flying" gems now in the "holding patterns" of dealer's inventories.

CCDN COIN MARKET INDEX: 764.89 - 0.73			JAN 5, 1990 BIDS = 1000

The Blue Sheet

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight-unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CCDn, albeit on a sight basis.

SAFRABANK NUMISMATIC FINANCING OFFERS YOU FOUR POWERFUL NEW SOURCES OF BUSINESS ENERGY.

FLEXIBILITY to
generate cash flow
from existing inventory
without having to sell.

VERSATILITY
to use any portion of an
existing inventory to finance
a larger inventory.

LEVERAGE to add new
or additional inventory
in the open market
or in auction.

PROOFLIKE MORGAN DOLLARS

P.L. Dollars may be reflective of the current market value of the coins. The deep-mirror Prooflike Dollars (P.L.s) are more valuable than the DMPL but command some premium over the P.L. strikes.

The *Certified Coin Dealer Newsletter*
announces a new **monthly** publication
featuring **Lowest Asks or Last Trades:**

the CCDn ASKSHEET

With the **sight-unseen** market beset by controversy over declining Bids, dealers need to have more complete information **now, more than ever!** Responding to the requests of scores of dealers, we are pleased to provide an important new source of necessary information. Even if the **sight-unseen** Bid reaches unrealistically low levels, having wholesale Low Ask or Last Trade information available will allow dealers to make more informed buying and selling decisions. And the spread observed will also give a strong indication of market liquidity.

The *CCDn ASKSHEET* will provide subscribers with the Lowest Ask or Last Trade prices seen during the preceding month in the dealer-to-dealer, wholesale marketplace. While we are offering this publication separately from the *Bluesheet*, we must point out that neither publication alone will give a complete picture of current wholesale market values. In fact, every page of the *ASKSHEET* will contain a caveat to that effect. After all, the Lowest Ask doesn't necessarily represent market value any more than the Highest Bid. But together, they should define the parameters of wholesale market value.

Hopefully, access to these dealer-to-dealer offers to sell will help stabilize the market price of coins. Uncertainty of value in a supply/demand marketplace means that fewer transactions can occur, and that benefits neither potential buyer nor potential seller.

Subscribe now to the *CCDn ASKSHEET*. Compiled by the same staff that has made the name *Bluesheet* synonymous with accuracy, timeliness, and reliability.

CCDn ASKSHEET

Superior Galleries presents A VERY SPECIAL AUCTION SALE AUGUST 11, 1991 IN CHICAGO

Just prior to the 100th Anniversary
of the American Numismatic Association Convention.

Some highlights already consigned to this important event:

1873-CC 25 Cent No Arrows
PCGS Mint State 65
Finest Known

1893 Isabella 25 Cent
PCGS Mint State 68
Finest Known

1900 Lafayette Dollar
PCGS Mint State 67
Finest Known

1880 \$4 Gold Coiled Hair Stella
PCGS Proof 66
Finest Known

1878 \$10 Gold Pattern
Judd-1581, PCGS Proof 64
3 Known

1865 \$20 Gold Pattern with motto
Judd-452, PCGS Proof 64
2 Known

We are still accepting consignments for this sale. Minimum value per lot at \$2,500.
Special discounted commission rates available on single coins valued over
\$10,000. We now have over \$25,000,000 available for cash advance.

Lowered Sells Overshadow Market

Attractive Coins Still Bring Attractive Prices

This week's Bidding activity was dominated by lowered Sells which had the effect of driving many Bids lower. Dealers can argue forever about the proper definition of "value", but the one that makes the most sense at the end of the day involves filling in the blanks on the check. High Bid may or may not equal "value", but when a coin sells at \$xyz, that is a pretty good indicator of "value" (to be fair, we should also mention a recent call from a dealer who "ripped" a Commem on the CCE trading exchange, but insisted that the coin really was "worth" more).

An interesting question was raised by another dealer friend (this market seems to be inspiring quite a few of these!): Prior to sight-unseen Bidding, what happened to unattractive coins? Just to confirm our own opinions, we asked a few 'old-timers', who basically all agreed that they were always a fact of numismatic life: They existed, and dealers had them in inventory (all too long, it seems). When they became too noticeable to be ignored, they would be blown off (*almost always at a discount from Bid*) to whomever would take them.

Therein lies another major change that sight-unseen Bidding has brought to the marketplace: Now, unattractive coins all too often define the Bid levels, and dealers expect to pay premiums above sight-unseen Bid for "PQ" quality coins. Are the unattractive coins that define Bid the coins that customers wish to buy? The obvious answer goes a long way towards explaining why wholesale Bidding levels have drifted so far from "value" on so many coins. And along with this drift has come a great deal of confusion about "value" in the marketplace. *Dealers must assure their customers that customer-quality sight-seen coins will trade at levels above sight-unseen Bids; therefore, the customer can expect to pay substantially over the listed Bids. If the customer succeeds at buying coins at the Bid levels, he is probably not buying PQ coins.*

Low Bids, over an extended period of time, create the mental picture of lower value (mental *illusion* is definitely not the right word for a self-fulfilling prophecy). The dealer who has made the "manufacturing" of slatted coins his business has a tendency to hit the sight-unseen Bids in the quickest way to turn-over material and retrieve the capital that fuels his activity. The constant removal of the high Bids that this occasions means that "high" Bid is often too low, but its inability to rise (without being "hit" again) ever time means that the market perceives that values really have dropped. With insufficient liquidity in the marketplace to counter this trend, perhaps they really have. This deterioration of Bid levels certainly depletes the confidence levels of both dealers and their customers, which can be deadly in a supply/demand market. This makes it extremely difficult for retailers to sell coins to their customers, and an inventory declining in value removes any hope of a profit (which is why any of us are in business anyway!).

Speaking of ATTRACTIVE coins, we would be hard pressed to think of a more amazing group of desirable material than the Amazing Collection of United States Silver Dollars that will be auctioned May 26-28 by Superior Galleries. Anyone worried about demand for *quality* material will be reassured when these beauties hit the auction block. Individually, these coins make you *desire* to own them; collectively, they remind you that only someone of exceptional taste and resources could afford to buy them all. Whatever you desire in a coin, whether exceptional strike, extraordinary toning, significant pedigree, or just the allure of distant times, can be found here. Only 18 pieces, and a world-class collection. Whether your want list includes a 1732 Pillar Dollar, or a 1776 Continental Dollar in Pewter, or the **finest known** Proof Bust Dollar with Heraldic Eagle, or the 1794 Flowing Hair Silver Dollar Presentation Piece (the Coiner's Proof?) or not, this will be a sale to remember.

The Blue Sheet

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer, and may fluctuate according to needs. CCDn represents only that the bid prices listed were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CCDn, albeit on a sight basis.

BUY YOUR COINS WHERE THE MAJOR DEALERS HAVE SINCE 1961

Why do the major coin dealers and collectors rely on Ronald J. Gillio, Inc.
— Because we have been:

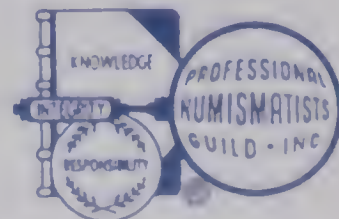

- Full time professional numismatists since 1961.
- The leading U.S. Gold coin wholesaler since the 1970's, importing hundreds of thousands of U.S. Gold coins. (Ron Gillio is personally in Europe about every six weeks buying coins).
- Leaders in the industry in handling all numismatic coins, such as the complete Kenneth Lee Collection of California Fractional Gold, the finest known 1894-S Barber Dime, the finest known 1851 Shultz \$5 Gold Coin, the number one Panama-Pacific Gold and Silver Set, etc.
- Leaders in international auction sales (through our sister company, Pacific Coast Auction Galleries) holding sales in the United States since 1967, and in Tokyo and Hong Kong since 1982.

If you are a dealer or collector looking for the first generation source, of course **WE ARE IT.** We take pride in giving personal service to all of our clients ranging from the novice to the sophisticated expert.

WE WANT TO SHARE OUR 30 YEARS OF EXPERIENCE WITH YOU.

Call 800-235-6937 (ext.200) or write for further information to:

We Collect Clients. . .

Our Clients Collect Coins

Not many dealers are willing to make a lifetime commitment to their clients. In fact, **Joel D. Rettew & Son Rare Coin Brokerage** is the only American numismatic firm to make this offer to you:

- We will work for you in a brokerage capacity, which means that *we are on your side* in making money in the numismatic marketplace!
- We can sell your coins *for you* in retail transactions for a 10% commission!
- We will sell coins *to you* at a very conservative mark-up (our average is about 10%)!
- We will give you a FREE statistical analysis of your current portfolio. (Minimum \$20,000)

What's in it for us?

- Financially, we will earn 10% of any profits that we assist you in generating for your account.
- More importantly, we want *all* of your coin business *for life*. We want a long-term relationship with you as a customer and as a friend.

There are many reasons why **Joel D. Rettew & Son Rare Coin Brokerage** should be your dealer of choice. We have been buying and selling coins since 1953, nearly four decades of service to our old customers and *friends*. But we are just as serious about making *new friends* through servicing new customers - and we are serious enough to offer benefits unmatched by any other dealer in America!

Joel D. Rettew & Son Rare Coin Brokerage

575 Anton Blvd. Suite 790 • Costa Mesa, CA 92626

714-833-1800 • 800-624-3022

the CURRENCY DEALER newsletter

is a Monthly Publication that is the most COMPREHENSIVE and UP-TO-DATE pricing guide available in today's ever-changing field! DEALER-TO-DEALER BID/ASK Charts cover all of the following areas:

LARGE SIZE U.S. NOTES

- DEMAND NOTES
- U.S. NOTE: (LEGAL TENDER)
- COMPOUND INTEREST TREASURY NOTES
- INTEREST BEARING NOTES
- REFUNDING CERTIFICATE
- SILVER CERTIFICATES
- TREASURY NOTES OR COIN NOTES
- NATIONAL BANK NOTES
- FEDERAL RESERVE BANK NOTES
- FEDERAL RESERVE NOTES
- NATIONAL GOLD BANK NOTES
- GOLD CERTIFICATES

U.S. FRACTIONAL CURRENCY

U.S. FRACTIONAL CURRENCY PROOF & SPECIMEN NOTES

SMALL SIZE U.S. NOTES

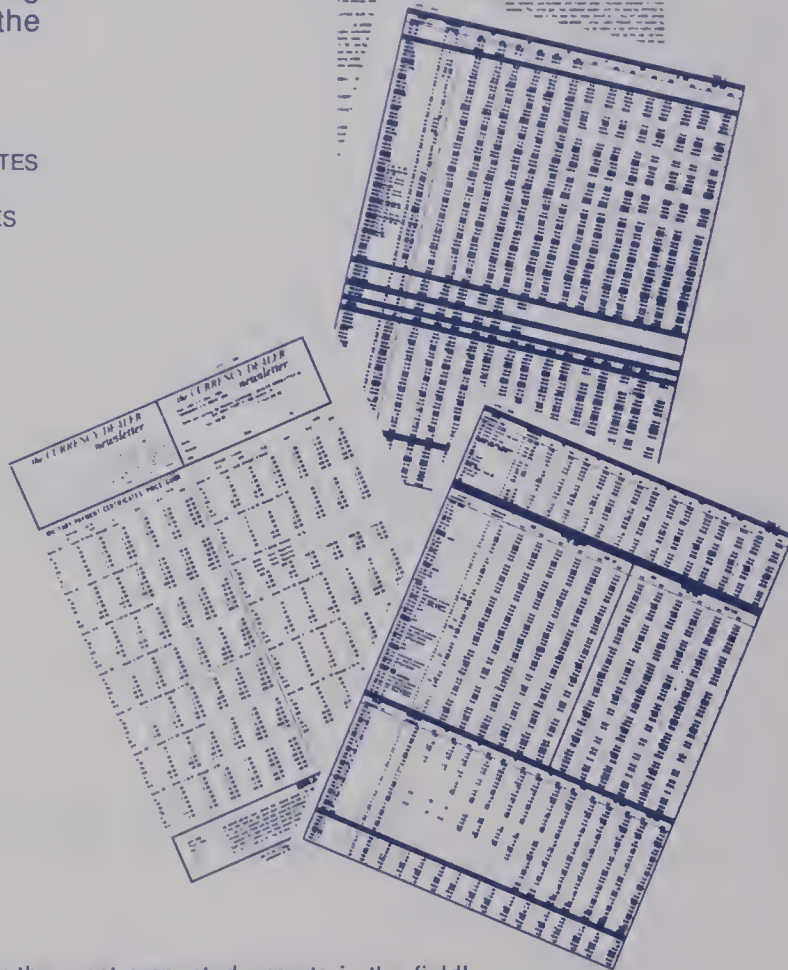

- LEGAL TENDER NOTES
- SILVER CERTIFICATES
- NATIONAL BANK NOTES
- FEDERAL RESERVE BANK NOTES
- FEDERAL RESERVE NOTES
- GOLD CERTIFICATES
- WW2 EMERGENCY ISSUES

UNCUT SHEETS - SMALL SIZE CURRENCY

- U.S. NOTES (LEGAL TENDER)
- SILVER CERTIFICATES
- WW2 EMERGENCY ISSUES
- NATIONAL CURRENCY

- ... **PLUS** IN-DEPTH ARTICLES and analyses, each month, written by the most respected experts in the field!
- ... **PLUS** AUCTION REPORTS — to give a clear and accurate picture of the most recent activity!
- ... **PLUS** special ISSUE-BY-ISSUE Charts covering special areas of changing importance!

Subscribe today and get the most comprehensive price guide on the currency market.

What everybody ought to know...

About the PCGS Population Report

And why, for \$10 an issue, you can't beat the value!

Each and every coin certified by PCGS, some you probably have in your collection, is in the PCGS Population Report. That's a lot of information. And as you can imagine, there are many different ways to organize and publish this data.

That's why we've been asking coin enthusiasts across the country, from the novice to the expert, what they want out of the PCGS Population Report. The result includes some improvements we think you should know about.

CIRCULATED COINS - It used to be, you had to wait two-and-a-half months to get circulated coin information. Now you get these statistics monthly.

WORLD COINS - Whether you have any world coins or not, you can see how they're doing on a monthly basis. Coins from Canada, England, Germany, Japan, Switzerland, and U.S. Philippines are already included and provide today's coin enthusiast with a whole new world of options.

INFORMATION - Each of the more than two million PCGS certified coins listed in the book are categorized by type and grade. This means that if you have a 1881-S Morgan silver dollar, PCGS graded MS65, you can find out with the turn of a page, just how many coins like yours are out there. This is an important factor to consider when researching facts on your coins.

2,480,712 Coins Graded with a
Declared Value of \$2,903,108,300
THE STANDARD FOR THE RARE COIN INDUSTRY.

Certification by PCGS does not guarantee protection against the normal risks associated with potentially volatile markets.

The report now costs an amazingly low \$10 per issue.

MINTAGE QUANTITIES - Listed along with each coin is the quantity originally minted. This too, is useful information and having it this handy can be a valuable time saver when you need all the facts in a hurry.

READER FEATURES - We designed the format to be easy to read and with the step-by-step User's Guide to help you, you'll have no trouble at all

getting the information you need. A comprehensive Glossary of Terms is also included and provides definitions for abbreviations and covers individual characteristics of your coins.

GREAT PRICE - By switching to a new format we were able to cut costs and generate the most handsome and user-friendly Population Report ever (please call us for additional savings on multiple subscriptions).

HERE'S HOW TO ORDER - Simply complete and return the convenient coupon below. Or, if you like, call our toll-free number and a customer service representative will take your order over the phone. Don't miss out on a single issue, order today!

Long Beach Bourse the Best Witness Bids Stable, Sells Slipping

Activity on the electronic exchanges the week before a major show is often weak, but this week has provided some pleasant surprises. While some **sight-unseen** Bids continue their somewhat anemic appearance, the market has provided some substantial increases. The minus signs on the charts inside still derive from lowered sells, so it will be interesting to see where prices stabilize in the **sight-seen** arena of the Long Beach bourse.

The Long Beach Coin Show has a flavor all its own, but most dealers will agree that the action on the bourse is the single best indicator of coin market strength to be found anywhere. If dealers see buyers willing to pay premiums over Bid for any halfway-decent coin, you can bet that we are in a **bull** market; if you see very selective buying after long inspection followed by protracted negotiation, you can believe that we are in a **bear** market. If you see dealers sitting behind their tables reading or knitting, you can assume that a **buyer's** market is reigning.

Dealers are preparing for Long Beach in a myriad of ways, but most are planning on displaying inventory that will appeal to the **collector**. The last year has convinced many dealers of the absolute need to have a healthy retail business, and what better place to offer coins to the buying public than at Long Beach? The customers have become accustomed to finding collector's coins here that just don't seem to be available elsewhere; so they come with checkbook loaded, expecting to buy.

Among the dealers, most seem to be predicting an active show, albeit at current levels. Few are predicting a further downturn, but most agree that **sight-seen** is going to be the byword for the show. With dollars

a little tight, you can be sure that every coin purchased will meet the qualifications of the buyer (and most importantly the buyer's customer!).

Both dealers and collectors will also have a wide range of auction material from which to select. In fact Long Beach has become the focal point for a wide range of numismatic activities. Superior will be offering their May 27, 28, 1991 Auction featuring An Amazing Collection of United States Silver Dollars (which we have mentioned previously), a session of World Coins on May 29, and the Irving Goodman Collection of Chinese Coinage on June 3 & 4 (anyone who thinks that the entire coin market is depressed should see the enthusiastic crowds viewing this material!). Heritage Numismatic Auctions will also be offering a pair of auctions: their May-June 1991 Long Beach Sale (May 29-June 1) and one of their Bullet Auctions (certified only) on May 30 at Long Beach. As seems always the case at Long Beach, whatever your area of numismatic specialization, there will be something here for you.

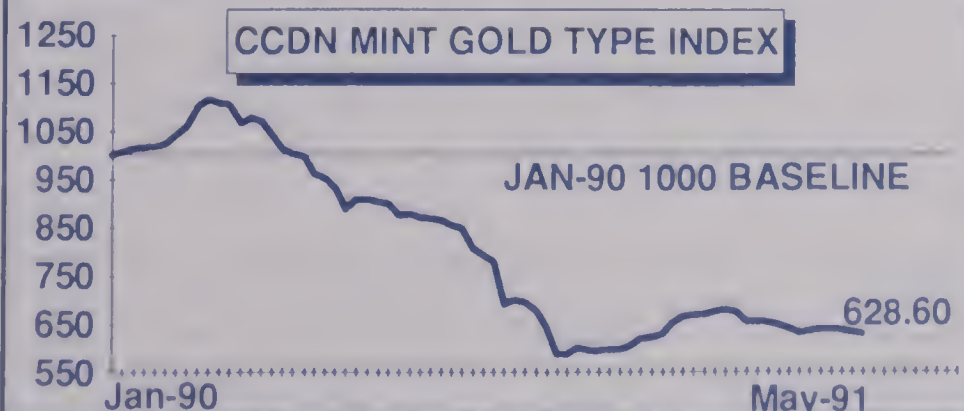

We are continuing our recent policy on **Bluesheet Bids**. **We raised Bluesheet Bid on a higher posted Bid, but we didn't lower Bluesheet Bid on a lowered posted Bid; Bluesheet Bid was lowered only in response to a lower offer to Sell or Trade.**

Judging by the count of changes this week, the overall market appears mostly steady. This issue contains the least amount of changes which we have monitored over the last several months. However, the **CCDN Coin Market Index** has declined slightly on the depth of the discounted sells (especially in the continuing saga of Gold Commem). In this market, one buyer's brave attempt to buy a coin at higher levels can easily be overshadowed by another dealer's need to sell.

CCDN COIN MARKET INDEX: 762.14 - 0.63 JAN 5, 1990 BIDS = 1000

The Bluesheet

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer and may fluctuate according to needs.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CCDn, albeit on a sight basis.

Why Give Your Coins Away at Sight-Unseen Levels? Your Premium Quality Coins Will Sell for More in a HERITAGE BULLET SALE.

Getting a bit tired of this sight-unseen nonsense? Hit back with a Heritage Bullet Sale. It's the way coins were meant to be sold -- sight-**seen** by qualified buyers. And the nicest thing is that it doesn't require you to tie up your inventory and capital for three or four months. From consignment to settlement check -- in **less** than a month. Just consider the following advantages, and then give us a call:

Bullet Auction

- Extremely low commission rates and never any seller's commission.
- We will pay you up to 107% of hammer price, with buy-back fees as low as 1%. See grid below.
- Always held in conjunction with a major show.
- Your PQ and better-date coins will bring more money sight-seen!
- Cash advances *always* available.
- Consignment Deadline only ten days prior to the sale.
- Catalog sent to thousands of retail buyers.
- Settlement Check only two weeks after the sale.

CERTIFIED COIN DEALER

a weekly report on the certified market
published by the Coin Dealer Newsletter (est. 1963)

newsletter

Vol VI No. 22

May 31, 1991

Single copy price \$3.50

1794 \$1 Realizes \$506K Superior Sale Garners \$7.5 Million

Teletype activity this week has been relatively subdued, as dealers crowded into Southern California for the Long Beach Show, to inspect all of the lots from the associated auctions, and to Bid on needed material for customers and inventory. The lack of plus signs can be attributed to market lethargy combined with the travelling dealers; the minus signs on the charts inside still derive from lowered sells, as dealers offered material at lower levels. We are continuing our recent policy on *Bluesheet Bids*: We raised *Bluesheet Bid* on a higher posted Bid, but we didn't lower *Bluesheet Bid* on a lowered posted Bid; *Bluesheet Bid* was lowered only in response to a lower offer to Sell or Trade.

The sale of an MS65 1893-S Morgan on the Certified Coin Exchange to the \$242,000 Ask may have created a (minor) minus sign in this week's issue, but the sale of such an important coin at this level could hardly be considered negative news. A Bid that stays on the system and is never "hit" provides some valuable information: You know that the coin is worth at least the amount of the Bid, but you still don't know what the coin is really worth. A coin that sells to the ASK (as few do on CCE) provides much more exacting information on the market value of the item.

Thanks to all of the advance publicity, and a crowded audience bidding on the Amazing Collection of United States Silver Dollars at

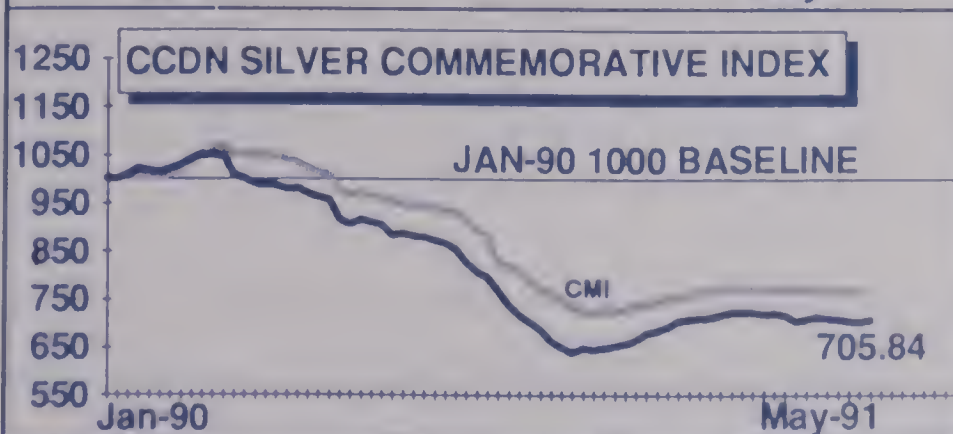

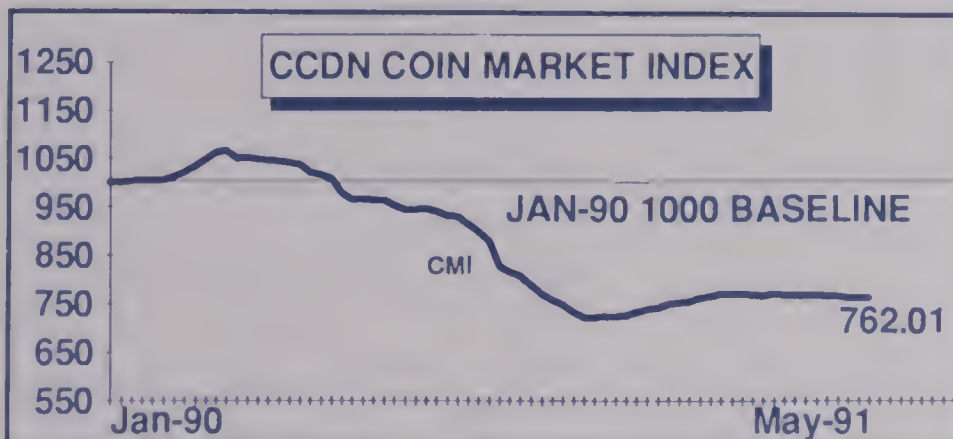

Superior Galleries' May 27, 28 Auction, we now know what some of America's finest coins are worth (see box).

And just to prove that the specialists also admire the finest quality in other series, an 1814 Bust Half (Overton-103) graded by NGC as MS67 realized \$30,800. Total Prices realized were \$7,528,564.

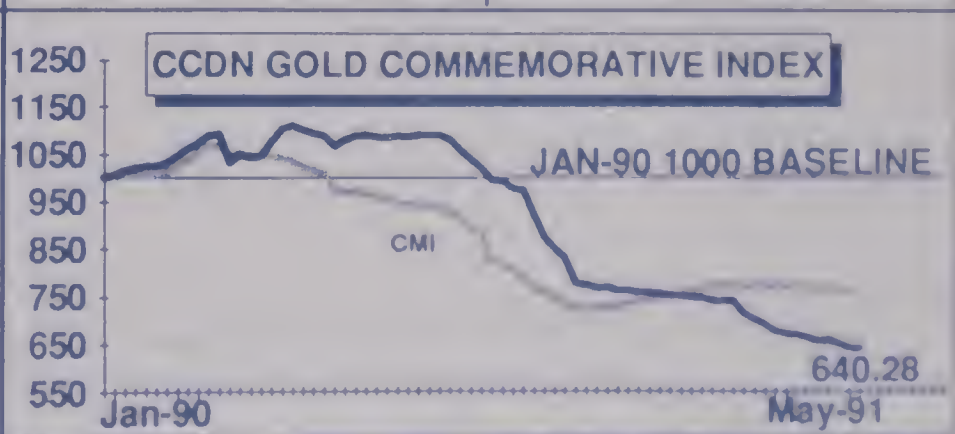

Heritage's Bullet Auction, to be held May 30 at the Long Beach

Show, exhibits several of the changes that certification has brought to the coin auction market. In the past we have described certified-only auctions; the concept has evolved considerably since then. The catalogue is definitely a "no-frills" affair, but no photographs and minimal lot descriptions are not a major drawback when you enjoy a clientele that is largely going to inspect the lots.

Printing the catalogues by laser means more than just being able to offer a two-week cutoff; it also means that customized catalogues can be prepared. If you are a specialist in Morgan Dollars, you can request that just the Morgan Dollar lots be included in your catalogue. Old-time numismatists who enjoy poring over old catalogues will be disappointed in this possibility, as well as those who enjoy looking at the photographs of coins outside their areas of expertise, but for an efficient system of moving coins from seller to buyer, you would be hard pressed to find technology being used more precisely.

The Bluesheet

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight-unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer, and may fluctuate according to needs.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CCDn albeit on a sight basis.

PLANTING and FERTILIZING. Both are in July. Group A and B plants were sown into 10-cm PE and PVC pots and grown under the same conditions. Soil for both treatments is a commercial loam soil (100% vermiculite). Both treatments required fully developed seedlings.

ENGINEERED FOR UNBIASED GRADING

The Numismatic Guaranty Corporation was founded to ensure unbiased, arms-length coin grading. The final graders of NGC can not buy, sell, or trade coins commercially. NGC is creating the standard for objective, consistent and accurate grading of higher quality coins.

Numismatic Guaranty Corporation has over 500 Charter and Associate members. *Look for premium quality, NGC certified coins at the following Charter Member/Dealers.*

June 7, 1991

Single copy price \$3.50

Customers Still Kings At Long Beach Cash Still Controls Activity

While dealers were quick to point out that this wasn't their best Long Beach ever, most were equally quick to acknowledge that it was far from their worst as well. In fact, many dealers were pleasantly surprised at how well they did (after admitting that their expectations seem to have been fairly low coming into the show). This is certainly not the happiest market that dealers have ever had to operate in, but Long Beach always seems to give them as good a show as is possible (and sometimes even a bit better!).

The happiest dealers were those who came with cash to buy coins for ready customers. They got to pick and choose and negotiate, just like in the good old days. Another happy group were the dealers with an inventory of nice collector coins and who had a regular Long Beach clientele. Coins up to \$2,000 did very well, especially those being sold to habitual customers. Less happy were those customers who came with material to sell, especially circulated gold, as dealers evidenced little desire to stretch in this low demand area.

There was also no shortage of exceptional quality coins on the floor, thanks to Superior Galleries' auction held earlier in the week. Customers who came looking for quality coins had a lot of merchandise to inspect, and the opportunity to engage in lengthy discussions and significant negotiations.

Heritage's Bullet Auction again proved the viability of this concept, especially in a volatile market, realizing nearly \$900,000. With the ability to bring coins from the mail room to the auction block in less than two weeks, consignors feel much more in control of their timing decisions. Since all of the coins are certified, buyers who feel comfortable sight-unseen can bid accordingly. Floor Bidders, who deliver the bulk of the action, naturally need the opportunity to inspect lots, so it becomes most desirable to hold these sales in conjunction with a major convention (see inset for highlights).

A review of this week's increases and decreases indicates a coin market that continues mainly stable, with individual issues moving in reaction to fluctuating demand. The scattered discounted issues are still creating minuses

Issue	Grade	Price Realized
1861 3-Cent Silver	PCGS65	\$ 1.48
1865 Half Dime	PCGS Pr65	\$ 2.420
1894 Dime	PCGS-Pr66	\$ 3.630
1919-S Dime	NGC65	\$ 1.705
1831 Quarter	PCGS64	\$ 4.950
1877-S Quarter	PCGS66	\$ 5.830
1891 Quarter	PCGS66	\$ 6.600
1892 Quarter	PCGS66	\$ 4.950
1853 Half A&R	PCGS64	\$11.275
1909 Half Dollar	PCGS65	\$ 3.520
1929-D Half	PCGS65	\$ 1.650
1887-S Morgan	PCGS65	\$ 3.850
1907 \$2 1/2	PCGS65	\$ 2.156

when there is no viable Bid support, you will rarely find discounting on the coins that are on dealers' want lists. Dealers looking to buy coins under Bid levels usually must be willing to accept what the seller has to offer, and not the coins with specific need. We are continuing our recent policy on *Bluesheet Bids*. We raised *Bluesheet Bid* on a higher posted Bid, but we didn't lower *Bluesheet Bid* on a lowered posted Bid; *Bluesheet Bid* was lowered only in response to a lower offer to Sell or Trade.

PCGS Professional Coin Grading Service, Newport Beach, CA Established in 1986, PCGS grades and authenticates U.S. and world coins. PCGS has certified more than two million coins. All coins must be submitted through one of the 560+ authorized dealers; contact PCGS at 800-447-8848 for a list.

PCGS has more than 15 graders on its staff; each coin is examined by at least two graders before the final grade is determined. No person involved with the grading process may be active in the buying or selling of U.S. coins. Fees start at \$26 or \$35 depending on the type of coin, plus postage and insurance; several levels of Express service are also available. PCGS coins are sonically sealed in an inert plastic "NumisCap" holder before return to the customer.

PCGS has a cash-backed Guarantee of Grade and Authenticity. PCGS has a comprehensive grading set which includes most major series. PCGS is a grading service only and does not make markets. PCGS dealers are responsible for their own making of markets in PCGS coins. PCGS publishes a monthly Population Report.

ANACS ANACS: The first authentication service (established in 1972), to which grading services were added in 1978. ANACS authenticates and grades all U.S. coins and Patterns, rendering unbiased third party grading opinions using prevailing market grading standards. After grading, the coins are placed in the sonically sealed ANACS Cache™.

ANACS has over 700 active submission centers. All coins can be sent through the submission centers or directly to the ANACS office. Submitters can also become Market Makers. The fee for a standard submission is \$23, and various levels of express service are available between \$40 and \$125.

Free information is available from ANACS, P.O. Box 182141, Columbus, Ohio 43218-2141. Phone 1-800-888-1861.

CCDN Bids reflect 1986 and newer certified coins, and assume the certificates have no negative comments. ANACS Bids are listed only once each month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 450 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at Heritage Plaza, Highland Park Village, Dallas, TX 75205-2788. Phone (214) 528-3500. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N C I Grading Guide") which may be considered somewhat liberal (commercial) compared to the other three services listed. Regular cost is \$24 per coin. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded with a charge of 50% of the regular fee. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. Due to current trading volume, NCI coins will only be listed once a month. CCDN Bids reflect 1987 and newer certified coins.

Client or sight-seen sales may command a substantial premium above *Bluesheet Dealer to Dealer Bids*. Certification does not guarantee protection against the normal risks associated with potentially volatile markets.

The Bluesheet

The Certified Coin Dealer newsletter reports the national market for certified coins only, following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight-unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer and may fluctuate according to needs.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Should the Bluesheet change?

Survey 2

We thank the many subscribers who took the time to answer our first survey on possible changes in the Bluesheet. As might be expected, opinions ran the entire spectrum suggested, but we were able to identify four favorite suggestions for changes. Because we take our obligations to the entire market very seriously, we **need** to know how you feel. As we reach the final stages of our decision process, **now** is the time for **your** input.

What the Bluesheet is:

The Bluesheet reports Bids based on the highest national **sight-unseen** Bid for certified coins. The High Bid should not be confused with market value (which should be higher), or with current liquidation value, except for the most generic coins.

What the Bluesheet should be:

Please give each of the following your vote in order of preference: 1 to the idea you think is best, 2 & 3 to the next likely candidates, and 4 to the choice you like the least. (If you're interested in the results of the first survey, the following choices are offered in order of their popularity!)

Changes:

___ Combine the Bluesheet and the Asksheet. Every weekly issue would feature: 1) a combined PCGS/NGC High Bid (one combined Bid for both services) and 2) weekly Low Ask or Last Trade information. This will require a modest increase in the subscription rate to \$125.

___ Combine the Bluesheet and ASKSHEET (as a weekly) and charge \$149 per year. The page count would double on all of the pricing pages; all of our preparation, paper, printing and postage costs would also double.

___ Continue your recent approach: raise Bids only on a higher Bid; lower Bids only in response to a lowered Ask or Trade. This would change Bid into a wholesale market value over time. This is a change in concept only.

___ Eliminate sight-unseen Bids and make Bluesheet prices suggested wholesale market value prices.

Remember, we need to hear from you. The CCDN is your tool, and we need to hear from you to make it the most effective tool possible. Thank you.

Names and address (optional): _____

Please return to CCDN Survey, PO Box 11099, Torrance, CA 90510

PROOF TYPE COINS

All prices are right as seen in the original photo.

The coin market is speculative and unregulated. Many areas of numismatics lend themselves to third party grading and authentication. Certification does not eliminate all risks associated with the grading of coins.

Sight-Unseen Bidding Picks Up Sells Still Lowering Some Bids

Sight-unseen Bidding activity has picked up considerably during the past week, resulting in a large number of plus signs in this week's issue. Granted, many of the increases they represent are fairly small, but who can complain about any upward movements? It is sufficient to acknowledge that there are many Bidders who need material to service their customers, and are willing to "advertise" higher Bid prices in order to obtain it.

Higher Bids were especially noticeable in the Morgan Dollar and Silver Commemorative Charts. Since these are two of the most popular "collector" areas, some dealers point to any strengthening here as good for the entire market. Walking Liberty Half Dollars and Mercury Dimes (also popular areas) are showing more plus signs, but discounted sells are still pushing some issues downward. We are continuing our recent policy on *Bluesheet Bids*: *We raised Bluesheet Bid on a higher posted Bid, but we didn't lower Bluesheet Bid on a lowered posted Bid; Bluesheet Bid was lowered only in response to a lower offer to Sell or Trade.*

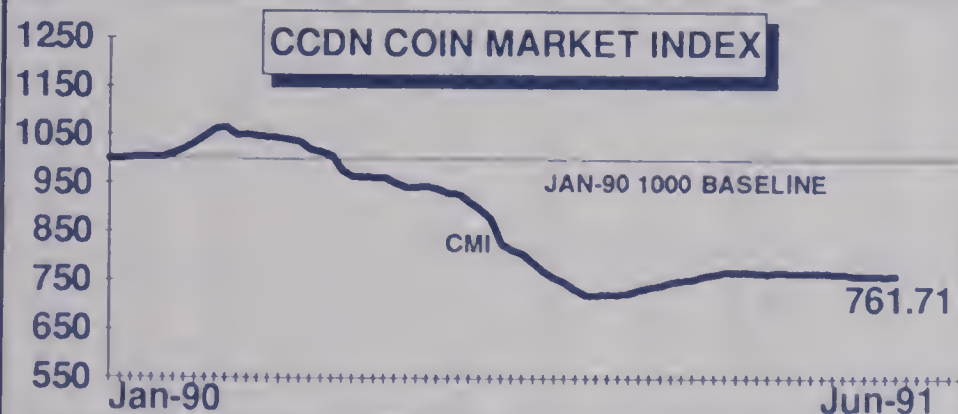

Auctions by Bowers and Merena has just concluded their multi-million dollar George N. Polis M.D. Collection sale. In past weeks, we have mentioned many of the positive aspects of the new minimalist "bullet" sales, but surely there will always be a vital place in numismatics for these "Grand Format" catalogues. Numismatics has always been much more than just the purchase price of coins, and the Bowers and Merena catalogues are a numismatic education in themselves. Dealers cannot be experts in every series, but they need more than a basic understanding of the many collecting areas. You may not be a specialist in Large Cents, but you will learn something about Early Coppers simply by perusing the catalogue. You may not be fully informed about the nuances of grading Standing Liberty Quarters, but just looking at the photographs will give you a greater understanding of "Full-Head". You may not have many customers for Ter-

ritorial Gold, but the catalogues will give you a strong idea of what is available in the marketplace.

Auction sales have been a big part of the grand tradition of American Numismatics for many decades, and their role seems to have strengthened during the past two decades. The continued ability of such major numismatic events to produce publicity, to attract willing customers with ready cash, and to facilitate the dispersal of great collections insures their survival. The overall market may be slow, but the gavel still rings down on widespread demand. The prominence of auctions in today's market may be further encouraging dealers to rethink the inventory-based nature of their traditional business.

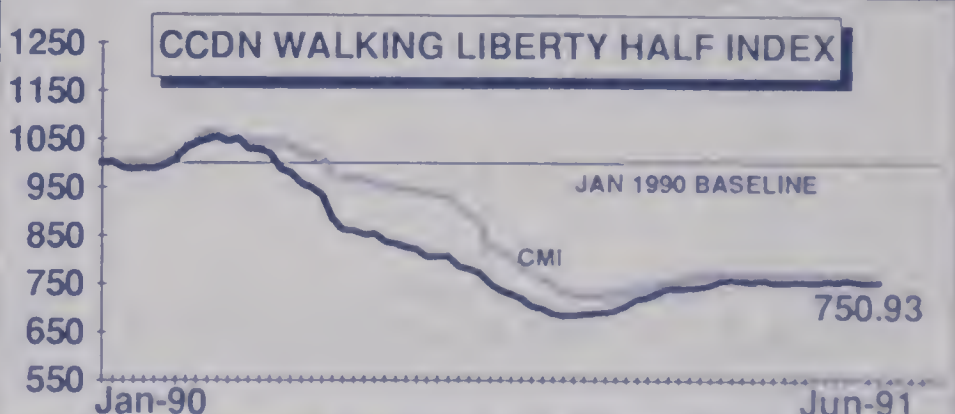

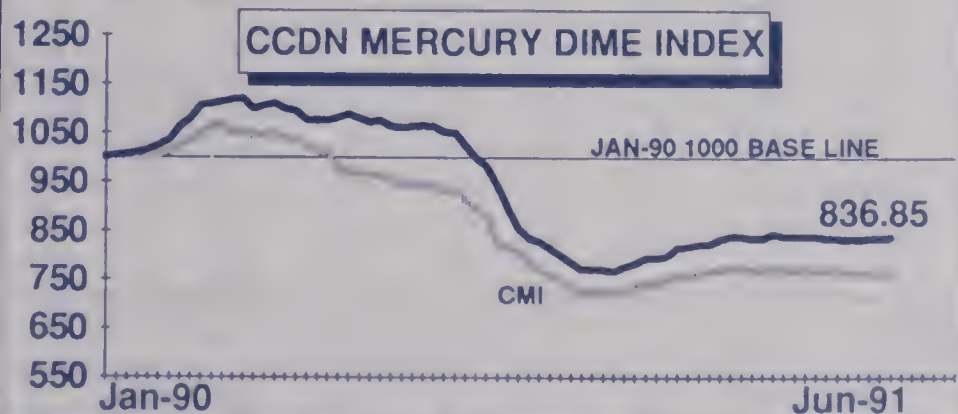

Among the certified highlights in the Polis sale:

Issue	Grade	Price Realized
1869/9 Indian Cent	NGC65, Red	\$ 3 300
1864 LM Two Cent	PCGS66, Red	\$ 3 850
1851 Three Cent Silver	NGC66	\$ 5 500
1866 Nickel w/ rays	PCGS-Pr65	\$ 4,290
1829 Half Dime, V-3	PCGS65	\$ 5 500
1801 Dime, JR-2	NGC55	\$ 5 720
1873 Half Dollar, Arr.	PCGS64	\$ 5 720
1856-D Gold \$1	PCGS55	\$10 450
1861-D Gold \$1	PCGS45	\$ 8 580
1832 \$2 1/2	PCGS61	\$ 8 250
1876 \$3	PCGS-Pr60	\$25 300
1879 \$4 Stella, FH	PCGS-Pr62	\$30,800
1843-C \$5	PCGS63	\$41 800
1874-CC \$5	PCGS62	\$29 700
1895 \$5	PCGS66	\$14 850
1883 \$20	PCGS-Pr58	\$23 100

The Bluesheet

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer and may fluctuate according to needs.

ENGINEERED FOR UNBIASED GRADING

The Numismatic Guaranty Corporation was founded to ensure unbiased, arms-length coin grading. The final graders of NGC can not buy, sell, or trade coins commercially. NGC is creating the standard for objective, consistent and accurate grading of higher quality coins.

Numismatic Guaranty Corporation has over 500 Charter and Associate members. *Look for premium quality, NGC certified coins at the following Charter Member/Dealers.*

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective (on one or both sides) with less reflectivity than the deep-mirror Prooflikes. Bids for P/Ls are usually much lower than for DMPL, but command some premium over non P/L strikes.

We Collect Clients. . .

Our Clients Collect Coins

Not many dealers are willing to make a lifetime commitment to their clients. In fact, **Joel D. Rettew & Son Rare Coin Brokerage** is the only American numismatic firm to make this offer to you:

- We will work for you in a brokerage capacity, which means that *we are on your side* in making money in the numismatic marketplace!
- We can sell your coins *for you* in retail transactions for a 10% commission!
- We will sell coins *to you* at a very conservative mark-up (our average is about 10%)!
- We will give you a FREE statistical analysis of your current portfolio. (Minimum \$20,000)

What's in it for us?

- Financially, we will earn 10% of any profits that we assist you in generating for your account.
- More importantly, we want *all* of your coin business *for life*. We want a long-term relationship with you as a customer and as a friend.

There are many reasons why **Joel D. Rettew & Son Rare Coin Brokerage** should be your dealer of choice. We have been buying and selling coins since 1953, nearly four decades of service to our old customers and *friends*. But we are just as serious about making *new friends* through servicing new customers - and we are serious enough to offer benefits unmatched by any other dealer in America!

Joel D. Rettew & Son Rare Coin Brokerage

575 Anton Blvd. Suite 790 • Costa Mesa, CA 92626

714-833-1800 • 800-624-3022

The *Certified Coin Dealer Newsletter*
announces a new **monthly** publication
featuring **Lowest Asks or Last Trades:**

the CCDn ASKSHEET

With the **sight-unseen** market beset by controversy over declining Bids, dealers need to have more complete information **now, more than ever!** Responding to the requests of scores of dealers, we are pleased to provide an important new source of necessary information. Even if the **sight-unseen** Bid reaches unrealistically low levels, having wholesale Low Ask or Last Trade information available will allow dealers to make more informed buying and selling decisions. And the spread observed will also give a strong indication of market liquidity.

The *CCDn ASKSHEET* will provide subscribers with the Lowest Ask or Last Trade prices seen during the preceding month in the dealer-to-dealer, wholesale marketplace. While we are offering this publication separately from the *Bluesheet*, we must point out that neither publication alone will give a complete picture of current wholesale market values. In fact, every page of the *ASKSHEET* will contain a caveat to that effect. After all, the Lowest Ask doesn't necessarily represent market value any more than the Highest Bid. But together, they should define the parameters of wholesale market value.

Hopefully, access to these dealer-to-dealer offers to sell will help stabilize the market price of coins. Uncertainty of value in a supply/demand marketplace means that fewer transactions can occur, and that benefits neither potential buyer nor potential seller.

Subscribe now to the *CCDn ASKSHEET*. Compiled by the same staff that has made the name *Bluesheet* synonymous with accuracy, timeliness, and reliability.

What everybody ought to know...

About the PCGS Population Report

And why, for \$10 an issue, you can't beat the value!

Each and every coin certified by PCGS, some you probably have in your collection, is in the PCGS Population Report. That's a lot of information. And as you can imagine, there are many different ways to organize and publish this data.

That's why we've been asking coin enthusiasts across the country, from the novice to the expert, what they want out of the PCGS Population Report. The result includes some improvements we think you should know about.

CIRCULATED COINS - It used to be, you had to wait two-and-a-half months to get circulated coin information. Now you get these statistics monthly.

WORLD COINS - Whether you have any world coins or not, you can see how they're doing on a monthly basis. Coins from Canada, England, Germany, Japan, Switzerland, and U.S. Philippines are already included and provide today's coin enthusiast with a whole new world of options.

INFORMATION - Each of the more than two million PCGS certified coins listed in the book are categorized by type and grade. This means that if you have a 1881-S Morgan silver dollar, PCGS graded MS65, you can find out with the turn of a page, just how many coins like yours are out there. This is an important factor to consider when researching facts on your coins.

The report now costs an amazingly low \$10 per issue.

MINTAGE QUANTITIES - Listed along with each coin is the quantity originally minted. This too, is useful information and having it this handy can be a valuable time saver when you need all the facts in a hurry.

READER FEATURES - We designed the format to be easy to read and with the step-by-step User's Guide to help you, you'll have no trouble at all

getting the information you need. A comprehensive Glossary of Terms is also included and provides definitions for abbreviations and covers individual characteristics of your coins.

GREAT PRICE - By switching to a new format we were able to cut costs and generate the most handsome and user-friendly Population Report ever (please call us for additional savings on multiple subscriptions).

HERE'S HOW TO ORDER - Simply complete and return the convenient coupon below. Or, if you like, call our toll-free number and a customer service representative will take your order over the phone. Don't miss out on a single issue, order today!

Market Stable at Current Levels Demand for St. Gaudens \$20s Particular

We know of few numismatists who don't have a very special place in their hearts for the \$20 Saints. Perhaps it is because the design still speaks volumes about artistic excellence; perhaps because the High Relief is certainly one of the world's most beautiful pieces of metallic art. Perhaps it is because ownership of one's first double eagle somehow spoke of becoming a serious numismatist.

Whatever the reasons, there is no question that the sight-unseen demand for Saints has declined (on average) along with the rest of the coin market. The accompanying graph, prepared from our monthly charting of the entire Saint-Gaudens series (hence the "stair-steps"), actually traces the activity of the overall market more closely than one would expect. Considering the doldrums of the bullion market, and the fact that lower-grade Saints are approaching perilously close to their intrinsic value, it is amazing that the relatively large number of generic dates in the series haven't pulled down the results even further.

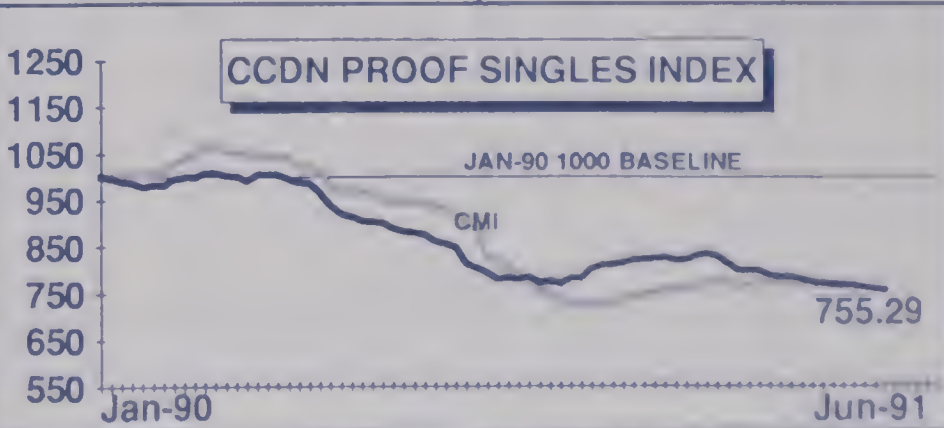

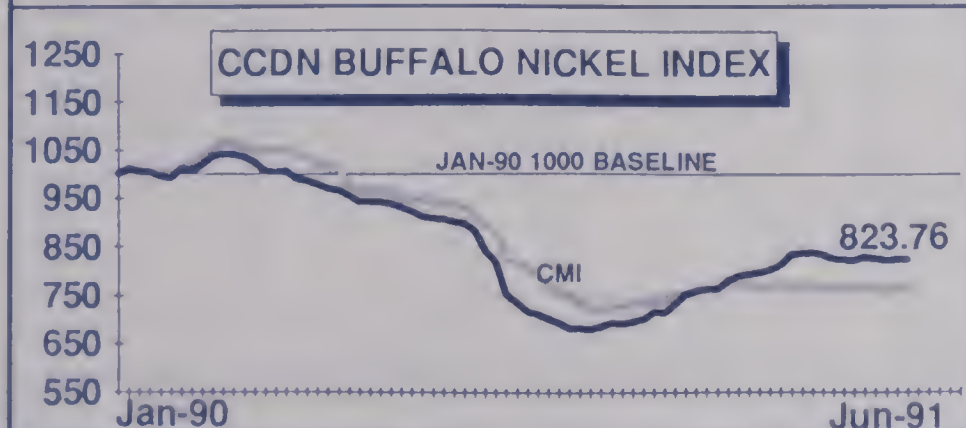

Perhaps this is a tribute to the true rarity of many of the dates, and the consistent demand of the specialists. The Type collector certainly has his choice of several dates available in very high grade at very reasonable prices. With around 10,000 Saints certified in MS65, there are more than enough available for every numismatist assembling a premium type set. Date collectors, on the other hand, have quite a chore. First, it isn't possible to assemble a complete set (even ignoring the problem of the 1933) in matching grades. Add to that complication the challenge of the 1927-D, and you have a problem that maybe even money cannot solve. Still, there seem to be many date collectors whose activities are sustaining the sight-unseen Bid levels for the better dates.

Assuming a date collector would seek to assemble an MS64 set (the highest quality with the greatest percentage of completion), has the challenge become easier over the past year? Sight-unseen Bid for the 52-piece set has declined from \$721,450 to \$672,505, while the average Bid decline was 21.5%. However, there remains the difference between *Bidding* and *Buying*, and many sellers know the true rarity and value of the premium pieces that they are offering. In fact, of the 52 specimens we list, sight-unseen Bid actually increased on *nine* of them (with the 1909 showing a staggering increase). Rarity still commands a premium in today's market, as it should in any supply-demand marketplace—remembering that rare dates only have special value to the date collectors who themselves are becoming as rare as the coins they prize.

The Bluesheet

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer, and may fluctuate according to needs.

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

the CURRENCY DEALER newsletter

... is a Monthly Publication that is the most COMPREHENSIVE and UP-TO-DATE pricing guide available in today's ever-changing field! DEALER-TO-DEALER BID/ASK Charts cover all of the following areas:

LARGE SIZE U.S. NOTES

- DEMAND NOTES
- U.S. NOTE (LEGAL TENDER)
- COMPOUND INTEREST TREASURY NOTES
- INTEREST BEARING NOTES
- REFUNDING CERTIFICATE
- SILVER CERTIFICATES
- TREASURY NOTES OR COIN NOTES
- NATIONAL BANK NOTES
- FEDERAL RESERVE BANK NOTES
- FEDERAL RESERVE NOTES
- NATIONAL GOLD BANK NOTES
- GOLD CERTIFICATES

U.S. FRACTIONAL CURRENCY

U.S. FRACTIONAL CURRENCY PROOF & SPECIMEN NOTES

SMALL SIZE U.S. NOTES

- LEGAL TENDER NOTES
- SILVER CERTIFICATES
- NATIONAL BANK NOTES
- FEDERAL RESERVE BANK NOTES
- FEDERAL RESERVE NOTES
- GOLD CERTIFICATES
- WW2 EMERGENCY ISSUES

UNCUT SHEETS - SMALL SIZE CURRENCY

- U.S. NOTES (LEGAL TENDER)
- SILVER CERTIFICATES
- WW2 EMERGENCY ISSUES
- NATIONAL CURRENCY

- ... **PLUS** IN-DEPTH ARTICLES and analyses, each month, written by the most respected experts in the field!
- ... **PLUS** AUCTION REPORTS — to give a clear and accurate picture of the most recent activity!
- ... **PLUS** special ISSUE-BY-ISSUE Charts covering special areas of changing importance!

Subscribe today and get the most comprehensive price guide on the currency market.

Currency Dealer newsletter

The *Certified Coin Dealer Newsletter*
announces a new **monthly** publication
featuring **Lowest Asks or Last Trades**:

the CCDn ASKSHEET

With the **sight-unseen** market beset by controversy over declining Bids, dealers need to have more complete information **now, more than ever!** Responding to the requests of scores of dealers, we are pleased to provide an important new source of necessary information. Even if the **sight-unseen** Bid reaches unrealistically low levels, having wholesale Low Ask or Last Trade information available will allow dealers to make more informed buying and selling decisions. And the spread observed will also give a strong indication of market liquidity.

The *CCDn ASKSHEET* will provide subscribers with the Lowest Ask or Last Trade prices seen during the preceding month in the dealer-to-dealer, wholesale marketplace. While we are offering this publication separately from the *Bluesheet*, we must point out that neither publication alone will give a complete picture of current wholesale market values. In fact, every page of the *ASKSHEET* will contain a caveat to that effect. After all, the Lowest Ask doesn't necessarily represent market value any more than the Highest Bid. But together, they should define the parameters of wholesale market value.

Hopefully, access to these dealer-to-dealer offers to sell will help stabilize the market price of coins. Uncertainty of value in a supply/demand marketplace means that fewer transactions can occur, and that benefits neither potential buyer nor potential seller.

Subscribe now to the *CCDn ASKSHEET*. Compiled by the same staff that has made the name *Bluesheet* synonymous with accuracy, timeliness, and reliability.

“One of the Best Kept Secrets of the Rare Coin Industry”

NOBODY KNOWS ULTRA-RARE PROOF COINS LIKE WE DO.

In the past few years alone, ACP has placed hundreds of extremely rare United States proof coins to private investors. Following are a select few of the more significant pieces we have handled:

		Original Mintage
◆ 1864 Small Motto 2¢ PCGS Proof 65 Red	Population: 1*	25
◆ 1838 Bust 25¢ PCGS Proof 66	Population: 1	1
◆ 1823 Bust 50¢ NGC Proof 63	Population: 1	1
◆ 1838-O Bust 50¢ NGC Proof 64	Population: 1	20
◆ 1845 Liberty Seated \$1 NGC Proof 65	Population: 1	8
◆ 1850 Liberty Seated \$1 NGC Proof 63	Population: 1	8
◆ 1884 Trade \$1 PCGS Proof 64	Population: 1	10
◆ 1901 Morgan \$1 NGC Proof 68	Population: 1	813
◆ 1863 \$3 Gold PCGS Proof 65	Population: 1	39
◆ 1899 Liberty \$10 PCGS Proof 67	Population: 1	86
◆ 1866 Liberty \$20 Gold PCGS Proof 64	Population: 1	30
◆ Complete PCGS Proof 65 sets of the following: Two-cent pieces, Three-Cent Nickels, Shield Nickels, Liberty (V) Nickels, Barber Dimes, Twenty-Cent Pieces and Barber Quarters.		

In June of 1990, we also earned the distinction of selling the the **RAREST** and **MOST EXCLUSIVE** United States coin. The Ultra-High-Relief (1907 Roman Numeral) St. Gaudens in NGC Proof 68 for over \$1.5 million!

* Population figures based upon June 1991 population reports.

These ultra-rare proof coins represent some of the finest rarities in numismatics today. We at ACP firmly believe that the time to invest in **Rare Date, Low Mintage** United States proof coins is **NOW!** Let us build a portfolio for you (minimum investment \$5,000). Please call Ira Einhorn today at (516) 921-0101.

Selective Demand Means Selective Pluses Discounted Sells Mean Selective Minuses

The coin market, for some time now, has been in a phase that can best be described as "consolidating". Compared to some of the alternatives, "stable" sounds pretty good to us. There is continued strong support for some issues. Additional charts, or selected portions of charts, show little support; a few dealers discounting those specific issues have produced assorted minus signs. And finally, scattered throughout the charts, there are declines created by dealers simply offering or trading coins at levels below last week's Bid. Overall, one needs to describe this market as stable, and enjoy doing so.

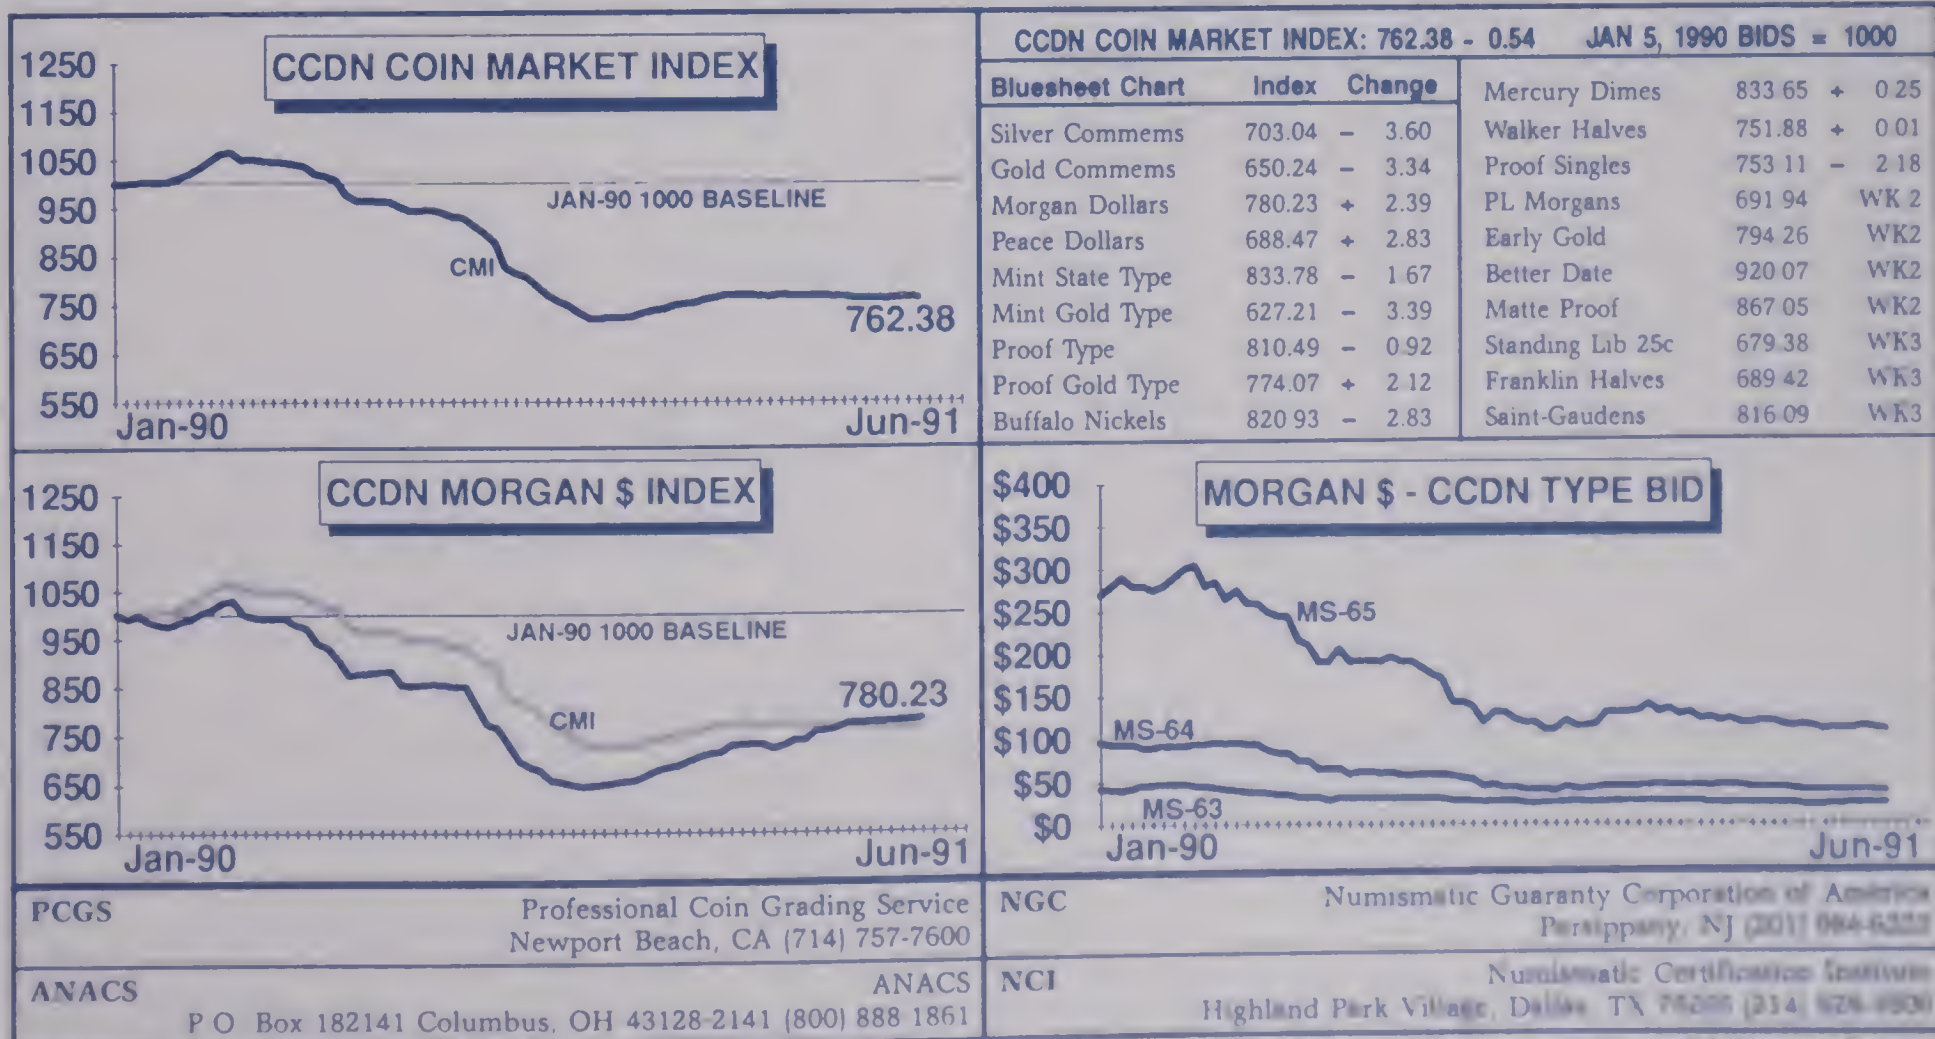

Certainly there are plus signs and minus signs, but if you could isolate this market from the long-term trends of the past two years, it looks pretty healthy. Of course, the key word really is "isolate". It isn't possible to simply look at the current market and forget that coin prices have largely been in a declining phase for a few years now. And you wouldn't really want to even try to ignore the historical context of pricing, because that is part of the process of formulating intelligent buying and selling decisions. Still, just because the market has been going down over time doesn't mean that this week the bottom hasn't been reached. Accepting the fact that the coin market is cyclical, we all know from experience that at some point, a top must be reached, and that at some other point a bottom must be reached. Great profits can be made by dealers' ability to participate during those times.

The pessimists look upon current levels and describe them as one of the quiet interludes between waves of liquidation. Certainly, we have all seen these periods of quiet while the market "decides" whether it will rise or fall. The optimists recognize that prices have been in decline, but look at current prices and see wonderful buy-

ing opportunities. Implicit in their assumption is that the market will be turning around soon and that enormous profits will be realizable.

As we have stated on many occasions, we are not in the guessing business. We know that in a supply-demand business, prices cannot rise without increased demand. During these slumps, dealers' cash flow is usually at a low, which may mean that they do not have the personal resources to create their own demand. Accordingly, a market turnaround requires broad-based demand from the collecting community. Yet, we also know that collectors too, usually wait out a decline on the side-lines until prices stabilize, and then want to be able to satisfy all of their pent-up demand at the new lower levels (about to go higher). With all parties waiting for someone else to make the first move, all should hope for a run-up in bullion to start the process.

Silver Commemoratives lost some of their recently gained ground, with a number of sells driving Bids lower. Gold Commemoratives are still in search of a hero. Morgan Dollars remain healthy, with most of the adjustments on the plus side. Peace Dollars are holding steady, but seem to suffer from mediocre interest. Mint State Type coins were on the down side, with numerous sells at just slightly lower prices. U.S. Gold Type coins lost ground, especially in the lower grades; some dealers can still remember when U.S. Gold coins were rare. Proof Type adjustments were largely balanced, and Proof Gold Type demonstrated a few solid advances. Among the specialty series, Buffalo Nickels showed few changes (unfortunately, most were negative). Mercury Dimes enjoyed some solid and widespread increases, as did Walking Liberty Halves. Proof Singles remained out of favor this week.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.
Client or sight-seen sales may command a substantial premium above Bluesheet Dealer to Dealer Bids.

The Bluesheet

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight-unseen bid prices shown. In the absence of current market bids the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer, and may fluctuate according to needs.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CCDn albeit, on a sight basis.

What Do You Need?

These days, coin dealers have a variety of needs, and coins are only one of them. Heritage offers a wide

range of services covering the full spectrum of the needs of today's dealers.

Split Deals: Do you have a lead on a major collection, but are short funds with which to purchase it? Heritage can provide cash for these occasions, and is willing to work on a "split profit" arrangement. *Call Steve Ivy, Jim Halperin or Martin Paul for details.*

U.S. Gold: We are the nation's largest importer of U.S. Gold from overseas. Our European contacts have been on the job since the mid 1970's, with more sources for both rare and bullion-oriented gold coins than anyone else around. *Contact Lee Sanders for current availability and prices.*

Auctions: With nearly one sale per month, you're never far from an opportunity to offer your inventory to thousands of retail buyers and hundreds of dealers. Our unique Bullet Sales feature a total turnaround time (from consignment to settlement) of about four weeks. Best of all, advances are available! *Give Bob Merrill or Leo Frese a call for further information.*

Certified Coins: With an inventory of over \$10 million, we are among the country's leading sources for PCGS, NGC and ANACS material. If you need it, we either have it or can get it. *Ask Tom Novy or Dave Lindvall.*

Rare Stamps: Ivy, Shreve & Mader Philatelic Auctions is one of the world's largest and most respected stamp auction companies. Offices in New York, Dallas and Los Angeles offer state-of-the-art services to all potential sellers of rare stamps. *Call Charles Shreve today for further details.*

Open to Buy: We are always willing buyers of almost any type of material - both raw and certified. Our bank line exceeds \$12 million, and our checks are good right away. No waiting or redepositing necessary. *Check with Greg Rohan or Martin Paul if you have coins you'd like to move.*

New Customers: Who couldn't use more of these? Join the nation's fastest-growing network of dealers on the U.S. Rare Coin Exchange. The Exchange sends both an electronic as well as hard-copy listing out to thousands of the strongest and most active retail buyers in the country every week. And right now, we're making some incredible offers to you, in order to build the Exchange even larger.

Summer Doldrums Slow Market Discounted Sells Strike at Bids

With the short work-week created by the Fourth of July holiday, it quickly became apparent that many dealers were taking advantage of the summer slowdown period to take much-needed vacations. Among the dealers who have tried to remain active, many were complaining that their customers seemed to have all gone on vacation as well. Dealers who have been through just one of these summer markets will recognize the frustration of customers deciding to spend much of their surplus cash elsewhere.

The slowdown in transactions this summer, coming on the heels of the recent market weakness, seems to be causing a number of dealers to drop their recent sell prices. As the offers to sell get lower, and the trade levels get lower, Bids are being seriously impacted. Nearly all of the minus signs in this issue are due to discounted sells. In the absence of visible Bid activity to support the current price levels, a single discounted sell can have a major impact on a large number of coins. The coin market is still struggling towards greater efficiency, and this is one area where the tail can still wag the dog. The heavier than normal discounts from Bid this week also signifies that some dealers are quite serious about raising cash (while reducing inventories).

Minus signs are also appearing on many of the generic issues. Collector coins are largely holding steady, but generics need to find additional support to help them maintain their support of the rarer dates. By definition, generics are the cheapest coins in a series, but much depends upon their participation in an active market. Dropping generic prices can negatively impact a large number of people, and this needs to be offset by using the lower levels to attract new collectors into the hobby. Much of the recent market volatility has been focused downward, and all dealers need to exert themselves to counteract negative publicity by focusing on spreading information about the joys of collecting.

Silver Commemorative changes were 3 to 1 to the minus side, but many of the minus signs were attributable to a decline in the Bid for Texas Type coins; such a declining Bid often has a rippling effect through series in which PDS Bid is primarily a multiple of the Type Bid. Gold Commemoratives continue their waves of liquidation, and there was little evidence of support this week, even at these levels. Morgan Dollars saw many declines, nearly all of which were a

result of discounted selling. A few dealers with want lists to fill were strongly supporting the lesser uncirculated Morgans, with plus signs on selected issues (especially those that seem to always be in demand somehow). Peace dollars are still quietly gathering signs of strength.

Mint State Type changes were relatively balanced, with much positive attention paid to some of the Half-Cent issues. Mint State Gold Type was nearly unanimously down, with the minus signs concentrated in the lower grades, this was especially discouraging to dealers who were viewing recent increases in spot with some hope. Changes in the Proof Type Bids were 3 to 1 in favor of declines, with many of the minus signs in the lower grades. Proof Gold Type remained largely unchanged, with just a few scattered changes on the minus side.

Among the specialty series, changes in the Buffalo Nickels were evenly balanced, with most of the activity in the middle uncirculated grades. Mercury Dimes were mainly up, with plus signs scattered across the chart. Changes in the Walking Liberty Halves were mixed; the pluses were primarily to be found in the lesser uncirculated grades, but were slightly outnumbered by minuses due to discounted sells. Proof Singles changes were dominated by declines, especially in the higher grades.

CCDN COIN MARKET INDEX: 760.77 - 1.61 JAN 5, 1990 BIDS = 1000

PCGS Professional Coin Grading Service, Newport Beach, CA Established in 1986, PCGS grades and authenticates U.S. and world coins. PCGS has certified more than two million coins. All coins must be submitted through one of the 560+ authorized dealers; contact PCGS at 800-447-8848 for a list.

PCGS has more than 15 graders on its staff; each coin is examined by at least two graders before the final grade is determined. No person involved with the grading process may be active in the buying or selling of U.S. coins. Fees start at \$26 or \$35 depending on the type of coin, plus postage and insurance; several levels of Express service are also available. PCGS coins are sonically sealed in an inert plastic "NumisCap" holder before return to the customer.

PCGS has a cash-backed Guarantee of Grade and Authenticity. PCGS has a comprehensive grading set which includes most major series. PCGS is a grading service only and does not make markets. PCGS dealers are responsible for their own making of markets in PCGS coins. PCGS publishes a monthly Population Report.

ANACS ANACS: The first authentication service (established in 1972), to which grading services were added in 1978. ANACS authenticates and grades all U.S. coins and Patterns, rendering unbiased third party grading opinions using prevailing market grading standards. After grading, the coins are placed in the sonically sealed ANACS Cache.[™]

ANACS has over 700 active submission centers. All coins can be sent through the submission centers or directly to the ANACS office. Submitters can also become Market Makers. The fee for a standard submission is \$23, and various levels of express service are available between \$40 and \$125.

Free information is available from ANACS, P.O. Box 182141, Columbus, Ohio 43218-2141 Phone 1-800-888-1861.

CCDN Bids reflect 1986 and newer certified coins, and assume the certificates have no negative comments. ANACS Bids are listed only once each month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$19, plus postage and insurance. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 550 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit, "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute. Organized in June, 1984 to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at Heritage Plaza Highland Park Village, Dallas, TX 75205-2788 Phone (214) 528-3500. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) compared to the other three services listed. Regular cost is \$24 per coin. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued, if not, the coin will be returned ungraded with a charge of 50% of the regular fee. They will certify coins already in holders without removal if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. Due to current trading volume, NCI coins will only be listed once a month. CCDN Bids reflect 1987 and newer certified coins.

Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids. Certification does not guarantee protection against the normal risks associated with potentially volatile markets.

The Bluesheet

The Certified Coin Dealer newsletter reports the national market for certified coins only following the most active areas for the most active grading services. CCDn uses every means available to insure accuracy and completeness of the sight-unseen bid prices shown. In the absence of current market bids, the CCDn will formulate an approximate bid based on prior bidding levels and current market activity. Individual buy and sell prices will vary from dealer to dealer and are strictly the responsibility of the dealer, and may fluctuate according to needs.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CERTIFIED COIN DEALER

Page 1

MORGAN DOLLARS

1. The MS60 and MS67 grades are for the only two Morgan Dollars grades that are not "P" or "D" grades.
2. Some prices are for uncirculated coins and are based on the "P" or "D" grade of the coin.
3. Prices are for the "P" or "D" grade of the coin.

The *Certified Coin Dealer Newsletter*
announces a new **monthly** publication
featuring **Lowest Asks or Last Trades:**

the CCDn ASKSHEET

With the **sight-unseen** market beset by controversy over declining Bids, dealers need to have more complete information **now, more than ever!** Responding to the requests of scores of dealers, we are pleased to provide an important new source of necessary information. Even if the **sight-unseen** Bid reaches unrealistically low levels, having wholesale Low Ask or Last Trade information available will allow dealers to make more informed buying and selling decisions. And the spread observed will also give a strong indication of market liquidity.

The *CCDn ASKSHEET* will provide subscribers with the Lowest Ask or Last Trade prices seen during the preceding month in the dealer-to-dealer, wholesale marketplace. While we are offering this publication separately from the *Bluesheet*, we must point out that neither publication alone will give a complete picture of current wholesale market values. In fact, every page of the *ASKSHEET* will contain a caveat to that effect. After all, the Lowest Ask doesn't necessarily represent market value any more than the Highest Bid. But together, they should define the parameters of wholesale market value.

Hopefully, access to these dealer-to-dealer offers to sell will help stabilize the market price of coins. Uncertainty of value in a supply/demand marketplace means that fewer transactions can occur, and that benefits neither potential buyer nor potential seller.

Subscribe now to the *CCDn ASKSHEET*. Compiled by the same staff that has made the name *Bluesheet* synonymous with accuracy, timeliness, and reliability.

CCDn ASKSHEET

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

ANA Summer Convention Approaching Centennial Celebration to Star

A full century of service to the numismatic community—that's no small achievement for the American Numismatic Association. When one considers how the hobby has changed and grown over those ten decades, it seems appropriate to reflect on how the ANA has nurtured numismatics. Rereading articles from the *Numismatist* is an education in itself, and reminds us that current scholarship stands on the shoulders of all the numismatists who studied and published before us. The growth of the *business* of numismatics depended on the growth of collectors, and here too, the ANA was a leading factor.

America's dealers and collectors will want to be part of the anniversary celebration when the ANA meets at the Rosemont/O'Hare Exposition Center, August 10, 1991 through August 18, 1991. The summer months are normally slow for the dealer community, but you can bet that Chicago should witness a spectacular convention next month. In addition to the usually wonderful offering of seminars and lectures, the ANA has surpassed all expectations in presenting educational opportunities. On the bourse floor, dealers are predicting increased activity, with collectors starting to reappear. Advanced collectors will naturally be there, but dealers will want to consider inviting all of their customers to attend. And while you are at it, you might want to encourage your customers to join any one of the specialty organizations covering their collecting interest, many of which will be hosting meetings in Chicago.

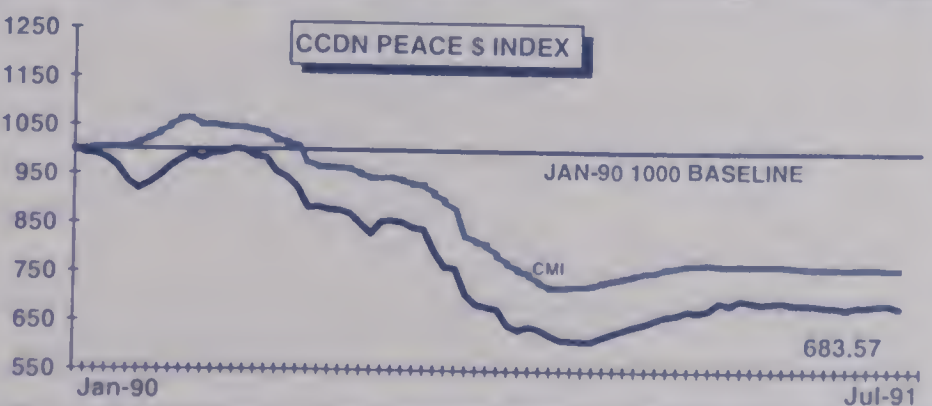

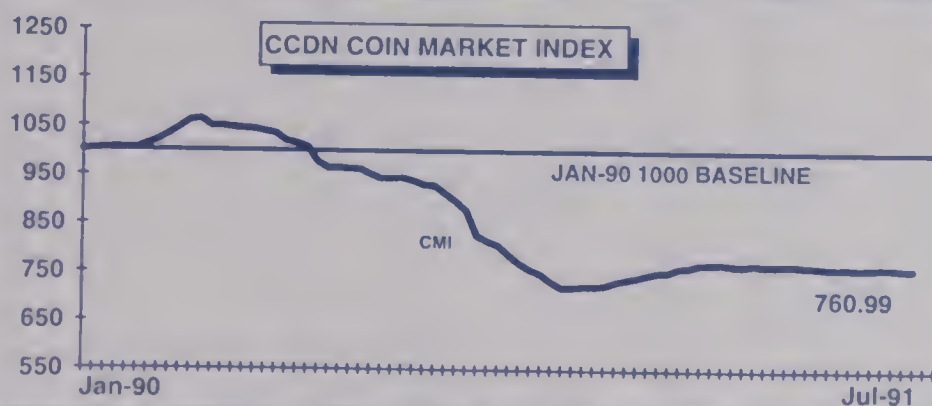

Buyers in the market certainly have an abundance of nice material from which to choose (who would have imagined Gem Morgans around \$100?). Numismatists who do the bulk of their buying at auction will likewise have plenty of chances to make significant purchases at the official 1891/1991

ANA Centennial Auction being held by Auctions by Bowers & Merena. Before mentioning some of the auction highlights, it seems appropriate to mention that the fees paid by the firms hosting the official ANA auctions over the years have gone a long way towards supporting the educational programs of the ANA. Every ANA member receives far more in benefits than could be provided by their low cost membership, and the contributions of these firms are helping to make your knowledge and your hobby grow. Regular customers of Auctions by Bowers & Merena will expect their ANA sale to be special, and they won't be disappointed. As befits an ANA sale, there will be something of interest to every collector, and even a cursory reading of the catalogue will be an educational experience. Among the certified highlights of the 1891/1991 ANA Centennial Auction will be:

ISSUE	CERTIFIED GRADE
1901 S Barber Quarter	NGC65
1878 \$3	PCGS Pr65
1879 \$4 Flowing Hair	PCGS Pr60
1864 \$5	PCGS Pr65
1907 \$20 High Relief	PCGS Pr67
1908 \$20	NGC Pr65
1851 \$50 A. Humbert	NGC61

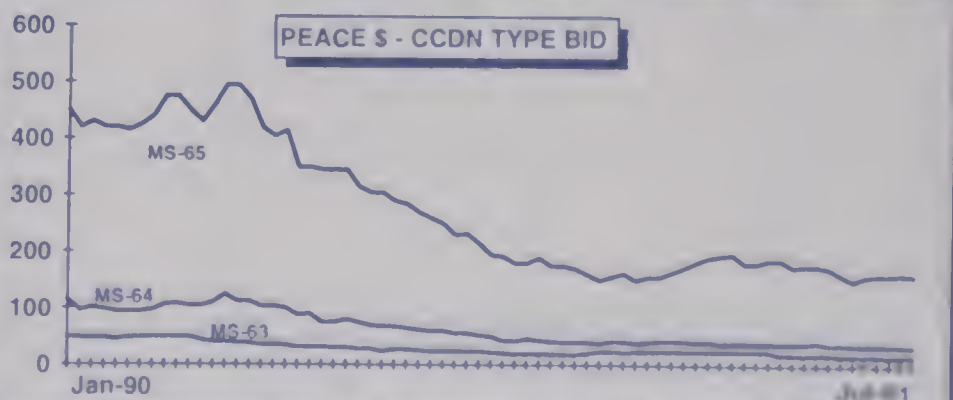

And as a reminder that there are some mighty interesting coins that still haven't been slabbed, the Auction will also feature a 1900 Indian cent in Gold, graded MS63, and an 1814 Bust Hall in Platinum. Judd 33, in F140.

If you haven't made plans to attend the ANA, do it now! This is one birthday party that no numismatist should miss!

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer to Dealer Bids.

GRAPHICS Shane Downing

Certified Coin Dealer newsletter reports current wholesale market values for all trading coins, including foreign. The number of coins traded through the fully market activity in July 1991 has been reported as visible. Bid Ask prices, trading information, and auction prices. The CCDn may not alter market value because high Bidder removes his Bid but will be strongly influenced by Asks or Trades with a near or below current wholesale value. CCDn's very means available to insure accuracy and completeness of the wholesale values shown. Blue sheets prior to April 1991 reported Bids based primarily on the highest sight unseen Bid. Individual buy and sell prices will vary from dealer to dealer are strictly the responsibility of the dealer and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. Client or sight seen trades can be expected to occur at substantially higher levels in many cases.

City _____ State _____ Zip _____

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

We Collect Clients. . .

Our Clients Collect Coins

Not many dealers are willing to make a lifetime commitment to their clients. In fact, **Joel D. Rettew & Son Rare Coin Brokerage** is the only American numismatic firm to make this offer to you:

- We will work for you in a brokerage capacity, which means that we *are on your side* in making money in the numismatic marketplace!
- We can sell your coins *for you* in retail transactions for a 10% commission!
- We will sell coins *to you* at a very conservative mark-up (our average is about 10%)!
- We will give you a FREE statistical analysis of your current portfolio. (Minimum \$20,000)

What's in it for us?

- Financially, we will earn 10% of any profits that we assist you in generating for your account.
- More importantly, we want *all* of your coin business *for life*. We want a long-term relationship with you as a customer and as a friend.

There are many reasons why **Joel D. Rettew & Son Rare Coin Brokerage** should be your dealer of choice. We have been buying and selling coins since 1953, nearly four decades of service to our old customers and *friends*. But we are just as serious about making *new friends* through servicing new customers - and we are serious enough to offer benefits unmatched by any other dealer in America!

Joel D. Rettew & Son Rare Coin Brokerage

575 Anton Blvd. Suite 790 • Costa Mesa, CA 92626

the CCDn ASKSHEET

a monthly publication for coin dealers
featuring **Lowest Asks or Last Trades:**

With the **sight-unseen** trading market beset by controversy over declining Bids, dealers turned to the **CCDN family of publications** and asked for more information on the selling and trading prices of coins. We responded, quickly and confidently, with the **CCDN ASKSHEET**, providing dealers with an important new source of needed information. With wholesale Low Ask or Last Trade information available at their finger tips, dealers are more confident making their buying and selling decisions.

Each **CCDn ASKSHEET** provides subscribers with the Lowest Ask or Last Trade wholesale price seen in the marketplace during the preceding month. While this publication is being offered separately from the *Bluesheet*, we recognize that neither publication alone will give you a **complete** picture of the current wholesale, dealer-to-dealer marketplace. Together, the High Bid of the *Bluesheet* and the Low Ask/Last Trade of the *ASKSHEET* define the parameters of market value; dealers feel more secure knowing the limits inside of which they need to operate to make that sale! Our subscribers already know the best way to avoid the uncertainties of value in a volatile supply/demand marketplace. And they do it by turning to the name that dealers have trusted for more than 28 years - the **Coin Dealer Newsletter family of publications**.

And if you need a better reason to subscribe now, all checks received before August 15TH are eligible to receive a **free** copy of the 1991 Numismatic Dealer Directory. This \$25 value can be yours just for checking the request box with your subscription order below. Don't hesitate - subscribe now.

What everybody ought to know...

About the PCGS Population Report

And why, for \$10 an issue, you can't beat the value!

Each and every coin certified by PCGS, some you probably have in your collection, is in the PCGS Population Report. That's a lot of information. And as you can imagine, there are many different ways to organize and publish this data.

That's why we've been asking coin enthusiasts across the country, from the novice to the expert, what they want out of the PCGS Population Report. The result includes some improvements we think you should know about.

CIRCULATED COINS - It used to be, you had to wait two-and-a-half months to get circulated coin information. Now you get these statistics monthly.

WORLD COINS - Whether you have any world coins or not, you can see how they're doing on a monthly basis. Coins from Canada, England, Germany, Japan, Switzerland, and U.S. Philippines are already included and provide today's coin enthusiast with a whole new world of options.

INFORMATION - Each of the more than two million PCGS certified coins listed in the book are categorized by type and grade. This means that if you have a 1881-S Morgan silver dollar, PCGS graded MS65, you can find out with the turn of a page, just how many coins like yours are out there. This is an important factor to consider when researching facts on your coins.

2,480,712 Coins Graded with a
Declared Value of \$2,903,108,300

THE STANDARD FOR THE RARE COIN INDUSTRY.

Certification by PCGS does not guarantee protection against the normal risks associated with potentially volatile markets.

The report now costs an amazingly low \$10 per issue.

MINTAGE QUANTITIES - Listed along with each coin is the quantity originally minted. This too, is useful information and having it this handy can be a valuable time saver when you need all the facts in a hurry.

READER FEATURES - We designed the format to be easy to read and with the step-by-step User's Guide to help you, you'll have no trouble at all

getting the information you need. A comprehensive Glossary of Terms is also included and provides definitions for abbreviations and covers individual characteristics of your coins.

GREAT PRICE - By switching to a new format we were able to cut costs and generate the most handsome and user-friendly Population Report ever (please call us for additional savings on multiple subscriptions).

HERE'S HOW TO ORDER - Simply complete and return the convenient coupon below. Or, if you like, call our toll-free number and a customer service representative will take your order over the phone. Don't miss out on a single issue, order today!

"THE" Commem Set Goes To Auction Summer Slowdown Continues As Expected

ANA convention-goers have become accustomed over the years to look for some mighty interesting coins to be sold in accompanying (albeit non-official) auction sales. This is the first summer in more than a decade that there will be no Apostrophe sale (due to the breakup of the partnership), but there will still be some wonderful coins available.

Heading the list of "Most Beautiful Coins in a Collection" is surely the Larry Shepherd Collection of Commemorative coins, being offered by Superior Galleries on August 11 in Rosemont, Illinois. To do justice to this notable collection, we really have to talk about two very different aspects - the technical and the aesthetic.

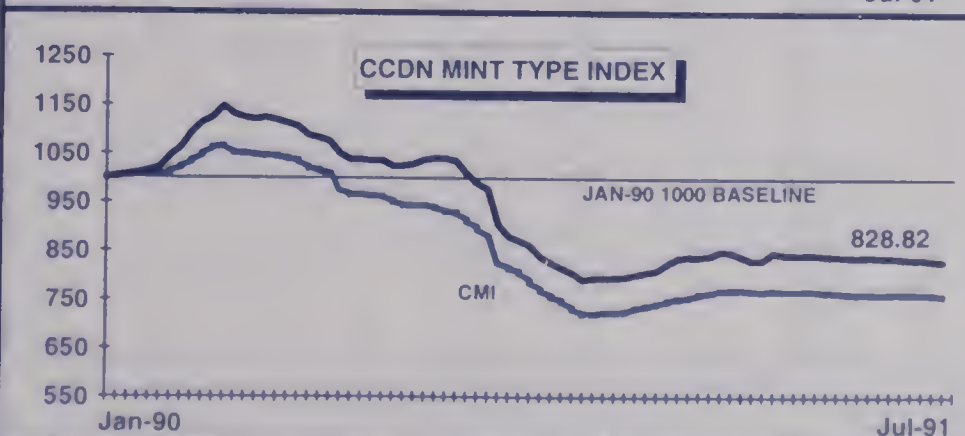

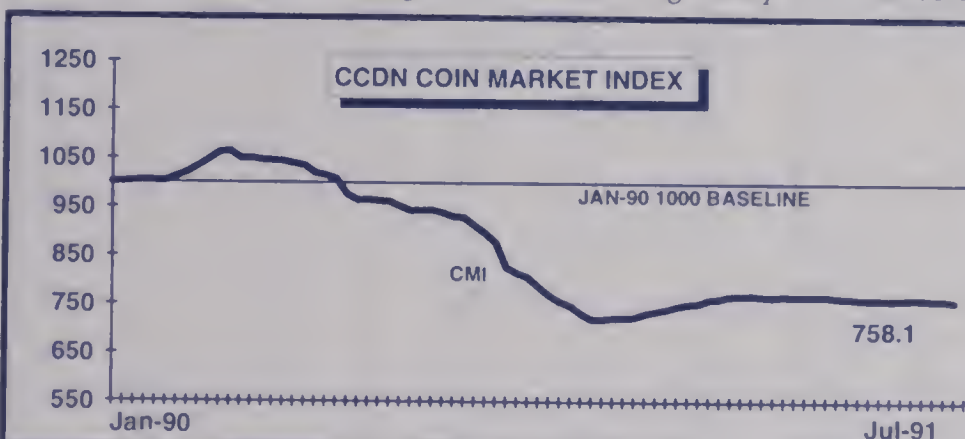

From a technical aspect, this is an extraordinary collection. First, we'll confine our discussion to just the 144 pieces of the "final" collection; that is, we'll ignore the 200+ duplicates also being sold, which in themselves are superior specimens. The statistics tell the complete story: All 144 pieces have been graded MS65 or higher by PCGS or NGC; 75 of the pieces are graded MS67 or MS68; every Type has at least one MS66 example (or higher!). If those numbers aren't sufficiently impressive, remember that 102 (of the 144) are the highest graded by their service, and that many have a population of three or less. We'll assume that none would care to challenge the quality of the offerings.

More impressive to us is the eye for aesthetic qualities that Shepherd evidenced in assembling his collection - and collection is the operative word. Over more than a decade, Shepherd examined several hundred thousand Commemoratives, and owned more than 5,000 pieces in the process of upgrading his collection. An *aficionado* of toning, Shepherd sought not only pieces of the highest quality, but also one that exhibited the very finest qualities of original, colorful toning. Many times the color

plates in auction catalogues are gratuitous, the color plates of the Shepherd Collection coins are worth the price of the catalogue even if one has only a cursory interest in Commems. They just don't come any prettier than this, or they would be in this catalogue.

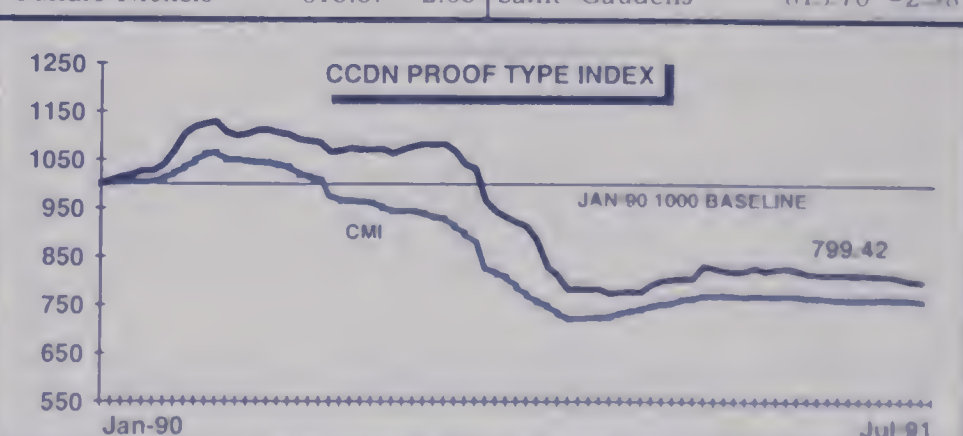

Of all the accolades accorded this collection (and any one who has seen these coins will join in the chorus of praise), most impressive is PCGS' decision to reholder their coins with a special insert acknowledging their provenance as part of the Shepherd Collection. Collections are a challenge to assemble, and the sad part of the reward comes when it is time to sell. Certainly the auction catalogues themselves stand as a memorial to the efforts of the collector, but to make sure that the pedigree of the Collection stays with the coin - what a nifty idea!

At the risk of mixing metaphors, the summer doldrums struck in force this week. The charts throughout the *Bluesheet* are peppered with minus signs as dealers were seen offering material at discounted prices. While the level of activity is lower, as expected during the pre-ANA slowdown, the number of trades which are occurring at lower levels is surprising. Judging by actions, dealers are still not convinced that we have reached the bottom of this market cycle. As long as there are sellers willing to sell selected issues below last week's Bid, prices will continue to drop; however, remember that less than 10% of the various coin issues are involved in this week's sell-off. The best news that we have to report is that common MS65 Morgans are strengthening, and Mint Type seems to be the strongest of the charts. Since these are both areas that appeal to collectors, strength here may ultimately firm-up other areas of the market; the market can rise only when demand spreads more rapidly than supply.

CCDN Coin Market Index: 758.10 - 2.90 Jan. 5, 1990 Bids = 1000

The Bluesheet

The Certified Coin Dealer newsletter reports current wholesale market values for coins certified by the most active grading service. The numbers reported are determined through careful study of market activity including the highest nationally reported visible Bids. Ask prices, trading information, prior bidding levels, and auction prices. The CCDn may not alter market value because the high Bidder removes his Bid, but will be strongly influenced by A/s or Trades which are near or below current wholesale value. CCDn uses every means available to insure accuracy and completeness of the wholesale values shown. Bluesheets prior to April 1991 reported Bids based primarily on the highest sight-unseen Bid. Individual buy and sell prices will vary from dealer to dealer, are strictly the responsibility of the dealer, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

PCGS DMPL and NGC DMPL tabs are for fully Deep Mirror Prooflike (some tabs for PCGS Flashed Proof, PL, and some prooflike or one-sided PL) will be listed multiple to a single tab (a pair of 100 coins each). Tabs have never represented fully deep mirror prooflike specimens.

[illegible]

CCDn does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

[illegible]

Prices are for the most common dates. Better date coins usually bring more than the Bid. of the most common issues listed herein.

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

A collage of various US coins and medals. The central focus is the 1910 Indian Head Cent, showing a Native American profile. Other prominent coins include the 1840 Seated Woman Cent, the 1917 Liberty Bell Cent, and the 1900 Mercury Dime. Smaller coins like the 1892 Union Shield Cent and the 1893 Liberty Cent are also visible. The arrangement is artistic, with some coins overlapping others, set against a dark background.

the CCDn ASKSHEET

a monthly publication for coin dealers
featuring **Lowest Asks or Last Trades:**

With the **sight-unseen** trading market beset by controversy over declining Bids, dealers turned to the **CDN family of publications** and asked for more information on the selling and trading prices of coins. We responded, quickly and confidently, with the **CCDN ASKSHEET**, providing dealers with an important new source of needed information. With wholesale Low Ask or Last Trade information available at their finger tips, dealers are more confident making their buying and selling decisions.

Each **CCDn ASKSHEET** provides subscribers with the Lowest Ask or Last Trade wholesale price seen in the marketplace during the preceding month. While this publication is being offered separately from the *Bluesheet*, we recognize that neither publication alone will give you a **complete** picture of the current wholesale, dealer-to-dealer marketplace. Together, the High Bid of the *Bluesheet* and the Low Ask/Last Trade of the *ASKSHEET* define the parameters of market value; dealers feel more secure knowing the limits inside of which they need to operate to make that sale! Our subscribers already know the best way to avoid the uncertainties of value in a volatile supply/demand marketplace. And they do it by turning to the name that dealers have trusted for more than 28 years - the **Coin Dealer Newsletter family of publications**.

And if you need a better reason to subscribe now, all checks received before August 15TH are eligible to receive a **free** copy of the 1991 Numismatic Dealer Directory. This \$25 value can be yours just for checking the request box with your subscription order below. Don't hesitate - subscribe now.

Transactions Determining Market Direction MS65 Morgan Bid Drops Below \$100

We really do prefer to start off with good news, but the biggest news in the market this week is that the **sight-unseen** Bid for MS65 Morgans dropped below the \$100 benchmark. In a supply/demand marketplace, coins are worth what they are worth, and there seems little logic to saying that this coin is undervalued or that coin is overvalued. And there is no use saying that the Bid will definitely recover, anymore than there is value in our predicting that it may decline further. The coin will be worth tomorrow what it will be worth tomorrow, and the market will decide that value. We will satisfy ourselves with one observation: Gee whiz, you sure are getting a lot of coin, a lot of history, a lot of *flash* here for a \$99 Bid. Lower sells are continuing to drive other Bids down as well, as an inspection of the charts will reveal. The good news is that lots of Trades are occurring, and that remains the heart and soul of the coin market.

Silver Commemoratives were largely steady, and the changes were mixed. Gold Commems are continuing to show signs of weakness. Morgan Dollars slipped on the declining generics and selected sells. Peace Dollars were noticeably weaker in MS63 & MS64. Signs of increased demand for selected Mint State Types were offset by lowered sells, while Proof Types were largely unchanged. Mint State Gold Types were mixed, and Proof Gold Types also largely stable. Buffalo Nickel changes were almost entirely driven by discounts, as were higher grades in the Mercury Dimes; some generic advances helped the Mercury chart overall. Walkers saw some discounting as well, and Proof Singles continue recent trends of weakness.

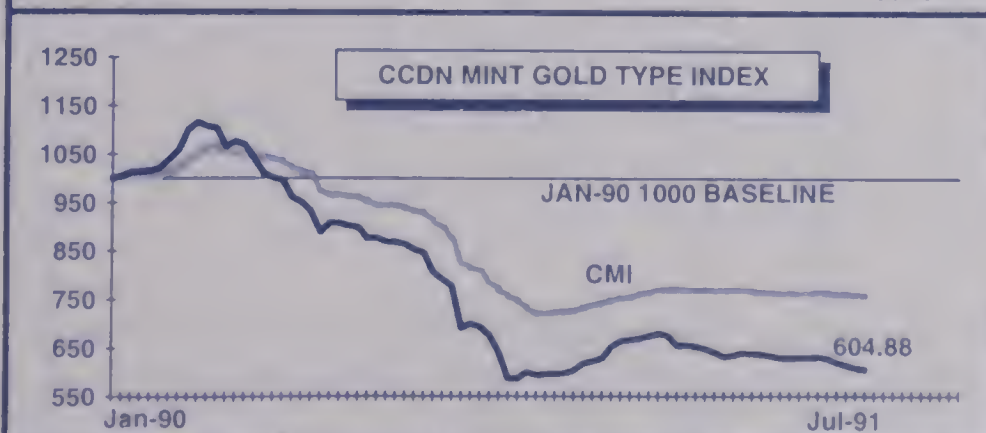

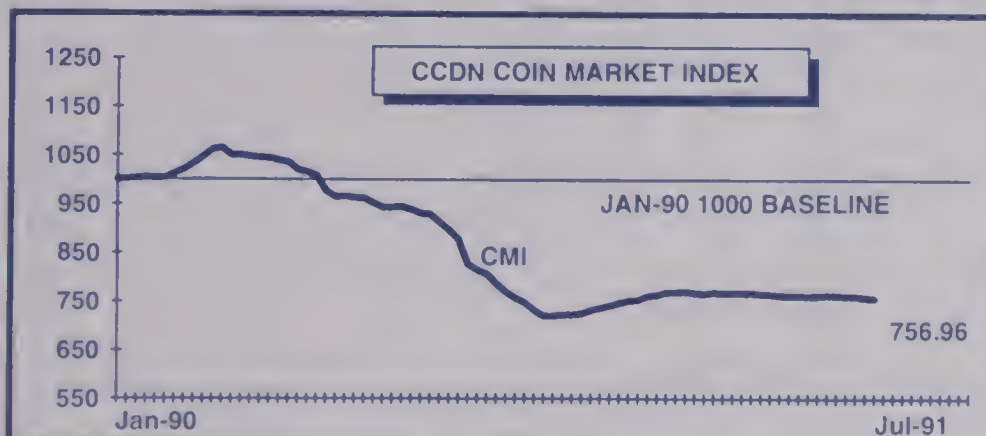

We recently received our copy of the official 1891/1991 ANA Centennial Auction being held by Auctions by Bowers & Merena at the ANA

Convention. While perusing this impressive catalogue (while we don't buy or sell coins here at the CDN, we can still dream), we ascertained that we had conveyed some incorrect information to our readers. One of the stars of the auction, a 1907 High Relief \$20 in **Proof67** has been certified by NGC and not PCGS (as we listed it). We probably should have caught this, as PCGS does not recognize the High Relief Proof.

This got us to thinking about one of the more enviable aspects of employment at a certification service. Numismatists share in common, the intense desire to look at coins, and there is no joy greater than being able to inspect beautiful coins. During lot inspection prior to auction sales, many non-buyers will come in to look at coins just for the sheer enjoyment of it. What could be better? Being paid to look at coins!

OK, we'll admit that there are drawbacks. The eyes do get tired and it is probably difficult to show enthusiasm over your ten thousandth MS63 Morgan Dollar. But, then there are the coins that are burned into your memory. In speaking with an NGC official about the characteristics of 1907 High Relief Proofs, we inquired about other memorable coins that he has had the privilege of inspecting. Wow, it was like asking a grandmother about her grandchildren; no need to take a moment and gather thoughts here!

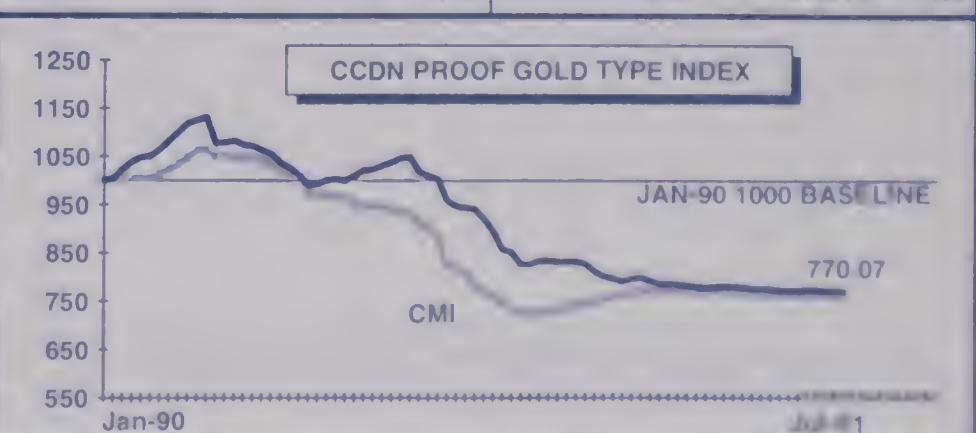

A second **remarkable** coin, curiously enough, was still another High Relief: The Ultra High Relief in Proof68! Where to start in describing either coin? Suffice it to say of such important coins that they are a privilege to inspect, a responsibility to certify, and a pride to own. One of them is coming up for Auction next month when the ANA meets at the Rosemont/O'Hare Exposition Center, and all the work that brings that coin to its new owner suddenly becomes justified.

[illegible]

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

PLP10-DME1 and 100C-DME1 have not fully developed. Among freshwater snails, both the PL10-DME1 and 100C-DME1 are pro-sulfide or ornithine PL10 and 100C, resulting in a non-sulfide form. The presence of both PL10-DME1 and 100C-DME1 in the same snail suggests that the two are related.

CCDN does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

All guests are subject to a security check at the entrance to the hotel. The hotel will not be responsible for any loss or damage to guests' property.

CCDN does not represent that it is possible to purchase selected coins at these Bid levels. CCN's historical data indicates that the Bid levels can be expected to occur at substantially higher levels in many cases.

For certified coins not listed in the CCDn, please refer to the COIN DEALER newsletter for current B.A.L.V.

When Is the Best Time to Buy Coins? Market Cycles Provide Opportunities

There is no sure-fire answer to the question "When is the best time to buy coins?". Most dealers and experienced collectors, having been through pricing cycles, will agree that buying is best done at the bottom of the market cycle. Of course, we all know that point can be identified only after we are past it. We also know that those who 'Buy Low & Sell High' are going to reap the greatest profits or assemble the finest collection for the least outlay. Pinpointing the bottom is a task for the skillful and the lucky.

We are hearing from dealers that now is a time, if not "the" time to make purchases. At current levels, many coins are down around 50% from their relatively recent highs. As one dealer expressed his opinion, "How much lower can many of these coins go?". Other dealers contend that prices will have to fall more, until we reach levels where the collectors will consider them ridiculously low and increase their purchasing.

Dealers have always played an important role in establishing when market peaks or troughs have been reached, and the size of a dealer's inventory is a prime factor. In a declining market, dealers need to liquidate additional inventory to sustain their cash flow. This adds additional supply to a market already suffering from inadequate demand to sustain prices. It is no wonder that dealers dread down-markets. We can think of only one dealer who has made down-markets his entire wholesale life; he only buys when he thinks the bottom has been reached, then he buys big, and takes his profits *along the way* to the top. We can report that his checkbook has finally come out, although the check writing has been limited thus far.

As long as discounted sells continue to dominate market activity, prices will continue to fall (as is expected in a supply/demand marketplace). While the fact that

many trades are occurring is a sign of a healthy market, there is no escaping the state of mind created by consistently falling prices. The negative attitude created only help to push the market further down, that is low depression is created. It is hard (if not impossible) to have a positive attitude in an inventory based industry when the value of that inventory drops every week, and liquidating the inventory only hastens the price declines. Times like this make it hard to remember just how profitable the coin business can be when prices are rising every week.

At some point, the bottom will be reached, and you can be assured that anyone

buying MS65 Morgans at \$100 cannot lose \$750 on each coin. Someone *has* done that for him. Sure they can decline further, but that shouldn't blind buyers to the long-term profit potential in a cyclical industry. Sooner or later the "crowd" will begin to agree with you on the profit potential of our little hobby, and prices will begin to rise again.

We would argue for selectivity. Remind your customers who have wanted to own selected coins for some time, that now is a good time to get serious about fulfilling their desires. If the price slips

little further, have them content themselves with thinking about how much less they paid than they (or you!) would have, just two short years ago. Contrarian thinking is difficult to put into practice without intense discipline, but we can assure you that many profits have been made by buying from "investors" when their interest has waned, and reselling to them when their demand has recovered. Investors may have little interest in coins now, and collectors will be able to take advantage of the lower prices created by the vacuum. But we all know that sooner or later, some investors will be back, and a lucky few will have set aside the coins to sell to them at enormous profits.

PCGS Professional Coin Grading Service, Newport Beach, CA: Established in 1986, PCGS grades and authenticates U.S. and world coins. PCGS has certified more than two million coins. All coins must be submitted through one of the 560 + authorized dealers; contact PCGS at 800-447-8848 for a list.

PCGS has more than 15 graders on its staff; each coin is examined by at least two graders before the final grade is determined. No person involved with the grading process may be active in the buying or selling of U.S. coins. Fees start at \$26 or \$35 depending on the type of coin, plus postage and insurance; several levels of Express service are also available. PCGS coins are sonically sealed in an inert plastic "NumisCap" holder before return to the customer.

PCGS has a cash-backed Guarantee of Grade and Authenticity. PCGS has a comprehensive grading set which includes most major series. PCGS is a grading service only and does not make markets. PCGS dealers are responsible for their own making of markets in PCGS coins. PCGS publishes a monthly Population Report.

ANACS ANACS: The first authentication service (established in 1972), to which grading services were added in 1978. ANACS authenticates and grades all U.S. coins and Patterns, rendering unbiased third party grading opinions using prevailing market grading standards. After grading, the coins are placed in the sonically sealed ANACS Cache™.

ANACS has over 700 active submission centers. All coins can be sent through the submission centers or directly to the ANACS office. Submitters can also become Market Makers. The fee for a standard submission is \$23, and various levels of express service are available between \$40 and \$125.

Free information is available from ANACS, P.O. Box 182141, Columbus, Ohio 43218-2141. Phone 1-800-888-1861.

CCDn Bids reflect 1986 and newer certified coins, and assume the certificates have no negative comments. ANACS Bids are listed only once each month.

NGC Numismatic Guaranty Corporation of America. Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grade and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$19, plus postage and insurance. After it is graded, it is then placed in a "lab tested" inert, hard plastic holder and sonically sealed, then returned to the customer.

There are over 550 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principal NGCs do not buy or sell coins for commercial profit. "Arm's length" NGCs have a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute. Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 11-ridge Place, Highland Park Village, Dallas, TX 75205-2788. Phone (214) 524-3500. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (more merciful) compared to the other three services listed. Regular cost is \$24 per coin. You may request a specific grade and if NCI can verify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded with a charge of 50% of the regular fee. They will verify coins already in holders without removal, if requested.

NCI has established grading sets for Silver Dollars, 800's, quarters, and Walking Liberty Halves. Due to current trading volume, NCI coins will only be listed once a month. CCDn Bids reflect 1987 and newer certified coins.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

The Bluesheet

The Certified Coin Dealer newsletter reports current wholesale market values for coins certified by the most active grading services. The numbers reported are determined through careful study of market activity including the highest nationally reported visible Bids, Ask prices, trading information, prior bidding levels, and auction prices. The CCDn may not alter market value because the high Bidder removes his Bid, but will be strongly influenced by Asks or Trades which are near or below current wholesale value. CCDn uses every means available to insure accuracy and completeness of the wholesale values shown. Bluesheets prior to April 1991 reported Bids based primarily on the highest sight-unseen Bid. Individual buy and sell prices will vary from dealer to dealer, are strictly the responsibility of the dealer, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

ANA to Confront Sluggish Market Collectors Coming to Chicago to Buy

A successful convention for dealers means buying and selling lots of coins. That may sound superficial, but many of the dealers descending upon Chicago next week are hoping to do just that. Dealers know that the only thing better than a trade is a profitable trade, but in a declining market replacement cost becomes almost as important as original cost. For the collectors, this ANA will also offer opportunities for many things. Buying coins will certainly be a major activity, although collectors of tokens, medals, currency and other numismatic disciplines will also be out in force. The various specialty club meetings and public presentations always draw the faithful and the special events marking the 100th anniversary of the American Numismatic Association are sure to be a crowd-pleaser.

Judging just from the Auction sales awaiting them, we know that buyers will have a wide range of material from which to choose, and add to that the diversity offered on the bourse floor. What kind of show are the dealers predicting? So far, expectations are pretty mixed, depending on whether dealers are attending to BUY or SELL; this is clearly being defined as a "buyer's market".

The dealers with the best attitude are those that are working closely with educated customers, educated to the numismatic "facts of life". Sure, prices are down right now, but one man's lemon is someone else's lemonade; low prices also mean that the downside risk has been lowered. For collectors (or investors) who have been involved in a long-term buying program, cost averaging has taken some of the sting out of the recent drops. For the true collectors, is there any greater joy than knowing that the same dollar today will buy twice the coin that it would just two years ago? Contrarian investing requires a sophisticated clientele; dealers who work with such customers are starting to advocate the selective buying of some of the rarer issues at current levels. This is especially advantageous for their customers who are working on sets - this may be the best opportunity in years for filling those gaps. Customers who love coins enough to be buying now, however, are also the

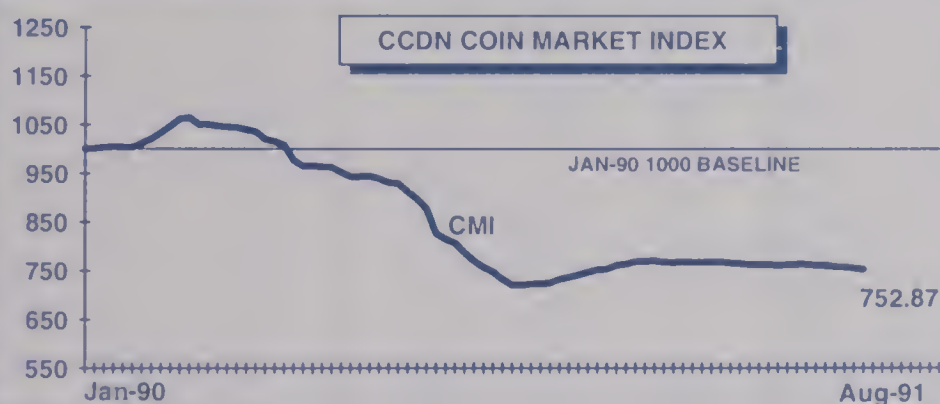

kinds of customers who will want to look at the coins before purchasing. Short term, the tight uneven market still tends to be under pressure.

There is some good news to be gleaned from this week's charts. Gold is finally starting to show signs of life. What a solid increase in gold would do for a successful ANA. Those dealers who can remember customers standing in 3 hour lines to buy gold must be wondering what has happened to this precious metal, or rather, what has happened to its purchasers.

Silver Commemoratives were largely unchanged, although there was a flurry of positive activity in the MS64 grade. Gold Commems were slightly on the downside, as they are wont to do. Morgan Dollars were largely steady on the better dates, with generic MS63's continuing to trade around the \$100 mark; every time a Bidder bravely steps forward above \$100, his order is rapidly filled and the Bid retreats. Peace Dollars have resumed their lackadaisical ways, with a few trades pushing the CCDn CMI down.

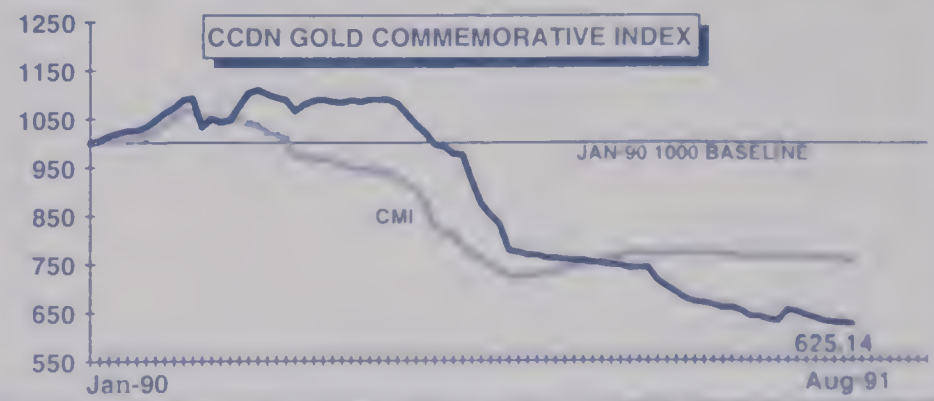

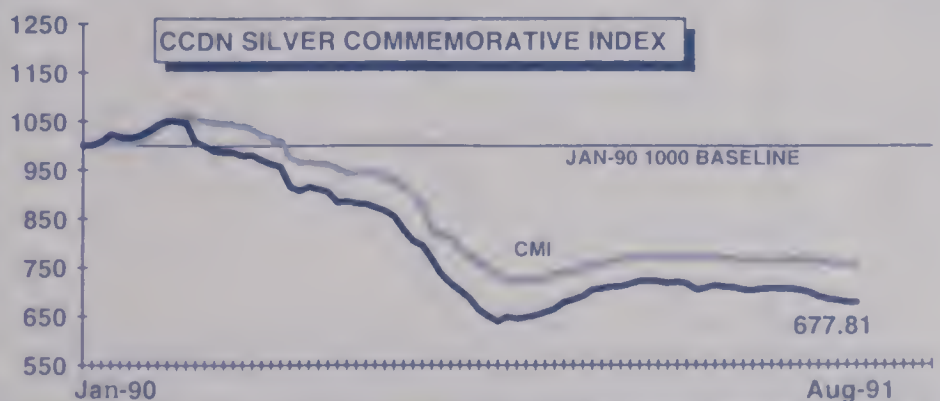

Mint State Type coins registered a few adjustments up & down, with discounted sells helping to push the market lower. Most of the plus signs on the Mint State Gold Type chart were to be found in the lesser uncirculated grades. Proof Type coins are still showing some minus signs, although it appears that the market has adjusted to the higher population counts created by the slabbing of that wonderful group of early proof sets (to be auctioned soon!) Proof Gold Type remained steady.

Among the specialty series, Buffalo Nickels were clearly on the downside, with declines outgunning advances 8 to 1. Mercury Dimes turned in a solid advance, hampered only by some discounted sells creating a few declines. Walking Liberty Halves showed some substantial advances in the MS65 column, but sells still managed to offset the gains. Proof Singles were fairly steady, with no discernible trends. Since the market has been noticeably trending downward recently, it will come as no surprise that the monthly supplemental charts are registering some hefty discounts. At least PL Morgans nearly turned in a balanced performance.

CCDn Coin Market Index: 752.87 - 2.23 Jan. 5, 1990 Bids = 1000

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi reflective (on one or both sides), with less reflectivity than the deep mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non P/L strikes.

NEED TO MAIL?

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

1991 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list of more than 5,000 current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only \$325 - well below the mailing industry standard of \$75/thousand.

To make this offer even more attractive, labels are available in both First Class - Zip Code order or Presorted for Third Class - Basic Bulk Rate mailings (you can save more than \$425 over First Class postage rates!).

YES, I want to order mailing labels for the 5,000+ names from the 1991 Numismatic Dealer Directory. I understand that my \$325 fee entitles me to only one usage of these names. _____ signature
My check for \$325 is enclosed.

☐ First Class; Zip Code Order

☐ Third Class; Pre-sorted Basic Bulk Rate Order

(Please provide City, State and Zip of mailing site for bag tag preparation)

NAME _____

ADDRESS _____

ZIP CODE _____

Send order to:

NDD Labels
P.O. Box 11099
Torrance, CA 90510
(213) 515-7369

Please make checks payable to: CDN

All prices are eight unseen books for \$29.95. Red prices are for the most common color within each type.

CCDN does not represent that it is possible to purchase selected rooms at the Bid Levels. Certain conditions can be expected to occur at substantially higher levels in many cases.

For certified coins not listed in the CCDn, please refer to the COIN DEALER newsletter for current Bid levels.

MERCURY DIMES

CCDN does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

What everybody ought to know...

About the PCGS Population Report

And why, for \$10 an issue, you can't beat the value!

Each and every coin certified by PCGS, some you probably have in your collection, is in the PCGS Population Report. That's a lot of information. And as you can imagine, there are many different ways to organize and publish this data.

That's why we've been asking coin enthusiasts across the country, from the novice to the expert, what they want out of the PCGS Population Report. The result includes some improvements we think you should know about.

CIRCULATED COINS - It used to be, you had to wait two-and-a-half months to get circulated coin information. Now you get these statistics monthly.

WORLD COINS - Whether you have any world coins or not, you can see how they're doing on a monthly basis. Coins from Canada, England, Germany, Japan, Switzerland, and U.S. Philippines are already included and provide today's coin enthusiast with a whole new world of options.

INFORMATION - Each of the more than two million PCGS certified coins listed in the book are categorized by type and grade. This means that if you have a 1881-S Morgan silver dollar, PCGS graded MS65, you can find out with the turn of a page, just how many coins like yours are out there. This is an important factor to consider when researching facts on your coins.

The report now costs an amazingly low \$10 per issue.

MINTAGE QUANTITIES - Listed along with each coin is the quantity originally minted. This too, is useful information and having it this handy can be a valuable time saver when you need all the facts in a hurry.

READER FEATURES - We designed the format to be easy to read and with the step-by-step User's Guide to help you, you'll have no trouble at all

getting the information you need. A comprehensive Glossary of Terms is also included and provides definitions for abbreviations and covers individual characteristics of your coins.

GREAT PRICE - By switching to a new format we were able to cut costs and generate the most handsome and user-friendly Population Report ever (please call us for additional savings on multiple subscriptions).

HERE'S HOW TO ORDER - Simply complete and return the convenient coupon below. Or, if you like, call our toll-free number and a customer service representative will take your order over the phone. Don't miss out on a single issue, order today!

ANA 100th Anniversary Celebration Begins 144 Pieces of Shepherd Break \$850,000

The 100th Anniversary of the American Numismatic Association is in full swing, and the only cloud over the celebration continues to be dealer uncertainty over prices and market direction. With nearly every major dealer in Chicago, teletype activity is rather slow, but **sight-seen** transactions will naturally be dominating this week's trading activity. The ANA and the local committee (those usually forgotten legions) have outdone themselves with the events and educational forums.

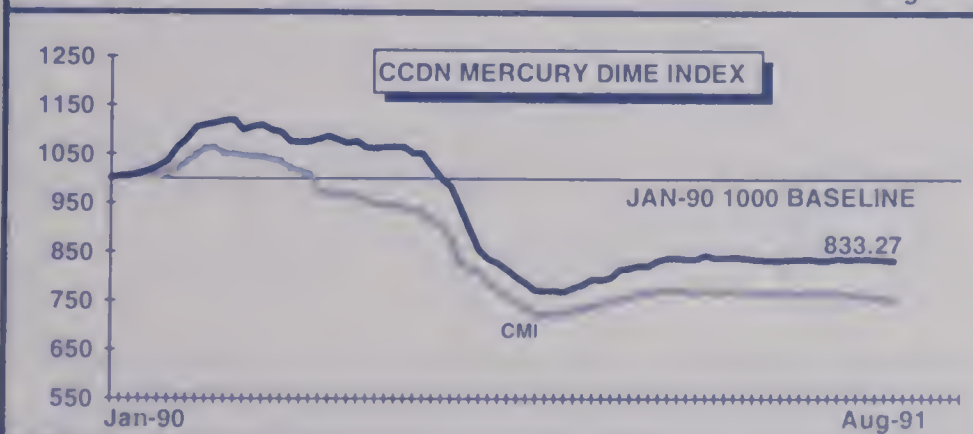

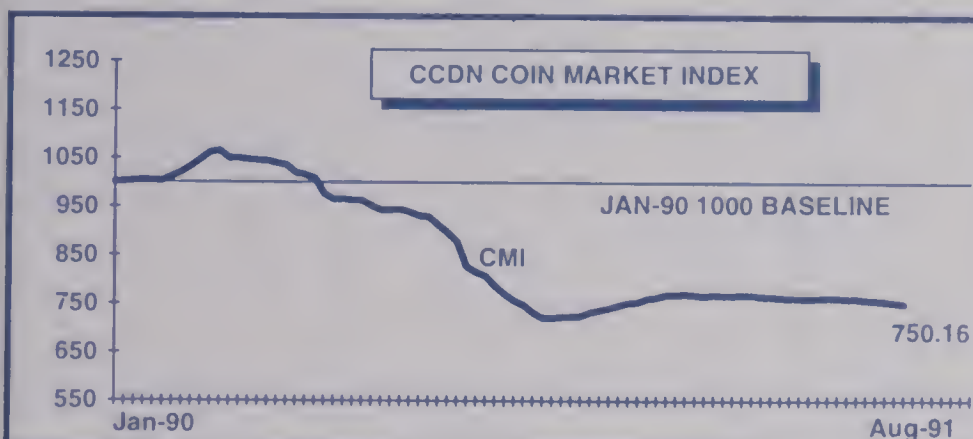

Convention week started in a fairly optimistic mood with Superior Galleries' auction of the **Larry Shepherd Collection of U.S. Commemorative Coinage**. Shepherd may be guilty of a slight understatement when he declared himself "extremely pleased with the results". The results of combining the "right coins" with the "right marketing effort" seems to have paid off handsomely — the 144-piece set yielded more than **\$850,000**. And if the incredibly high prices didn't bring him quite enough pleasure, Shepherd also considers himself fortunate to have seen most of his prized jewels sold to other collectors — the spectacle being 150+ floor bidders doing combat over the "spoils" of his decades of pursuit of quality Commemoratives. Any question of the dominance of the floor Bidders over what was thought to be a strong book were laid to rest with the opening lots. The PCGS68 Isabella realized an unbelievable **\$115,500** after opening at \$37,500. Other impressive final prices: 1892 Columbian in PCGS67 at \$33,000, Grant w/star in PCGS66 at \$31,900, Hudson in PCGS67 at \$26,400, Lexington in PCGS66 at \$8,525, Lincoln in PCGS67 at \$12,100, 1938 Oregon PDS in PCGS67&68 at \$16,500, Pan-Pac in PCGS67 at \$18,150, Sesquicentennial in PCGS66 at \$33,000, Vermont in PCGS67 at \$14,850, and the 1948 BTW PDS in PCGS65&66 at \$3,685. Certainly not the highest priced lot at \$14,850, the PCGS68 Antietam had the distinction of being Shepherd's favorite coin.

After a long spell of negative news, dealers were only too glad to greet the upbeat results of the Shepherd collection. Dealers are now hoping that the

momentum can be sustained as the ANA progresses through the final weekend. Initial reports of bourse activity were promising without being overly enthusiastic. Trading is occurring, but **mint** prices are still uncertain in the face of persistent discounted selling. Dealer-to-dealer trades are occurring only **after** the viewing of coins and negotiating on price, the key continues to be the strength of the buying dealer's Want List. There is no question that both dealers and collectors have come to Chicago to buy, but the selection of available coins is large. Many dealers made a point of bringing their high-grade, high quality circulated Type coins, and collectors can make impressive purchases at advantageous prices. In the face of some substantial discounts on selected Gem issues, a few dealers will admit to making purchases for their own accounts. Hopefully, the fact that coins are finally becoming cheap enough to be of interest to dealers as long-term investments may ultimately mean that a bottom to the cycle may be in sight.

There is another problem that dealers will have to confront upon their return from the festivities, and that is the continuing question of efficiency in the marketplace. For the last two weeks we have been witnessing repeated Trades occurring on the CCE electronic exchange at prices substantially below the highest marketplace Bids currently found on the other **mainstream** systems. For example, just among the Silver Dollars, the following Trades occurred despite higher (and active!) market Bid (following in parentheses): 1888 in MS65 @ \$156 (\$177), 1896 in MS60 @ \$156 (\$170), 1898-O in MS65 @ \$104 (\$117), 1899-O in MS65 @ \$108 (\$120), 1924-P in MS65 @ \$166 (\$197).

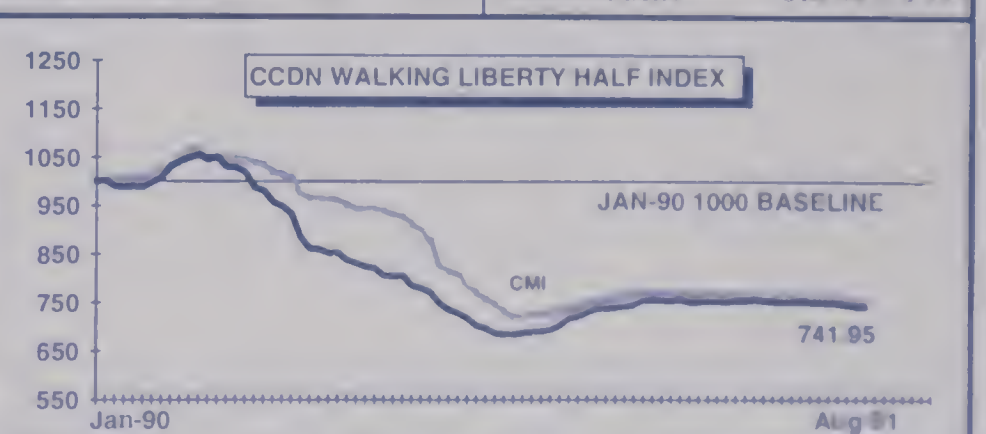

CCE has made real contributions towards increasing market efficiency in the trading of coins, but we would remind all of our readers that the CCE is **not** the entire coin market. In fact, there are many Bids in the marketplace at higher levels, and the prudent seller needs to search them out if he is to maximize his inventory investment. The Dealer with a little more knowledge has always been able to use it to his advantage.

The Blue Sheet

The Certified Coin Dealer newsletter is published weekly. The Blue Sheet is a special feature of the newsletter. It is a list of the highest visible bid prices for the most popular coins in the market. The Blue Sheet is published weekly, except for the year-end issue. The Blue Sheet is a valuable tool for coin collectors and dealers alike. It provides a quick and easy way to check the current market prices for the coins you are interested in. The Blue Sheet is also a good source of information about the latest trends in the coin market. It is a must-read for anyone who is serious about collecting coins.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

PCNA, HMGB1, and APC. TAPC inhibits the fully formed Microtubule network using both its APC and HMGB1 binding sites. TAPC promotes a reassembled VPC and its growth resulting in a reassembled microtubule network. TAPC promotes the formation of microtubule fully, along with the growth of microtubules.

CCDN does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

[illegible]

Princess and the most common. Let's better do some work, being very in the field of the most common results in her in

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

the CCDn ASKSHEET

a monthly publication for coin dealers
featuring **Lowest Asks or Last Trades:**

With the **sight-unseen** trading market beset by controversy over declining Bids, dealers turned to the **CDN family of publications** and asked for more information on the selling and trading prices of coins. We responded, quickly and confidently, with the **CCDN ASKSHEET**, providing dealers with an important new source of needed information. With wholesale Low Ask or Last Trade information available at their finger tips, dealers are more confident making their buying and selling decisions.

Each **CCDn ASKSHEET** provides subscribers with the Lowest Ask or Last Trade wholesale price seen in the marketplace during the preceding month. While this publication is being offered separately from the *Bluesheet*, we recognize that neither publication alone will give you a **complete** picture of the current wholesale, dealer-to-dealer marketplace. Together, the High Bid of the *Bluesheet* and the Low Ask/Last Trade of the *ASKSHEET* define the parameters of market value; dealers feel more secure knowing the limits inside of which they need to operate to make that sale! Our subscribers already know the best way to avoid the uncertainties of value in a volatile supply/demand marketplace. And they do it by turning to the name that dealers have trusted for more than 28 years - the **Coin Dealer Newsletter family of publications**.

And if you need a better reason to subscribe now, all checks received before August 30TH are eligible to receive a **free** copy of the 1991 Numismatic Dealer Directory. This \$25 value can be yours just for checking the request box with your subscription order below. Don't hesitate - subscribe now.

Sight-Seen Satisfies Spenders ANA At 100 Just Like the 'Good Old Days'

1991 will long be remembered as the "Year of the Collector"; you remember, those stalwart coin collectors of old who persevered in the face of investors and telemarketers to add a few nice coins to their collections. One thing this latest down cycle has taught dealers — there are a few customers around who will pay unbelievable prices to obtain coins of the highest quality (as witness several recent auction results), but there are simply not enough such quality coins or wealthy individuals to build an entire industry around. Most coin dealers in America need to have a retail base of healthy, active, and interested coin collectors in order to survive. Since these are buyers who like to look at coins before purchasing them, the dealers who service them are beginning to insist upon the same privilege.

The crowds in Chicago provided ample evidence of some remaining strengths in the coin market. Twenty-thousand interested parties attended, and many (if not most) of them came to buy. A dealer friend of many years' acquaintance quietly informed me that this was his best ANA ever! Doubtless seeing the look of incredulity on my face, he hastened to add that the invoices were all smaller, but that there were more of them. Since he only brought 'collector' coins to Chicago, he anticipated an additional benefit in picking up new customers.

One of the long-standing strengths of the major auction companies, especially when holding one of their larger sales, is that they truly can offer something for everyone. At Bowers & Merena's Chicago sale, *The American Numismatic Association 1891-1991 Centennial Auction*, there was certainly no shortage of rarities of mintage and

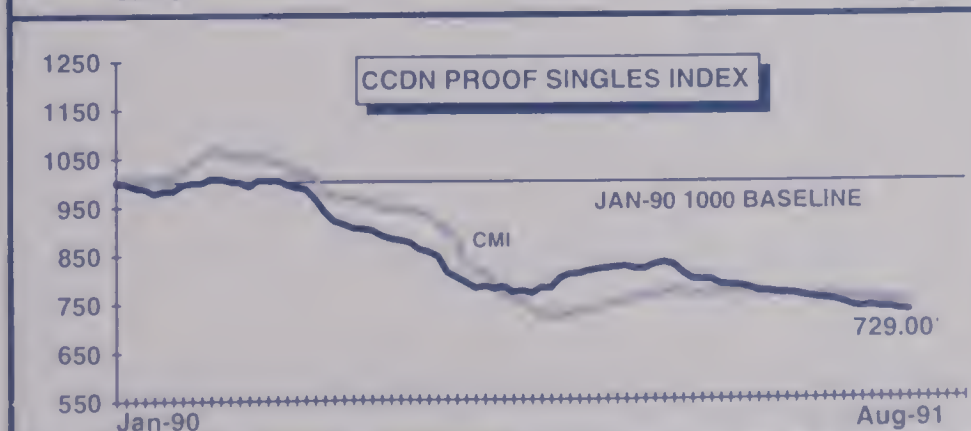

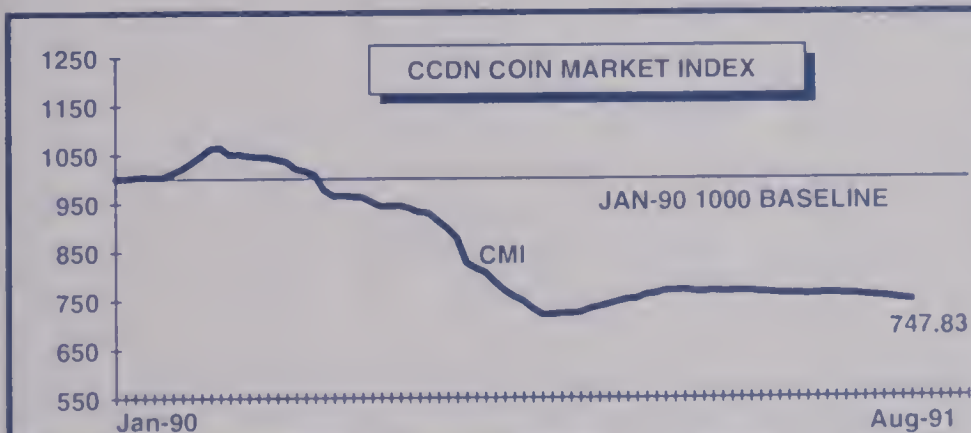

condition. But there was much more, and with the market's increasing attention on breadth, that has become even more important.

Among the highlights sold at Bowers and Merena's \$4 million auction:

Denomination	Certified Grade	Price Realized
1877 Cent	PCGS Pr67 Red	\$4620
1916 D Mercury Dime	PCGS65FB	\$11,825
1901 Morgan \$1	NGC63	\$8800
1881 Trade \$1	PCGS Pr67	\$24,200
1874 \$1 Gold	PCGS66	\$4,840
1856 \$2.5	PCGS65	\$9,400
1911 D \$2.5	PCGS64	\$11,525
1847 O \$10	PCGS63	\$15,900
1904 Lewis & Clark	PCGS63	\$4,200

Bidders for certified material will find some items of interest in The Cornerstone '91 Sale being held by Mid-American Rare Coin Auctions on August 30, in Atlanta. Bidding for the many rare date gold coins is expected to be quite strong. Among the highlights:

Denomination	Cert. Grade	Denomination	Cert. Grade
1839 ND Seated Dime	PCGS67	1820 \$5	NGC62
1855 \$1 Gold	NGC64	1843 O \$5	NGC64

Our findings have important implications for practice. In particular, we have shown that the use of a single survey method may be expected to reduce the reliability of the results. It is therefore important to use multiple methods.

Bids for Lincoln Cents are for full-red specimens in PR64 and higher

What Do You Need?

These days, coin dealers have a variety of needs, and coins are only one of them. Heritage offers a wide

range of services covering the full spectrum of the needs of today's dealers.

Split Deals: Do you have a lead on a major collection, but are short funds with which to purchase it? Heritage can provide cash for these occasions, and is willing to work on a "split profit" arrangement. *Call Steve Ivy, Jim Halperin or Martin Paul for details.*

U.S. Gold: We are the nation's largest importer of U.S. Gold from overseas. Our European contacts have been on the job since the mid 1970's, with more sources for both rare and bullion-oriented gold coins than anyone else around. *Contact Lee Sanders for current availability and prices.*

Auctions: With nearly one sale per month, you're never far from an opportunity to offer your inventory to thousands of retail buyers and hundreds of dealers. Our unique Bullet Sales feature a total turnaround time (from consignment to settlement) of about four weeks. Best of all, advances are available! *Give Bob Merrill or Leo Frese a call for further information.*

Certified Coins: With an inventory of over \$10 million, we are among the country's leading sources for PCGS, NGC and ANACS material. If you need it, we either have it or can get it. *Ask Tom Novy or Dave Lindvall.*

Rare Stamps: Ivy, Shreve & Mader Philatelic Auctions is one of the world's largest and most respected stamp auction companies. Offices in New York, Dallas and Los Angeles offer state-of-the-art services to all potential sellers of rare stamps. *Call Charles Shreve today for further details.*

Open to Buy: We are always willing buyers of almost any type of material - both raw and certified. Our bank line exceeds \$12 million, and our checks are good right away. No waiting or redepositing necessary. *Check with Greg Rohan or Martin Paul if you have coins you'd like to move.*

New Customers: Who couldn't use more of these? Join the nation's fastest-growing network of dealers on the U.S. Rare Coin Exchange. The Exchange sends both an electronic as well as hard-copy listing out to thousands of the strongest and most active retail buyers in the country every week. And right now, we're making some incredible offers to you, in order to build the Exchange even larger.

Mint Gold Type Advances Dollars & Walkers Also Show Positive Signs

The performance of Mint State Gold Type coins, after a long period of sporadic declines, has been showing some steady signs of improvement during the last month. Since these coins play a very important role in the economic health of America's coin shops, any price increase is welcome. What is perplexing is that so many of the advances are coming in the lower grades, which are normally most affected by bullion changes - and gold spot has been declining modestly!

Hopefully, the increased demand is being fueled by coin collectors taking advantage of current prices to add a lot of value to their collections. Dealers can discuss whether many of these coins should be described as "rare", but there is no denying that they have a "rare" component to them at a fairly small premium.

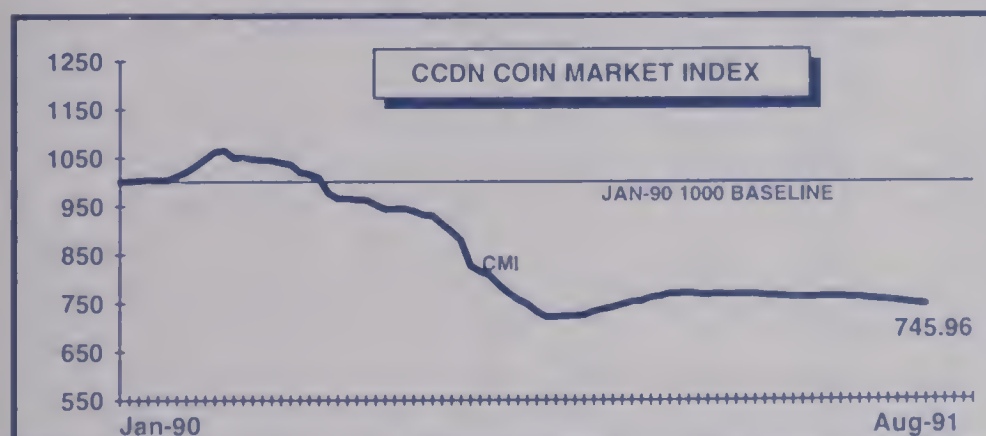

There are some other bright spots on the numismatic horizon. Morgan and Peace Dollars both show a majority of plus signs, although some larger discounted sells in both series resulted in slight declines in the CMI figures. Plus signs in the Walking Liberty Halves also outnumbered the minuses four to one, although here too discounted sells resulted in only a slight increase in the CMI.

Dealers are expressing some disappointment at the continuing declines in the Silver Commemoratives. It was hoped that the results of the auctioning of the Shepherd Collection would have helped inspire demand for these lovely pieces of numismatic Americana. Gold Commems are also continuing their unbelievable decline -

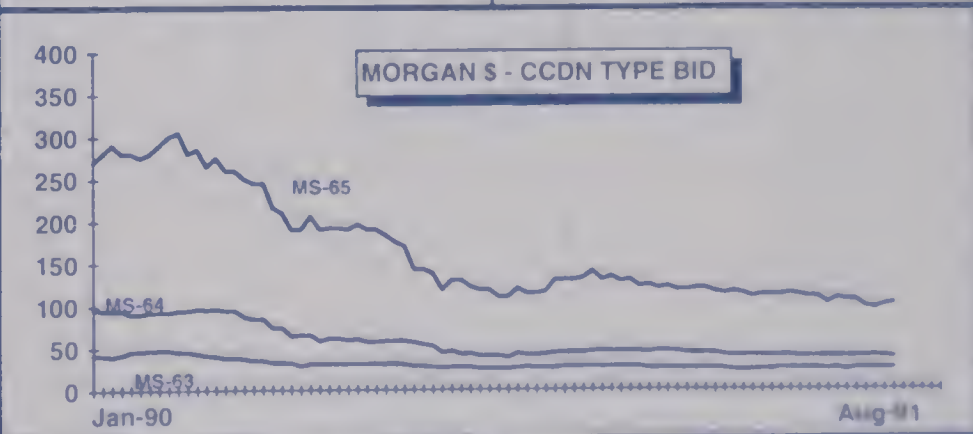

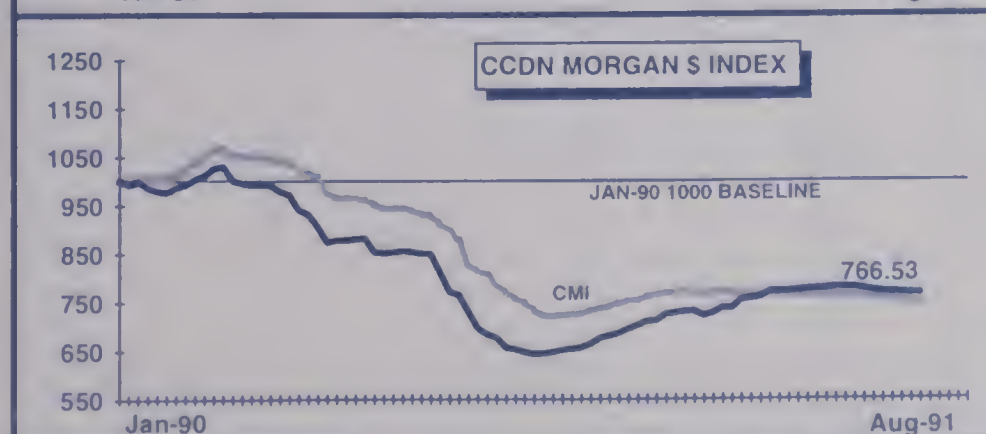

surely they must reach equilibrium at some level. Sometimes supply and demand is a cruel mechanism.

Mint State Type coins showed some reversals, with most of the changes being minuses due to discounted sells, and now being in the MS63 to MS65 range. These are the coins that form the heart of the rare coin market, and any declines here must be viewed seriously. The Proof Type coins were also mainly steady, but here too the changes were primarily negative; at least they were scattered throughout the chart. Proof Gold Type, which by any definition must be considered "rare coins", was largely unchanged, but all of the changes were declines due to discounted selling. Bullion sinks slightly, Mint State Gold Type rises, and Proof Gold Type declines. What a market!

Among the other specialty series, Buffalo Nickels were constant, with the few changes nearly all minus signs. The Mercury Dime chart showed more changes, but were pretty well divided between advances and declines. At least the Walkers turned in a strong showing. Proof Singles were steady, with most of the minus signs clustered on specific issues. It is always risky to try to summarize markets in transition, but there is no question that discounted sells are driving the market lower in the face of weakened bidding responses. At some level, prices will stabilize, but both buyers and sellers will have to agree on when that point has been reached. That time has not come yet.

CCDn does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

CCDN does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

If your coin will stand on its own merits regardless of the certified grade, a higher *CDN Bid* may be more indicative of current market value.

WALKING LIBERTY HALVES

[illegible]

CC-TES does not represent that it is possible for the above information to be used for any other trading, and the copyright for it must be acknowledged. Without further to be done.

Bids for Lincoln Cents are for full-red specimens in PR64 and higher.

Higher Grade Generics Solidify Better Dates Under Selling Pressure

The Labor Day holiday is usually one that finds coin dealers breathing a sigh of relief, and it has little to do with a three-day weekend. Autumn means that dealers have survived another bout with the dreaded summer doldrums, when it seems that most of their customers are too busy to visit their local friendly coin shop. Or, as some believe, their better customers are saving up for the pilgrimage to the ANA Convention. Or perhaps, with all the activities of summer, there seems to be a never-ending supply of activities competing for those limited surplus dollars. The summer slowdown isn't entirely logical, but we have learned from experience that logic doesn't always count.

At any rate, we are well on the road to autumn, and hopefully the slump in coin prices will be reversed with the addition of collector demand in the marketplace. It certainly seems that the collectors are still in the driver's seat on this ride. It also seems that the collectors, while they are buying nice coins, have shown little demand for the really high grade, high-powered coins. In the Morgan Dollars, for example, Bid on Generic MS65 coins is holding nicely around the \$100 mark. We heard many differing answers to one dealer's questioning of how much lower they could possibly go, but for the time being they are holding at the century mark. Perhaps the collectors have asked themselves the same question, and have decided that this is a lot of coin, a lot of numismatic history, to buy for \$100. On the other hand, the lesser uncirculated Morgan generics continue to show the same signs of weakness that has characterized their fall over the last two years. Perhaps here the relevant question being asked by collectors is "Just how many MS63 1881-S Morgans do I need to own?" Demand for the MS66 Morgans, undeniably a dynamite coin, has stabilized under

\$300. Are collectors telling us that there is a limit to the premiums that they will pay for just that little extra bit of quality?

We are seeing similar trends in some other series. Walking Liberty Halves, another favorite among collectors, has seen prices decline across a broad front over the last several years. Our CCDn Coin Market Index for Walkers, standing at 740.37, is sufficient testimony to the declines. Among the generic dates, the older series have largely stabilized. With MS65's trading around \$100 and MS66's around \$200, you are getting a tremendous amount of numismatic art for a very reasonable price.

Low grade, uncirculated examples can be bought in quantity around \$30, so there isn't too much of a premium to buy a first rate example. And make no mistake about it, a properly graded MS66 Walker, especially examples that are either brilliant or beautifully toned, is simply an incredibly lovely coin. With MS67 Bid around \$900, will the collector be willing to pay more than four times the MS66 price for that increment of quality? Collectors, and consequently dealers, vote with their dollars, and the answer to that important question will be found, as it

always is, in the marketplace.

The rare coin market of the 'nineties is developing along two themes. The key concept of buyers inspecting the coins to evaluate appeal is as old a theme as one can find in numismatics. Still, when a potential buyer falls in love with a coin, there remains the question of value. Computers are useful in disseminating prodigious quantities of pricing information, but the information that comes out so rapidly is only as good as the information that goes in. And computers can do very little to help a buyer decide whether he finds the coin appealing.

PCGS Professional Coin Grading Service, Newport Beach, CA. Established in 1986, PCGS grades and authenticates U.S. and world coins. PCGS has certified more than two million coins. All coins must be submitted through one of the 560 + authorized dealers; contact PCGS at 800-447-8848 for a list.

PCGS has more than 15 graders on its staff; each coin is examined by at least two graders before the final grade is determined. No person involved with the grading process may be active in the buying or selling of U.S. coins. Fees start at \$26 or \$35 depending on the type of coin, plus postage and insurance; several levels of Express service are also available. PCGS coins are sonically sealed in an inert plastic "NumisCap" holder before return to the customer.

PCGS has a cash-backed Guarantee of Grade and Authenticity. PCGS has a comprehensive grading set which includes most major series. PCGS is a grading service only and does not make markets. PCGS dealers are responsible for their own making of markets in PCGS coins. PCGS publishes a monthly Population Report.

ANACS ANACS: The first authentication service (established in 1972), to which grading services were added in 1978. ANACS authenticates and grades all U.S. coins and Patterns, rendering unbiased third party grading opinions using prevailing market grading standards. After grading, the coins are placed in the sonically sealed ANACS Cache.™

ANACS has over 700 active submission centers. All coins can be sent through the submission centers or directly to the ANACS office. Submitters can also become Market Makers. The fee for a standard submission is \$23, and various levels of express service are available between \$40 and \$125.

Free information is available from ANACS, P.O. Box 182141, Columbus, Ohio 43218-2141. Phone 1-800-888-1861.

CCDn Bids reflect 1986 and newer certified coins, and assume the certificates have no negative comments. ANACS Bids are listed only once each month.

NGC Numismatic Guaranty Corporation of America. Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$19, plus postage and insurance. After it is graded, it is then placed in a "lab tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 550 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit, "Arm's length." NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute. Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at Heritage Plaza, Highland Park Village, Dallas, TX 75205-2788. Phone (214) 528-3500. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) compared to the other three services listed. Regular cost is \$24 per coin. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded with a charge of 50% of the regular fee. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for Silver Dollars, \$20 St. Gaudens, and Walking Liberty Halves. Due to current trading volume, NCI coins will only be listed once a month. CCDn Bids reflect 1987 and newer certified coins.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.

Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer to Dealer Bids.

We Collect Clients. . .

Our Clients Collect Coins

Not many dealers are willing to make a lifetime commitment to their clients. In fact, **Joel D. Rettew & Son Rare Coin Brokerage** is the only American numismatic firm to make this offer to you:

- We will work for you in a brokerage capacity, which means that *we are on your side* in making money in the numismatic marketplace!
- We can sell your coins *for you* in retail transactions for a 10% commission!
- We will sell coins *to you* at a very conservative mark-up (our average is about 10%)!
- We will give you a FREE statistical analysis of your current portfolio. (Minimum \$20,000)

What's in it for us?

- Financially, we will earn 10% of any profits that we assist you in generating for your account.
- More importantly, we want *all* of your coin business *for life*. We want a long-term relationship with you as a customer and as a friend.

There are many reasons why **Joel D. Rettew & Son Rare Coin Brokerage** should be your dealer of choice. We have been buying and selling coins since 1953, nearly four decades of service to our old customers and *friends*. But we are just as serious about making *new friends* through servicing new customers - and we are serious enough to offer benefits unmatched by any other dealer in America!

Joel D. Rettew & Son Rare Coin Brokerage

575 Anton Blvd. Suite 790 • Costa Mesa, CA 92626

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

Higher Bids Confronting Lower Sells Generic Walkers Reflect Market Realities

The continuing slide in the value of rare coins is well known to all of our readers; watching inventory values sink is not a pleasant way to pass the day. The importance of the collector, once in some doubt, has been firmly reestablished, and along that line, we have been talking with dealers about attracting new collectors. One of the

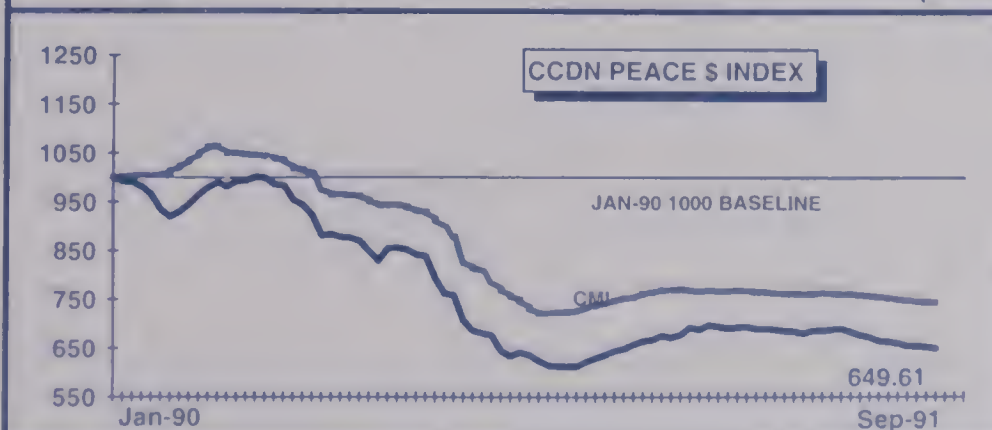

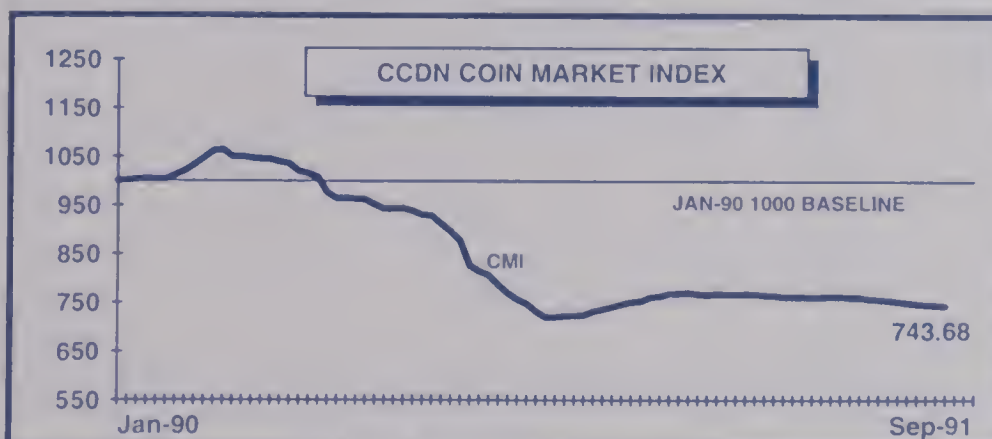

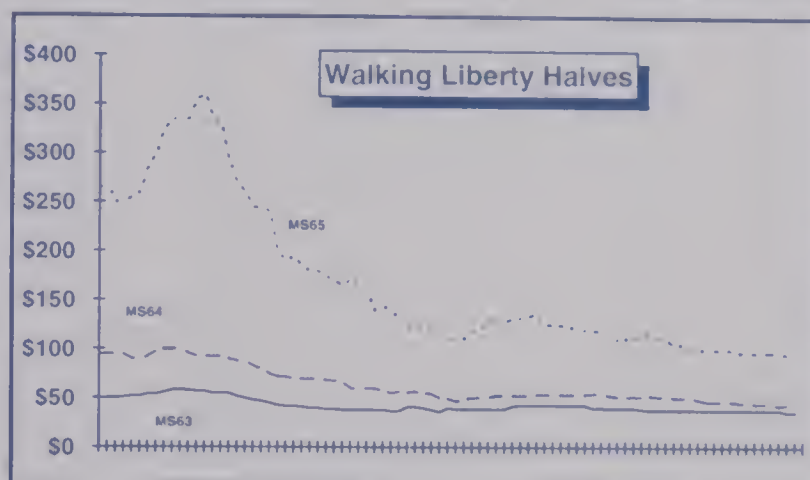

main selling points of numismatics remains the beauty of the coins that we covet so. Oh, we all know that beauty is in the eye of the beholder, but there is also no mistaking the timeless appeal of a well executed piece of art. There has long been an assumption that richer customers make better customers, and while appreciation of art does not depend on one's finances, the ability to buy (whether coins or canvas) certainly does. Anyone who has tried to excite a neighbor with the difference between an "O" and "S" mintmark, or between an Overton 110 & 111, will understand that appreciation of beauty is simply an easier selling tool. So, do coin dealers need to *sell* prettier coins first?

We are fairly certain that most collectors would put Weinman's Walking Liberty Half Dollar, one of our favorites, among the top three twentieth century issues. If this would be a good coin to attract new buyers, the next question is which grade to recommend? Most collectors still view the purchase of works of art as an investment,

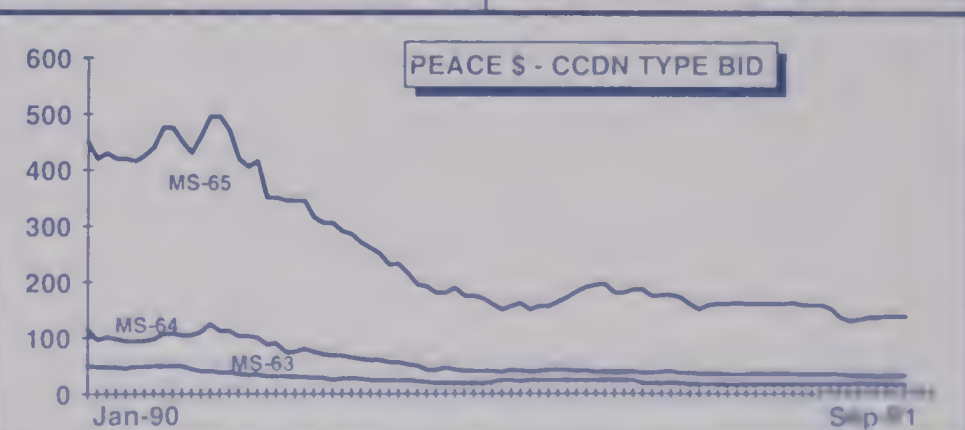

whether or not profit is their primary motivation. Dealers have to live with the fact that coin buyers continue to view coins as an investment; they have been touted that way for many years. Recent price trends may mean that they have been a "bad" investment, but an investment nevertheless.

Looking at the recent history of the 1945 Walking Liberty Half Dollar, the dealer can have a reasonable conversation with a potential buyer. The buyer who can appreciate the quality of an MS65 should also be able to recognize the greater price volatility, there is a greater risk, but also a possibility of greater reward. The MS64 Walker, arguably a most attractive coin, has shown a lot more stability in pricing even during this slide. The purchaser of three MS64 Walkers in early 1990

has lost a lot less than the buyer who spent the same amount on one MS65. Not many novices could see the difference between an MS64 and an MS65 specimen, although one would hope that an MS63 and MS65 side-by-side would prove the point. The buyer of the MS63 has a coin that is still attractive with comparative price stability. Three coins, three choices, three philosophies of collecting and investing. An informed buyer knows that in the end, you pay your money, and you get your choice.

Announcing the Secret of America's Lowest Priced Slab . . . The Certified CAPSULE®

Why pay ~~\$28~~ . . . to get your U.S. coins
~~\$22~~ graded and authenticated
~~\$18~~ when Photo-Certified Coin
~~\$12~~ Institute (PCI) will do it for

\$6.00

**6 Coin Minimum
 Guaranteed 6 Working Day
 Express Service Turnaround.
 (plus return postage)**

New PCI
 CAPSULE®
*Destined To
 Make Coin Slab-
 bing Economical
 for Everyone*

The Secret Revealed: As recently reported in the news, Hallmark Grading Services, Inc., has been dissolved and will no longer grade coins. On April 16, 1991, Photo-Certified Coin Institute (PCI) acquired the entire assets of Hallmark Grading Service (except the name). In the deal we got virtually everything but the kitchen sink . . . including the technology, hardware, software computer programs and the molds used to produce their familiar coin slab now seen in the marketplace.

On June 1, 1991, the newly improved PCI CAPSULE® name replaced the old Hallmark logo. PCI will continue with the same format, bar coding and coin attribution (e.g. varieties, mintages, PQ status, etc.) that Hallmark developed for collectors, including their intricate anti-counterfeiting measures.

The best part is that the new CAPSULE® slab will cost substantially less, both in manufacturing and processing time, to evaluate coins. And, because of these technological advances, PCI will now be charging only \$6 per coin to grade, authenticate and encapsulate all U.S. coins in the new CAPSULE® slab.

We also accept foreign coins, errors and colonials that may be slabbed in our \$10 photoslab. You may mix or match the \$6.00 and \$10.00 services.

A few years ago, one of the owners of another slab grading service stated that "someday" he could foresee slab fees as low as \$5 or \$6. Today, that projection has become reality with the shortest turn around guarantee in history (6 working days after we receive your coins).

At PCI, we have always relied upon 3 basic business practices that you can count on:

- (1) **to process** your coins at the lowest rates & shortest turnaround time . . . in history,
- (2) **to remain open** to the general public without favoritism to any dealer or individual,
- and (3) **to provide the most** technologically consistent and accurate grading service possible.

6 COIN MINIMUM, NO MAXIMUMS, NO HIDDEN COSTS . . . to take advantage of this new service please fill out the actual submittal form shown below. **Note:** If your coin(s) are cleaned, whizzed, discolored or otherwise not eligible for slabbing, PCI will still grade, authenticate & issue a formal grading report for each coin.

Look for this symbol to save you money!

6 DAY EXPRESS SERVICE SLAB SUBMITTAL FORM

Coins will be shipped on or before the 6th working day after we receive them and will be sent U.S. Registered Mail.

NOW GRADING ALL WORLD COINS!!!

(Well, almost all of them.)

PCGS is now accepting coins for grading
from the following countries:

Albania (1926 -1941)
Argentina (1813 - 1942)
Australia (1911 - 1964)
Austria (1802 to date)
Belgian Congo (*Zaire*)
(1887 - 1947)
Belgium (1832 - 1955)
Bolivia (1801 - 1951)
Brazil (1802 - 1922)
British Guiana (*Guiana*)
(1836 only)
British Honduras
(*Belize*) (1885 - 1966)
British West Africa (1907 - 1952)
British West Indies (1820 - 1822)
Bulgaria (1881 - 1943)
Canada (1858 to date)
Central American Republic
(1824 - 1847)
Ceylon (*Sri Lanka*) (1815 - 1957)
Chile (1801 - 1968)
Colombia (1801 - 1948)
Costa Rica (1842 - 1954)
Cuba (1915 -1953)
Cyprus (1879 - 1957)
Czechoslovakia (1923 - 1955)
Danzig (*Poland*) (1923 - 1937)
Denmark (1808 - 1960)
Dominican Republic
(1844 - 1955)
East Africa (1897 - 1952)
Ecuador (1833 - 1944)
El Salvador (1889 - 1940)

England (1797 to date)
Estonia (1922 - 1936)
Ethiopia (1897 - 1931)
Fiji (1934 - 1965)
Finland (1864 - 1918)
France (1848 to date)
French Cochinchina
(*Vietnam*) (1875 - 1885)
German East Africa
(*Tanzania*) (1890 - 1916)
German New Guinea (*Papua
New Guinea*) (1894 - 1895)
Germany (1800 to date)
Greece (1828 - 1967)
Greenland (1926 - 1957)
Guatemala (1801 - 1959)
Haiti (1807 - 1908)
Honduras (1832 - 1949)
Hong Kong (1863 - 1951)
Hungary (1830 - 1943)
Iceland (1922 - 1940)
India (*British*) (1834 - 1947)
Ireland (1805 - 1966)
Isle of Man (1813 - 1859)
Italy (1801 - 1956)
Jamaica (1869 - 1963)
Japan (1870 - 1964)
Jersey (1841 - 1960)
Korea (1888 - 1910)
Latvia (1922 - 1932)
Liberia (1847 - 1906)
Liechtenstein (1862 - 1956)
Lithuania (1925 - 1938)

Luxembourg (1854 - 1946)
Malaysia (1845 - 1961)
Mauritius (1877 - 1971)
Mexico (1801 to date)
Mombasa (*Kenya*) (1888 - 1890)
Netherlands (1801 - 1966)
New Zealand (1933 - 1965)
Nicaragua (1878 - 1965)
Norway (1801 - 1958)
Panama (1904 - 1953)
Paraguay (1845 - 1939)
Peru (1801 - 1966)
Philippines
(*Spanish*) (1861 - 1885)
Poland (1810 - 1939)
Portugal (1804 - 1860)
Puerto Rico (1895 - 1896)
Rumania (1867 - 1946)
Russia (1802 - 1936)
San Marino (1864 - 1938)
South Africa (1892 - 1960)
Southern Rhodesia (1932 - 1954)
Spain (1801 - 1966)
Sweden (1802 - 1955)
Switzerland (1797 to date)
The United States of America
(1792 to date)
U.S. Philippines (1903 - 1945)
Uruguay (1840 - 1961)
Vatican (1801 - 1959)
Venezuela (1843 - 1945)
Yugoslavia (*Montenegro-Serbia*)
(1868 - 1934)

PCGS has graded 2,667,873
coins with a declared
value of \$3,242,010,625.

Certification by PCGS does not guarantee
protection against the normal risks
associated with potentially volatile markets.

Long Beach To Face Collector's Market Recent Activity Levels on the Rise

We recall attending an event in the not so distant past where one of the gurus of numismatics was predicting a rosy future where sight-unseen computer trading of coins ruled the market. Well, our regular readers know that we seldom (if ever) make predictions on these pages. Who knows what the coin market will be like in the next century? We do feel comfortable, however, in forecasting that the brave new world of the high-tech numismatic order will not be dominating this autumn's Long Beach.

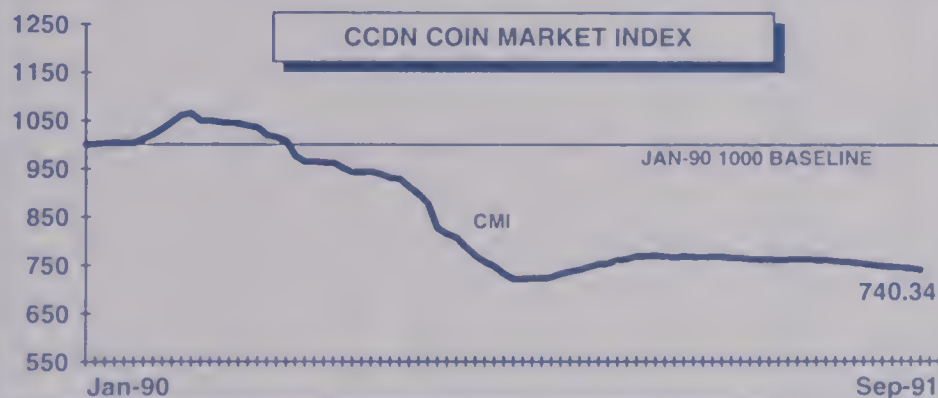

No, dealers can look forward to doing business the slow, methodical, old-fashioned way. They will be **looking** at coins before deciding if they want to buy, and evaluating their offers carefully in the light of customer desires and market trends. Dealers and their customers will together purchase millions of dollars in coins, but you can believe that they will examine and reject many millions of dollars more. Only a few things will motivate a looker into a buyer - the coin must be rare, the coin must be right, or the price must be really right for the coin. Nothing like a down market to restore attention to the basics.

This week's market could best be described as guardedly optimistic. The optimism comes easily enough. There is a real scattering of plus signs across the charts. Many of the increases are small, to be sure, but they are increases just the same, thank you. Just as mighty oaks from little acorns grow, dealers are expressing great hope that the market bottom has been reached, and that the plus signs will continue. The "guardedly" terminology is also easily understood

when one examines the number of minus signs to be seen. One counted sells continue to be reflected in lowered Bid levels as the market continues to seek appropriate levels. Not to put too good a spin on this approach, we continue to maintain that a market that is moving coins, is a market that will return to health. If a coin's price has to be dropped in order to effect a sale, then the value of that coin had already dropped and the discount is only recognition of that salient fact.

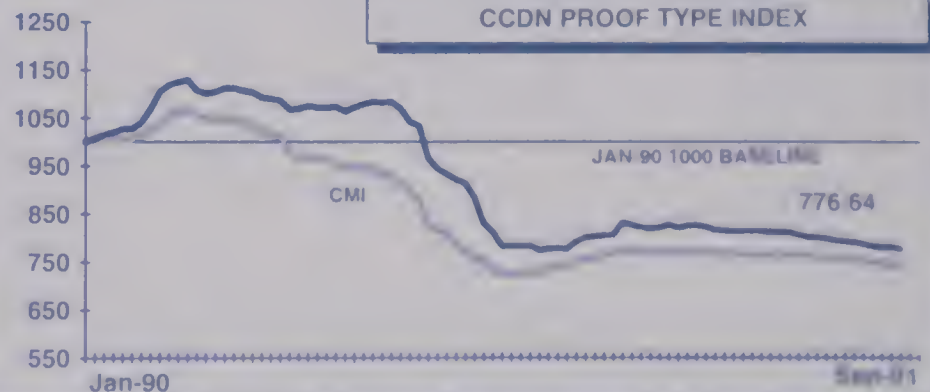

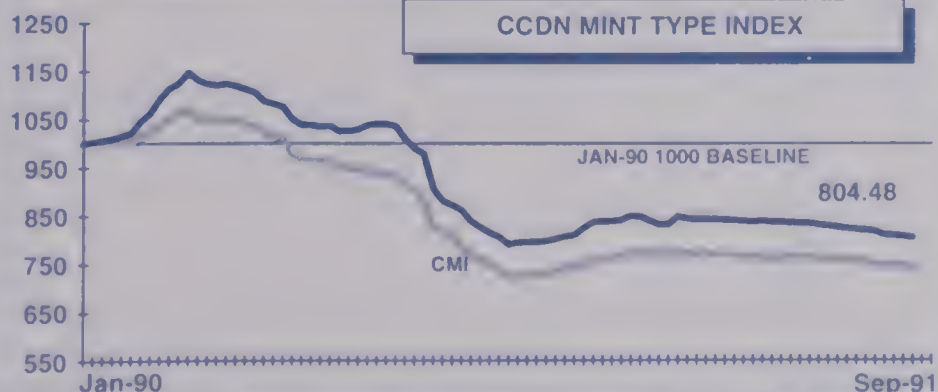

The most optimistic news that we can offer is that activity is picking up, which indicates that a growing number of dealers are agreeing on the new levels of valuation. If this activity can be sustained through the next few weeks, it bodes well for the Long Beach show, where dealers are accustomed to face-to-face negotiations.

On the individual charts, the plus signs are especially abundant on the Silver Commemoratives, and even the beleaguered Gold Commems managed to garner a few. Morgan Dollars benefitted from many small increases, although here the effect was dampened by many discounted sells. Peace Dollars continue to feel tentative. Mint State Type Coins were mixed, while Mint State Gold Type gave up some of the progress that it had made recently. Changes in the Proof Type Coins ended slightly on the plus side, and Proof Gold Type was largely unchanged. The specialty series also were stable, with some growing interest in early date Walking Liberty Halves.

CCDN Coin Market Index: 740.34 - 3.33 Jan. 5, 1990 Bids = 1000

Bluesheet Chart	Index	Change		
Silver Commems	660.14	+1.70	Mercury Dimes	828.00 -2.11
Gold Commems	596.17	-1.42	Walker Halves	799.50 +0.81
Morgan Dollars	760.88	-3.40	Proof Singles	731.94 -2.76
Peace Dollars	647.56	-2.05	PL Morgans	696.14 WK2
Mint State Type	804.48	-2.18	Early Gold	808.06 WK2

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Shane Downing

[illegible]

Some bids with n represent very conservative sight unseen buy prices on the part of the highest value bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

PEACE DOLLARS

CCdn does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

[illegible]

MINT STATE TYPE COINS

Prices are for the most common dates. Better date coins usually bring more than the bids of the most common issues listed herein.

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

MERCURY DIMES

CCDN does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

Market Stability Improves Growth in Supporting Bids Monitored

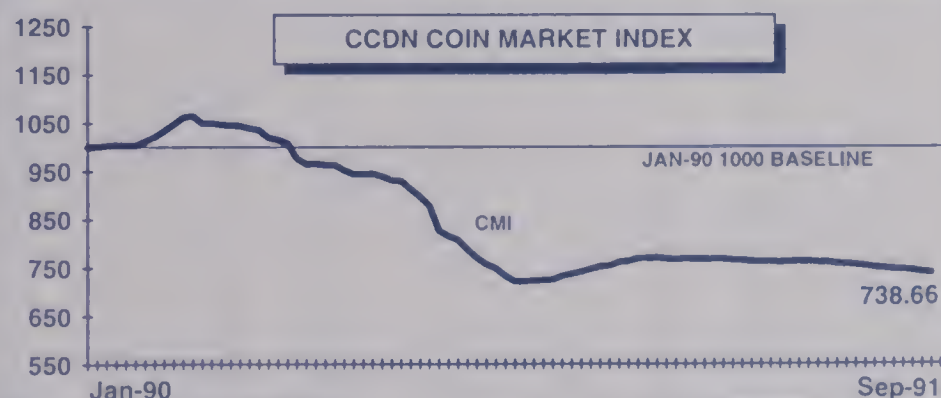

This has been a good week for good news in the coin market. Activity has been picking up, and it has had a noticeable impact on dealers' attitudes. With a little extra buying activity by the collectors, the dealers are telling us that they feel more confident, and are willing to invest a few more dollars in inventory. As demand grows, even at these early stages, rising prices will inspire still additional purchases by collectors and dealers. We can only recognize the exact market bottom with hindsight, but we can tell you (and don't have to tell any dealers who have been through a cycle before) that the corner has been turned *only* when Bids begin to rise in a sustained fashion, and activity begins to pick up. It is still too early to declare the beginnings of a new rally, but we can all savor such good news. And it always helps to have a stronger market heading into Long Beach.

Most impressive has been the number of confirming Bids, especially on the MS64 and below grades, and moreso on those coins valued below \$700. This is the heart of the collectors' market, and it is here that the greatest strengths show. For every plus sign in the charts (and there are many this week), there have been hundreds of confirming Bids at current levels. This in itself is a definite sign of a healthy market. To be sure, there are still minuses being created by discounted selling, but that seems to have become the exception rather than the rule.

The weakest segment of the market continues to be the super-premium pieces, both of grade and price. Serious bidding for much

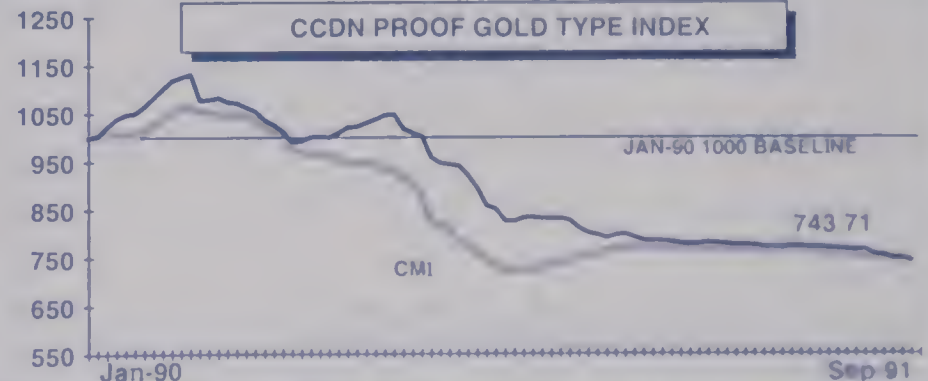

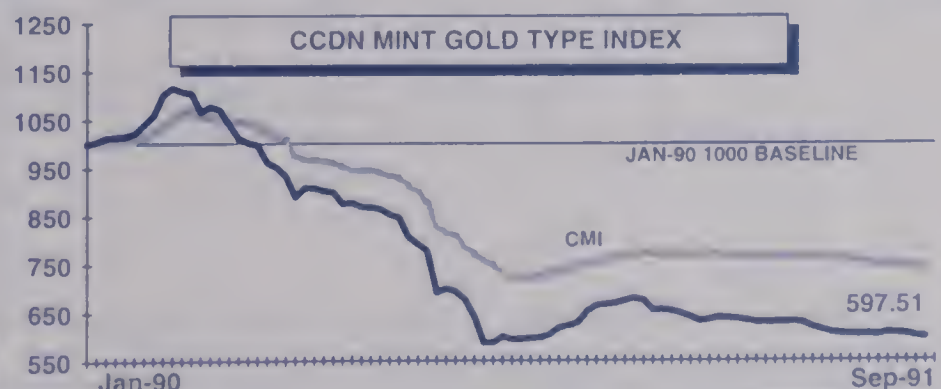

of this material is lacking, but that too is not surprising in a year that has rediscovered the virtues of sight-seen trading. *If you wanted to buy a Stella wouldn't you prefer to inspect the coin before committing yourself?* So the lack of Bids on material that typically trades at auctions or over the bourse table is not as alarming as it might be otherwise. Perhaps when sight-seen trading comes to the electronic marketplace Bids on these super coins may again more accurately reflect their value.

Silver Commemoratives are reflecting some of the renewed activity, with many small increases producing a plentitude of plus signs. Gold Commems are actually showing plus signs, certainly a long-awaited piece of good news. Morgan Dollars enjoyed many solid confirming Bids, and again small increases produced scattered plus signs. Peace Dollars were mainly steady with mixed changes. Mint State Type was also steady with most changes on the plus side, dealers are waiting for more plus signs on this chart before letting their optimism really show. Mint Gold was weak in the lower grades, but showed a surprising number of plus signs in MS65. Changes in Proof Type were heavy on the plus side, while Proof Gold Type still looks weaker than we would expect - perhaps here is another example of the lessened support being shown higher-value coins. Buffalo Nickels turned in a mixed performance, Mercury Dimes were largely steady with scattered minus signs, and Walking Liberty Halves show many plus signs in the later issues, and only a few minus signs in the early years. Proof Singles are still seeking support levels.

CCDN Coin Market Index: 738.66 - 1.68 Jan. 5, 1990 Bids = 1000

[illegible]

CCDN does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

[illegible]

Prices are for the most common dates. Better date coins usually bring more than the Bids of the most common issues listed herein.

UNITED STATES GOLD TYPE COINS

[illegible]

PROOF TYPE COINS

All prices are sight unseen unless otherwise noted.
 Bid prices are for the most common item within each type.

WALKING LIBERTY HALVES

If your coin will stand on its own merits regardless of the certified grade, a higher CDN Bid may be more indicative of current market value.

What Do You Need?

These days, coin dealers have a variety of needs, and coins are only one of them. Heritage offers a wide

range of services covering the full spectrum of the needs of today's dealers.

Split Deals: Do you have a lead on a major collection, but are short funds with which to purchase it? Heritage can provide cash for these occasions, and is willing to work on a "split profit" arrangement. *Call Steve Ivy, Jim Halperin or Martin Paul for details.*

U.S. Gold: We are the nation's largest importer of U.S. Gold from overseas. Our European contacts have been on the job since the mid 1970's, with more sources for both rare and bullion-oriented gold coins than anyone else around. *Contact Lee Sanders for current availability and prices.*

Auctions: With nearly one sale per month, you're never far from an opportunity to offer your inventory to thousands of retail buyers and hundreds of dealers. Our unique Bullet Sales feature a total turnaround time (from consignment to settlement) of about four weeks. Best of all, advances are available! *Give Bob Merrill or Leo Frese a call for further information.*

Certified Coins: With an inventory of over \$10 million, we are among the country's leading sources for PCGS, NGC and ANACS material. If you need it, we either have it or can get it. *Ask Tom Novy or Dave Lindvall.*

Rare Stamps: Ivy, Shreve & Mader Philatelic Auctions is one of the world's largest and most respected stamp auction companies. Offices in New York, Dallas and Los Angeles offer state-of-the-art services to all potential sellers of rare stamps. *Call Charles Shreve today for further details.*

Open to Buy: We are always willing buyers of almost any type of material - both raw and certified. Our bank line exceeds \$12 million, and our checks are good right away. No waiting or redepositing necessary. *Check with Greg Rohan or Martin Paul if you have coins you'd like to move.*

New Customers: Who couldn't use more of these? Join the nation's fastest-growing network of dealers on the U.S. Rare Coin Exchange. The Exchange sends both an electronic as well as hard-copy listing out to thousands of the strongest and most active retail buyers in the country every week. And right now, we're making some incredible offers to you, in order to build the Exchange even larger.

Market Still Strengthening Influence of Generics to be Determined

As we wind down towards the Long Beach Show, the coin market is continuing to show signs of strengthening (both in terms of activity levels and Bid levels). This continues to be welcome news to dealers, most of whom would really appreciate a strong Long Beach Show. Previous Bid levels on many coins are being confirmed, and Bid levels are rising on a large number of coins. These are very healthy signs. Offsetting that, we continue to have Lowered Sells on issues which are not on current want lists.

Generally, we like to see a tight spread because it means that buyer and seller share a very close concept of the value of the coin. However, if the spread becomes too close, it means that wholesalers will have a very difficult time making a living in the marketplace. Even worse, we are still seeing many examples every week of *reverse spreads* - that is, where a coin is sold below the current high Bid. Every time this happens, it means that not only did the buyer and seller fail to share a concept of value, but that they couldn't even meet to argue about it.

Silver Commemoratives are showing many plus signs, especially in the MS63 through MS66 grades. The very few changes seen in Gold Commems are mixed, a bit disappointing after last week's more

positive indications. Morgan Dollars turned in a mixed performance as well, but with the majority of the minus signs being attributed to a drop in generic prices. Changes in the Peace Dollar charts were not abundant, but were mostly positive. Mint State Type coins also showed few changes but they were mostly advances. Mint State Gold Type coins showed quite a few minuses, especially in the lower grades. Proof Type coins and Proof

Gold Type coins were both steady, with a majority of the changes being on the minus side. Buffalo Nickels were steady, with a few scattered minus signs. Mercury Dimes show definite weakness in the later dates and lower chart grades. Among the specialty series, only Walking Liberty Halves showed significant plus activity. Proof Singles were steady.

The total number of plus and minus signs is a quick indicator of market activity, and the twelve weekly files show 500 plus signs and 556 minus signs. Isolating the minuses caused by small downward adjustments in generics, the market still looks to be gaining health. More significant, though, are the 9,000 Bids that remain unchanged. There is growing strength in the market that cannot be seen in the charts, but is evident to participants.

PCGS Professional Coin Grading Service, Newport Beach, CA: Established in 1986, PCGS grades and authenticates U.S. and world coins. PCGS has certified more than two million coins. All coins must be submitted through one of the 560+ authorized dealers; contact PCGS at 800-447-8848 for a list.

PCGS has more than 15 graders on its staff; each coin is examined by at least two graders before the final grade is determined. No person involved with the grading process may be active in the buying or selling of U.S. coins. Fees start at \$26 or \$35 depending on the type of coin, plus postage and insurance; several levels of Express service are also available. PCGS coins are sonically sealed in an inert plastic "NumisCap" holder before return to the customer.

PCGS has a cash-backed Guarantee of Grade and Authenticity. PCGS has a comprehensive grading set which includes most major series. PCGS is a grading service only and does not make markets. PCGS dealers are responsible for their own making of markets in PCGS coins. PCGS publishes a monthly Population Report.

ANACS ANACS: The first authentication service (established in 1972), to which grading services were added in 1978. ANACS authenticates and grades all U.S. coins and Patterns, rendering unbiased third party grading opinions using prevailing market grading standards. After grading, the coins are placed in the sonically sealed ANACS Cache.TM

ANACS has over 700 active submission centers. All coins can be sent through the submission centers or directly to the ANACS office. Submitters can also become Market Makers. The fee for a standard submission is \$23, and various levels of express service are available between \$40 and \$125.

Free information is available from ANACS, P.O. Box 182141, Columbus, Ohio 43218-2141. Phone 1-800-888-1861.

CCDN Bids reflect 1986 and newer certified coins, and assume the certificates have no negative comments. ANACS Bids are listed only once each month.

NGC Numismatic Guaranty Corporation of America. Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$19, plus postage and insurance. After it is graded, it is then placed in a "lab tested" (incit) hard plastic holder and sonically sealed, then returned to the customer.

There are over 550 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit "Arm's length" NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at Heritage Plaza, Highland Park Village, Dallas, TX 75205-2788. Phone (214) 224-0500. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (somewhat compared to the other three services listed). Regular cost is \$24 per coin. You must request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded with a charge of 30% of the regular fee. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for Silver Dollars, 1800-1849, and Walking Liberty Halves. Due to expert trading volume, NCI coins will only be listed once a month. CCDN Bids reflect 1987 and newer certified coins.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

The Blue Sheet

Certified Commodities newsletter is a monthly publication of the Certified Commodities Trade Association (CCTA). It contains information on market conditions, price movements, and other factors affecting the commodities market. The CCTA is a non-profit organization that represents the interests of its members, who are primarily large commercial and industrial users of commodities. The CCTA's primary goal is to promote the efficient and orderly functioning of the commodities market. It does this by providing its members with timely and accurate information, by advocating for their interests, and by promoting the use of standardized contracts and procedures. The CCTA also provides a variety of other services to its members, including research, analysis, and training. The CCTA is a valuable resource for anyone involved in the commodities market.

City _____ State _____ Zip _____

Some bids within represent very conservative sight/unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

Long Beach May Bring to Bear Future Market Direction

Some of the uncertainty about the direction of the coin market reappeared just as dealers were starting to show some real enthusiasm for the autumn show. The mixed signals that the market has been showing during the past week have done little to establish any clear indications. This may be one of those Long Beach shows where dealers have to wait until Sunday to decide whether they have been having a good time or not. We have been hearing increasing reports that coin investors are still out there, and that they are starting to do some selective buying, some real bargain hunting. Dealers will be looking for them at Long Beach.

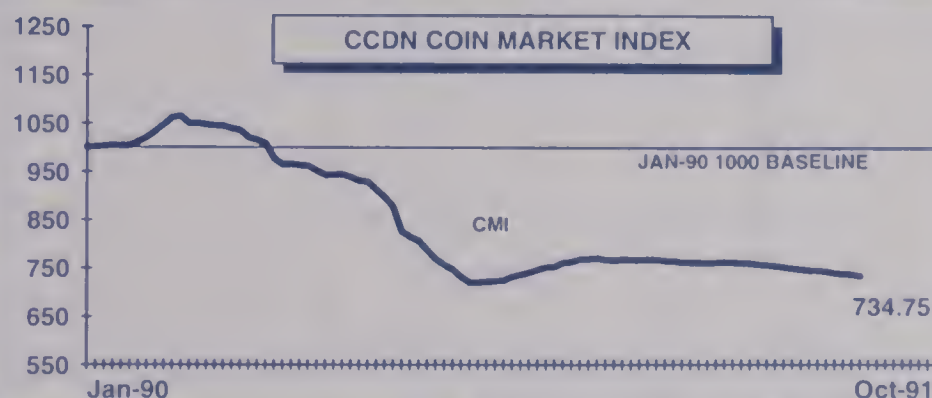

The uncertainty has manifested itself in many ways. Some dealers who may be considered 'permanent fixtures' at the Convention Center will not be attending this year, for one reason or another. Bid prices coming into the show have been relatively stable - in fact, the biggest news about Bids is that there is little news at all. **This really is good news.** The plus/minus counts that we sometimes provide (with trepidation, since the raw counts can be very misleading) are what indicate the uncertainty. This week, the twelve weekly charts showed 469 minus signs, and 424 plus signs. Just like the whole market, the count is balanced. The counts may be a crude indicator of market direction (in a mixed market), although we can just imagine the joy in **coindom** should the plus signs begin to massively dominate the charts.

What else is chipping away at the good news of the stationary prices in the market? Weakness in the generic prices for Morgan Dollars and Walking Liberty Halves in MS65. We have read the population reports, and we know that you might have to stretch the definition of "rare" to include all of these coins, buy my goodness, just how cheap can they get? The market will ultimately let us know, and during the process, hopefully

dealers will be able to entice new numismats into buying a whole lot of history for very few dollars.

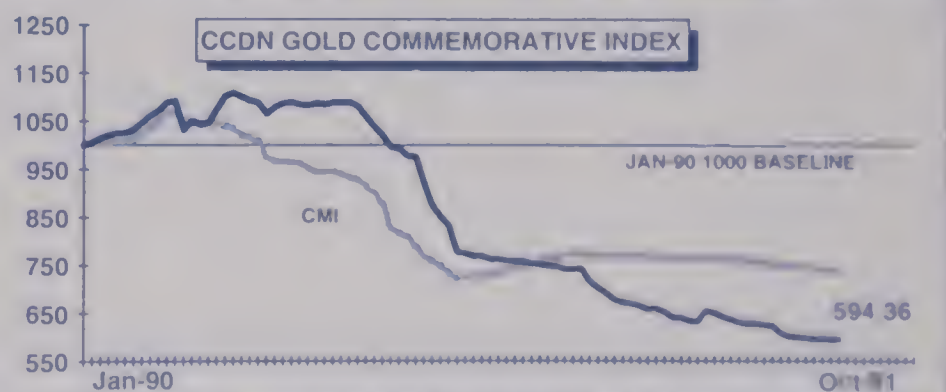

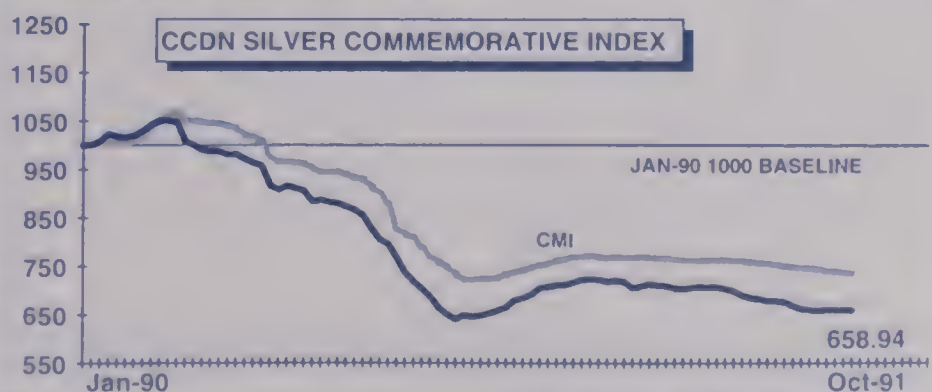

Collectors attending Long Beach should be tuned in to watching a lot of intense interplay between dealers trading at the bourse tables. Buyers are going to be looking long and hard before the negotiating begins, and you can bet that the negotiations will be something fierce. Dealers coming with strong Want Lists will be in a strong position, just how strong will depend upon the strength of the collectors' buying ability. Dealers sitting behind the tables of Long Beach will definitely want to make the sale for the sake of margin, they will naturally prefer to sell retail to clients, but a wholesale transaction will still be better than no sale at all. This is going to be one to watch.

Silver Commemoratives ended the week in the plus column, although stability is quickly evident at first glance. Gold Commems, the unloved 'orphan' of recent numismatic bidding history, managed a step in the positive direction. Morgan Dollars, despite continued weakness in generic prices and some discounted selling, still managed to turn in a positive performance. Peace Dollars continue to have trouble sustaining any momentum, and ended the week mixed with a slight majority of minus signs. Mint State Type and Mint State Gold Type both turned in a negative performance, with minus signs outnumbering pluses about two to one. Proof Type and Proof Gold Type, on the other hand, both showed some signs of life. Buffalo Nickels were slightly on the minus side and Mercury Dime changes were clearly to the minus side, while Walking Liberty Halves turned in a majority of plus signs despite the weakness in common MS65s. Proof Singles remain active in trading despite the lower Bid levels.

CCDN Coin Market Index: 734.75 - 2.83 Jan. 5, 1990 Bids = 1000

Bluesheet Chart	Index	Change		
Silver Commems	658.94	-0.42	Mercury Dimes	816.69 -2.14
Gold Commems	594.36	-0.41	Walker Halves	739.89 +0.27

Still Thinking About 1991?

It really is time to begin thinking about 1992, and especially about how to make the new year even more productive. It's time to begin thinking about the 1992 Numismatic Dealer Directory. Do we have your correct address and telephone numbers? Have you begun to think about your advertising plans for 1992 yet? Call us at 213-515-7369 to discuss advertising in the 1992 NDD.

Your very best customers will be using the *Greypages* in the 1992 Numismatic Dealer Directory; when they want to buy or sell coins and currency, when they are looking for certification services, or when selecting an auction house. Make sure that they find you there.

MERCURY DIMES

CCDN does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

14. The data that suggest that it is possible to partition, without loss, all those who would benefit at least some, rather than be rejected, to some of the community health centers in poor areas.

[illegible]

Bids for Lincoln Cents are for full-red specimens in PR64 and higher

Long Beach Makes Most of Market Activity in Some Areas Spotty

It is often difficult to find a single word to describe such a dynamic situation as the coin market. We asked a few dealers at the Long Beach Coin Show their opinions, and their answers covered a lot of territory. Price levels have been declining for some time now, and this had severely impacted many dealers. *Down?* Dealers who have been specializing in collector coins report solid business. *Up?* Many dealers feel that we are very close to the bottom, and that a market recovery will begin soon. *Hopeful?* Other dealers, trying to change their emphasis from the investor to the collector, are having a hard time of it. *Collector's?* The single best word that we can provide is *spotty*. With so many contradictory aspects to the market, it is no wonder that a single word can hardly describe it. This word is probably the best description of Long Beach as well; Long Beach provided as good an opportunity as this market allows. Dealers who came expecting a fully liquid coin market were bound to be disappointed. Dealers with coins to sell still had to find the buyer with the bucks and the demand, but the buyers were definitely there. Dealers who are skillful or lucky had a fine show.

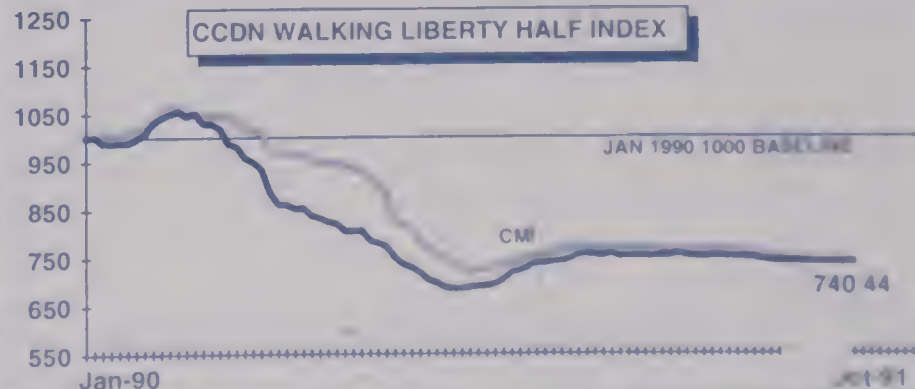

Results from Heritage's Oct. 1991 Long Beach Sale and its accompanying Bullet Sale, also held at the Long Beach Coin Show, provided evidence of the continuing demand for quality coins, especially after the buyer has had the opportunity for *inspection*. Most important, many of the certified coins were of the "middle grades" which appeal to the broadest possible audience. Among the more interesting lots:

Date & Denomination	Certified Grade	Price Realized
1858 F.L. Cent. L.L.	PCGS65	\$ 3.00
1909-S V.D.B.	PCGS64 R&H	\$ 8.75
1912 D Barber Dime	PCGS65	\$ 3.00
1916 S.L. Quarter	PCGS62 F.H.	\$ 4.60
1821 Bust Half	NGC64	\$ 2,440
1941-47D (20 pc set) W.L. Half	PCGS66	\$18,700
1899 Morgan	PCGS65 DMPL	\$ 1,980
1878 \$3 Gold	PCGS64	\$ 6,160
1805 Half Eagle	PCGS61	\$ 7,040
1901-S \$10 Gold	PCGS65	\$ 4,070

The market this week is showing some of the same indifferent, spotty qualities we detected at Long Beach. Despite the efforts of many dealers to fill want lists, with genuine plus signs reflecting increased demand, the sheet is still showing a majority of minus signs. In fact, minus signs outnumbered plus signs in every chart except Morgans (a mixed performance), Proof Type (a tie), Walkers (a boomer for plus signs) and Standing Lib Quarters (a strong showing). Discounted selling may be a fact of life in a declining market - in fact, it may well define a declining market. But we will mention again that every week we are seeing many coins being sold for amounts below (and in a few cases) substantially below the top active Bid in the marketplace. Unnecessary low sells, due to information inefficiency in the marketplace, are adding insult to injury.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CCDn, albeit, on a sight basis.

FIGURE 10 | *PMPL and NPL101* folds are the fully deep Minus-Flanking cases. See also FIGURE 11 and TABLE 11. January 2016, provided as one-sided PL and for hand simulation in a supplemental report. 2016 observed. Both cases show a significant fully-deep positive probability appearance.

CCDN does not represent that it is possible to purchase selected coins at these bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

[illegible]

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

Still Thinking About 1991?

It really is time to begin thinking about 1992, and especially about how to make the new year even more productive. It's time to begin thinking about the 1992 Numismatic Dealer Directory. Do we have your correct address and telephone numbers? Have you begun to think about your advertising plans for 1992 yet? Call us at 213-515-7369 to discuss advertising in the 1992 NDD.

Your very best customers will be using the *Greypages* in the 1992 Numismatic Dealer Directory; when they want to buy or sell coins and currency, when they are looking for certification services, or when selecting an auction house. Make sure that they find you there.

the COIN DEALER Newsletter family of publications P.O. Box 11099 • Torrance, CA 90510

All prices are sight unseen. Excludes handling fee.
End prices are for the most common color shown on display.

CCDN does not represent that it is possible to purchase selected commodities at the "Fair level." Commodity prices can be expected to occur at substantially higher levels in many cases.

[illegible]

For certified coins not listed in the CCDn, please refer to the COIN DEALER newsletter for current Bid levels.

NOW GRADING ALL WORLD COINS!!!

(Well, almost all of them.)

PCGS is now accepting coins for grading
from the following countries:

Albania (1926 - 1941)
Argentina (1813 - 1942)
Australia (1911 - 1964)
Austria (1802 to date)
Belgian Congo (*Zaire*)
(1887 - 1947)
Belgium (1832 - 1955)
Bolivia (1801 - 1951)
Brazil (1802 - 1922)
British Guiana (*Guiana*)
(1836 only)
British Honduras
(*Belize*) (1885 - 1966)
British West Africa (1907 - 1952)
British West Indies (1820 - 1822)
Bulgaria (1881 - 1943)
Canada (1858 to date)
Central American Republic
(1824 - 1847)
Ceylon (*Sri Lanka*) (1815 - 1957)
Chile (1801 - 1968)
Colombia (1801 - 1948)
Costa Rica (1842 - 1954)
Cuba (1915 - 1953)
Cyprus (1879 - 1957)
Czechoslovakia (1923 - 1955)
Danzig (*Poland*) (1923 - 1937)
Denmark (1808 - 1960)
Dominican Republic
(1844 - 1955)
East Africa (1897 - 1952)
Ecuador (1833 - 1944)
El Salvador (1889 - 1940)

England (1797 to date)
Estonia (1922 - 1936)
Ethiopia (1897 - 1931)
Fiji (1934 - 1965)
Finland (1864 - 1918)
France (1848 to date)
French Cochinchina
(*Vietnam*) (1875 - 1885)
German East Africa
(*Tanzania*) (1890 - 1916)
German New Guinea (*Papua
New Guinea*) (1894 - 1895)
Germany (1800 to date)
Greece (1828 - 1967)
Greenland (1926 - 1957)
Guatemala (1801 - 1959)
Haiti (1807 - 1908)
Honduras (1832 - 1949)
Hong Kong (1863 - 1951)
Hungary (1830 - 1943)
Iceland (1922 - 1940)
India (*British*) (1834 - 1947)
Ireland (1805 - 1966)
Isle of Man (1813 - 1859)
Italy (1801 - 1956)
Jamaica (1869 - 1963)
Japan (1870 - 1964)
Jersey (1841 - 1960)
Korea (1888 - 1910)
Latvia (1922 - 1932)
Liberia (1847 - 1906)
Liechtenstein (1862 - 1956)
Lithuania (1925 - 1938)

Luxembourg (1854 - 1946)
Malaysia (1845 - 1961)
Mauritius (1877 - 1971)
Mexico (1801 to date)
Mombasa (*Kenya*) (1888 - 1890)
Netherlands (1801 - 1966)
New Zealand (1933 - 1965)
Nicaragua (1878 - 1965)
Norway (1801 - 1958)
Panama (1904 - 1953)
Paraguay (1845 - 1939)
Peru (1801 - 1966)
Philippines
(*Spanish*) (1861 - 1885)
Poland (1810 - 1939)
Portugal (1804 - 1860)
Puerto Rico (1895 - 1896)
Rumania (1867 - 1946)
Russia (1802 - 1936)
San Marino (1864 - 1938)
South Africa (1892 - 1960)
Southern Rhodesia (1932 - 1954)
Spain (1801 - 1966)
Sweden (1802 - 1955)
Switzerland (1797 to date)
The United States of America
(1792 to date)
U.S. Philippines (1903 - 1945)
Uruguay (1840 - 1961)
Vatican (1801 - 1959)
Venezuela (1843 - 1945)
Yugoslavia (*Montenegro-Serbia*)
(1868 - 1934)

PCGS has graded 2,667,873
coins with a declared
value of \$3,242,010,625.

Certification by PCGS does not guarantee
protection against the normal risks
associated with potentially volatile markets.

Bids Drop Under Selling Pressure Sporadic Demand on Select Grades & Series

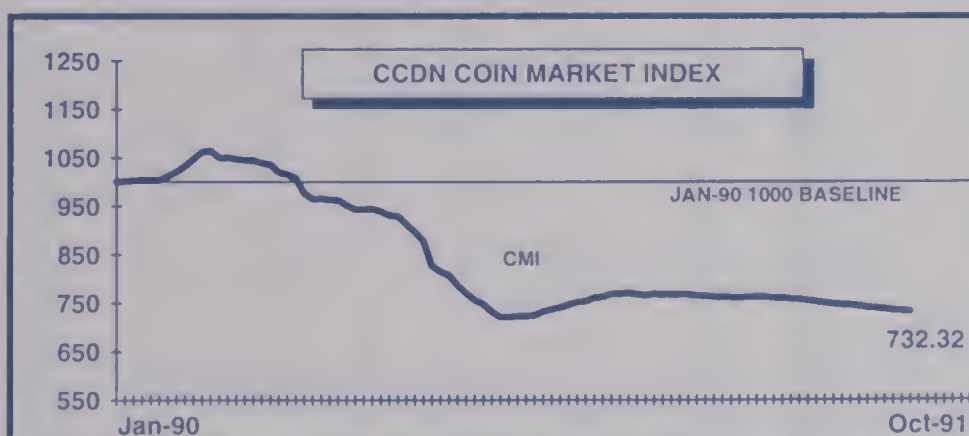

The growing market strength that we were watching before Long Beach seems to have become rather sporadic. Perhaps it sounds better to say that demand has become more focused. Either way, it means that it has now become extremely precarious to make generalizations about the coin market. How do you describe a market where MS64 Silver Commems are extremely active with strong demand, but MS63-MS65 Morgans have shown declines due to discounted sells? Where currency continues slow methodical growth, but Proof Singles continue to slide?

Sticking to basics? Silver Commemoratives were mixed outside of the strong MS64 showing. Some Gold Commems moved upward, building on several weeks of support - has the bottom been reached? Higher Bids in the Morgan Dollars seemed overwhelmed by discounted sells. Peace Dollars and Mint State Type were steady, with mixed changes. Mint State Gold Type changes were mainly on the minus side. Proof Type was mixed, with most of the plus signs in the lower grades. Proof Gold Type was steady, with little activity. Buffalo Nickels and Mercury Dimes were steady, but Walkers showed some weakness in the later dates. Proof Singles ended on the downside of steady.

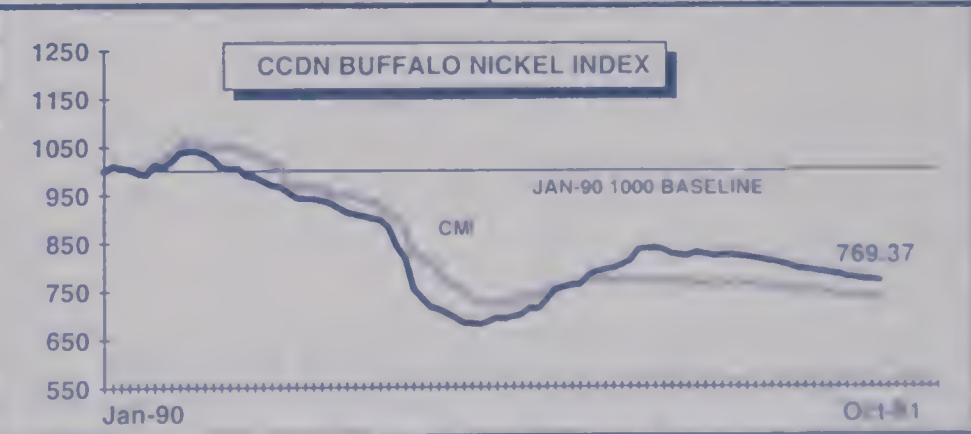

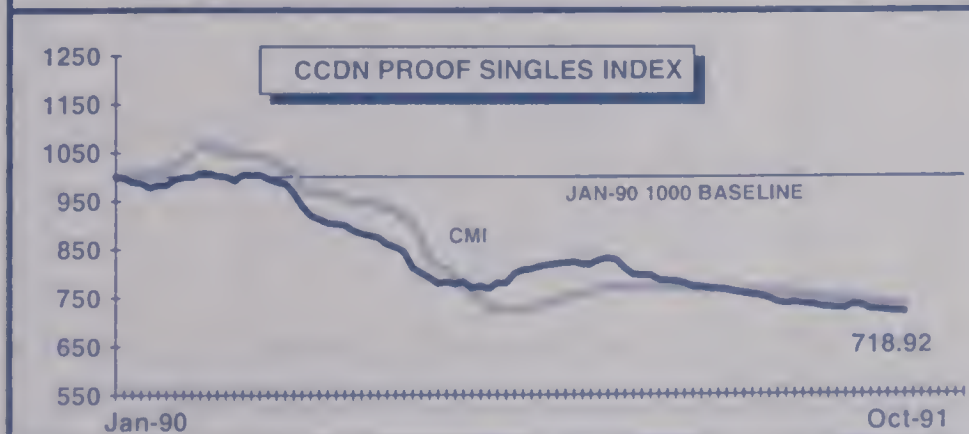

One aspect of the larger market is certain. In many series, in many grades, dealers are selling coins below previous Bid levels (or even worse, offering to sell without success!). Market value is market value, and we must respond to a dealer turning last week's Bid into this week's Ask. We hate to see inventory values decline, but a coin trade is still very strong evidence of the market's valuation of that coin. When there are simply no supporting Bids visible in the marketplace, a *trade* or an *offer to sell* at a new lower price really does establish the new market value.

Exacerbating the problem of discounted sells is that we are seeing many coins being sold at prices substantially below the current, active High Bid. And by many, we are talking about hundreds of coins every week. While it is true that the coin market is now much more efficient (especially in terms of its ability to spread information) than it was ten years ago, it still has a long way to go. Most of the problem in selling coins below the highest current Bid can be traced to today's inefficiencies - it is sometimes difficult to find the highest Bidder on the multitude of systems and information sources available.

Sometimes the problem cannot be blamed on inefficiency. We were recently talking to one of the largest local dealers, whose high Bid of several week's standing was substantially above the long posted Ask for the very same coin. Frankly, his response to our challenge of his not buying *that* particular coin caught us off guard. He was well aware of the coin in question, since he did business with the seller on at least a weekly basis - the problem is that it was just one *ugly* coin. He didn't want *that* coin, and accordingly wouldn't run his Bids on CCE where he would have to accept the coin if tendered. The seller, in this case, knew that the highest buyer did not want his ugly coin, and wouldn't have offered it to him. Sooner or later, a sight-unseen Bidder will end up with this dog, and unfortunately, the trade report may reflect a value for that specific date and mintmark that reflects neither a superb nor an average example, but a dog that the high Bidder wouldn't take at 35% less than his high Bid. Ugly coins are a fact of numismatic life, and they are a fact that plays havoc with the concept of a sight-unseen trading system.

CCDN Coin Market Index: 732.32 - 0.90 Jan. 5, 1990 Bids = 1000				
Bluesheet Chart	Index	Change

What Do You Need?

These days, coin dealers have a variety of needs, and coins are only one of them. Heritage offers a wide

range of services covering the full spectrum of the needs of today's dealers.

Split Deals: Do you have a lead on a major collection, but are short funds with which to purchase it? Heritage can provide cash for these occasions, and is willing to work on a "split profit" arrangement. Call Steve Ivy, Jim Halperin or Martin Paul for details.

U.S. Gold: We are the nation's largest importer of U.S. Gold from overseas. Our European contacts have been on the job since the mid 1970's, with more sources for both rare and bullion-oriented gold coins than anyone else around. Contact Lee Sanders for current availability and prices.

Auctions: With nearly one sale per month, you're never far from an opportunity to offer your inventory to thousands of retail buyers and hundreds of dealers. Our unique Bullet Sales feature a total turnaround time (from consignment to settlement) of about four weeks. Best of all, advances are available! Give Bob Merrill or Leo Frese a call for further information.

Certified Coins: With an inventory of over \$10 million, we are among the country's leading sources for PCGS, NGC and ANACS material. If you need it, we either have it or can get it. Ask Tom Novy or Dave Lindvall.

Rare Stamps: Ivy, Shreve & Mader Philatelic Auctions is one of the world's largest and most respected stamp auction companies. Offices in New York, Dallas and Los Angeles offer state-of-the-art services to all potential sellers of rare stamps. Call Charles Shreve today for further details.

Open to Buy: We are always willing buyers of almost any type of material - both raw and certified. Our bank line exceeds \$12 million, and our checks are good right away. No waiting or redepositing necessary. Check with Greg Rohan or Martin Paul if you have coins you'd like to move.

New Customers: Who couldn't use more of these? Join the nation's fastest-growing network of dealers on the U.S. Rare Coin Exchange. The Exchange sends both an electronic as well as hard-copy listing out to thousands of the strongest and most active retail buyers in the country every week. And right now, we're making some incredible offers to you, in order to build the Exchange even larger.

Market Continues Sluggish Generic Morgans Slide Further

This week's market news is not especially pleasant, but there is some good news behind the bad news. What bad news, you say? How about MS65 Morgans trading *light-unseen* below \$85? What's the good news? Coins are trading. As long as inventories turn, as long as coins are bought and sold, prices will eventually sort themselves out. When buyer and seller share a common idea of value, the supply/demand market is functioning. We don't make light of dealers' losses on individual coins, simply keep in mind replacement costs, tax laws, and the ability to turn a profit when coins are trading. We will get seriously worried when inventories become museums.

Before Long Beach, we reported dealers' expressions of guarded enthusiasm about firming coin prices. With the number of supporting and *increasing* Bids, and levels of activity, we judged their predictions to hold a fair amount of validity. Instead the market has continued to move slowly downward. As one dealer expressed his apology for a bad prediction, he confused validity with volatility. The technician (as in stock-market analyst) would look at these price movements and declare that we recently witnessed a wave of consolidation in the continuing liquidation of the rare coin market. True enough, but we prefer to keep the faith that one of these upcoming consolidations will turn into the market bottom. At some level, coins have to inspire demand from buyers.

Some dealers are still 'giving' money away. When coins trade at a price lower than they should (by which we mean that there is a current, active buyer with good funds Bidding at a higher price), it hurts the entire market. How serious is the problem? We see thousands of dollars of reverse spreads every week! One NGC MS65 dollar, which this week enjoyed an active, well-publicized Bid price of \$212,

traded on CCF at \$134! The buying dealer got a rip, and could have bought and sold it to the high Bidder. Fortunes can still be made on arbitrage, and that is his just reward for his superior knowledge of the marketplace. The problem lies with those who might look at the trade report and believe that the market has fallen even further than an already unpleasant reality. We have enough bad news in the market; why manufacture more unnecessarily?

Silver Commems were steady (with plus signs dominating the changes). Gold Commems, Morgan Dollars and Peace Dollars slumped on a wave of *light-unseen* sells. Mint Type bids were steady, but

Mint Gold Type shows a wave of *minus*es on reduced Bidding activity along with lower sells. *Minus* signs on Mint State Gold and Morgan Dollars get the attention of every coin chip twirler in America. Proof Type looked mainly steady, and Proof Gold Type showed increases in 64 & 65. Buffalo Nickels showed scattered changes, many on the plus side. Mercury Dimes were somewhat steady, with a few scattered *light-unseen* sells producing *minus* signs. Walking Liberty plus signs were split

between the services, with PCGS registering pluses across the lower grade, earlier dates, and NGC was strong in later date MS65 and MS66. Proof singles showed weakness in the Dimes and in the Halves from the Forties.

Editor's Note: Special congratulations are in order for Superior Guaranty's newest auction policy. Announcing when the owners of coins are bidding from the floor on their own material. This crucial information will enable serious floor bidders to make better informed choices.

PCGS Professional Coin Grading Service, Newport Beach, CA. Established in 1986, PCGS grades and authenticates U.S. and world coins. PCGS has certified more than two million coins. All coins must be submitted through one of the 560+ authorized dealers; contact PCGS at 800-447-8848 for a list.

PCGS has more than 15 graders on its staff; each coin is examined by at least two graders before the final grade is determined. No person involved with the grading process may be active in the buying or selling of U.S. coins. Fees start at \$26 or \$35 depending on the type of coin, plus postage and insurance; several levels of Express service are also available. PCGS coins are sonically sealed in an inert plastic "NumisCap" holder before return to the customer.

PCGS has a cash-backed Guarantee of Grade and Authenticity. PCGS has a comprehensive grading set which includes most major series. PCGS is a grading service only and does not make markets. PCGS dealers are responsible for their own making of markets in PCGS coins. PCGS publishes a monthly Population Report.

ANACS ANACS: The first authentication service (established in 1972), to which grading services were added in 1978. ANACS authenticates and grades all U.S. coins and patterns, rendering unbiased third party grading opinions using prevailing market grading standards. After grading, the coins are placed in the sonically sealed ANACS Cache.TM

ANACS has over 700 active submission centers. All coins can be sent through the submission centers or directly to the ANACS office. Submitters can also become Market Makers. The fee for a standard submission is \$23, and various levels of express service are available between \$40 and \$125.

Free information is available from ANACS, P.O. Box 182141, Columbus, Ohio 43218-2141. Phone 1-800-888-1861.

CCDn Bids primarily reflect 1989 and newer certified coins (post ANA's sale of ANACS). Earlier certifications (including pre-Cache certificates) may realize varying Bids. ANACS Bids are listed only once each month.

NGC Numismatic Guaranty Corporation of America. Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grade and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$19, plus postage and insurance. After it is graded, it is then placed in a "lab tested" inert, hard plastic holder and sonically sealed, then returned to the customer.

There are over 550 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC and coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit. Arm's length, NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute. Organized in June 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at Heritage Plaza, Highland Park Village, Dallas, TX 75205-2788. Phone (214) 528-1281. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (generous) only compared to the other three services listed. Regular cost is \$75 per coin. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded with a charge of 50% of the regular fee. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for Silver Dollars, 50c Se. Commems, and Walking Liberty Halves. Due to current trading volume, NCI coins will only be listed once a month. CCDn Bids reflect 1987 and newer certified coins.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.

Client or sight seen sales may command a substantial premium above *Bluesheet* Dealer to Dealer Bids.

the CURRENCY DEALER newsletter

... is a Monthly Publication that is the most COMPREHENSIVE and UP-TO-DATE pricing guide available in today's ever-changing field! DEALER-TO-DEALER BID/ASK Charts cover all of the following areas:

LARGE SIZE U.S. NOTES

- DEMAND NOTES
- U.S. NOTE: (LEGAL TENDER)
- COMPOUND INTEREST TREASURY NOTES
- INTEREST BEARING NOTES
- REFUNDING CERTIFICATE
- SILVER CERTIFICATES
- TREASURY NOTES OR COIN NOTES
- NATIONAL BANK NOTES
- FEDERAL RESERVE BANK NOTES
- FEDERAL RESERVE NOTES
- NATIONAL GOLD BANK NOTES
- GOLD CERTIFICATES

U.S. FRACTIONAL CURRENCY

U.S. FRACTIONAL CURRENCY PROOF & SPECIMEN NOTES

SMALL SIZE U.S. NOTES

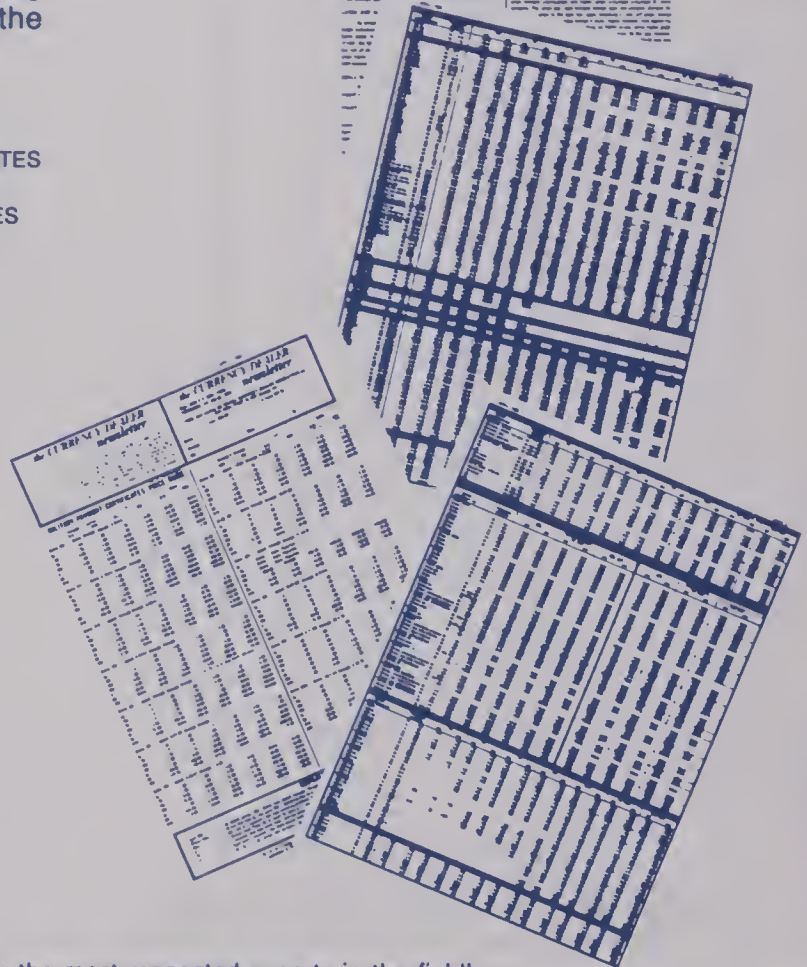

- LEGAL TENDER NOTES
- SILVER CERTIFICATES
- NATIONAL BANK NOTES
- FEDERAL RESERVE BANK NOTES
- FEDERAL RESERVE NOTES
- GOLD CERTIFICATES
- WW2 EMERGENCY ISSUES

UNCUT SHEETS - SMALL SIZE CURRENCY

- U.S. NOTES (LEGAL TENDER)
- SILVER CERTIFICATES
- WW2 EMERGENCY ISSUES
- NATIONAL CURRENCY

... **PLUS** IN-DEPTH ARTICLES and analyses, each month, written by the most respected experts in the field!
 ... **PLUS** AUCTION REPORTS — to give a clear and accurate picture of the most recent activity!
 ... **PLUS** special ISSUE-BY-ISSUE Charts covering special areas of changing importance!

Subscribe today and get the most comprehensive price guide on the currency market.

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

Price Slide Continues Active Trading in Morgans & Commems

This week's coin market is continuing to show the same weakness that we described over the past several weeks. The decline of many generic prices, and declines on some of the high-powered coins, combined with active trading in the 'middle' priced coins, inclines us to repeat an observation we made some time ago. The coins valued \$150 to \$750 seem to be best weathering the storm. Generalizing about this market is risky, however, because what we are seeing is that *many coin markets* exist. MS65 Morgans may be down now, but Early Coppers are still setting records. Mint State Gold Type may be down, but there is continuing strong demand for Saints from date collectors. Low-value generics may not be in great demand today, because today's collectors may only need so many MS63 Morgans; a new generation of collectors could change that situation. Some of the high-powered coins are languishing, but there remains demand for the Proof Gold coins that are such a delight to inspect and own. The bulk of activity in the overall market, though, comes from the vast range of medium-priced material that advanced collectors know they desire, and can now afford to buy at the lower prices. As a corollary to this observation, we are hearing some very positive things from dealers who have specialized in developing a customer base for this range of material.

We know that there is still a bias in the collecting community (although not always recognized as such) for MS65 material. *Serious* collectors, starting in the 1970s with the growing awareness of **grade**, were defined by their MS65s. MS65s have always gotten the "oohs" and "ahhs". Need to produce a pricing history chart for the *Bluesheet*? Let's look at MS65s! Of course, if we think about it, we know that today's

MS63s and MS64s are mighty fine looking coins; they better be, since so many started life as MS65s in the 1970s! The fact remains that we still have a tendency to look at the MS65 grade as a market bellwether.

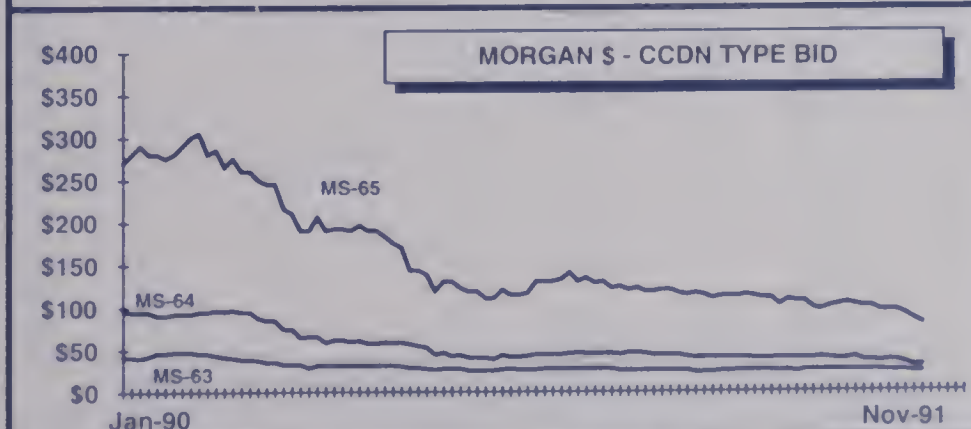

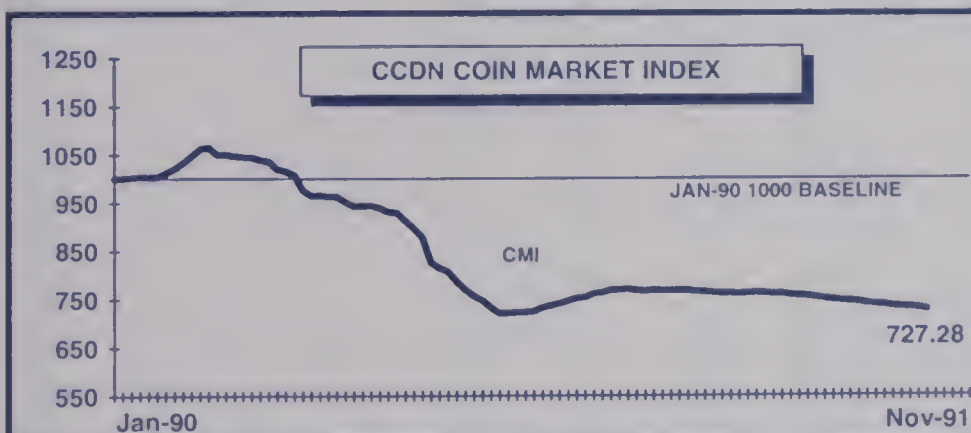

It pays to look at MS63s as well. Barber coins are among the most popular type coins that a collector will procure when he begins to enlarge both his sophistication and his collection. Many collectors will look at MS63 quality, as a means of maximizing the number of attractive coins that they can afford. How have they performed over the past five years in MS63? All Bids are from early November issues of their respective years:

MS63	1986	1987	1988	1989	1990	1991
Barber 10c	310	255	265	280	100	154
Barber 25c	625	450	455	460	320	284
Barber 50c	1100	875	975	975	680	660

Focusing on MS65 Barbers, the increased volatility of the investor market becomes more evident.

MS65	1986	1987	1988	1989	1990	1991
Barber 10c	2100	1750	1450	2300	1000	910
Barber 25c	3075	2400	2600	4000	2500	1180
Barber 50c	4750	3750	3750	5150	4000	2300

Collectors of MS63 Barbers have seen growing collecting opportunities as the Bids have declined. They have been denied some of the profits available by selling out at the top of the MS65 market, but they have also been spared much of the volatility. An MS63 remains a very nice coin at an extremely attractive price for the collector.

The Bluesheet

The Certified Coin Dealer newsletter reports current wholesale market values for coins graded by the most active grading service. The numbers reported are determined through careful study of market activity including the highest nationally reported visible Bids Ask prices trading information from dealers and auction prices. The CCDn may not alter market value because the high Bidder removes his Bid but will be strongly influenced by Ask or Trades which are near or below current wholesale value. CCDn every means available to insure accuracy and completeness of the wholesale values shown. Bluesheets prior to April 1991 reported Bids based primarily on the highest sight-unseen Bid. Individual buy and sell prices will vary from dealer to dealer are strictly the responsibility of the dealer, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

URGENT MEMO

TO: *All Dealers* FROM: *Ron Downing* RE: *IRS Cash Reporting Regulations*

Coin dealers are included in the IRS' "Operation Big Ticket" which targets industries the IRS believes are being used to launder drug money. The IRS is conducting detailed compliance checks of its CASH REPORTING regulations that require dealers to file IRS Form 8300 for transactions of \$10,000 or more.

DO YOU KNOW

- what "structuring" is and that it is illegal?
- about "related transactions"?
- that if you do not report a transaction the IRS believes you *should have known* was suspicious, you could be in violation of these regulations?
- the definition of cash and which "monetary instruments" are considered to be cash?

PENALTIES

- Failure to file a Form 8300 is a criminal offense.
- Willful failure to file Form 8300 can result in fines starting at \$25,000.
- Receiving cash known to have been illegally generated is punishable by 4½-5½ years in prison for the first offense.
- New laws regarding forfeiture of assets are even more sweeping than the drug possession forfeiture laws. Be aware that IRS "sting" operations are both legal and widespread.

INDUSTRY ACTION

CASH REPORTING regulations are confusing. ICTA (Industry Council for Tangible Assets)--the national trade association for collectibles dealers (coins, precious metals, sportscards, etc.)--is working to clarify and keep you up to speed on these changing IRS **CASH REPORTING** regulations. ICTA is the only way we've got to get some kind of relief. ICTA needs money to 1) provide information to keep you up to date; 2) pay lawyer(s) to communicate with IRS on terms they'll understand; 3) coordinate efforts with coalition industries to increase our "clout"; and 4) let IRS know our industry is unique--no other industry considers *cash as merchandise!*

It's a sad fact of life that while we have the right to be heard, the cost of "hearing aids" in Washington is high. Without money, we can't pay for legal representation. Without funds, how can we even be part of any coalition? Without funds, we can't win. We'll barely be able to stay informed. Please help us with whatever donation you can make to the "ICTA CASH REPORTING FUND". Donors will continue to receive vital information on **CASH REPORTING** until the issue is resolved.

YES! I WANT TO HELP

Enclosed is my donation of: ☐ \$1000 ☐ \$500 ☐ \$250 ☐ \$100 ☐ \$50 ☐ Other \$ _____

Your name: _____ Firm name: _____

Address: _____ City: _____ State: _____ Zip: _____

Bill my contribution of \$ _____ to my: ☐ Visa ☐ MasterCard ☐ AmEx.

_____ Exp.Date _____ Signature: _____

☐ Check to "ICTA-Cash Reporting Fund" enclosed. ☐ Please send ICTA membership information

ICTA: 666 Pennsylvania Ave., S.E., #301, Washington, DC 20003; Telephone (202)544-3531.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective (on one or both sides), with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Still Thinking About 1991?

It really is time to begin thinking about 1992, and especially about how to make the new year even more productive. It's time to begin thinking about the 1992 Numismatic Dealer Directory. Do we have your correct address and telephone numbers? Have you begun to think about your advertising plans for 1992 yet? Call us at 213-515-7369 to discuss advertising in the 1992 NDD.

Your very best customers will be using the *Greypages* in the 1992 Numismatic Dealer Directory; when they want to buy or sell coins and currency, when they are looking for certification services, or when selecting an auction house. Make sure that they find you there.

the COIN DEALER Newsletter family of publications P.O. Box 11099 • Torrance, CA 90510

NEED TO MAIL?

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

1991 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list of more than 5,000 current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only \$325 - well below the mailing industry standard of \$75/thousand.

To make this offer even more attractive, labels are available in both First Class - Zip Code order or Presorted for Third Class - Basic Bulk Rate mailings (you can save more than \$425 over First Class postage rates!).

YES, I want to order mailing labels for the 5,000+ names from the 1991 Numismatic Dealer Directory. I understand that my \$325 fee entitles me to only one usage of these names. _____ signature
My check for \$325 is enclosed.

☐ First Class; Zip Code Order

☐ Third Class; Pre-sorted Basic Bulk Rate Order

(Please provide City, State and Zip of mailing site for bag tag preparation)

MERCURY DIMES

CCDn does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

LC 8b shows that regression that is quadratic in price has a better fit to the data than linear, and the quadratic regression line has a negative slope, as theoretically expected. Since the error term

NOW GRADING ALL WORLD COINS!!!

(Well, almost all of them.)

PCGS is now accepting coins for grading
from the following countries:

Albania (1926 - 1941)	England (1797 to date)	Luxembourg (1854 - 1946)
Argentina (1813 - 1942)	Estonia (1922 - 1936)	Malaysia (1845 - 1961)
Australia (1911 - 1964)	Ethiopia (1897 - 1931)	Mauritius (1877 - 1971)
Austria (1802 to date)	Fiji (1934 - 1965)	Mexico (1801 to date)
Belgian Congo (<i>Zaire</i>) (1887 - 1947)	Finland (1864 - 1918)	Mombasa (<i>Kenya</i>) (1888 - 1890)
Belgium (1832 - 1955)	France (1848 to date)	Netherlands (1801 - 1966)
Bolivia (1801 - 1951)	French Cochinchina - China (<i>Vietnam</i>) (1875 - 1885)	New Zealand (1933 - 1965)
Brazil (1802 - 1922)	German East Africa (<i>Tanzania</i>) (1890 - 1916)	Nicaragua (1878 - 1965)
British Guiana (<i>Guiana</i>) (1836 only)	German New Guinea (<i>Papua New Guinea</i>) (1894 - 1895)	Norway (1801 - 1958)
British Honduras (<i>Belize</i>) (1885 - 1966)	Germany (1800 to date)	Panama (1904 - 1953)
British West Africa (1907 - 1952)	Greece (1828 - 1967)	Paraguay (1845 - 1939)
British West Indies (1820 - 1822)	Greenland (1926 - 1957)	Peru (1801 - 1966)
Bulgaria (1881 - 1943)	Guatemala (1801 - 1959)	Philippines (<i>Spanish</i>) (1861 - 1885)
Canada (1858 to date)	Haiti (1807 - 1908)	Poland (1810 - 1939)
Central American Republic (1824 - 1847)	Honduras (1832 - 1949)	Portugal (1804 - 1860)
Ceylon (<i>Sri Lanka</i>) (1815 - 1957)	Hong Kong (1863 - 1951)	Puerto Rico (1895 - 1896)
Chile (1801 - 1968)	Hungary (1830 - 1943)	Rumania (1867 - 1946)
Colombia (1801 - 1948)	Iceland (1922 - 1940)	Russia (1802 - 1936)
Costa Rica (1842 - 1954)	India (<i>British</i>) (1834 - 1947)	San Marino (1864 - 1938)
Cuba (1915 - 1953)	Ireland (1805 - 1966)	South Africa (1892 - 1960)
Cyprus (1879 - 1957)	Isle of Man (1813 - 1859)	Southern Rhodesia (1932 - 1954)
Czechoslovakia (1923 - 1955)	Italy (1801 - 1956)	Spain (1801 - 1966)
Danzig (<i>Poland</i>) (1923 - 1937)	Jamaica (1869 - 1963)	Sweden (1802 - 1955)
Denmark (1808 - 1960)	Japan (1870 - 1964)	Switzerland (1797 to date)
Dominican Republic (1844 - 1955)	Jersey (1841 - 1960)	The United States of America (1792 to date)
East Africa (1897 - 1952)	Korea (1888 - 1910)	U.S. Philippines (1903 - 1945)
Ecuador (1833 - 1944)	Latvia (1922 - 1932)	Uruguay (1840 - 1961)
El Salvador (1889 - 1940)	Liberia (1847 - 1906)	Vatican (1801 - 1959)
	Liechtenstein (1862 - 1956)	Venezuela (1843 - 1945)
	Lithuania (1925 - 1938)	Yugoslavia (<i>Montenegro-Serbia</i>) (1868 - 1934)

PCGS has graded 2,667,873
coins with a declared
value of \$3,242,010,625.

Certification by PCGS does not guarantee
protection against the normal risks
associated with potentially volatile markets.

Slow Market Presents Problems Will Holidays Rush to the Rescue?

It doesn't take much of a survey to gain a consensus that the coin market is slow right now. The only area where dealers disagree is whether it is *slow* or **slow**! Dealers seem to be working harder than ever, but most are still at the mercy of a customer walking through the door with cash to spend. All retailers in all segments of the economy are asking the same questions; perhaps coin dealers should have put up their Christmas trees six weeks ago!

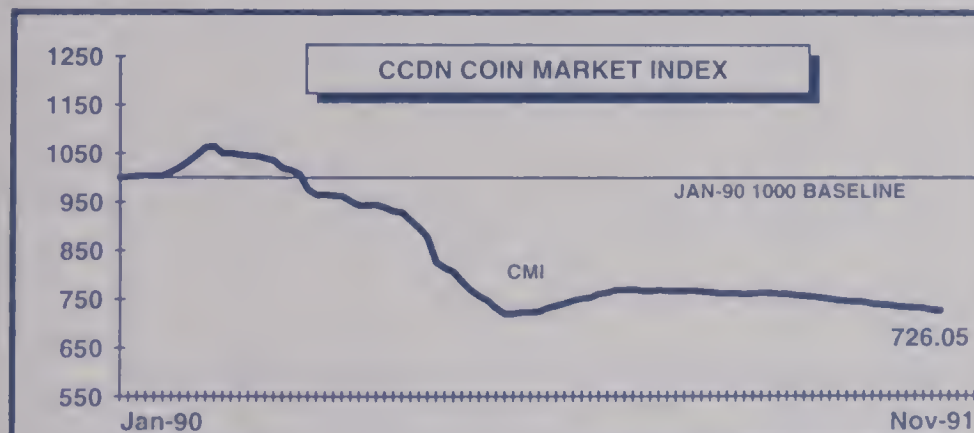

Silver Commemoratives were steady this week, with many of the plus signs in the lower grades, and the minus signs hitting selected issues in MS64 and MS65. Gold Commems showed adjustment in both directions as well. Morgan Dollar Bid increases were overpowered by minus signs from discounted sells. Changes in the Peace Dollars were mostly lower. Mint State Type coins were steady, with a few plus and minus signs sprinkled about. Mint State Gold Type continued its erratic way, with plus signs dominating the chart this week. Proof Type coins showed plus signs in most grades, with a scattering of minus signs. Proof Gold Type was steady with few changes. Buffalo Nickels showed a few scattered plus signs, especially in MS63 and MS64. Mercury Dimes were steady, with only a few minus signs. Walkers showed some positive activity in the early date/lower grade uncs; a persistent buyer has been raising the later date NGC65 & 66 coins. Proof Singles showed few changes.

A dealer friend was reminiscing about some of his favorite coins, many of which matched our favorites. We naturally agreed on one of our favorite series, A.A. Weinman's Walking Liberty Half Dollar, and one of our favorite dates, the 1916. We know that investors often stay away from the initial date in a new series, since many are put away as keepsakes; from an investment standpoint, that may be sound advice. But we were

talking about *favorite* coins, and the word *investment* hadn't entered the conversation yet. The initial year of a coin is often a favorite with Type collectors, since the large number saved means an attractive price, and what better date for a Type than the year the design was introduced.

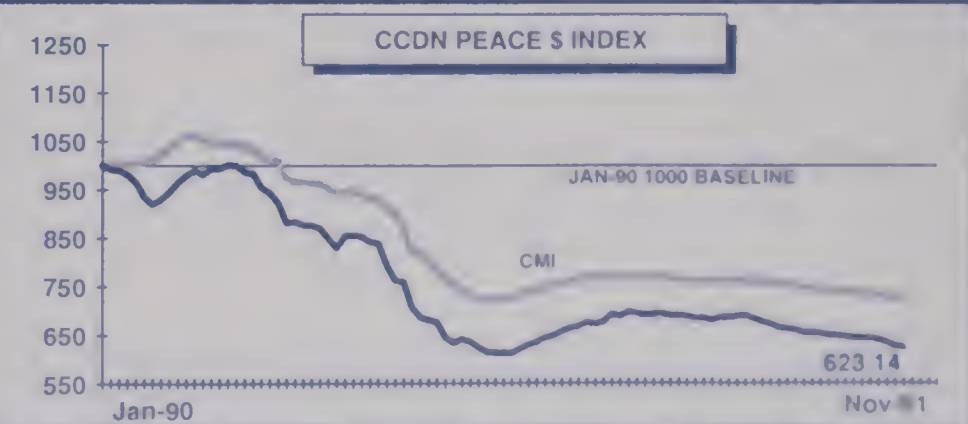

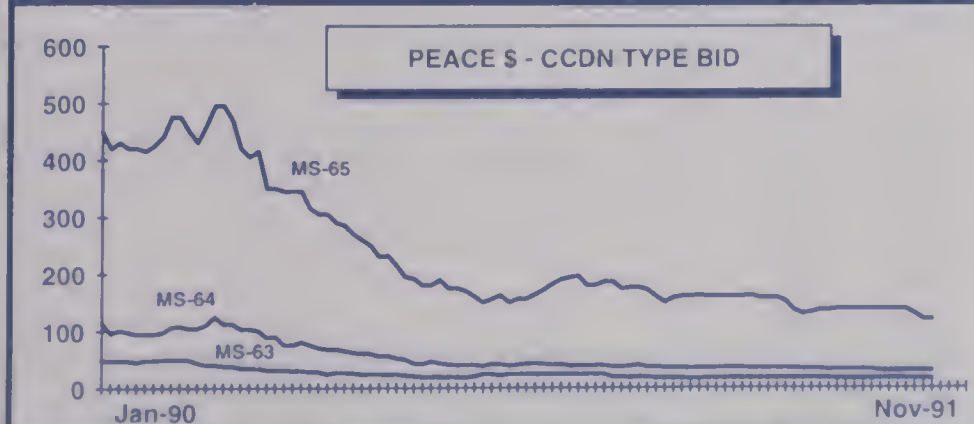

Looking at the Bidding history of the 1916 Walker since January of 1990, we were struck by a few observations. The MS63, an attractive coin, is Bidding the same now as it was 22 months ago at \$300. In MS64, also a very attractive coin, the market decline has shaved 15% off the Bid value; not bad considering the circumstances. Two very attractive grades, a desirable coin, and fair stability. In MS65, though, market volatility has reared its ugly head; a \$2,500 Bid had declined to \$1,190. And here is where the dealer brought out the "investment" word into the conversation. "The MS65 is a fabulous buy at these levels; I should know. I just ripped one for my personal holdings!" A beautiful coin at an advantageous price - it's hard to argue with that as a purchasing guide.

CCDN Coin Market Index: 726.05 - 1.22 Jan. 5, 1990 Bids = 1000

The Bluesheet

The Certified Coin Dealer newsletter reports current wholesale market prices for the most actively traded services. The market is based on the highest visible bid through our monthly market study including the highest visible bid, ask price, from a number of prior trading levels and auction prices. The CCDn may not alter market values as the highest bid or removes his bid, but will be strongly influenced by Asks in Trades which are near or below current wholesale value. CCDn uses every means available to insure accuracy and completeness of the wholesale values shown. Bluesheets prior to April 1991 reported Bids based primarily on the highest sight-unseen Bid. Individual buy and sell prices will vary from dealer to dealer are strictly the responsibility of the dealer, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. Client or sight seen trades can be expected to occur at substantially higher levels in many cases.

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

the CCDn ASKSHEET

a monthly publication for coin dealers
featuring **Lowest Asks or Last Trades:**

With the **sight-unseen** trading market beset by controversy over declining Bids, dealers turned to the **CDN family of publications** and asked for more information on the selling and trading prices of coins. We responded, quickly and confidently, with the **CCDN ASKSHEET**, providing dealers with an important new source of needed information. With wholesale Low Ask or Last Trade information available at their finger tips, dealers are more confident making their buying and selling decisions.

Each **CCDn ASKSHEET** provides subscribers with the Lowest Ask or Last Trade wholesale price seen in the marketplace during the preceding month. While this publication is being offered separately from the *Bluesheet*, we recognize that neither publication alone will give you a **complete** picture of the current wholesale, dealer-to-dealer marketplace. Together, the High Bid of the *Bluesheet* and the Low Ask/Last Trade of the *ASKSHEET* define the parameters of market value; dealers feel more secure knowing the limits inside of which they need to operate to make that sale! Our subscribers already know the best way to avoid the uncertainties of value in a volatile supply/demand marketplace. And they do it by turning to the name that dealers have trusted for more than 28 years - the **Coin Dealer Newsletter family of publications**.

CCDn ASKSHEET

MERCURY DIMES

CCDn does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

WALKING LIBERTY HALVES

CCPD's dealer bid information page is designed to give dealer/bidder access to issues that cannot be seen in such a timely manner as the suggested minimum bid information. Higher bids are more common.

Morgans and Mint State Gold Surge Growing Confidence or Demand?

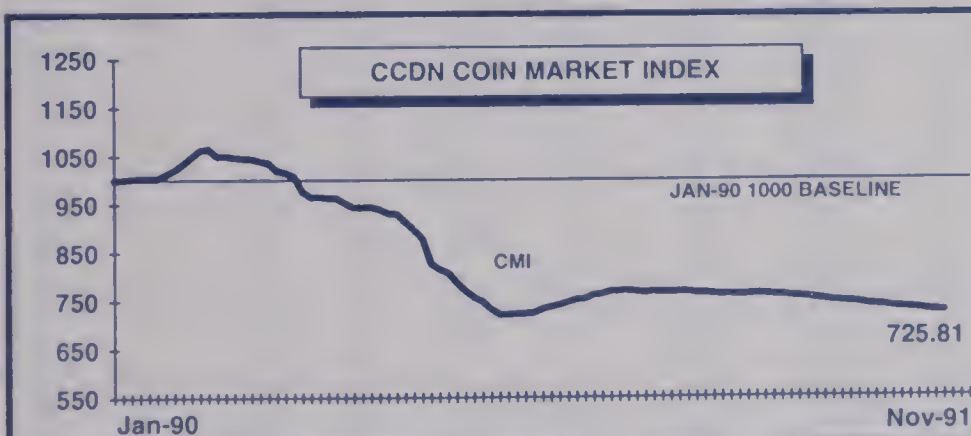

Who would have expected it? Who would have believed it? Dealers were just starting to hunker down for a low-demand Holiday season when generics decided to make a major move. We have been reporting that dealers were starting to have some serious doubts about Holiday demand this year; this was not an unusual prediction in a year that witnessed a continuing drop in demand for all collectibles, as well as uncertain prospects for all retail Holiday sales. So what do coins (or to be more precise, coin dealers) do? Astound everyone and stage a major surge in prices.

Dealers have been saying for some time that many market prices were "just too cheap". Of course, "just too cheap" doesn't mean very much if you are not in a position to realize the bargain yourself. By definition, a coin that is offered at a very low price and still finds no buyer is not "just too cheap". Oh well, everything is relative, and it certainly looks as though MS65 Morgan Dollars at \$80 were "**just too cheap**" even for the current state of the coin market. With Bid jumping to \$95 in one week, it seems that a number of dealers have come to just that conclusion.

Another major move has also occurred in Mint State Gold Type, especially in the MS61 to MS64 grades. Bullion gold hasn't been doing anything extraordinary, as has been the case for much of this year. There are no special signs of tension in the international community (who would expect Gold to do anything but yawn over the indictment of two Libyan terrorists?). The stock market has been

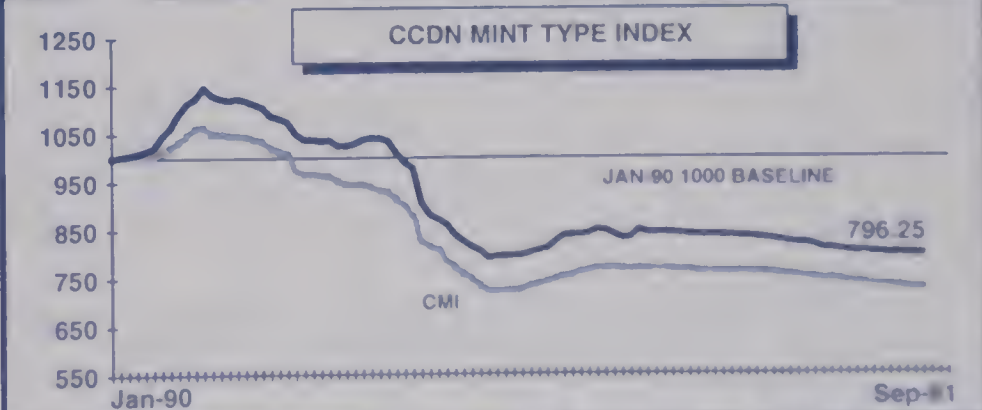

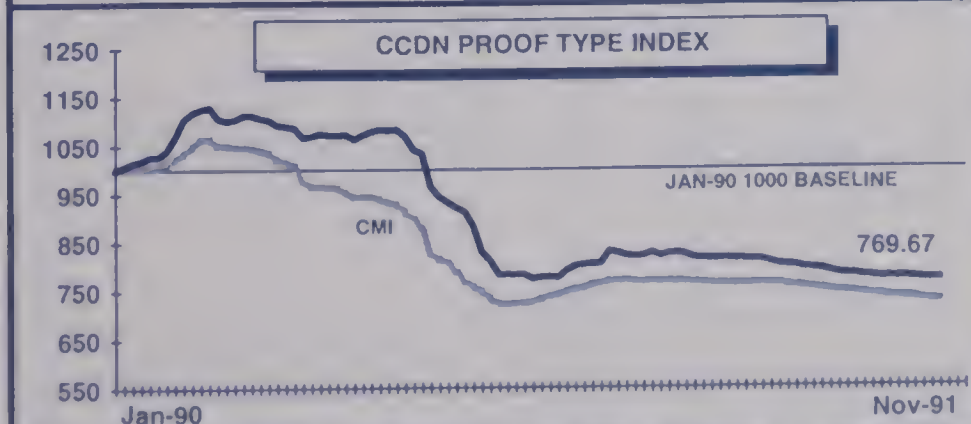

showing some extra volatility of late but we dare anyone to make a convincing argument that a Dow drop on Tuesday will raise MS64 Libs on Thursday. No, it looks like we are stuck with the simple 'supply, demand' conclusion that it was simply time for Mint State Type Gold to make its move. Lowering prices reduce demand for psychological reasons; low prices, at some level, increase demand. Only time will tell if we have reached market bottom, or if this is just another wave of consolidation. If it is a wave, it is certainly a strong, healthy one.

Silver Commemoratives, the recipient of some strong market demand lately, were steady this week. Gold Commems showed few changes, but most of them were positive. Morgan MS65 generic movements overshadowed the minus signs created by discounted sells. Peace Dollars are steady with some activity in the MS64 & MS65 grades. Mint State Type is steady. Mint State Gold is rising, with most of the activity in MS61 through MS64. Proof Type showed a nice scattering of plus signs, mostly in MS63 and below. Proof Gold showed a few downward movements due to discounted sells, after weeks of relative stability. Buffalo Nickels were mainly steady, as were Mercury Dimes (with the exception of a buyer for generic MS66s). Walking Liberty Halves were mainly steady, with one buyer continuing to generate activity in the NGC MS65 & MS66 later dates. Proof Singles are steady. We will be even happier when the CMI goes positive.

The Bluesheet

The Certified Coin Dealer newsletter reports current wholesale market values for coins certified by the most active grading services. The numbers reported are determined through careful study of market activity including the highest nationally reported visible Bids. Ask prices, trading information, prior bidding levels, and auction prices. The CCDn may not alter market value because the high Bidder removes his Bid, but will be strongly influenced by Asks or Trades which are near or below current wholesale value. CCDn uses every means available to insure accuracy and completeness of the wholesale values shown. Bluesheets prior to April 1991 reported Bids based primarily on the highest sight-unseen Bid. Individual buy and sell prices will vary from dealer to dealer, are strictly the responsibility of the dealer, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

What Do You Need?

These days, coin dealers have a variety of needs, and coins are only one of them. Heritage offers a wide

range of services covering the full spectrum of the needs of today's dealers.

Split Deals: Do you have a lead on a major collection, but are short funds with which to purchase it? Heritage can provide cash for these occasions, and is willing to work on a "split profit" arrangement. *Call Steve Ivy, Jim Halperin or Martin Paul for details.*

U.S. Gold: We are the nation's largest importer of U.S. Gold from overseas. Our European contacts have been on the job since the mid 1970's, with more sources for both rare and bullion-oriented gold coins than anyone else around. *Contact Lee Sanders for current availability and prices.*

Auctions: With nearly one sale per month, you're never far from an opportunity to offer your inventory to thousands of retail buyers and hundreds of dealers. Our unique Bullet Sales feature a total turnaround time (from consignment to settlement) of about four weeks. Best of all, advances are available! *Give Bob Merrill or Leo Frese a call for further information.*

Certified Coins: With an inventory of over \$10 million, we are among the country's leading sources for PCGS, NGC and ANACS material. If you need it, we either have it or can get it. *Ask Tom Novy or Dave Lindvall.*

Rare Stamps: Ivy, Shreve & Mader Philatelic Auctions is one of the world's largest and most respected stamp auction companies. Offices in New York, Dallas and Los Angeles offer state-of-the-art services to all potential sellers of rare stamps. *Call Charles Shreve today for further details.*

Open to Buy: We are always willing buyers of almost any type of material - both raw and certified. Our bank line exceeds \$12 million, and our checks are good right away. No waiting or redepositing necessary. *Check with Greg Rohan or Martin Paul if you have coins you'd like to move.*

New Customers: Who couldn't use more of these? Join the nation's fastest-growing network of dealers on the U.S. Rare Coin Exchange. The Exchange sends both an electronic as well as hard-copy listing out to thousands of the strongest and most active retail buyers in the country every week. And right now, we're making some incredible offers to you, in order to build the Exchange even larger.

MS65 Morgans on the Move Auctions Remain Magnets for Demand

There would be no point in putting it in a novel; the reviewers would trash it, saying that the idea is just too farfetched. Let's set the scene: A market declining over a period of years in general, and MS65 Morgans in specific. A lovely coin, of exceptional history and beauty, and nobody seems to want them. They slide below \$700; then \$600; \$500; \$400; \$300; \$200; and finally, they reach a plateau above \$100. Even that seems too much, under the pressures of high populations and low demand, and Bid ultimately slides into the low \$80s; and sellers in the mid- to high-\$80s can find no buyers for their coins.

Now comes the kicker. Two weeks later, Bid has returned to \$100, and for awhile at least, the lowest Ask on a quantity lot wanted more than \$130 each! With this kind of volatility on a common coin, who needs to go to the track for excitement? Two years of sliding are dismissed in two weeks; Bid jumps \$20, and Ask jumps nearly \$50. No, for a pure adrenaline rush, it's hard to beat shorting Morgan Dollars.

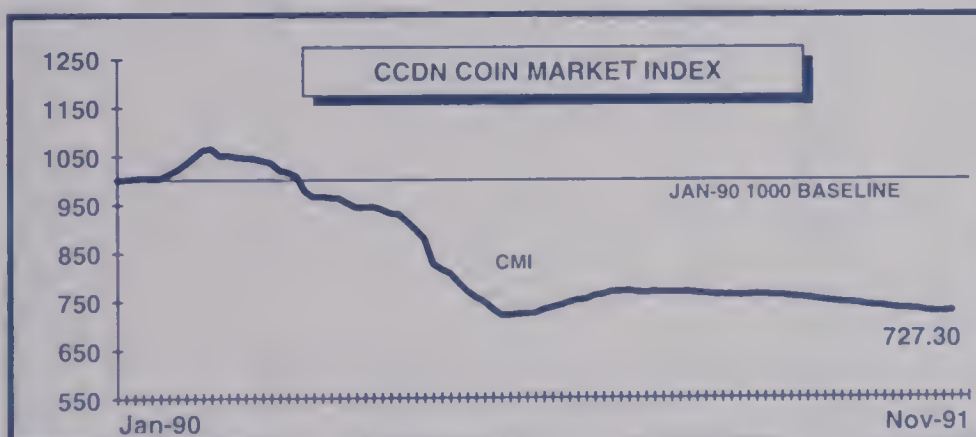

Excitement of a more pleasant nature was to be found at The Frontenac Sale, held by Auctions by Bowers & Merena. An enthusiastic crowd of floor Bidders was challenged by more than a thousand Mail Bidders for the \$3 million+ in rare coins being offered. The 'collector' material was in especially strong demand, with many specialists attend-

ing. Bidding on the Colonials and American was especially active; specialists in Bust Half Dollars and Patterns also vied for the right to their trophies. Better dates seem to be attracting the collectors at current levels, and many coins defied the gloomy economy. Among the certified highlights

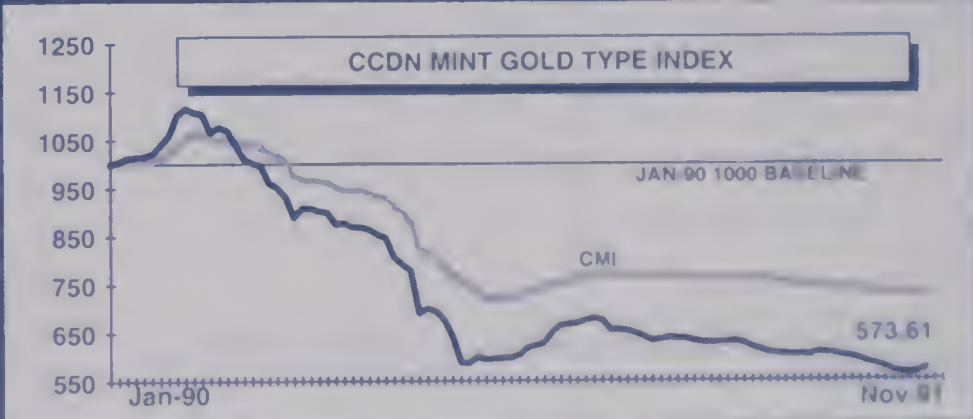

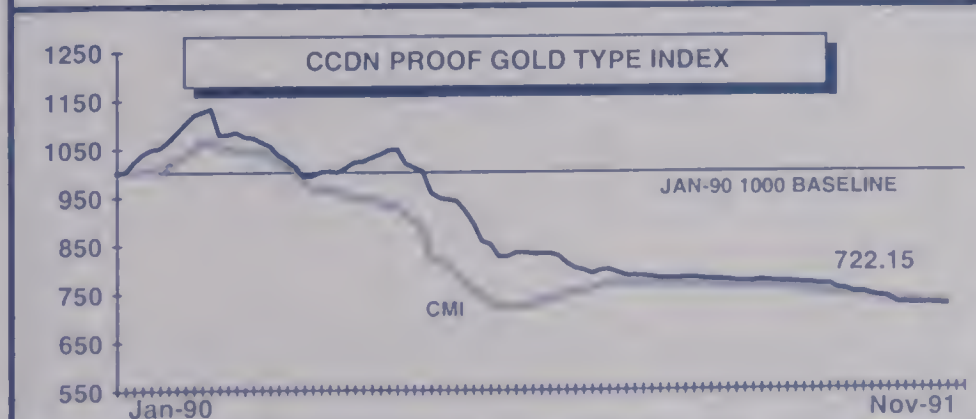

1877 Indian Cent	PCGS45 R	\$4,400
1924-S Dime	PCGS64 FB	\$2,500
1855-S Quarter	PCGS63	\$5,120
1895 S Quarter	NGC66	\$9,775
1795 Fl Hair Half	PCGS47	\$7,920
1817/3 Half O 101	NGC63	\$5,100

Among the interesting coins to watch over the next two years will be the 1892 Columbian Silver Commemorative Half Dollar. The coin has experienced some volatility as marketers adjusted their inventories to match their marketing plans. As the country begins to get a little more excited about the 500th Anniversary of the 'Main Event' of 1492, we can expect a lot of media attention to be paid to this coin. Holders of MS63 examples have seen the value of their investment hold pretty steady; MS65 pieces offer a lot more opportunity for profits and losses. Many of the buyers of Columbian Halves in the coming months will be obtaining one of the abundant circulated specimens, and hopefully many of them will be coming into coin shops to learn a little bit more about numismatics.

CCDn does not buy/sell any coins whatsoever. CCDn will not recommend any particular dealers. Bid prices are represented as authentic to the CCDn, nevertheless, CCDn implies *no guarantee whatsoever*.

[illegible]

Prices are for the most common dates. Better date coins usually bring more than the Bid. For most common issues listed herein.

UNITED STATES GOLD TYPE COINS

[illegible]

All points are eight unseen double-blind tests.
 Bad points are for the worst scoring data within each type.

CCDN does not represent that it is possible to purchase selected coins if these Bidder Clearing House tools can be expected to occur at substantially higher levels in many cases.

For certified coins not listed in the CCDn, please refer to the COIN DEALER newsletter for current Bid levels.

C. trachomatis was measured just 2 h previously in a different, unrelated part of the body. There is also some reason to doubt the reported strength of the association between these two tests.

Bids for Lincoln Cents are for full red specimens in PR64 and higher.

Sight-Unseen Bids Rising Alongside Sight-Seen Activity Electronic Exchange Now Provides Choice

This week, dealers on ATC's *Certified Coin Exchange* have seen several changes that will alter the certified coin market. ATC's introduction of **sight-seen** bidding is in direct response to complaints that low **sight-unseen** Bids were casting a pall over prices. Previously, dealer's bids considered the worst possible coin they might receive; if they Bid, they had to buy. Or, they might have Bid at a level that they could afford to inventory if their *sight-seen* customer turned down the coin. Dealers used to *looking* at coins, and who knew the *look* that their customers demanded, bid accordingly. Now, dealers can Bid at a level appropriate to the average coin, or even Bid strongly for an above-average specimen. If they don't like the coin (just like their customers), they don't have to buy it. This should allow dealers to support the market much more fully than in the past; this will help, provided that too many dealers don't begin placing 'throw-away' Bids on coins that they have no intention of buying.

Some dealers, however, are concerned about another change that ATC has instituted: opening up bidding on all rare coins in their main data base with populations greater than 10 pieces. Many of these had been unbidable under the most recent set of rules. While the many rule changes over the past several years seem quite confusing in recapitulation, ATC has tried mightily to reconcile the demands of dealers with market realities. This has not always been easy; as we have remarked before, if you put two dealers together, they will generate three opinions on any coin topic.

The problem with opening additional rare coins to bidding, according to worried dealers, is that it will stretch insufficient market liquidity over more coins. This could substantially hurt those coins that are currently receiving borderline attention. The key will lie with market perceptions of the role of the Exchange. To those dealers who view it simply as a source of information, a ridiculously low Bid on any coin simply means useless information. To the individual, however, who has been unable to shake the

old propaganda about electronic exchanges being the *last word* on value, what you see on the screen is equivalent to **value**. What you see is what you get, at least if you are selling.

Since the reality of this belief seems to dominate much market activity, the thinning of liquidity may have a negative effect on prices. For example, a High Relief \$20 Saint in MS65 is currently Bid around \$22,000 and during the last three months, at least 7 coins have traded hands at that level or above in dealer-to-dealer transactions.

With the restrictions off, *Bid* on ATC is currently \$12,500. Is this coin worth \$12,500? We can immediately think of at least seven dealers who will disagree. Will the now visible \$12,500 "wish Bid" become the new value? Will the visibility of that Bid create an impediment to additional trading at \$22,000? Will it depress Bid 20%? 30%? One can always hope that ATC's Bid will rise to \$22,000, but spreading insufficient liquidity over even more coins makes that seem unlikely. One of ATC's actions should raise Bids, the other lower them; it will be interesting (as always) to see which activity dominates.

PCGS Professional Coin Grading Service, Newport Beach, CA: Established in 1986, PCGS grades and authenticates U.S. and world coins. PCGS has certified more than two million coins. All coins must be submitted through one of the 560 + authorized dealers; contact PCGS at 800-447-8848 for a list.

PCGS has more than 15 graders on its staff; each coin is examined by at least two graders before the final grade is determined. No person involved with the grading process may be active in the buying or selling of U.S. coins. Fees start at \$26 or \$35 depending on the type of coin, plus postage and insurance; several levels of Express service are also available. PCGS coins are sonically sealed in an inert plastic "NumisCap" holder before return to the customer.

PCGS has a cash-backed Guarantee of Grade and Authenticity. PCGS has a comprehensive grading set which includes most major series. PCGS is a grading service only and does not make markets. PCGS dealers are responsible for their own making of markets in PCGS coins. PCGS publishes a monthly Population Report.

ANACS ANACS: The first authentication service (established in 1972), to which grading services were added in 1978. ANACS authenticates and grades all U.S. coins and patterns, rendering unbiased third party grading opinions using prevailing market grading standards. After grading, the coins are placed in the sonically sealed ANACS Cache.TM

ANACS has over 700 active submission centers. All coins can be sent through the submission centers or directly to the ANACS office. Submitters can also become Market Makers. The fee for a standard submission is \$23, and various levels of express service are available between \$40 and \$125.

Free information is available from ANACS P.O. Box 182141, Columbus, Ohio 43218-2141. Phone 1-800-888-1861.

CCDN Bids primarily reflect 1989 and newer certified coins (post ANA's sale of ANACS). Earlier certifications (including pre-Cache certificates) may realize varying Bids. ANACS Bids are listed only once each month.

NGC Numismatic Guaranty Corporation of America. Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grade and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$19, plus postage and insurance. After it is graded, it is then placed in a "lab tested" inert hard plastic holder and sonically sealed, then returned to the customer.

There are over 550 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principles of NGC do not buy or sell coins for commercial profit. Arm's length. NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute. Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at Heritage Plaza, Highland Park Village, Dallas, TX 75205-2785. Phone (214) 526-2500. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin (JN43, "Grading Guide") which may be considered somewhat liberal (commercially compared to the other three services listed). Regular cost is \$24 per coin. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded with a charge of 50% of the regular fee. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for Silver Dollars, \$80 & \$100 coins, and Walking Liberty Halves. Due to current trading volume, NCI coins will only be listed once a month. CCTN Bids reflect 1987 and newer certified coins.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.

Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

The Bluesheet

Certified Coin Dealer newsletter - report current wholesale market values as determined by the active grading service. The numbers are based on the current study of market activity in the coin market. The report of variable Bids Ask prices trading interest in the market is a valuable tool for the CCDn. The CCDn may not alter market values due to the high Bidder moves. Bid but will be strongly influenced by Ask or Trades which are near or below current wholesale value. CCDn uses every means available to insure accuracy and completeness of the wholesale values shown. Bluesheets prior to April 1991 reported Bids based primarily on the highest sight-unseen Bid. Individual buy and sell prices will vary from dealer to dealer. The responsibility of the dealer and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. Client or sight seen trades can be expected to occur at substantially higher levels in many cases.

Still Thinking About 1991?

It really is time to begin thinking about 1992, and especially about how to make the new year even more productive. It's time to begin thinking about the **1992 Numismatic Dealer Directory**. Do we have your correct address and telephone numbers? Have you begun to think about your advertising plans for 1992 yet? Call us at 310-515-7369 to discuss advertising in the 1992 NDD.

Your very best customers will be using the *Greypages* in the **1992 Numismatic Dealer Directory**; when they want to buy or sell coins and currency, when they are looking for certification services, or when selecting an auction house. **Make sure that they find you there.**

the COIN DEALER Newsletter family of publications P.O. Box 11099 • Torrance, CA 90510

All prices are sight unless otherwise noted.
 Bid prices and lot quantities common, date within each city.

CCDN does not represent that it is possible to purchase selected coins at the Bad Level. Coin trading that can be expected to occur at substantially higher levels in many cases.

7,750	14,000	22,000	2,250	2		4	2	1	2
10,000	15,750	25,000	2,300	1	4	2	2	2	2

For certified coins not listed in the CCDn, please refer to the COIN DEALER new letter for current bid values.

If your coin will stand on its own merits regardless of the certified grade, a higher *CDN Bid* may be more indicative of current market value.

[illegible]

CA. This does not represent that it is possible to purchase insurance in those states where a court of probate may find any life insurance policy to be void as an investment contract under state law.

[illegible]

PROOF SINGLES

Bids for Lincoln Cents are for full red specimens in PR64 and higher

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

Demand for Dollars Continues Year to End with Good News for MS65 Morgans?

Demand continues strong for MS65 Morgan Dollars, after a spectacular three week climb that brought them from the low \$80s to around \$118, only to return to \$102+. Dealers confirm that several thousand pieces have been taken off the market, many at the higher prices. It remains to be seen whether the buyer intends to hold these long term, or if a major marketing effort will soon be underway. If the demand should suddenly turn into supply, the effects on the marketplace could be long-lasting. Looking at the population figures, every dealer will form their own opinion on the size of the floating supply, and the percentage of that floating supply that will need to be 'permanently removed' in order to sustain the higher prices.

The good news about Dollars is continuing to cheer many dealers. While few will deny that 1991 was a "very tough year", ending on an upbeat will certainly help. The FUN Show in early January will provide additional information on the direction and strengths of the market. Dealers are still looking towards gold as a major determinant of the 1992 market; unfortunately, few have any strong convictions about what to expect from gold in the coming twelve months. Predictions seem to follow personal beliefs about the general economy, and their predictions cover the range from Recovery to Recession to Depression. When numismatists talk about coins being reflections of great economic trends and truths, they usually aren't referring to the current state of the rare coin market.

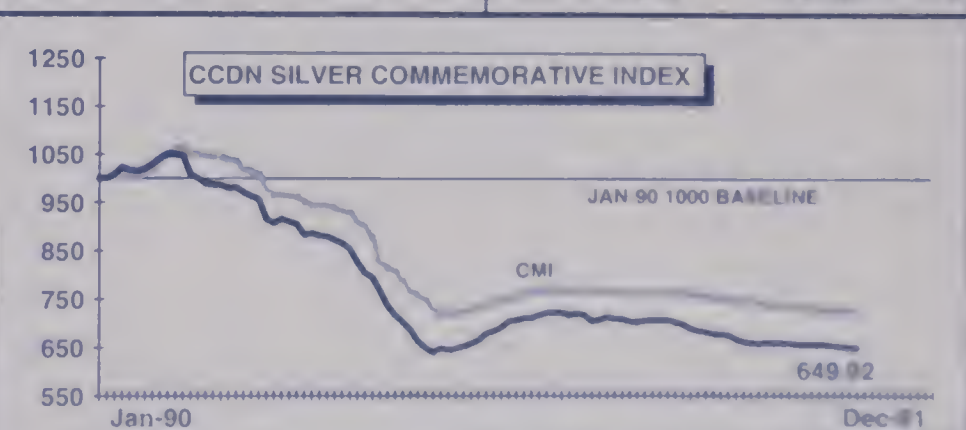

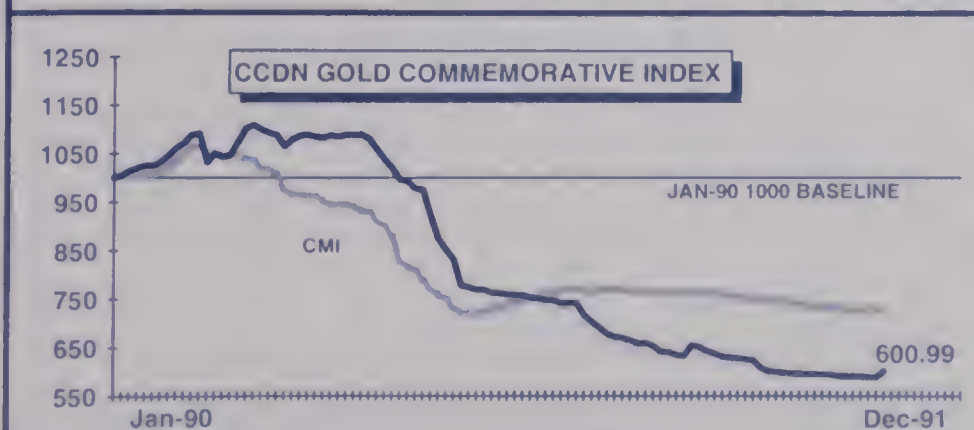

The last several *Bluesheets* have seen the development of a trend that may continue into the New Year. Demand is often focused with particular dealers making a strong market in particular coins. This has been most evident in specific dates and grades of NGC Walking Liberty Halves and NGC Morgans. Bidding on behalf of customers with specific Want Lists, dealers are trying to purchase specific coins while taking advantage of the lowered levels. The trouble with low Bids, as has been the case for some time, is that they don't mean all that much unless you have a willing seller at those levels. Without a willing seller, Bid must be raised to try to capture a specimen; rising Bids can then support rising expectations. At least Trades (at some level) vindicate both buyer's and seller's concepts of values.

Silver Commemoratives were steady this week, with advances in the MS65 grade. Gold Commems were steady, with demand concentrating on NGC67s. Morgan Dollars showed their greatest advances in MS64; perhaps collectors have begun to realize just how much coin a little money can buy. MS65 Peace Dollars were also active, with mixed results. Mint State Type was largely unchanged, with discounted sells dominating the changes. Changes in Mint State Gold Type were scattered, with PCGS63s and NGC66s both advancing strongly. Proof Type coins were steady, as were Proof Gold Type coins. Buffalo Nickels showed some minuses in the earlier issues, Mercury Dimes were steady, and Walking Liberty Halves strong in the later dates. Proof Singles showed some substantial increases after a long dry spell.

CCDN Coin Market Index: 724.57 - 2.68 Jan. 5, 1990 Bids = 1000

The Bluesheet

Certified Coin Dealer newsletter reports current wholesale market prices for United States active circulating coins. The content is based on a thorough study of market activity including prior bid levels and auction prices. The CCDn may not alter market prices, but the high bidder removes his bid but will be strongly influenced by Asks or Trades which are near or below current wholesale value. CCDn uses every means available to insure accuracy and completeness of the wholesale values shown. Bluesheets prior to April 1991 reported Bids based primarily on the highest sight-unseen bid. Individual buy and sell prices will vary from dealer to dealer are strictly the responsibility of the dealer and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at bid levels. Client or sight seen trades can be expected to occur at substantially higher levels in many cases.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

PGC, DMRI, and NOC DPL Bids are for fully deep Marrow Products (i.e., Bids for PL2a, PL, and NOC PL either a joint prooflike or one-sided PL) will be used monthly or a supplemental insert (CPI) provided. Full Lane always represented fully deep marrow prooflike specimens.

CCDN does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

[illegible]

Prices are for the most common dates. Better dates usually bring more than the B.M. of the most common issues listed herein.

An equal opportunity lender

P/L Dollars may be semi reflective (on one or both sides), with less reflectivity than the deep-mirror Profitlikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

The gold coins in this chart trade very infrequently. These are the last known Bids.

Bids for Lincoln Cents are for full red specimens in MS64 and higher

Matte Proof Cent Bids for grades of PR64 and better are for full red cents. PR63 and lower Bids are for Red and Brown cents. See Proof Type Coins page for Type Bids in all colors.

Celebrating Five Years as The Standard for the Rare Coin Industry!

the CCDn ASKSHEET

a monthly publication for coin dealers
featuring **Lowest Asks or Last Trades:**

With the **sight-unseen** trading market beset by controversy over declining Bids, dealers turned to the **CDN family of publications** and asked for more information on the selling and trading prices of coins. We responded, quickly and confidently, with the **CCDN ASKSHEET**, providing dealers with an important new source of needed information. With wholesale Low Ask or Last Trade information available at their finger tips, dealers are more confident making their buying and selling decisions.

Each **CCDn ASKSHEET** provides subscribers with the Lowest Ask or Last Trade wholesale price seen in the marketplace during the preceding month. While this publication is being offered separately from the *Bluesheet*, we recognize that neither publication alone will give you a **complete** picture of the current wholesale, dealer-to-dealer marketplace. Together, the High Bid of the *Bluesheet* and the Low Ask/Last Trade of the *ASKSHEET* define the parameters of market value; dealers feel more secure knowing the limits inside of which they need to operate to make that sale! Our subscribers already know the best way to avoid the uncertainties of value in a volatile supply/demand marketplace. And they do it by turning to the name that dealers have trusted for more than 28 years - the **Coin Dealer Newsletter family of publications**.

CCDn ASKSHEET

P.O. Box 11099 Torrance, CA 90510

☐ Please start my subscription to the ASKSHEET for the term checked below.
☐ Enclosed is my Check / M.O.

California residents please add 8.25% sales tax.

☐ \$45 for 12 issues

☐ \$80 for 24 issues

What Do You Need?

These days, coin dealers have a variety of needs, and coins are only one of them. Heritage offers a wide

range of services covering the full spectrum of the needs of today's dealers.

Split Deals: Do you have a lead on a major collection, but are short funds with which to purchase it? Heritage can provide cash for these occasions, and is willing to work on a "split profit" arrangement. *Call Steve Ivy, Jim Halperin or Martin Paul for details.*

U.S. Gold: We are the nation's largest importer of U.S. Gold from overseas. Our European contacts have been on the job since the mid 1970's, with more sources for both rare and bullion-oriented gold coins than anyone else around. *Contact Lee Sanders for current availability and prices.*

Auctions: With nearly one sale per month, you're never far from an opportunity to offer your inventory to thousands of retail buyers and hundreds of dealers. Our unique Bullet Sales feature a total turnaround time (from consignment to settlement) of about four weeks. Best of all, advances are available! *Give Bob Merrill or Leo Frese a call for further information.*

Certified Coins: With an inventory of over \$10 million, we are among the country's leading sources for PCGS, NGC and ANACS material. If you need it, we either have it or can get it. *Ask Tom Novy or Dave Lindvall.*

Rare Stamps: Ivy, Shreve & Mader Philatelic Auctions is one of the world's largest and most respected stamp auction companies. Offices in New York, Dallas and Los Angeles offer state-of-the-art services to all potential sellers of rare stamps. *Call Charles Shreve today for further details.*

Open to Buy: We are always willing buyers of almost any type of material - both raw and certified. Our bank line exceeds \$12 million, and our checks are good right away. No waiting or redepositing necessary. *Check with Greg Rohan or Martin Paul if you have coins you'd like to move.*

New Customers: Who couldn't use more of these? Join the nation's fastest-growing network of dealers on the U.S. Rare Coin Exchange. The Exchange sends both an electronic as well as hard-copy listing out to thousands of the strongest and most active retail buyers in the country every week. And right now, we're making some incredible offers to you, in order to build the Exchange even larger.

1991: A Year That Will be Remembered 1991: A Year That Might Better be Forgotten

This is the last issue of the Bluesheet for 1991; the next issue will be published in the New Year. There seems to be something special about a New Year, as if you could leave behind all the unpleasant events of the previous year. And you know, that's not a bad idea; too bad that turning the first page on a fresh calendar doesn't really give you a fresh slate. After such a difficult year, it has also become painfully obvious that whoever thought up that cute phrase "Tomorrow is the first day of the rest of your life" was definitely not the proud owner of an inventory of rare coins of declining value.

Maybe there is something to the idea of starting off a new year with fresh ideas. Most dealers would agree that the old ideas haven't been doing so great. The first step towards mental equilibrium is to pick up your newspaper and read about the rest of the country. The economy really stinks, and if you need a second opinion, ask your customers who have lost their jobs, or your retailer friends who have seen their customers disappear as well. Coin dealers cannot blame all of their problems on the economy, but there is no question that this Recession has exposed all of the hidden shoals which were avoided in the past.

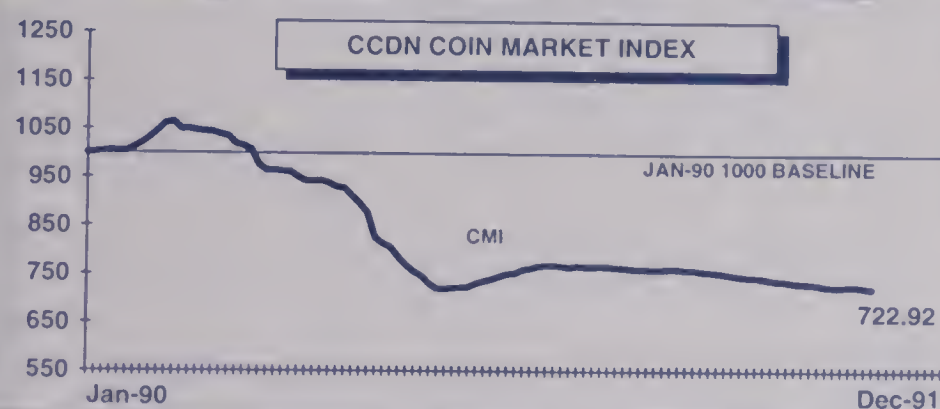

So what to do? The lessons from this down cycle are obvious. Most dealers have to remember that most customers are collectors, and coins have to be marketed that way. Coins must be attractive, and have a story to tell. Except dealers, nobody needs rare coins to live, so the coins have to offer a lot of pizzazz to win against other attractions for those precious surplus dollars. Dealers probably

won't get much help from investors for awhile yet, so the coins are going to have to do it on their own. To survive in a service-oriented economy, you need to provide a real service to your customers—and that includes spending the time and effort to get them excited about coins. Coins used to be fun; they need to be fun again.

Dealers don't need to be told that they have to turn coins to survive, and that they need to either turn a profit on each coin, or on the coin purchased with the cash flow from a loss. It's that simple. When prices are declining, who can afford to hold inventory? Getting nice coins into the collections of your customers remains the surest guarantee of success. Collectors can afford to put their advantageous purchases into the safe-deposit and let them sit for a decade. Dealers need short-term strategies to help their customers enjoy their long-term hobby.

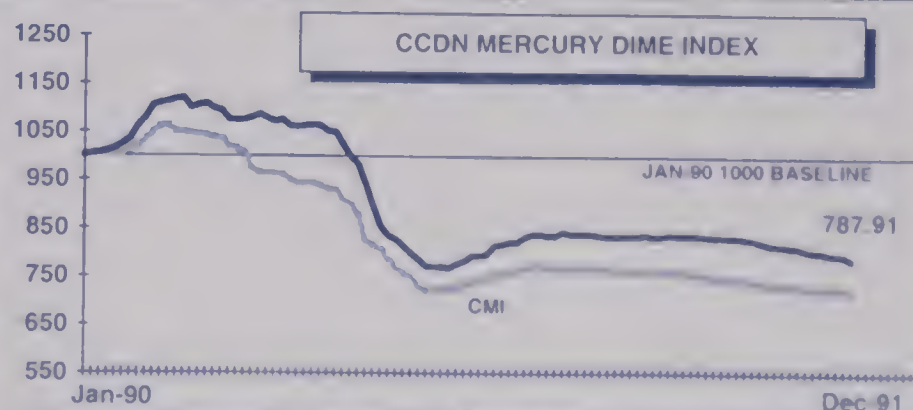

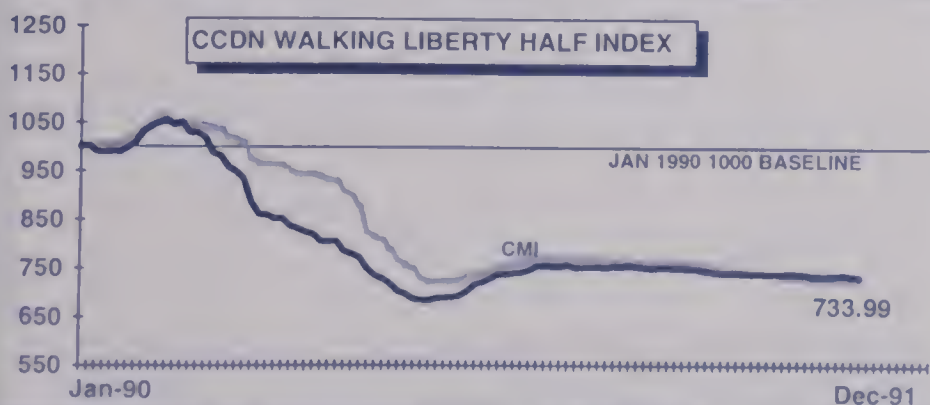

Even though the market has been quiet, there are still areas generating excitement. Investors are starting to buy common MS65 Dollars again. Mint State Gold has been showing some signs of life. Proof Three-Cent Nickels (Pr63 through Pr67) have been receiving a lot of attention. Remember, it's more fun when your customers are buying nice coins at attractive prices.

Remember, this is the last issue of the *Certified Coin Dealer newsletter* for 1991; our next issue will be dated Jan. 3, 1992. The staff of the *CDN family of publications* wishes you and yours a happy & safe Holiday.

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

Still Thinking About 1991?

It really is time to begin thinking about 1992, and especially about how to make the new year even more productive. It's time to begin thinking about the **1992 Numismatic Dealer Directory**. Do we have your correct address and telephone numbers? Have you begun to think about your advertising plans for 1992 yet? Call us at 310-515-7369 to discuss advertising in the 1992 NDD.

Your very best customers will be using the *Greypages* in the 1992 Numismatic Dealer **Directory**; when they want to buy or sell coins and currency, when they are looking for certification services, or when selecting an auction house. **Make sure that they find you there.**

the COIN DEALER Newsletter family of publications P.O. Box 11099 • Torrance, CA 90510

the CURRENCY DEALER newsletter

... is a Monthly Publication that is the most COMPREHENSIVE and UP-TO-DATE pricing guide available in today's ever-changing field! DEALER-TO-DEALER BID/ASK Charts cover all of the following areas:
